

Boise State University ScholarWorks

ScholarWorks is a collection of services designed to capture and showcase all scholarly output by the Boise State University community. These services include:

- Identifying and making available via the ScholarWorks web site documents and files produced by the faculty, research groups, and students of Boise State University.
- Creation of SelectedWorks pages which highlight the scholarly accomplishments of each individual faculty member.
- Distribution of regular reports that provide data on the impact and usage of faculty publications.
- Access to simple and inexpensive electronic publishing of original series, journals, and monographs.
- Promotion of research efforts via a searchable database, reports to key administrators and stakeholders, and coordination with other research recognition activities.

Major Advantages of ScholarWorks

- Enhances professional visibility and impact through broader dissemination and increased use of research.
- Supports graduate scholarship by providing public access to theses and dissertations.
- Provides a quick, effortless, and inexpensive method of sharing research.
- Helps remove the significant access barriers to research and publicly funded scholarship.
- Provides substantial support of Boise State's scholarly communication efforts by facilitating the entire publishing and dissemination process.

Types of materials and projects included in ScholarWorks:

- Journal articles
- Theses
- Dissertations
- Presentations
- Datasets
- Working papers and pre-prints
- Technical reports
- University documents
- Books, series, and journals
