• The Public Policy Center has conducted a statewide, survey of Idaho citizens for 20 years. This survey is meant to identify opinions about a variety of public policy concerns. The study is provided to the public – including officials and interested citizens - to facilitate policy discussion and education.

• Adults in 525 Idaho households representing three geographic regions were surveyed between November 18th, 2010 and January 8th, 2011. This is a random sample survey (RDD) to landline telephones and cell phones. Telephone calls, interviews, data collection and data preparation were contracted to Clearwater Research. Analysis and reporting are conducted by Boise State University.

• The survey standard error is +/- 5% at a 95% confidence-level for the total population.
20th Annual Idaho Public Policy Survey

Regions covered in the survey

I. Boundary, Bonner, Kootenai, Benewah, Shoshone, Latah, Clearwater, Nez Perce, Lewis, Idaho
