Thesis and Dissertation Subject Categories

Updated May 12, 2010

Please choose a subject category that best describes your thesis or dissertation. Your choice must be from the following ScholarWorks list. You will notice that the ScholarWorks subject categories are given in a hierarchical format with three levels for most disciplines. Express your subject category by starting with the highest level and then listing the second level, and then the third level; use colons (:) as separators. If it is not possible to refine your subject category to the third level, either because a third level is not listed for your discipline or you simply do not feel that a third level is warranted, you should stop at the second level.

Example (3 levels): Arts and Humanities: English Language and Literature: Literature in English, British Isles
Example (2 levels): Education: Bilingual, Multilingual, and Multicultural Education
