Associated Students of Boise State University

Although this file was scanned from the highest-quality microfilm held by Boise State University, it reveals the limitations of the source microfilm. It is possible to perform a text search of much of this material; however, there are sections where the source microfilm was too faint or unreadable to allow for text scanning. For assistance with this collection of student newspapers, please contact Special Collections and Archives at archives@boisestate.edu.
ASBSU PRIMARY'S

DON'T LET THEM BSU...vote in the Primaries
In recent months the present ASBBSU has been besieged by demands that it either get on the ball or desist itself. Students have charged that student government is not worth the time, energy or money it uses. Perhaps this is true, I do not know, but I do know that student government can be effective if it is willing to stand on its own decisions. The failure in student government over the past few years has not been the students' fault, but its lack of tenacity toward administrative, athletic and academic officials.

Rather than standing fast on issue, the government has allowed itself to be compromised by groundless statements from unqualified sources. These powers that be tell the government: the way things are and the student government, like a bunch of sheeps, agree and goes right along with what the official has stated...only occasionally stopping long enough to consider whether or not there is any concrete proof.

What the answer is for next year important and a good involvement from the student body could make the difference in how next year’s government in the story-telling university officials.

There are several signs that the student has the stadium, parking policies and faculty promotion and tenure. Perhaps a student mandates to the candidates for these various offices would give the aspiring government and the "E Pluribus Unum" people at the helm of our ship of state cause to all back and listen...rather than hull the students with their patent formulas of student appeasement.

The only way we are going to have an effective student government is if that government form itself of compromise and creates a policy of "Don’t fear ‘til you see the whites of their lies".

Mr. Christensen!

...open mouth, insert foot!

Personally, I think President Christensen has every right to speak out on events that affect all of us. In the Idaho Daily St部分, dated February 27, 1975, he has made an error and I think it is irresponsible for him to be censured on conflict of interest charges. In a letter to the editor, Dr. Christensen has stated that, and quote, "Speaking on behalf of Idaho Power, I urge your support for Idaho Power Company’s Pioneer Plant."

I would state, if Mr. Christensen wishes to support that power plant personally, I do not have any objections, but I will not have him speaking on my "behal", especially if he is doing so as the ASBBSU President.

A line must be drawn somewhere when it comes to speaking for another person. I refer you to the letter to the editor referring to his letter to the editor concerning a proposed Pioneer Power Plant. He said he research...the matter completely. It looks to me as if he is speaking in an exoficio capacity.

Money seems to be the main reason he supports the plant. Great money is the reason, and a lack of for-sighted planning are what got us into this mess. I mean the environmental and energy problems.

These problems cannot be solved if we do not take care of them now. If we provide in our education system, we can help prevent someone daigles in front of us, and I don’t see how you can put a dollar signs on it.

Idaho Power and backers of the plant paint a pretty rosy picture, but they fail to add to the picture many important facts. They say that the plant will be 99 per cent clean coal fired and that it will not say no more on the environment, and that it is the wood in Wyoming and Montana that will be raped for the coal. What about the oil that will be burned to get the coal here? There are many more unanswered questions and I think it is irresponsible for anyone to support something this serious without looking all at facts, even the gruesome ones. Steve Schmidt

Reader says students don’t want to be heard

Editor, the ARBITER

This is what some of our ASBBSU President’s opinion on the Idaho coal-fired plant. When I first read the article, a question arised as to why he would espouse so favorably on the proposed plant. We do support Mr. Christensen personally and that he is graduating this spring. He does not have to worry and worry about, but; it is possible that he’s decided to play suck boy to business (for money) and has decided to try to get a job? It is no way am I making light of the knowledge he's gained.

Nowadays, it’s very hard to come by a job, and I guess, if things get bad enough, we’ll do anything for coal.

President's can be wrong

Editor, the ARBITER

Well, it’s election time again at BSU and I have been thinking on who to vote for.

The question in the senate race is: Will the current candidates represent the people if they are elected? I do not think this will be the case.

As some long-time students will attest to, when I started writing letters to the editor, I wrote several on the senate and why we shouldn’t represent the students that time. What I said at that time is still true now. The sad part is it is so close to the student that they do not wish to be heard...i.e., Last year person for the senate on a platform of honesty and openness with the students. The candidate lost, because the people thought statements or other things, I don’t know.

The point is that in all the times that I’ve been in the S.U.B., I have never heard an announcement given that the senator from the school of education would like to meet with his constituents to talk over things that concern the school and how he should act on them. I would urge the people that are running for the senate this year to take into consideration the above letter and that you students think over the points of it.

Dan Lawrence

Christensen misses point

Editor, the ARBITER

It is encouraging to see that we have peaked the pocket of local business men. Among the other effects are: public facilities often they are overloaded; sewer systems have to be enlarged and extended; parks become crowded; traffic flow gets snarled; near by recreational areas (Rogues Basin and Lucky Peak) are overused, and on.

3. Kit makes an obvious point about the fastness of property tax revenues to be created by Pioneer. He ignores the equally obvious point that it is the power consumers in Ada County who will ultimately pay most of those taxes through higher electric bills. Who is subsidizing what? 

4. Yes, the precipitators will supposedly remove 99 per cent of all emissions into the atmosphere. Most of the smallest particles escape into the atmosphere. There is substantial evidence to indicate that these smaller particles represent the most significant threat to health.

5. It is a seldom mentioned fact that nitrogen oxides, though they might be invisible when emitted, react with free oxygen in the atmosphere to form brown haze. In the winter, the wind blows within 15 degrees from a direct line from Orchard to Boise at least 50 per cent of the time. I would like to conclude that Kit Christensen gathered his "data" in the office of Robert Brown, PR man for Idaho Power Company. Every prediction and description he uses comes directly from Idaho Power’s news release.

In the end though, I must agree with the students at the president. It does appear that some people are opportunized when it comes to dis- cussion. Even to the point of not knowing what is involved. Roy E. Terrry

Mr. Christensen is lambasted for letter

Editor, the ARBITER

The common cause of our ASBBSU President’s opinion on the Idaho coal-fired plant. When I first read the article, a question arised as to why he would espouse so favorably on the proposed plant. We do support Mr. Christensen personally and that he is graduating this spring. He does not have to worry and worry about, but; it is possible that he’s decided to play suck boy to business (for money) and has decided to try to get a job? It is no way am I making light of the knowledge he's gained.

Nowadays, it’s very hard to come by a job, and I guess, if things get bad enough, we’ll do anything for coal.

President's can be wrong

Editor, the ARBITER

Well, it’s election time again at BSU and I have been thinking on who to vote for.

The question in the senate race is: Will the current candidates represent the people if they are elected? I do not think this will be the case.

I would urge the people that are running for the senate this year to take into consideration the above letter and that you students think over the points of it.

Dan Lawrence
Kudos to students responsible for changes
by Bob Davis

Congratulations are in order for the students responsible for the alterations to the art in the up-stairs area of the SUB. Pencil-holes and smashed frames were just a few of the refreshing changes made to the otherwise normal paintings and pictures hung in the hall outside the ASBSU offices.

Incidents like this demonstrate that while most of the population here are concerned with classes and term papers, there are still a few who failed bed-wetting in kindergarten and take out their frustrations in "pranks" which display characteristics known commonly as stupidity.

The art in the SUB is there for the enjoyment and enlightenment of the students. It was intended to be looked at, not poked, scribbled on, smashed or ripped-off. People who do things like this clearly show that they are not mentally equipped to be allowed out of the house without a keeper, let alone go to school. Perhaps, they are only victims of bad breeding, because after all, what can one expect from offspring conceived in a kennel.

Meanwhile, not to be out-done, some other students over in the music building managed to display their mechanical talents and break into the candy machine. Marcy Eustis, the student representative who handles complaints about the machines stated that they had informed the vending company that they would not be required to replace the machine, or that they could move it to another building. This is the second time that vandalism has occurred in the music building.

So if students here find themselves hungry and cannot find a candy machine or begin to feel that the walls of the SUB look blank and empty, they can place the blame on the "Paul few" who are making life even more unbearable here at Boise State.

Editor, the ARBITER

It seems to me that the majority of people who have been bitching about the punching-off of campus parking are those who need lessons on their parking habits. The same laws that are being enforced on campus are the same laws that are being enforced in other areas. one is going to have to obey whenever they park anywhere else.

Just because this is a state school, it doesn't give people the right to ignore those laws. Why should you be able to park next to a fire hydrant, or anywhere else on campus? It's just as much of a bother here on campus as it is anywhere else.

For one, I am glad that someone is finally doing something about those people who need to be taught consideration for the rights of others. Now, we can park without worrying about someone parking between you and the next car (even a Volkswagen Beetle) because the police are blocking you in until they finally come and tow it. I say good for those who felt it was wrong, but now something has been done about these problems.

Besides, there is always the standing room only walk that would do us all some good.

Dain Poderken

Tables turned on football coach
(The following letter was written by the English department's chairman at Ponder University to their football coach.)

Dear Coach Millenkompe:

Re: our discussion of your football men who were having trouble with their studies. We have decided to ask you, in turn, for help.

We feel that Paul Spindles, one of our most promising scholars, has a great chance for a Rhodes Scholarship. We have felt that something was wrong with him for and for Purdue. Paul has the academic record for this award, but his football record is not really what is needed. He is highly trainable, and we expect Paul to try hard, of course. During his intervals of study we shall coach him as much as we can.

His work in the English Club and on the debate team will force him to miss many practices, but we intend to see that he carries an old football around to bounce on whenever one does with a football during intervals in his work. We expect Paul to show entire good will in his work, and though he will not be able to begin football practice till the last of January, he will finish with good attendance.

Sincerely,
J. Russ Mills
Head, English Department

P.S. We are delaying a decision on your request made to this department regarding a passing grade for your fullback. Pete Jarinski, until we receive your favorable reply.

Bunny returns, suggests remedy

Editor, the ARBITER.

Although I am going to college at Moscow this year, I have decided that I shall return to the SUN. The editor can tell from all the stuff all over Idaho election time.

The same thing happened last year. I think if someone cares about the school enough to run, they should care enough to clean up after themselves. I would have voted for Mr. Spindles, but he wouldn't have to run for a place. I say the same thing at Boise because they have the same problem.
Need for funds to acquire land is BSU's first priority
by John Elliott
Boise State University President, Dr. John Barnes, stated in an inter-
view February 20, 1975, that the need for funds to acquire land is
the number one priority for the uni-
versity. Barnes stated that the parking problem, the building of needed facilities and office space
on campus would soon be resolved unless new
land is acquired.
"The well being looked at for ac-
quisation lies south of the Student Union Building, the present
vo-technical school and the state-
ment parking lot, back about two blocks south of Bertram. The pur-
purpose of this location is to signifi-
cantly provide additional parking
near the Student Union and secondly to facilitate a much ex-
panded vo-technical school and
thirdly to provide additional park-
 ing. That building would provide approximately 1000 more parking spaces.
"The need for funds to acquire
land would provide approximately 1000 more parking spaces. Although a few years.
"The request is then presented to
the student Senate for ratification. It is the Senate's responsibility to
determine where any alterations or
modifications in the budget will be
made.
"The final acquisition to that land is probably a good many years
away," Barnes stated. "I reluc-
tantly admit that. You can't expect
the state legislature to purchase in one year the amount of land that
will be needed by this university in the
next twenty years."
"The university is asking for
approximately $200,000 per year,
and it is Barnes' contention that the State Board of Education will grant
this proposal. "In this manner the
legislature will be encouraged to request, and over a period of five to ten years we would have a
substantial piece of land."
"Barnes went on to say that many of
the facilities at BSU are now inadequate because of increased student
enrollment. When questioned as to when a new classroom building or when any addi-
tions would be built at Boise State,
Barnes said that it would be a num-
ber of years.
"The new Science Building which
will begin construction later this year will not be a general classroom
building. That building is to house
laboratory facilities. Barnes stated that building ex-
editures should be strengthened by
more from governmental surplus funds. "It is difficult to justify using student funds for
contracting expenses such as teach-
er salaries, but these surplus funds
could be used to construct build-
ings or any other one-time expendi-
tures."
"If the legislature were to put in
another five or six million dollars into permanent building fund, Boise State might, and I stress
might, benefit." Barnes went on to add that Higher Education in the state
would certainly benefit from ad-
tional revenue funneled into the
permanent building fund.
"The State Board has requested
around $1,000,000 to put an addi-
tional two floors onto the Liberal
Arts Building, but this request probably will not be funded unless
legislature, takes some of its surplus
money and puts them into the
permanent building fund." Barnes
said.
Budget hearing to be held March 1
Newly appointed ASBSU Treasurer,
Martin Teall, has announced that budget hearings for the 1975-76 school year will be held
March 1. The purpose of these hearings is to allow student-funded organizations to
submit budget proposals for evalua-
tion.
With these proposals Teall can
compare them with the ASBSU request for the year's total operating costs. This request is then presented to
the Senate for ratification. It is the Senate's responsibility to
determine where any alterations or
modifications in the budget will be
made.
"Balancing revenues and expendi-
tures can be a very tricky undertak-
ing, because the climate of factors
can vary. For instance, revenues from student tuitions may be decreased and on a projected enrollment that is extrap-
olated from the previous semes-
ter. Often budget proposals are grossly out of line with an organiza-
tion's true costs. Sometimes
the budgets are padded, but usu-
ally they are underestimated.
Thermoneautics has even
occurred. Where students have
made requests which have depleted the budget's reserve
fund, $20,000 is still being held in
excess. This money is the result of
the poorly high enrollment at BSU this year. The Senate is now accepting proposals on how
this money might be put to good
use.
"The following is the SUIPB
Financial Report totals current as
of January 12, 1975. Allocations:
$56,000, 00; Expenditures: $11,213.00; Expenditures: $54,325.52; Balance: $17,688.48."

meeting he declared, "I promise
you that a year from now Alpha
Kappa Psi will be still on this
campus.
Friday morning, he and Theta
Omicron president, Dan Roberts,
held an informal meeting with
President Barnes, Dr. David
Taylor, and the Dean of the School
of Business, Dr. Charles Leta. The
meeting was mainly a "Correctly
visits campus
John C. Wilson, national presi-
dent of Alpha Kappa Psi Profes-
sional Business Fraternity, was on
campus Thursday and Friday, February 20 and 21. The purpose of his visit was to addre-
s the members of A K Psi's local chap-
ter, Theta Omicron, and to estab-
lish a goodwill visit to BSU's administra-
tors.
At Theta Omicron's weekly meeting Thursday evening, he
spoke on the topic of leadership.
"If you examined all present mem-
bers and alumni to assemble a large contingent and to attend the
national convention in force.
Although only certain delegates
would have voting rights, he emph-
phasized that they could all vote
their opinions and work for the
cause in which they believed.
"The delegates would vote for
those changes that were truly in the
best interest of the fraternity,
"Concerning the issue of sexual integ-
ration of the fraternity, President
Wilson stated that A K Psi would
not support a legal battle in the
court, but at the end of the
meeting he declared, "I promise
you that a year from now Alpha
Kappa Psi will be still on this
campus.
Senate votes on radio club
This Tuesday in its weekly meet-
ing, the Senate will vote on a pro-
posal by Radio Club president
John McCabe, to set aside funds for
establishing an FM radio sta-
tion on campus. McCabe has worked closely with ASBSU Vice
president, David Ward, on prepar-
ing a written statement which asks
for an allocation of $10,000. This
allocation would be supplemented
with $2,500 from the Radio Club
and $7,500 from the budget.
If the proposal is accepted, the application for a broadcasting license can be completed. The FCC
requires proof of sufficient funding before the application can be pro-
cessed. Since the ASBSU treasury is currently unbalanced, student leaders are hopeful that the
proposal will be accepted.
Many faculty members are sup-
porting the establishment of a broadcasting facility and the Communi-
cation Department has even designated Dr. Jerry Gephart to serve as the
adviser. R. E. Bullington, execu-
tive vice president, has emphasized the educational benefits the station
would create and hinted that it
might lead to the formation of a
baccalaureate program in the
broadcasting field.
VETERANS
This includes all weekend warriors, war mongers, ex GI fighters, and NOW lovers. BSU Veterans Club ESQUIRES is having an important meeting Friday, February 28, at 6 p.m. in the Owyhee Room of the SUB.

Topics to be Discussed
Applications will be taken toward our Intramural Basketball team and Summer Recreation Softball team. After last year’s “show em no mercy” softball team with a composite record of 1 win 13 losses, we thought we would start earlier this year. We had too practice but liked to drink a few.

BSU Veterans Appreciation Day. We are the main organization in charge of organizing and putting this together. We want this to be a huge success again this year.

The annual BSU Student Faculty Golf Tournament or Shoshone Open. It was a lot of fun last year with two sororities supplying caddies. Jim Hawley winning the free massage and sauna for closest to the pin contest. Most everybody won $10 in gift certificates last year.

United Veterans of Idaho. We will have updated reports of all bills going through the Legislature with emphasis on half tuition being paid by the state.

Voting on “Captain of the Ship” for this year’s annual TKE Raft Race. Even navy vets are eligible.

Qualifications
a. Willing to go down river on large raft by yourself. b. If raft wrecks again, must be last to leave raft, not first as last year’s brave and courageous captain did. This year’s spring plastic or beer baseball game.

We will have speakers running for AESSU offices.
We have a lot going. If you have an extra hour Friday come and see who we are. It won’t cost you a cent and you will get a free beer out of it.

Refunds for seniors
As of November 1, 1974, graduate fees are not to be paid by students. Students who have paid for either December 1974 or May 1975 graduation are entitled to a refund which can be picked up at the counter office in YOUR CAMPUS BOOKSTORE. A university ID is required.

Veterans eligible for clemency
Over 100,000 veterans received bad discharges because of AWOL or AWOL-related offenses during the Vietnam era, August 4, 1964 through March 28, 1973. These men and women are eligible to apply to the Presidential Clemency Board for a pardon for their AWOL offenses and a clemency discharge in lieu of the undesirable or punitive discharges they now hold.

Most are granted pardons and clemency discharges after 3 to 6 months of alternate service, but many are given immediate unconditional pardons. The maximum under the program is 24 months.

A veteran has nothing to lose by applying for clemency. He has much to gain. If he has a felony court-martial conviction for his AWOL offenses, his pardon restores his civil rights. He thereby regains his right to vote and to hold trade licenses in most states.

By itself, the clemency discharge does not change a veteran’s entitlement to veterans benefits. If he was previously ineligible, he remains ineligible. If he previously had appeal rights, he still has those appeal rights.

An application to the Clemency Board does not impair any pre-existing right to review a bad discharge. A veteran can maintain his other review petitions and still seek relief from the Presidential Clemency Board. A veteran can decline the President’s offer of clemency if his other appeals are successful or if he decides not to do alternate service.

Clemency through the Board procedures can only have a beneficial effect on any subsequent applications to the discharge review boards. It is entirely possible that any pardoned offenses may be disregarded by the service review boards. At least, any pardon should be a highly mitigating circumstance in their deliberation.

If you are interested, action must be taken soon. The application deadline is March 1, 1975. Applications are accepted by telephone and by mail at the Presidential Clemency Board, the White House, Washington, D. C., 20500. The telephone number is 202-466-3100.

Studies show migrant children have classroom problems

Department of Education figures indicate that 570,000 migrant children attend school in the United States. Due to their cultural and linguistic backgrounds, many of them have problems in the classroom.

Strides have been taken in Idaho to correct the difficulties these children have in school, but a Boise State University professor feels on a national level the educational system is still not meeting their needs.

Mrs. Nancy Smither, a distinguished visiting professor from Pan American University in Edinburg, Texas, says a key system is still not meeting their needs.

Smither says many schools in the United States mean the schools mean the artwork concerning its present material status.

Norman stated that there have been no major problems in the areas of vandalism or theft in the five years he has been connected with the building. The artwork is then photographed. This photograph is then filed for later references made back to the artwork concerning its present material status.

Norman stated that there have been no major problems in the areas of vandalism or theft in the five years he has been connected with the building. The artwork is then photographed. This photograph is then filed for later references made back to the artwork concerning its present material status.

The objective of the Talent Search Program is to identify and encourage high potential minority and low income students to complete their education with post-secondary training. The Talent Search Program is funded by the HEW grant at Idaho State University.

Recruiter appointed

Dean Ed Wilkinson, Student Activities Program, is pleased to announce the appointment of “Jim” Salvador Sanchez as the Talent Search Program Assistant for southwest Idaho. Mr. Sanchez will be operating out of Room 111 in the Administration Building.

Applications being accepted for advisor program

The Office of Student Residential Life is accepting applications for the Resident Advisor Program. Applicants must have a cumulative GPA of 2.25 or above and be upperclassmen.

Building and Grounds rules as to where campaign literature may be placed in posted in the Director of Student Activities office, second floor of the SUB.
Marijuana, by far the most widely used of the hallucinogens, is obtained by drying the leaves, stems, and flowers of the female Indian hemp plant, Cannabis sativa. Although the physiological side effects are still under debate by researchers, few people, if any, become truly addicted to marijuana. In addition, smoking the pure drug has fewer side effects than smoking an impure "joint." Most marijuana is sold on the black market and is laced with other compounds, commonly belladonna, or deadly nightshade as it is sometimes referred to. Belladonna contains the drug atropine, which is sometimes used medicinally as a pupil dilater, and as a stimulator of breathing and heart beat. However, overdoses of belladonna are poisonous and can make the person sick. Overdoses can also cause a person to hallucinate by making one feel as if insects are crawling all over the body. Much of the hallucinogenic effect of smoking or eating marijuana is therefore as much a result of imperfections as from the marijuana itself. The felt effects also largely depend on the users frame of mind. LSD is the strongest of the hallucinogens. In addition to producing distorted visual images and depersonalization or loss of self, disturbances in normal thinking also occur when taking the drug. LSD was first synthesized by Albert Hoffman in 1943. When the drug became extensively used in the 1960s, researchers began experimenting with LSD and found that it blocks some nerve receptors in certain parts of the brain, while it stimulates other receptors directly. Hence, a user often cannot perceive some external stimulus, and at the same time, the brain produces bizarre hallucinations. These visual, auditory, and tactile effects last 8 hours or more, and commonly begin about half an hour after ingestion. The larger the dose, the more a person hallucinates, but increasing the dose does not increase the length of time the drug acts up on the body. Some users experience recurring hallucinations days or months after taking LSD. This is probably a result of the drug's fat solubility; the drug is extremely soluble in body fat, and can be stored there for indefinite periods of time, only to be released into the bloodstream later. A user's ability to perform while on the drug is nil, and depth perception is radically distorted because the pupils of the eyes dilate and contract independently of one another. LSD is not addictive in any way. Most of these drugs are fairly mild in the effects they produce as compared with LSD. Psilocybin, for example, is only about one-tenth as potent as LSD when taken in comparable doses.
Electors to be held February 26, 27

On Monday, February 18, the candidates for ASB office met in the SUB Senate Chambers to draw ballot positions for the upcoming Primary Elections to be held February 26 and 27. Announced candidates for ASBSU President are:
1. Dave Ward
2. Nate Kim
3. Jon Adamson
4. Jim Arkoosh

Announced candidates for ASBSU Vice-president are:
1. Ron O’Halloran
2. Gary Allen
3. Kenneth Cole

Announced candidates for ASBSU Treasurer are:
1. R. Scott Harmon
2. Ronald Buchanan

28 students have announced their candidacy for 12 senate seats from the various schools and one Senator at large position. There are 3 announced candidates for the seat from the school of Education.

The candidates and schools are:

- ARTS AND SCIENCES (4 seats available)
  1. John McKay
  2. Lenny Hertling (incumbent)
  3. James J. Staupt
  4. Royanne Kline
  5. Doug Gochnour (incumbent)
  6. John Steppe (incumbent)
  7. Nick Guiner
  8. Mark Stinson
  9. Rod Daugherly
  10. Robert Davis
  11. David Haymond

- SCHOOL OF BUSINESS (3 seats available)
  1. James Crawford (incumbent)
  2. Dave Wynkoop
  3. Mary Jane Jorgensen
  4. Donald Hay
  5. Jerry Reed
  6. Jeff Kelly
  7. Kenny Rice

- VOCATIONAL AND TECHNICAL (1 seat available)
  1. Pamela John
  2. Rodney Brown
  3. Mark Rose

- HEALTH SCIENCES (1 seat available)
  1. Jack Kershner
  2. James Murry
  3. Howard Welch
  4. Mike Stampske

- SENATOR AT LARGE (1 seat available)
  1. Scott Whipple
  2. School of Education (2 seats available)
  3. No announced candidates

The winners in each category will square-off for the General Election to be held in March.

Geology professor investigates geothermal energy for mall

State buildings in the Capitol Mall and other public structures throughout Boise may be using geothermal energy following a research project undertaken by Boise State University students and staff.

A research team that includes geologists and engineers will drill two experimental wells to be used for geothermal heat and to transport the resource to the structures.

Boise State University professor Nancy Smith was in Washington D.C. February 17-19 for the annual meeting of the Society for Intercul. Edgar. She also attended the meeting of the Society for Intercul. Edgar.

According to Garcia. The conference was held to bring together educators for "an exchange of ideas and cooperation in bilingual education." Garcia noted that 200 representatives from the United States and abroad were in attendance.

Panel to be held on treatment of offenders

There will be a panel discussion on the topic "Juvenile Delinquents and Adult Offenders - What Kind of Treatment Is Available?" The panel will discuss some of the current treatment practices used in Boise and throughout the state by private psychiatrists and state agencies. The panelists will include Richard Anderson, Warden of the Idaho State Penitentiary; Dr. Donald St. Aubyn, psychologist at the Boise State University; Dr. Carl Usadel, Idaho state coordinator for Youth Rehabilitation Services.

The discussion will be held on the second floor of the Student Union Building at Boise State University, March 4 7:00-10:00 p.m.

If there are any questions concerning this workshop, please contact Robert L. Marth, Department of Societal and Urban Studies phone 285-3000.

The other sites are chosen, the drilling phase of the project will begin. Nichols said that it is expected that the two wells will be drilled, with additional wells planned for future development.

As the BSU team is conducting its research, engineers from the Atomic Energy Commission and the State of Idaho will be deciding what structures to convert to geothermal heat and how to transport the resource to the structures.

Hollenbaugh stressed that the project will have to use the Boise area for the geothermal power and that it will be "energy saving, not using energy producing" because it will be using a renewable resource already existing.

He added that the geothermal addition is designed to supplement the present heating systems which will be retained for emergency use.

Students will play a big role in the project. said Hollenbaugh. This grant will employ nine students as research assistants, and they will develop the practical skills that are in great demand for geothermal research projects in industry.

He said Boise State will receive $65,000 in equipment once the research is completed.

Professor attends meeting

The Boise State University professor was in Washington D.C. February 17-19 for the annual meeting of the Society for Intercul. Edgar. She also attended the meeting of the Society for Intercul. Edgar.

As her part of the discussion, Smith discussed teacher training multicultural education.

According to Garcia, the conference was held to bring together educators for "an exchange of ideas and cooperation in bilingual education." Garcia noted that 200 representatives from the United States and abroad were in attendance.

Boise State students win honors in contest

Four Boise State University art students have won the first four places in the Annual College Poster Contest. First place went to Jana Wright; second place to Becky Halby; third place to Gale Howard Burley; and fourth place to Randy Walcutt.

According to George N. Stoops, Executive Secretary to the Governor's Committee on Employment of the Handicapped, the first four places in the contest reflect the teacher's ability to inspire and instruct. Jana Wright's poster was sent to the national contest to compete for the prize of $1000. The students shall receive formal recognition at a luncheon to be held in their behalf at the Elks Lodge on April 10.

The rape of Mr. Smith

Senate Bill 1159 is a bill currently in the Senate Judiciary and Rules Committee which would change the wording in criminal action from "rape" to "sexual assault." The following story, reprinted from the Detroit Free Press is a fictionalized account of what might happen in a trial if this bill is passed.

The law discriminates against rape victims in a manner that would not be tolerated by victims of any other crime. In the following example, a rape victim is asked questions similar in form to those usually asked a rape victim: "Mr. Smith, you were held up at gun point at 16th and Locust?"

"Yes."

"Did you struggle with the robber?"

"No."

"Why not?"

"He was armed."

Then you made a conscious decision to comply with his demands rather than resist?"

"Yes."

"Did you scream? Cry out?"

"No. I was afraid."

"I see. Has you ever been held up before?"

"No."

"Have you ever given money away?"

"Yes, of course."

"And you did so willingly?"

"Yes."

"What are you getting all?"

"Well, let's put it like this, Mr. Smith. You've given money in the past-in fact you have quite a reputation for philanthropy. How can we be sure that you weren't contriving to have your money taken away from you by force?"

"Listen, if I wanted-"

"Never mind. What time did this hold up take place, Mr. Smith?"

"About 11 p.m."

"You were out on the street at 11 p.m. Doing what?"

"Just walking."

"Just walking? You know that it's dangerous being out on the street that late at night.. Weren't you aware that you could have been held up?"

"I hadn't thought about it."

"What were you wearing at the time, Mr. Smith?"

"Let's see. A suit. Yes, a suit."

"An expensive suit?"

"Yes, yes."

"In other words, Mr. Smith, you were walking around the streets late at night in a suit that practically advertised the fact that you might be a good target for some easy money, isn't that so? I mean, if we didn't know better, Mr. Smith, we might even think you were asking for this to happen, wouldn't you?"

"I'm afraid not, Mr. Smith. I don't think you would WANT TO VIOLATE his rights now, would you?"

Naturally, the line of questioning, the innuendo, is ludicrous as well as inadmissible as any sort of cross examination-unless we are talking about parallel questions in a rape case. The time of night, the victims previous history of "giving away" that which was taken by force, the clothing-all of these are held against the victim. Society's posture on rape, and the manifestation of that posture in the courts, help account for the fact that so few rapo are reported.

The rape of Mr. Smith

Eight students and two faculty members from Boise State's Theatre Arts Department left early last Wednesday morning to attend a large university theatre conference in Eugene, Oregon. The conference was a combination of the Northwest Drama Conference, American College Theatre Festival and highschool one-act play festival. It was sponsored by the University of Oregon and ran from Wednesday the 12th until Saturday the 15th.

The NWDC is the northwestern region's equivalent of the Rocky Mountain Theatre Conference which was held at Boise State last November, and the ACTF for Idaho's region was held in Ogden in January, and included Boise State Theatre Carnival.

Highlights of the conference included four plays selected by ACTF judges from four northwestern universities; an informal talk given by Joseph Picket, the distinguished producer-director of the New York Shakespeare Festival; a production by the San Francisco Chinese Opera; and several plays both on and off campus produced in conjunction with the NWDC.

Two ACTF plays in particular, U of O's One Two by Thornton Wilder, and Pacific College's Godspell by Stephen Schwartz were thoroughly enjoyed by the Boise group. One of the more interesting experiences came in viewing the world premiere of an original drama even then in the process of rewriting. The cast was comprised of Jerome Kilty, U of O's guest artist-in-residence. Other noteworthy plays included an excellent production of Harold Pinter's Old Times, the musical A scene from "Born Yesterday," which is playing March 6 to March 15. Tickets may be obtained at the box office.

Subul box office opens

The Subal Theatre box office opens February 27 for reservations to the next Theatre Arts department production, BORN YESTERDAY, directed by Garson Kanin. Reservations may be obtained by calling 385-1462 from 3:00 to 6:00 p.m. daily. General admission is $3.00 and BSU students free with activity card. Curtain time will be 8:15 p.m. The play will open March 6 and run through March 15. Directed by Dr. Robert Ericson, the play deals with political graft and the unscrupulous men who sometimes seek office for their own rewards.

For more information call the BSU Theatre Arts department at 385-1406 during regular business hours.

Obscene phone calls can be harmful according to survey
by Gary Colenda

She was the first student to a telephone survey dealing with nuisance telephone calls and telephone misuse. I had introduced myself as a journalism student at Boise State University and stated the object of my survey which was to collect research data for a writing project. I began by asking her general questions about telephone surveys, sales calls, and harassing phone calls. Then asked her of she had ever received an obscene call.

About that time, her husband picked up their extension phone -- flashiag a voice to hear a man's voice asking his if she'd ever received an obscene phone call. Needless to say, I had to do some quick explaining to the "man of the house" before my survey became an obscene statistic.

Many people consider obscene phone calls to be harmless pranks, but for some, those intimate communications have become a serious matter. In order to gain added perspective into this type of phone call and other types of nuisance calls, I formulated a telephone survey to ask people in the Boise area their opinions about and personal contacts with nuisance telephone communications and telephone misuse. One hundred local families were interviewed. Within this group, only twelve people refused to express their opinions on those subjects.

"Do you consider telephone surveys to be a nuisance call?" was my first question. This question was often answered with "like this one!", which usually initiated a chuckle from both parties. Fifty-six percent of the respondents in this question considered telephone surveys to be a nuisance call. The most common qualifier to this response was that it depends on the subject matter of the survey or if it was a legitimate one (and a sales call or juvenile prank).

The non-solicited sales call was the next subject we confronted. Sales calls were received by eighty percent of the surveyed families. Sixty-six percent of the respondents thought that there should be stricter controls on non-solicited sales calls. Within this group, many believed that stricter controls would be nice, but they couldn't see how these laws could be enforced.

Legal guidelines were considered appropriate by the majority of this group. These guidelines would require telephone salesmen to state the purpose of their call early in the conversation and give opportunity to the potential prospect to state his or her interest in the subject. Another group of respondents accepted sales calls as an economic fact of life, and wanted to give telephone sales people a chance to make a living. This response group believed that they always had the option to end the conversation at any point.

Harassing phone calls seems to be a subject area that includes most types of nuisance calls. Obscene calls, calls from collection agencies, prank calls by children, and threatening calls are considered by most to fall within this group. Silent callers, repeating wrong numbers, and pushy salesmen are also considered by some to be harassing calls.

Thirty-one percent of the people surveyed stated that they have received harassing phone calls. 12.5 percent of the respondents have been acquainted with someone or agency who has used the telephone as a device for harassment. At this point, I decided to increase this harassment with an intimate query into obscene.

We have all heard statistics about the victims of the obscene phone call. But no one goes around asking everyone about their acquaintance with this practice -- except, perhaps this reporter.

Obscenity is often considered a relative matter, within the mind of the beholder. But over the telephone, it comes through loud and clear with no such question as to its relative merits. "Heavy breather" calls are a subgroup which are at times borderline cases. After all, it could be a "wrong number" caller with emphasis on or obscene "thinker" who can't get the words out. If the "breather" repeats his pulmonary calls, the call then commences to become harassment.

Obscene calls can be humorous, yet when hard-core obscenity is repeated, serious psychological consequences might be the result.

COLLEGE STUDENT'S

POETRY ANTHOLOGY
The National Poetry Press
announces its
Spring Competition

ANY STUDENT attending either junior or senior college is eligible to submit his verse. There is no limitation as to form or theme. Shorter works are preferred by the Board of Judges, because of space limitations.

Each poem must be TYPED or PRINTED on a separate sheet, and must bear the NAME and HOME ADDRESS of the student, and the COLLEGE ADDRESS as well.

MANUSCRIPTS should be sent to the OFFICE OF THE PRESS

NATIONAL POETRY PRESS
3210 Selby Avenue
Los Angeles, Calif. 90034

The closing date for the submission of manuscripts by March 31.

Another event of Black History Week was poetry reading. The poetry exemplified the heritage of the black people as all Black History Week sought to do.

Black History Week helps awareness

The theme of this year’s Black History Week, “We A Proud People”, carried a message that all people everywhere should content. “WE A Proud People” is more than just a few words grouped together to create a theme; it is an open statement about a people’s heritage.

Black History Week is an event geared toward making people aware of the important contributions that have been made throughout history by the black race.

The events that made Black History Week a success were more than just events, they were the story of a people, their heritage and their society.

The Rags to Riches Dance held February 20 displayed the moods and climates of Black music.

The MOMENTS in BLACK HISTORY Banquet held at Chaplin’s on February 21 had as its guest lecturer the Rev. Cecil Murray, a Black History Instructor from Seattle, Washington.

The Black Poetry Reading held in the SUB Look-Out Lounge on February 20 gave the listener a glimpse of Black emotions and struggles in our modern world. Original works of poetry by local Black artists were featured.

The ideas and theories behind Black History Week could be summed up by their National Anthem, LIFT EVERY VOICE AND SING. The character and energy inherent in that song would show the spirit so proudly displayed during the BSU Black History Week.

Broncos drop 2 Sky games, see crown hopes fizzle

by Michael Conroy

Conroy’s Cagers saw all their hopes for a Big Sky Conference basketball title vanish like a puff of smoke as they dropped two must games over the past weekend. Friday night they lost to league-leading University of Montana 67-66 and Saturday night they were blitzed by the Bobcats of Montana State 71-81. Pat Hoke scored 29 points Friday night against the Montana Grizzlies and guard Steve Connor dropped 19 as Boise State shot an incredible 59 percent from the floor, but Hoke and Connor were the Broncos to score in double figures in the Broncos’ losing effort. Defense was again the name of the game, as it was the second time in as many games that the Grizzlies held the Broncos to under 70 points.

Montana was led by All Big Sky player Ken McKenzie, who scored 15 points and pulled down 13 rebounds. McKenzie was only one of four Grizzlies who hit in double figures. Others were Mike Richardson with 14 points, Eric Hays who also scored 14 and Jim Peck who added 12. The win gave Montana an 11-1 record and dropped Boise to 6-4.

Pat Hoke had his second 20 point plus scoring night in a row, and Steve Connor again was the runner-up scorer for the Broncos but it was still not enough. It was Montana State’s night for revenge as their 81-71 victory made up for the 105-92 defeat they were handed just one week ago here in Boise. The game was very tough, but Hoke and Connor kept the Cagers in it all the way. They were aided by the play of James Smith, who scored 13 points.

The Broncos lost the shooting battle to the Bobcats 42 per cent to 50 per cent. The Bobcats also pulled down 39 rebounds to Boise State’s 31 and scored more free throws 19 to 17. “They (Montana State) just played better,” said Boise head coach Bus Conner. “The loss sent the Broncos to a 12-10 season record and 6-5 in conference play. Montana defeated Idaho State Saturday night 79-76 and claimed the Big Sky title with a 12 win 1 loss record.

Grapplers prepare for Big Sky championships

by Rob Landgren

The Big Sky Conference wrestling finals loom ahead. Though several hundred miles away in Tucson, Montana, the hornets’ easy reach for Coach Young’s wrestlers as his team enters the three-day tournament in conference action.

“If we wrestle up to our capability, we could definitely be the favorites,” stated Young. “We’ve seen some State schools and have wins over Idaho State and Montana State. They’re the only teams that have beaten us so far. We’re good with ISU, the closest,” he added.

Young pointed out that this year’s meet will weigh heavily on the seeding or pairing off and bracketing of the wrestlers. “It’s very important that we get as many number one seeds as possible,” Young said. “In most weights, there are at least three good kids, so we’ll need that number one spot or we just have to win it the hard way.”

With four returning Big Sky Champions in Mark Hatten at 130 pounds; Jeff Howell competing at 142; Randy Watson, down to 150 pounds; and Chuck Cedillo at 190 pounds, the Boisies’ should take a lot in the October 5th weekend tournament.

Young’s wrestlers pointed out, “It’s a great team. As one scene,” Bittick’s match at heavyweight will feature a collegiate wrestling for the first time at Boise State. Pat Hoke of Idaho State and N.A.U in the place of regular Pat Hoke who was nursing injuries. Mark responded with 11 points against the Wildcats and 13 against the Lumberjacks.

Mark terms playing for BSU a new experience in that he’s never played on a team that has not won all the time. However, he feels the caliber of basketball played in the Big Sky is just as good as in the bigger schools in Oregon. Mark enjoys playing his guitar and likes pinball and pool.

IN THE SPOTLIGHT

MARK CHRISTIANSON

Freshman, Mark Christianson comes to BSU from Oregon’s West Linn High School where he was most valuable player all three years and was chosen All-State and All-Metro his senior year. Mark chose BSU because of the enthusiasm in the basketball program here. He hopes to be a starter in the next few years and plans to work on his jumping to help him reach that goal.

Mark has seen quite a bit of action this year and is averaging 5 points a game. The highlight came when he got to start against Weber State and H.A.U in the place of regular Pat Hoke who was nursing injuries. Mark responded with 11 points against the Wildcats and 13 against the Lumberjacks.

Mark terms playing for BSU a new experience in that he’s never played on a team that has not won all the time. However, he feels the caliber of basketball played in the Big Sky is just as good as in the bigger schools in Oregon. Mark enjoys playing his guitar and likes pinball and pool.

Senior wrestlers Mark Hatten, Jeff Howell lead the way

by Rob Landgren

With the Boise State wrestling season nearing an end, seniors Mark Hatten and Jeff Howell lead the way for their teammates as they strive for another Big Sky Conference crown.

Hatten and Howell, both junior college transfers, were conference winners on last years championship team and are favored to repeat this season as they have beaten all their opponents in the league.

Although both wrestlers admit to liking the Boise area and its people, they come from opposite ends of the spectrum. Hatten came to BSU after two years at Grossmont College in San Diego. Hatten transferred out of Gray's Harbor Junior College and calls Aberdeen, Washington home.

In Hatten's case, sunny southern California gave way to snow and a colder climate at Hatten's birthplace, a county side of the country.

Another thing these two wrestlers have in common is that they are both determined to be number one in the conference and on top as a team. Coach Young stated that "Hatten and Howell are consistent wrestlers. Hatten has been a steady winner, doing better in dual bouts. Howell has been consistent at doing well in tournaments." He placed third at the MIWA and Arizona Tournaments and second at the Beehive Invitational while competing in the 142 pound class.

Young also noted that "both Mark and Jeff are good team boosters. They spark and cheer the team on where we need it the most."

Cross-country skiing termed economy sport

Now, while we're all concerned with fuel shortages and inflation, yet still resist the idea of compromising our life style which has been well populated with fun and recreation. It is a great eight times we consider participating in sports of a more economical vein. For most of us, winter sports have included Alpine skiing or snowmobiling. It takes a considerable amount of gas to get to the ski lodge or to that favorite snow mobile trail. It takes an even more considerable amount of coins to pay lift fees, outfit yourself in style, and pay lodge prices for meals when slope skiing; or to purchase a snowmobile and pay for maintainable repairs.

One way to save fuel and money and still have fun is to buy or rent cross-country ski equipment, pool with a group of friends, drive up to where there's a few inches of snow and take off. After the initial investment of skis, boots, and poles (approximately half the price of downhill equipment), your recreation budget will be practically zero.

There are trails designated just for cross-country skiing, although some are used as cross-country ski areas. There are trails designated just for this purpose.

Fifty or sixty years ago, people who lived in snow country used cross-country skiing to visit their neighbors and to attend social functions at the one-room school house. With the arrival of motor vehicles, snow plows, and our inevitable repairs, skier, according to her or his vehicle, snow plows, and our inevitable repairs. skier, according to her or his vehicle, snow plows, and our inevitable repairs. skier, according to her or his vehicle, snow plows, and our inevitable repairs. skier, according to her or his vehicle, snow plows, and our inevitable repairs. skier, according to her or his vehicle, snow plows, and our inevitable repairs. skier, according to her or his vehicle, snow plows, and our inevitable repairs. skier.

Although both wrestlers admit to liking the Boise area and its people, they come from opposite ends of the spectrum. Hatten came to BSU after two years at Grossmont College in San Diego. Hatten transferred out of Gray's Harbor Junior College and calls Aberdeen, Washington home.

Vaughn preps baseball team for busy spring season

by Rick Christian

You can't but and play for one run when you know your team might give up four runs in the next inning. This strategy characterized the play of BSU's baseball team last year. Although the Broncos had good run scoring potential, the big bats could not compensate for the inconsistent arms on the mound. Bronco hurlers hung out a total of 121 hits compared to their opponents' 290, but scored fewer runs, 202 to 205. This run differential stemmed from a porous defense that committed 133 errors and a pitching staff that was plagued with injuries and a balloonized ERA of 4.43.

Head coach, Ross Vaughn, who in his rookie season at BSU, directed the team to an overall record of 19-18. In Big Sky Conference play, however, the Broncos held a disappointing 3-6. Four of these eight games were against conference champ, Gonzaga. Vaughn attributes irregularities like this resulted because a number of Big Sky rivals schools were de-emphasizing their baseball programs.

This summer the big Sky officially terminated baseball as a conference sport, but like a Phoenix rising from the ashes, BSU rose into a new and even stronger conference, the North Pacific.

The team personnel has ably experienced a rebirth due to graduation and recruiting. Only seven members of last year's squad are returning for this season. Although he emphasizes recruiting athletes from the top high schools of Idaho and the northwest, Coach Vaughn has garnered a wealth of talent from the junior college ranks. On the present roster 15 of the 27 athletes are junior college transfers; similarly, only seven members of the squad are underclassmen. Essentially the Broncos are now a team of seasoned, experienced veterans.

Many of the problems the areas which hindered the Broncos in the past have been bolstered by the acquisition of these new players. Mike LeVeole, a blue-chipper from Arizona Western JC who has a live arm and an adequate glove, will man first base. Chris Chinn and Jack Wilfing will fill the gaps at second base and shortstop, and Mike Schwartz will be behind the plate. Newcomers, Rick Coates and Ron Estes, will bring their fireballing right arms and new depth to the pitching rotation. They will join Scott Hoensaker, Nick Mitchell, and Paul Levar, last year's ace, in giving the Broncos a very stable pitching staff. What was once considered the Broncos' nemesis, is now one of their strong points.

As a member of the North Pacific conference, the Broncos will need every bit of their newly acquired talent. Six other schools: Idaho, Gonzaga, Seattle U., Portland State, U. of Portland, and U. of Puget Sound will be scrambling for the league title, and the Broncos will play each team four times. All together Coach Vaughn has set up a rugged 36-game schedule: during the week from April 26-May 3 the team will play a devastating ten game. Against competition as rigorous as that, the Broncos will be hard pressed to keep their competitive edge.

The Boise State women's basketball team finished their regular season last Saturday morning by defeating the University of Idaho 71-37. Idaho took a slight lead early in the game, but Boise State battled back to a 37-31 lead at intermission. The BSU Women hit 30 of 62 field goal attempts for 48 percent and were 11 of 12 from the charity stripe for 91 percent. Jason Burrell and Elaine Elliott topped the Broncos' scoring drive with 16 points apiece. Bette Will dropped in 12, Kendra Faden seven and Elaine Godfrey six. Burrell and Theresa Anderson each grabbed five rebounds to lead Boise State in balanced rebounding effort.

Boise State has a record of 15-1 and is now preparing for the Northwest Regional Tournament in Pullman, Washington, this weekend. If victorious they then advance to the regional finals in Ellensburg, March 6 and a chance for the coveted trip to the National Tournament.

Now $125.00 buys:

More power than our HP-35. 32 pre-programmed functions and operations vs. 22 for our HP-35. The HP-21 performs all log and trig functions, the latter in radians or degrees.

It's our only calculator short of the HP-45 that lets you:
- convert polar to rectangular coordinates, and back again ($P \rightarrow R$);
- do full register arithmetic ($M+, M-, M\times, M+$);
- calculate a common antilog ($10^x$) with a single keystroke.

The HP-21 also performs all basic data manipulations ($1/x, y^x, \sqrt{x}, \sqrt[y]{x}$) and executes all pre-programmed functions in one second or less. In sum, it's designed to solve tomorrow's problems as well as today's.

Smaller size. 6 ounces vs. 9 ounces for our HP-35.

Full display formatting. The display key (DSP) lets you choose between fixed decimal and scientific notation and lets you control the number of places displayed. (The HP-21 always uses all 10 digits internally.)

If a number is too large or small for fixed decimal display, the HP-21 switches automatically to scientific. It never confuses a smaller number with zero.

Finally, if you give the HP-21 an impossible instruction, the Display spells E-r-r-o-r.

RPN logic system. Here's what this unique logic system means for you:
- You can evaluate any expression without copying parentheses, worrying about hierarchies or re-structuring beforehand.
- You can solve all problems your way—the way you now use when you use a slide rule.
- You can re-use numbers without re-entering them. The HP-21 becomes your scratch pad.
- You see all intermediate answers immediately. The HP-21 executes each function immediately after you press the function key.
- You can easily backtrack when you err. The HP-21 performs all operations sequentially.

Hewlett-Packard quality craftsmanship. One reason Nobel Prize winners, astronauts, conquerors of Everest, America’s Cup navigators and over 500,000 other professionals own H-P calculators.

Your bookstore will give you a demonstration today. Challenge our new HP-21 with your problems. See for yourself how much performance $125.00 can buy. If your bookstore doesn't have the HP-21 yet, call us at 800-538-7921 (in Calif. 800-662-9862) for the name of a dealer who does.
