Associated Students of Boise State University
SAGA wins food contract

by Mary Strahs

Some people regret the change. Others say it’s time for a change. Whatever the sentiment, the student union has a new service contract. As of June 30, ARA Food Services’ five year contract will expire, with the food services being provided by SAGA Food Services. The decision was recently announced by the Boise State Food Service Contract Committee which is responsible for the current contract.

Under new state purchasing laws the state division of purchasing will be managing the bids submitted by the national food services. But Al Hooson, Assistant Vice-president for Financial Affairs, obtained special permission to allow the bidding to be handled on campus.

Composed of two representatives from Student Affairs, two representatives from the Student Union Building, and three from Food Service, the Food Service Contract Committee was created, with Hooson as chairman. On February 24, the committee opened up bids for management of the food service contract which includes the Snack Bar and dorm cafeterias which are both located in the BSU.

According to Hooson, “We bid exactly the same program that had been contracted for the previous five years. The program that was bid was the same and remarked that the difference in bids may be accounted to SAGA’s use of their employees.” SAGA utilizes their managerial staff in production considerably greater than what ARA does,” said Hooson. Also, “SAGA is able to produce the same number of meals (as ARA) with fewer employees.”

Ara bid second highest with SAGA coming in fifth highest, at least $40,000 less than ARA. SAGA’s in-state resident meal tickets were exactly the same and remarked that the difference in bids may be accounted to SAGA’s use of their employees. “SAGA utilizes their managerial staff in production considerably greater than what ARA does,” said Hooson. Also, “SAGA is able to produce the same number of meals (as ARA) with fewer employees.”

According to David Boerl, Dean William Keppler to BSU’s next president. “We just want to test the food for themselves. According to Dave Boerl, Assistant Director of Residential Life, the members made a point of suprising the food service director. Marotto said, “Personally speaking, I am of the opinion that SAGA posed a few tricks into their plan knowing that some representatives of BSU would be seeing them.” He added, “I am bazing this on only two things. One, our salesman have been to their accounts before and they’ve seen a major improvement in their program recently. Two, we have an awful lot of BSU kids here that say that our food is much better here.”

Hooten as well as committee members were concerned about ARA’s presently employed full-time staff losing their jobs when SAGA arrives. They placed, what Marotto called, an “unusual” clause in the contract. SAGA must rehire and retain these employees for a minimum of sixty days.

Several committee members viewed the high bid as speculative, that food services must conform to at Boise State.

Hooson’s bid was conservative and is accounted to SAGA’s use of their employees. “SAGA utiliz- ing their managerial staff in production considerably greater than what ARA does,” said Hooson. Also, “SAGA is able to produce the same number of meals (as ARA) with fewer employees.”

Hooson commented, “If there is a labor savings, fine, I’ll accept $10-15,000 per year. Let’s assume that we’re inefficient - though I’m not convinced that we are. Not $40,000 - you can’t do it.”

Because Marotto and the committee members were concerned about ARA’s presently employed full-time staff losing their jobs when SAGA arrives, they placed, what Marotto called, an “unusual” clause in the contract. SAGA must rehire and retain these employees for a minimum of sixty days.

Several committee members viewed the high bid as speculative, that food services must conform to at Boise State.

SAGA’s bid provides that a student can eat 10 or 14 meals out of the 30 meals provided. This is something I understand that the students requested a couple years ago, but ARA couldn’t provide it unless there was additional cost to the student.

Marotto referred to comments he had heard from students who were on campus five years ago when SAGA had BSU’s food service contract. He remarked, “I think a lot of kids forget how bad SAGA was.”

Biblical studies offers four classes

The Biblical Studies Center will be pre-registering students in three classes for next fall, April 3-14. The courses are: The book of Romans 11:40-12:30 SWF, History of the Bible 10:40-11:55 TTh, Joshua thru Nehemiah 7:00 p.m., T, New Testament Greek 5:30-6:45 MW.

The first three courses listed are accredited extension courses from the Oklahoma Christian College through the Biblical Studies Center with the tuition of $15.00 per course. The fourth course is offered through the Foreign Language Department in the Continuing Education program. The course is a biblical Studies course. Students are asked to contact the Biblical Studies Center at 324-2182 or 345-3784, or go by 1025 Belmont (one block south of the stadium) for pre-registration forms or information.

Hall seeks reasons for unrenewed contract

by Bob Humphrey

Bob Hall, director of BSU Information Services since its inception in 1968, was fired Wednesday afternoon after that his working contract would not be renewed for the 1978-79 academic year. Hall says he has requested a meeting with the interim BSU president Dr. Richard Bullington to “find out some of the reasons why his contract is discontinued.”

The meeting, according to Hall’s attorney, Bill Roden, is a “grieve procedure...we hope Dr. Bullington will explain some of the reasons for his action.”

Bullington, on the day he had informed Hall of his decision stated only that he had received an unfavorable evaluation of Hall’s performance in his position. Hall became the subject of some local controversy and the subject of the eruption of some of the BSU faculty when he publically criticized the tone of the memo written by his predecessor, Dean William Keppler to BSU administrators several weeks ago.

Bullington said if any meetings were to be held on the matter, it would probably be held Monday, “I wasn’t aware he had asked for the meeting. I was away (Friday) afternoon...the first I know about it was when I read it in the paper (Saturday) morning.”

One thing Hall will try to communicate during his meeting with Bullington is re-“of course,” said Bullington, “I have to know. My decision to do is...persuade the presi- dent, or the State Board of Education, that reinstatement would be the best remedy.”

Roden did not speculate on any “ultimate possibilities” of tak-

Pavilion outages several students

by Sally Thomas

"Every time I thought about it I got mad. A $50.00 fee for transportation and lodging in the biased way the whole thing was handled. I've decided to pop the recent recommendation made by the ASBSo Student Senate to build a $2 million dollar Pavilion using, student money. I've been asked for the funding."

"I mean, suppose I got a petition started when Don (Constantine) stopped by and said, 'hey, I'm heading downtown. I know a friend of his opposition to the winery. I'm going to make sure they have my petition and I'll call him up and see how the whole thing was done.'" Rand Martindale

"I popped my head around the door and said, 'Hey, I'm going downtown and I want to make sure they have my petition and I'll call him up and see how the whole thing was done.'" Rand Martindale

"I asked for another petition to take to a group of students who 'we would be one without the whole thing paying the tuition fee at BSU,' Martindale collects a 300 names," Martindale, certain that he could get forty signatures in less than two hours, asked for another petition to take to a group of students who "we would be one without the whole thing at BSU," he added, "We collected solid 300 names." Martindale plans to present the petition directly to the Student Senate. "I don't think they could ignore 30 signatures." After finding out concerned people would like to be represented, Martindale decided to present the petition directly to the Student Senate and be told that a representative would be recognized if a request was made. He now hopes to find hospital and travel, to Pocatello and present the petition before the Board.

The petition, printed below, simply asks that a new vote be taken on the funding of the pavilion. It also states that a new vote be taken on the funding of the pavilion. Martindale concluded that a new vote be taken on the funding of the pavilion. Martindale, convinced that they were hoping for 1,000 signatures before the State Board meeting in Pocatello next Friday, "I feel sure that we will not get the whole thing paid," he decided. "I've talked to so many people who don't agree with the whole thing."

Building & Structure.

"We, the undersigned students, do not feel that the recent vote taken on the construction of the pavilion was truly representative of student opinion and, by signing this petition, do condemn the methods employed in conducting the same survey. We request that another poll be taken in a professional unbiased manner." Martindale

"I still can't quite figure out how the majority pulled it off," Martindale wondered. He called the election committee to discuss how the winning committee, according to Martindale, was out of control. Most of the presentations were made to Friedman (nous) instead of to the majority of the presentation, according to Martindale. "Students there have no interest about nature. Also, Mom and Dad arc still footing the bill for them so those who care what it costs just as long as they get to see the whole concept." Martindale

"I think Mike Hoffman wants to make a splash before he goes out of office," he said. "He's out to make a name for himself so he chose to sink or swim on the petition issue. What's happening is, he is drowning the students."

Student Assistant position open

Applications for the position of Student Assistant to the Dean of Student Affairs and Special Services are being accepted for the 1978-79 school year. Qualified persons for the position are upper-class standing and shall conduct and supervise all official campus opinion polls. Any major is welcome. For further information and application forms, contact the Business Office. Deadline for applications is April 7, 1978.

The following positions are open in the ASBSo Student Government: Arbiter Editor, Personnel Selection (1), Election Board (1), Building & Structures (1), International Students (2), Financial Advisory Board (2), Maricriion (2), Judicial (2), and Senate.

Below is a brief job description of each of the jobs mentioned above positions:

Arbiter Editor: Put together weekly student newspaper. Any major is welcome. For further information contact the Business Office.

Personnel Selection: Responsible for interviewing applicants for all ASBSo committee positions and related boards; making recommendations to the ASBSo President. Any major is welcome.

Election Board: Shall conduct and supervise all elections in its jurisdiction and shall conduct and supervise all official campus opinion polls. Any major is welcome.

Building & Structure: Responsible for providing student input on all proposed changes to be made. Any major is welcome.

International Students: Establishes a body to meet the needs and problems of foreign students.

Financial Advisory Board: Shall be responsible for finding and placing students on various boards. Any major is welcome.

Maricriion Board: Shall be responsible for decisions regarding the sale of tickets for ASBSo financed. Any major is welcome.

Tri-Deltas announce new pledges

The Beta Chi chapter of Delta Delta Delta sorority of B.S.U. has announced the pledging of five new members. New pledges are: Lee Reiner, daughter of Mr. and Mrs. David Reiner, Hampton, Virginia; Chris Engstrom, daughter of Mr. and Mrs. Robert J. Engstrom, Mountain Home, Idaho; Pat Fairchild, daughter of Mr. and Mrs. George Sanford and Georgia Allen, daughter of Mr. and Mrs. Thomas Allen, both of Boise.

"The new pledges are becoming involved with many activities and exchanges along with a number of hours at the study table at the house." Martindale

Pavilion funds could be better spent

Academic excellence or just another junk factory? With a change in administration definitely scheduled for this coming August, critical issues are being debated at Boise State University. At the moment, the star-rated world of sports seems to have the edge. A recent vote by the BSU Student Senate to recommend to the State Board the construction of a $20 million Pavilion supérieur to this statement. The main function of the Pavilion would be to promote spectator sports, notably basketball, although it is designed to house concerts, indoor tennis courts, and somemeeting and class rooms. The Student Senate thus placed themselves on record as favoring a facility which would regularly benefit only a few.

McGuire, the lobbyist at BSU struggles on the tacit, a factor in obtaining accreditation, which thereby affects every campus. The committee concluded that such spaces were not reserved for the students at the most week-end hours. These surveyed asked for the library to keep lacrosse open to be open all day Sunday by a margin of more than 4 to 1. When contacted, a member of the library administration staff remarked that the situation called for more full-time and part-time workers, a request which is not available and a remedy that cannot be effected until at least the fall of '78.

Enrollments are declining at BSU and use must decrease. A recent study revealed that only one our of every four freshmen return for their second year. The picture at the senior level is no better. A recent study by the National Commission on Education revealed that only one out of every four freshmen return for their second year. The picture at the senior level is no better. A recent study by the National Commission on Education revealed that only one out of every four freshmen return for their second year.

Parking situation to be investigated

Letter to the Editor

A small committee composed of ABSSU Senate, Administration, and Means Committees decided to look into the parking rule of ticketing autos proper display of parking rules. The committee concluded that such spaces were not reserved for students at the most week-end hours. These surveyed asked for the library to keep lacrosse open to be open all day Sunday by a margin of more than 4 to 1. When contacted, a member of the library administration staff remarked that the situation called for more full-time and part-time workers, a request which is not available and a remedy that cannot be effected until at least the fall of '78.

Laetrile issue probed

by Mike Hughes

Hold it the phone. Separate the combatants and let them talk. This time there has been a fight like this since The Bible Blimp and Marcel Firpo took two out of three falls from The Masked Medicus. If the from this scuffle you were anybody but a philosopher you would have to admit that death is a matter of life and death, some of the encounters are justified, but the intensity of each side's vehemence towards the other borders on the frontier. The issue is amplyed up or in a language, Laetrile. Doctors despite the subspecies of right wingers would almost give their lives for it and the cancer patient, as usual, is the pattern pig of this story. Supporters laid the blow to the greatest invention in the history of the medical establishment's intrusion of the natural process, whereas they might have little or no familiarity with Laetrile in the violater and has also admitted parking rules. This Is due to the Shane Bengochca.

Laetrile is a substance relied on the fact that de Lylexico, at one time funneled problems. spaces now. Likewise, some of the parking rule of ticketing autos proper display of rules and signs and such spaces were not reserved for students at the most week-end hours. These surveyed asked for the library to keep lacrosse open to be open all day Sunday by a margin of more than 4 to 1. When contacted, a member of the library administration staff remarked that the situation called for more full-time and part-time workers, a request which is not available and a remedy that cannot be effected until at least the fall of '78.

A six-weeks' field school in geoarchaeology and prehistoric geography will be conducted by Boise State University June 26 through August 4.

The school, to be held at the Clover Creek Site, first major open site to be investigated on the Snake River Plain, is located at the confluence of Clover Creek and the Snake River among deposits of the Pleistocene Lake Bonneville flood of 18,000 to 13,000 years ago. The area consists of lake sediment, flood basalt and shield volcanoes. Towering granite mountains of the Idaho Batholith are to the north and south. The field school curriculum will include site and regional prehistoric geography, sampling and excavation techniques, geomorphology, palynology, historical and cultural geography.

Also included in the summer study will be local lava tube caves, animal jump sites, the Oregon trail, Snake River placer mining remains, and the Thousand Springs area.

Students can earn 4 to 8 credits for the course for $100 or $200 plus laboratory fee. Those interested in applying should contact Dr. Elton B. Bentley, Department of Geology and Geophysics, Boise State University, Boise, ID 83724. Enrollment is limited.

Student
Democrat
Laetrile
group formed

All students interested in forming a College Democrats group are urged to attend an organizational meeting on Thursday, April 5 at 5:30 in the Student Union Building. This meeting will determine the immediate direction for the group and set up fundamental goals.

continued from page 4

approximately $500 in this country. The black market tarnishes reputations and the clients who keep it going figure they could do just as well if the legal practitioners were set aside and interested parties allowed to seek out the substance, even if a doctor had to ultimately obtain it. The siege on the lawmakers is indeed earnest and one of the most vocal groups is the John Birch Society. No doubt about it, this is a strange nest of birds. Lost amid the uproar are the advocates of healthy living. Although not totally immune from turmoil, they would still rather adhere to Granny's old axiom, somewhat modified, which says, "An ounce of prevention is worth a pound of cure." Or substitute Laetrile at the end, whichever you prefer.

Dr. Tony Ash, Director of the Institute for Christian Studies at the University of Texas, Austin, will be at BSU for a one- night lecture and discussion Thursday, April 6, 7:30 p.m., in the Big Four Room of the SUB. He will be fielding questions and speaking to the claims the Bible makes about Christ and Christianity. Questions like the following will be discussed: "Is Christianity the 'opiate' of the masses?" "Does Christianity answer real problems or is it simply ritualized?" "Is Christianity an insult to true scholarship?"

Dr. Ash was raised in the northwest at Eugene, Oregon, attending the University of Oregon and in 1966, he moved from Florida State, the M.A. in the Old Testament from Southern Seminary and the Ph.D. in Church History from the University of Chicago. He has been teaching at the university level students in Biblical studies for 20 years and has spoken at many university and college campuses throughout the U.S.

C.K. Lewis is a favorite author of Dr. Ash so he plans to share some of the ideas which Lewis has left us. Since, Lewis was originally an agnostic with a highly sceptical mind toward Christianity his intellectual struggles are similar to the average university student. Lewis became a Christian but only with great reluctance. Ash identifies with that reluctance and, like Lewis, has been forced to be very reasonable in his approach to Christianity. The theme of Dr. Ash's lecture and discussion is "Making Christianity Believable." Dr. Ash appreciated very much the serious questions which many skeptics to Christianity have asked and feels that these questions must be addressed. He has devoted his life to helping university students in their honest pursuit for what is true.

During the day Friday, Dr. Ash will speak in different classes on campus. His weekend will be spent at a mountain retreat near Idaho City addressing a four state gathering of university students. Sponsoring these programs is the Biblical Studies Center Student Organization.

Field school offered for summer

A $20,000 grant from the U.S. Department of the Interior, Bureau of Land Management, helps support the project. The Clover Creek Site, first major open site to be investigated on the Snake River Plain, is located at the confluence of Clover Creek and the Snake River among deposits of the Pleistocene Lake Bonneville flood of 18,000 to 13,000 years ago. The area consists of lake sediment, flood basalt and shield volcanoes. Towering granite mountains of the Idaho Batholith are to the north and south.

Pavilion motion sent to Board of Education

by Mary Simha

In the March 28 meeting of the Student Senate the pavilion motion was discussed. The Events week was outlined, student committee appointments were made, and Reader's Theatre was allotted funds and the parking ticket situation was discussed.

ASB President Mike Hoffman proposed that the purpose of the pavilion motion to the senators. He called it a proposal, the pavilion to the senators agenda for the next meeting.

The motion requests that the board make a one-time fee increase for the purpose of raising monies to assist in the costs associated with a multipurpose pavilion. It further states that if additional monies are not available by April 1, 1980, that $5.00 fee for part-time and summer, would be discontinuated.

The next meeting of the State Board is scheduled for April 6 and 7 on the Idaho State University campus. Bill Kastin, Programs Board chairmen, outlined Special Events week which is slated for April 7-15. The week will include a number of films, a jazz concert, a Gong Show sponsored by the on-campus student groups, a field lecture and demonstration, a picnic at Julia Davis and a spring Billy party sponsored by the Intercollegiate Knights at Boise Creek.

The senators approved the following presidential appointments: Jay Pickett and Marty Weber-FAR, Mike Fisher-Student Advisory Committee, and Tom Bisbee-Intercollegiate Milk.

Reader's Theatre was allotted $500. In addition to the $500 already allotted, to help send five students to the International Intermontes Theatre Alliance Festival in April. The motion was proposed by Arts/Sciences Senator Pat Thompson, passed by a 10-3-2 vote.

The senators approved the senate-forming parking committee, Business Seminar Board, Downtown, clarified the ticketing situation for the senators. He announced that during several weeks ago cars parked backwards in the parking spaces on campus will not receive violations. According to Bengoecha, city hall invalidated all tickets given in the last couple of weeks to cars parked backwards. Any students wanting to know out of these tickets have been invalidated should contact city hall.

In other senate business, the Circle K Club constitution was approved by unanimous consent. Also, an amendment to the ARBITER budget which was proposed by Arts/Sciences Senator Mike Fisher was passed. The amendment dealt with the further specification of admissions and service awards.

Under emergency items, Senator Fisher introduced a motion to endorse a letter President Hoffman to Dr. Gerald Wallace which supported the students' right to demonstration.

The motion passed.

The next Senate meeting will be at 4:00 in the Senate Chambers in the second floor of the SUB. Student attendance and participation is encouraged.

by Sally Thomas  

The batter leaned into the pitch. A slow, lazy arc and the ball descended across the plate. There was the sound, a sharp crack, then he sprang from home plate and pounding down the base line, tried to beat the throw to first.

First base consisted of a cone, irregularly shaped hole, 4" to 6" deep. Considering the fact that second was a red T-shirt that slid whenever a runner did, that third was marked only by a slight mound in the grass, and that home plate measured at 6" by 10" with no sign of a batter's box, the hole for first caused no particular comment.

The ball bounded to short; scooping it up, she whirled and faced toward first. The runner was almost on, the ball came in off to the right, pulling her away. Snooki in the glove, a quick twist, I stepped into the hole with my left foot-the runner was out! But so was I.

I was surprised to find that my left leg had now been completely ripped from my body, so intense was the pain.

“Minut, guys.” After all, it was only the bottom of the third. What could it be? But it was no use. Whatever I’d done, I’d done worse. I’d been tossed off the field and into my bed. to spend the remainder of the week-with my leg and an ice pack.

Monday, I could hardly get out of bed; I couldn’t climb stairs, get in and out of cars. By evening, I couldn’t take any steps at all. Tuesday, it was almost as bad, so a friend suggested I get some therapy. Thinking nothing could be more painful than what I was already experiencing, I agreed. The thought of not being able to walk for only four or five days away, helped me up my mind.

“Hamstringing,” the therapist said. The only thing I knew about this was having my arm pulled from my shoulder. An old mae my father owned herself hamstringsowe and she sold her to the glue factory. I’m all for new experiences, but that seemed a little much. Fortunately, modern science has come up with better methods for dealing with the problem. Even so, I reminded the therapist that I was a baseball player, but you can’t be on the safe side.

The next thing I knew, I was lying on some sort of table thing and she was saying, “This will feel cold.”

I found out why. She was using a piece of ice, rubbing it along the sore muscle. Only seconds before perma-frost set in, the table. They were on a funny little machine sitting next to the table, she grabbed up two flat pads, slapped them on my leg, by now too numb to register much shock, and said, “This will feel cold.”

The woman has a real flair for understatement. When the machine went on, my leg began to jump up and down and I gave her an overview to screaming-just before I blacked out. And I came to, everything was under control.

At least, that’s what the therapist said. My treatment was over, I could go home, as far back Thursday. I was back on stretching exercises and heating pad application to get myself in shape. By the weekend Wednesday-before the day I’d missed my first class-I felt I could hardly notice. Five minutes later it seemed, it was Thursday.

“We’ll try something different,” she said cheerfully as I hobbled in the door. She could afford to be cheerful. She knew damn well how that “we” was going to be divided. Seconds later, I found myself seated in a pool of beautiful, warm water. This was sounding like it.

“Exercise that leg while you’re sitting there,” she commanded. “That will loosen up your muscles and tendons. That will help you to jump up and down. That’s it. It hurt, but the pool had its hands down over that table jazz. I was having a good time when she came over and said

“We’re ready now.”

Maybe it was ready, but I also knew how that “we” was divided and I liked it fine right where it was. The thought of practice, however, now only two days off, got me out of the pool. I followed the whirl-pool tub kind of thing.

“That look’s ok.” Thoughts of warm pies of water gently massaging my leg filled my mind as I stepped into Boise’s equivalent of the Siberian Sea. I knew why they kept the water moving-just to break up the ice. I figured, with the chill factor and all, I’m going to try out for second.

Handicapped people face discrimination  
by Jean King

“I should have known deaf children when I was in school...I should have known blind children and handicapped children as a child...why didn’t I? I’m 32 years old and I’ve just met my first person...that’s incredible...why...?” were comments overheard on the SUB recently.

These comments give rise to some unfortunate circumstance rather than a mark of shame, children and the children.

Watch that special tenderness and closeness between the very young and the very old or the very young and extremely handicapped. There is an unembarrassed curiosity which turns into a special tenderness and warmth. This only happens before the child has been indoctrinated into the concept of “different” and there separated from the rest of society to prove that they are...

"But children are so cruel!” you say. Oh! Or are they not naturally totally honest? Sadly enough, children learn the talent of cruelty from their elders.

Children deal with handicaps openly and honestly, much better than you could deal with the problem. Answers completely of blasphemy or implied “differentness” will bring on honest reaction from the children.

Unfortunately, children tend to limit groups and create society so closely associated with. If handicaps are accepted and dealt with, there is a new understanding of children...different in the same way...

I watch with special tenderness and closeness between the very young and the very old and the very young or extremely handicapped. There is an unembarrassed curiosity which turns into a special tenderness and warmth. This only happens before the child has been indoctrinated into the concept of “different”...therefore, somehow embarrassing and shameful.

Why separate these children during their school years? We have recourse teachers, why couldn’t we handle any special problems that arise? After all, this was a problem these problems would be longer be “special” but merely part of the routine.

Why not teach sighted children a little how they might better communicate with the blind and thereby understand them better? Why not teach hearing children a little sign language for the same reason.

Handicapped people face discrimination.

Children could learn about the compensations and alternatives they cripple oneself must employ simply to exist.

Instead of separating our children, they can do the same thing figuratively behind our backs, as we do in this area, why not take the side of more progressive schools in our country.

Two eastern U.S. schools (no accurate statistics available) have already begun with some pilot programs aimed at assimilating some handicapped children in regular school systems. There are problems of course, but not nearly as many as children today solve in our society we would have to believe.

True, many things have been done and are being done so make life for the handicapped a little bit easier. These things are appreciated I am sure. But to date most of these innovations are concerned entirely with the physical aspects. How are you going to teach intellectually and culturally?

How about art for the blind? Art that could be designed that were almost entirely tactile experiences. What a delight it

The technology for transcribing music into colors has long been with us. Why not that experience easily and readily available to the public so that the deaf and the hearing alike partake of the full delights of music.

Why not develop methods of hand dancing or rhythm games for people who do not have the use of their legs? This could enable all people to express their physical movement in rhythm(s).

Some suggestions only scratch the surface of what could be done to enrich the lives of so-called “handicapped” and “normal” peoples. That such suggestions would promote love and understanding between all the world’s peoples, that such proposals would restore the future of the world’s children, is hard to imagine. (There seems to be a plat against anything of their...)

How very much could be done?

Think about it, my friends, think about it.
Students, faculty members honored at Banquet

Thirty graduating students and thirty faculty members were chosen to be honored at the First Annual Academic Awards Banquet last Friday evening at the Hillcrest Country Club. The event was sponsored by the Alumni Association with James "Dyle" Nally, Alumni Director, and Dr. Bill Mech, Honors Program Director as coordinating chairmen.

"This is the first time that there has been a straight forward recognition of our academic efforts," explained Dr. Mech. Students were chosen not only on the basis of high grade point but also "on the nature of their course selection and their total overall academic performance." In turn each student provided the name of the one faculty member who contributed most to his academic success. These faculty members were invited to the dinner as guests of the president of the university, to be honored along with the student scholars.

Dr. Richard Johnson from Loyola University in New Orleans was guest speaker. Emcee for the evening was Dyle Nally, Alumni Director. Students being honored at the banquet were:

Marilyn Shuler-Public Administration
Katherine DeLong-Business Administration
Lorenc Quick-Elementary Education
Michael Hoffman-Theatre Arts
Kathleen Wiegers-Math
Silvia Loomis-Elementary Education
L. Kaye Bean-English sec. Ed.
Doug Sutherland-Accounting
Gary Ray-Math
Mary Spofford-Nursing
Sharon Brubaker-Biology
Larry Johnson-Economics, Accounting
Samantha Silva-History

Honored Faculty included:
Richard Mabbutt-Political Science
Gary Moncrief-Political Science
Peter Wilson-Business Administration
E. John Dahlberg-Education
Carolyn Kay Kendall-Political Science
Emma Waller-English
Peter Lichtenstein-Economics
Martin Scheyer-Sociology
Donald Smith-Psychology
Francis Terry-History
Ken Hollombeugh-Geology
Elaine Long-Home Economics
Jerald Miller-Accounting
Yoso Takeda-Math
Roger Allen-Finance
John Mitchell-Economics
Richard Payne-Economics
Richard Starks-Chemistry
Willard Overguard-Political Science
William Godfrey-Marketing
Harry Fritchman-Zoology
Brenda Lyons-Nursing
William Stilman-Political Science
Jay King-English
Donald Holley-Economics
Michael Cleveland-Music
Carroll Lambert-Early Childhood Education
William Mech-Math
Robert Hughes-Math

Portner wins state award

Each year the Idaho Federation of Music Clubs sponsors the State Compton Composition Contest. This year the award has been won by Boise State Senior-music student Jean Portner. Her winning composition, "Suite for Piano," will be premiered at the State IFMC Convention later this year.

In addition to this award, Jean has also won the Music Teachers National Association Northwest Division audition on guitar. This placement allows her to continue in the National Division auditions held in Chicago on April 3rd. Jean is a guitar student of George Thompson and composition student of J. Wallis Bratt.

Portner wins state award

Stump Trivia Rat

by Mark C. Beough

1) What was the name of Amos 'n' Andy's taxi company?
2) In the film "Summer of '42" Hermie and Oscie spent one evening at the movies trying to put the make on a couple of girls. Identify the movie they were supposedly watching and the actor and actress who had leads in that movie.
3) What musical instruments open The Diamonds' version of the song "Little Darlin"?
4) What actor played the role of Mr. Waverly on the television show "The Man from U.N.C.L.E."?
5) What was the only film Ethel Barrymore made with her brothers?
6) Who said: "There are no atheists in the foxholes."
7) On what day were the Rascals Groovin'?
8) What television family lived at 623 East 68th Street, New York City?
9) Name the pitcher who served up Roger Maris's sixty-first homerun in 1961.
10) According to Hal, the computer from 2001: A Space Odyssey, where was he designed and assembled?

ARE YOU PLANNING ON OFFERING A COURSE ON MIND READING THIS TERM?

WELL, I FIGURED THE WAY OUR TEST WAS WORDED TODAY, WE'D BETTER LEARN HOW TO READ YOUR MIND!

ARE YOU BLIND AND CAN'T SEE I'VE GOTTEN A MILLION BUCKS THE WAY SHE THINKS SHE'S WORTH SO MUCH?!

WHAT MAKES YOU THINK SHE'S WORTH SO MUCH?

BY LOOKING AT HER, JUST KNOW I CAN TELL.

I'M TOLD THAT I'VE MADE A MILLION BUCKS.

WHAT'S SO SPECIAL ABOUT HER?

WOULD YOU LOOK AT THAT GIRL! HELLO DARLIN', I THINK I'M IN LOVE.

NO... WHY DO YOU ASK?

I'LL COMMIT A FELONY HAVE A LONG DRAWN OUT TRIAL, BE FOUND GUILTY, AND WRITE A BOOK. THAT'S A SURE MILLION!!

Beekeeping benefits told

by Bob Gear

Advice can either be good or bad, but from a beekeeper like Phil Canning, a helpful hint to recently received is certainly welcomed. In fact, that was what he did with his advice. It was then he began his endeavor with one hive. That same year his apory was increased by 29 hives. But because of his work schedule at the old Boise Payette Lumber Company, he had to give them up. He didn't attempt to keep bees until his retirement in 1957.

During 1976 there were 400 hives in his apiary. But because of his age he has since sold all but 20. And as he put it, "I'm too old to handle them, so I'll just live with 20." Phil is 85 years old. Canning, 709 Warm Springs Ave., said there is money to be made as a beekeeper. "But to really make a lot of money, you should have 1,000 hives. For a part-time beekeeper, 30 hives will bring a good profit. I can remember one instance in 1974.

That year I got 200 pounds of honey from one hive. It was a good summer. Conditions were right for a good honey flow." According to Canning, was has been selling for $1.90 a pound, and not too long ago it only brought $5 to 50 cents a pound. That price for a 60 pound can of honey is about $30. There are classes of bees: the queens, workers, and drones. The queen's role is to lay eggs, and it is not unusual for her to lay one to two thousand a day.

The worker bees are also female, but not capable of laying fertile eggs. When a worker is first born, she is required to clean empty cells, help build comb, care for the young bees, and also help store the nectar that is brought in by other worker bees. Then when the workers are ten days old, they begin going out every day to bring back pollen and nectar.

At the end of the honey flow, when the worker's wings are worn and she can no longer fulfill her duties around the hive, she is often carried by other bees to an area miles away from the hive. There she is left to die. To us this may seem cruel, but to the bees it is essential to their way of life. When the queen lays unfertilized eggs, a drone is produced. Their only purpose in life is to mate with the queen. If a drone does survive the mating season, then at the close of the honey-gathering season he is driven out of the hive. Normally no provisions are made to board him during the winter months.

But let's take a closer look at this city of bees. Within the hive there are from 30,000 to 70,000 bees. There is no mayor, city manager or city council. Supervisors aren't needed because the bees instinctively know what's required of them. Guard duty is protect the honey supply within the hive. An example, a mid-westerner beekeeper reported that one day he observed his bees being attacked by a swarm of bumblebees. As the bumblebees began to attack, wave after wave of Italian bees flew forward to meet the invaders. This combat continued until the bumblebees were driven away. The ground around the hives resembled a battlefield. Dead bumblebees and Italian bees literally covered the ground. Even though the bumblebees did dwarf the Italian bees, this seemed to make no difference to the smaller bees. The average bee flies anywhere from a mile-and-a-half to collect pollen and nectar. It uses its long tongue to gather nectar, and its hind legs to carry pollen. The pollen is stored in baskets located on the bees legs. The nectar brought in by the bees is similar to sweetened water. Once it has been stored in comb by the bees, it is converted into honey. It now consists of what is known as invert sugar, or about equal parts of levulose and dextrose. Honey also consists of dextrose, levulose and mineral elements such as iron, lime, sodium sulphur, magnesia and phosphoric acid.

At least 50 agricultural crops either depend on honey for production, or yield more abundantly when bees are present. Quite often, bees are sold to fruit growers to pollinate their fields, gardens and orchards.

Glade lance in Bee Culture is an excellent magazine on beekeeping, the magazine's address is 223 West Liberty Street, Medlmln, Ohio 44556. If you write and ask for a sample copy, they will probably be more than happy to send you one. Beekeeping is for the young and old, rich and poor. What is more, beekeeping is something you would enjoy doing.

Idaho civic ballet to perform in SPEC

Boise, Idaho, March 29, 1978. The Idaho Civic Ballet will present their spring 1978 performance April 7 and 8, 8:15 p.m. at the BSU Special Events Center. Tickets for this exciting evening of dance arc $4.00 for adults and $2.00 for students and at the door the nights of the performance.

The Idaho Civic Ballet was founded two years ago to promote knowledge and appreciation of dance and to give professional performance opportunities to talent in this young company. Company members include Andrijeski, Doris Ann Asmus, Lisa Holtz, Pamela Leavitt, Andrea Mansigh, Cindy Shults, Duane Stippich, and Sharon Braubach. The Ballet will also perform two years ago to promote knowledge and appreciation of dance and to provide young Idaho dancers an opportunity to perform before the general public in an entertaining and professional atmosphere. This season has seen the Ballet performing with the Boise Civic Opera and in Caldwell and Mountain Home.

The consistency high level of talent in this young company has already been recognized by several other northwest area ballet companies. Former members of the Civic Ballet are presently performing with the San Francisco Ballet and the First Chamber Dance Group in Seattle. Every member of this year's company has received scholarships to prestigious Northwest summer dance workshops and several have been approched this year to perform professionally with other companies. This fledgling dance troupe offers Idaho residents an opportunity to see the high standards of their young performers and to enjoy an evening of professional dance.

Sharon Braubach has been chosen as the recipient of the $250.00 Joan E. Richardson Memorial Scholarship awarded by the Tri-Delta sorority. Sharon is a pre-med student and is currently working as a registered Nurse in St. Alphonsus Hospital. Her extra-curricular activities include volunteer work for the Idaho Lung Association and the American Cancer Society.
by Richard Smith

Until three weeks ago most American would have had no more idea of what Paraquat is than they would have had what kumquats and loquats are. Then on March 12 HEW Secretary Joseph Califano announced that about 20% of the marijuana coming from Mexico was super saturated with Paraquat and that smoking large amounts of it could cause lung damage. Suddenly every youth who smokes pot and whose parents were struck with paranoia, and the only group now that doesn't act like they know something about it is the Customs Service, supervises it.

How did all this come about? It started in 1975 when the Mexican government started spraying poppies and then marijuana with Paraquat, an aquatic weed killer. The U.S. government claims that Mexico has performed this operation all by itself. However, the National Organization for the Reform of Marijuana Laws (NORML) has filed suit against four federal agencies or departments for supporting Mexico in its spraying. It would not be in Mexico's economic self-interest to have marijuana super saturated with Paraquat and that smoking large amounts of it could cause lung damage. Suddenly every youth who smokes pot and whose parents were struck with paranoia, and the only group now that doesn't act like they know something about it is the Customs Service, supervises it.

The state and local governments on the contamination levels of the local marijuana supply is, as the evidence of Paraquat the idea of NORML that there would be little practical use in trying to distinguish between the two. People who may be worries about their pot should not forget that for 55 and one gram in an envelope, they could be found by the analysis at ChemPharm Re- research Foundation/ 1844 Bay Road, Palo Alto, CA 94303 (415) 322-9941. Put on an air mask, and you can go to jail and use that to find the results when you call or 3 or 4 weeks later. We can't say if they are correct, but we can say that NORML is right and the state government are supporting Mexico in its spraying. It would not be in Mexico's economic self-interest to have marijuana super saturated with Paraquat and that smoking large amounts of it could cause lung damage. Suddenly every youth who smokes pot and whose parents were struck with paranoia, and the only group now that doesn't act like they know something about it is the Customs Service, supervises it.

The suit by NORML claims that the Mexican government should have been charged with an environmental crime. The government claims that Mexico has performed this operation all by itself. However, the National Organization for the Reform of Marijuana Laws (NORML) has filed suit against four federal agencies or departments for supporting Mexico in its spraying. It would not be in Mexico's economic self-interest to have marijuana super saturated with Paraquat and that smoking large amounts of it could cause lung damage. Suddenly every youth who smokes pot and whose parents were struck with paranoia, and the only group now that doesn't act like they know something about it is the Customs Service, supervises it.

Students get to meet candidates

During the next two weeks students will have the opportunity to meet the gubernatorial candidates and question them about issues of concern to student. Candidates who fling the stage will be kept at the back of the stage, and one and again. Terry Hanck was very interested in the admission. Terry Hanck was very interested in the admission. Terry Hanck was very interested in the admission. Terry Hanck was very interested in the admission.

The first time I listened to the album Head East, I was in an altogether rotten mood, and was occupied with other matters. The impression I got was that this was very, very average rock and roll.

But reason, along with intuition and the realization that KSBU radio is featuring the record in a special giveaway event, persuaded me to give the album a good, hard second listen. The thing grew on me. After all, was an authentic Southern rock outfit that I heard. I became further convinced that here, at last, was an authentic collection of distinctly above average hard rock.

Maybe the basis for my first-glance censure was a shaming comparison to Head East's brilliant earlier album, Flat as a Pancake. That lp showed Head East as an emerging, inventive Midwest group that was willing to put lyrical and vitally above repetitive riffs and pounding backbeats. Here was a group that was about to take a stand for honest music within solid rock.

So it was with a little disappointment that I heard Head East steer more toward the heavy metal routine that stigmatizes the genre. Nevertheless, as I said, it was far above average. The vitality is still there, most manifest in the strident vocals of John Schlitt continued on page 16.
About fifty-eight years ago, in Grangeview, Idaho, someone stood at the banks of the Snake River and thought to himself, “Wouldn’t it be nice to be able to cross without rowing?”

Several tons of steel and concrete later, his dream became a reality. At first used for rail traffic and later for trucks and cars, the bridge served its purpose well, providing the residents of Grangeview much easier access to points north.

As with most of man’s creations, however, the bridge began showing the wear and tear of continual use. Automobiles got faster, traffic got heavier, and people began suggesting that two lanes would be better than one. A wider, stronger bridge was built, and the aged steel structure was closed to traffic. Like a birth notice and an epitaph, two simple signs tell the bridge’s story.

Though its wooden rails are weathered and broken, its girders rusted, and its asphalt surface crumbled, the old bridge is not without value. The warm afternoon sun, a sandwich in his tacklebox, and a fishing hole away from the snagging obstacles along the riverbank—what more could a young fisherman ask? If nothing else, the picturesque old bridge stands as a memorial to those who dreamed of something better on the other side, and of a better way to reach it.

Aged, yet still of value. Oh, that we might learn that truth and apply it to our fellowman!

follow all day in the Quad
I'm trying to update myself.

by Sally Thomas

Elise Balch pays the $5.00, but Boise State University gets the bargain.

How else can the following statement be explained? "Four thousand people signed up for community schools in Boise last fall, and I can't see why they didn't come to BSU where they would get so much more."

Or the fact that Ms. Balch has been continuously attending BSU since 1952, not to get any special diploma but for her own pleasure and, as she says, "I'm trying to update myself."

As a part of declining college enrollments, Ms. Balch staunchly upholds the value of education even though she has not yet mastered Spanish, the first course in which she enrolled way back in '32. As a tutor at the Learning Center, she said, "teaching English to a Spanish-speaking lady, but that's as close to learning Spanish as I've gotten."

Actually, Ms. Balch was no stranger to the college scene prior to coming to BSU. She graduated in 1934 from a Florida College, completing her degree in three years. She lived with her parents on the edge of campus. "I can't say I've really been off campus. "I can't think of one thing we (the association) did that was worthwhile," she chuckled.

To supplement the family income, Ms. Balch wrote a column for the local paper, "Campus Chatter," and was paid $5.00 a week for her anecdotes. "Five dollars was a lot of money then," she remembers. She feels a need today for closer communication between the community and the campus saying, "Many things are going on here that people never knew about." She majored in international relations, taking a lot of history and foreign languages. College hasn't changed all that much, though, because after four years of college French, all she can now say is "Merci bien."

The biggest thing toward team teaching today, she notes, and toward combining many different disciplines. Education seems much more rounded to her than it once was. "I don't know that that is necessarily good," she states. "When they dilute History, for example, enough to include all humanities, I wonder if they are doing the students any good."

Another trend in education is toward having a good time. "For me," Ms. Balch asserts, "the pure subject is a good time. School does not have to be diluted with extras as it is now from the first grade all the way through."

What is education for Ms. Balch? "Something that enables you to reach your highest potential, that enables you to function at the best level possible," she replies. But education, good education, is copious-ent of the fact that not everyone has the same potential. And Ms. Balch agrees. "If you're not good at anything, forget about going to school and go to work."

Her solution to the weighty problems of grades? She takes all her classes on an audit basis. "I wanted to be friends and equal with my professors," she explained. "And I have the feeling that if they didn't have to grade me, I would have the advantage of being friends."

She also believes she can "integrate what I'm learning better if I'm not under the pressure."

On the other hand, she believes grades to be absolutely essential. "A teacher has no other way to judge you against others."

For the student, grades are not "representative of character or potential, but are input in what you are gifted for." To Ms. Balch, a D in math wouldn't mean so much if her talents lie elsewhere and she would simply spend her time working on those things in which she is talented. Not all of Ms. Balch's life has centered around education, however. For three years, she worked for the Associated Press,medTelegram. Her job? She was the Brooklyn Society Editor. Then, too, while her sons were young, she worked as a substitute teacher. "But I ran into the "empty nest" syndrome," she explains as part of the reason for her years of volunteer work. For seven years, she served on the Library Board, during which time many libraries around the state were established, not to mention the Idaho State Library itself. She also worked for three years with the State Historical Society which concerns itself with the museum. But the work didn't satisfy her and, in 1960, she ran for the State Legislature. Her platform was built around making Boise Junior College a state supported, four-year school. "That was the first time this had been publicly talked about," she said happily. She didn't win the election, but the victory did begin introducing legislation which was directly responsible for making JUC into Boise State College.

"As an individual, I feel I was responsible for this change taking place," she said. "But the time was also right." She understands that a seed has to first be planted then left to grow, the delight of the faculty and of his mother. "That spirit seems to have gone in the last few years," she reflected. "The campus is much more a pleasant place to be without all that militant tension." She added, "I don't know what made the students feel that way."

As interesting as Ms. Balch's life seems, her choice of classes is more so. But she has no explanation for each choice. Last summer, she went to London with BSU's theatre group and became fond of Del Corbett, the group's leader. Naturally, this last fall she enrolled in Intro to Drama. "Also," she added, "I have a 15 year old grandson who is interested in theatre and in singing." Her enrollment in Animal Behavior coincides with her son's interest in veterinary medicine. "I've always liked animals," she defended her own interest, "but I never thought about what made them grow."

Elise Balch

Mr. Balch takes a long view of the role of women in education—very thorough, she feels, "and I've gotten burned a few times."

Education is "something that enables you to reach your highest potential."

The $5.00? About five years ago, the State Board of Education decided that persons 60 years of age and older could attend any state-supported college by paying a tuition fee of only $5.00. Ms. Balch totally bashes about saying so. And the $5.00? About five years ago, the State Board of Education decided that persons 60 years of age and older could attend any state-supported college by paying a tuition fee of only $5.00. Ms. Balch totally bashes about saying so. But Ms. Balch refuses to pay $18-$20 for a book. Instead she goes to the library, reads the text. After buying the book, the professor doesn't use it," she explains, "and I've gotten burned a few times."

So the bargain is BSU's. The university gets an interested and interesting student who is obviously dedicated to the life of the mind and who isn't a bit bashful about saying so. And the $5.00? About five years ago, the State Board of Education decided that persons 60 years of age and older could attend any state-supported college by paying a tuition fee of only $5.00. Ms. Balch totally bashes about saying so. And the $5.00? Television journalist turn to writing books

by Terry McGuire

You may have noticed a concerted effort on the part of television journalists to not only pepper their names across the video waves, but also the book shelves of the U.S. Let’s call this C.B.S., not the tube conglomerate, though most of the clubs are principles at the network, but the initial could well stand for Correspondent Book Saturation. Dan Rather momentarily sidestepped the tears of the video wars to write his book; as did the Kahl brothers, Marvin and Bernard. Then Marvin teamed with ABC colleague Ted Koppel for a sparkling piece of fiction about high level intrigue—that’s a story in itself, so the name escapes me. Edwin Newman of NBC...nevermind.

One cardinal rule: always turn to the older statesman of video review and one whose realities are far more engaging and beyond the wildest imagination of even this break-neck crew of high projectors. Daniel Schorr. Call his offering, simply, Clearing the Air. For fun, we’ll subtitle it: Clearing My Mind in the Process.

As an added note of delight, watch how the author accounts C.I.A. attempts to discredit Fidel Castro—you’ll love the part about placing a certain nasty little substance in the Cuban’s Havanas, which in turn were supposed to make his head fall out. Is this any way to turn the man’s people against him? Honestly, this is a way for an agency of the grand U.S. of A. to behave? Schorr doesn’t think so and couldn’t even find a reliable mafia to add extra gloom to the Agency’s tarnished reputation.

Keep pace with Schorr and this book is quite enjoyable. If you can’t, turn to page 62 and chuckle at the expense of the C.I.A. Held on though, ’till C.I.A. Hold’ on though, ’till Schorr can’t, turn to page 22.

For the younger set, the name might stir dim memories for Schorr has spent more time in the news on the past three years, than reporting it. Some conc’s hush-hush ba-

Tom Scott, jazz musician par excellence appears at the Ada Lounge Monday, April 10, at 8 p.m. Scott and his band, the L.A. Express have performed with such artists as Joel Mitchell and Bob Dylan. Tickets are $4 for students and $5.50 general admission. Outlets are Budget Tapes, Red and Blue Music Shack and the SUB Info Booth.

Grant Teaff to visit BSU campus

Boise State University in conjunction with the Athletics Association for Christ movement (Fellowship of Christian Athletes) will be hosting Grant Teaff, the Head Coach of Baylor University, to our campus on April 18, 1978 for an area wide Christian athletes meeting for athletes, coaches and interested persons who would like to hear our outstanding speaker. The meeting will be held in the Boise State Student Union Building at 8:00 p.m.

Teaff, in six years as the Bruin boss, has brought belief back to the Baylor faithful. His accomplishments both on and off the gridiron are truly remarkable. National and Southwest Conference Coach of the year, the first Southwest Conference title at the school in 50 years, head coach of four major all-star games, and even an honorary doctorate degree are just a few of the highlights earned by Grant Teaff.

Baylor's head coach is a tremendous speaker and his manner of motivating youngsters to play beyond their capabilities makes him one of the best "doctors" in college football today. He has a knack of healing sick football programs. Take the last nine seasons he has served as a head coach at a major college for instance. At Angelo State University, where he served three years prior to becoming a Baylor Bear, he turned a non-winner with a 7-43-1 record into a three-time nationally ranked unit.

At Baylor, Teaff-coached teams have accomplished even more. In the three seasons prior to Teaff's arrival, the Bears had won just three out of 31 games. Since the Bears have posted a 30-33-3 record. Included in that total, however, is a Southwest Conference Title in 1974, the Bears have been nationally ranked four times during that period. When you consider Baylor plays the nation's best Saturday after Saturday, the record is even more impressive.

The job turned in by Teaff and his staff in '77 was especially satisfying. The Baylor schedule featured five teams that played in post-season bowl games and seven teams ranked in the nation's top ten. To add to the scenarios, 19 different Bruin players missed one or most contests with an injury. The biggest injury came in the season opener when junior All-American noseguard Gary Don Johnson suffered a knee injury that required surgery. Instead of pulling out, Teaff felt an obligation to the players he had recruited and stayed three more seasons until he was able to get grants-in-aid restored.

The final nominees for the Wade Trophy Player of the Year Award and the STAYFREE Coach of the Year Award on their respective levels were announced recently following preliminary voting. This Women in Sports Program, sponsored by STAYFREE, which also includes the Service of Women in Sports Awards and the Wade Trophy Awards Dinner is the first of its kind in women's sports.

The final nominees for the Wade Trophy, designed to honor the top female collegiate player in the country were comprised after voting by 100 coaches, writers, and Sports Information Directors from throughout the country. Each MAW region was represented by 10 committee members and from their votes, the top three players from each region were selected. It is from this list of the final thirty that one player will be selected as the recipient of this prestigious-Wade Trophy Award.

Jim Simpson comes to BSU

BOISE, IDAHO—Jim Simpson, veteran NBC sportscaster, will be the featured speaker Wednesday, May 3, at the Boise State University Letterman's Banquet.

The banquet, which honors all Bronco lettermen in all sports, will begin at 7:07 p.m. at the Rodeway Inn Convention Center in Boise. The annual affair is co-sponsored by the Bronco Athletics Association and KTVB-Channel 7 in Boise.

Making the announcement of Simpson's selection was E.D. Coppola, banquet chairman, "We are very pleased to have such a fine personality and speaker as Jim Simpson come to Boise for our banquet. I am sure he will be a great attraction," Coppola said.

A limited number of tickets for the banquet will be on sale April 4 in the Bronco Athletic Association office at the University Center on the BSU campus. Tickets are $7.50 per person.

Simpson, who has reported on virtually the entire spectrum of athletic endeavor since he began his sportscasting career, holds the distinction of being the first television announcer to broadcast live, via satellite, from Japan to the United States. His historic broadcast from the Far East occurred during NBC's coverage of the 1964 Tokyo Olympics. Simpson returned to the Orient to cover the 1972 Winter Olympics at Sapporo, Japan. He has covered a total of nine Olympics beginning in Helsinki, Finland, in 1952.

In his 30 years as a sportscaster, Simpson has covered National Football League games, major League Baseball contests, PGA tournaments, the Wimbledon Open Tennis tournament, World Championship Tour's events, and the NCAA basketball championships.

BOISE, ID—Rebuilding in the offensive and defensive trenches will be the major objectives for Boise State Bronco head football coach Jim Criner and his staff as the Broncos began their spring football session Wednesday, March 29.

The spring sessions will be for a total of 20 days and will culminate with the annual Alumni Game a week later. (6-0, 190) Concord, Ca.; Renny berths include juniors Carl Allen from Pocatello, Id. Those new center Mark Villano (6'2, 230) Exception will be the Blue & White Intrasquad game Saturday, April 22 at 10 a.m. and the Alumni Game a week later.

The only returning starter in the offensive line is honorable mention All American senior Buckner (6-2, 185) Chicago, Ill.; Bill Roberts (6-2, 230) Bakersfield, Ca.; and Bob Markovich (6-2½, 235) San Leandro, Ca.

"Offensively we will be developing a passing attack that will spread the ball out more. We'll throw to more receivers so we can keep the defense off-balance. We want to be more unpredictable than last year," he said.

Senior Lonnie Hughes (6-3, 185) Riverside, NY, is being moved to split end to help offset the loss of All American Terry Holtz. Boise sophomore Mike Brady (5-10, 175) Taosoma, Wa.

"With the exception of Cezad Minter, we'll be teaching all the running backs to play both positions," Criner said. Minter (5-11, 180), sophomore from Boise will be joined in the backfield by sophomore David Hughes (6-1, 210) Honolulu; junior Fred Goodo (5-10, 185) Sacramento, Ca. and senior James Jackson (5-11, 195) Birmingham, Al.

Another major strength for the Broncos going into the spring session with the loss of Terry Buckner (6-2, 185) San Bernadino, Ca., and senior Dee Pickett (6-1, 190) Caldwell, Id. will be battling for the starting quarterback post.

"Our players are big, needs-experienced," he added.
