Keiser: No Early Tenure

by Diane Barr
Arditor Staff

Boise State University President John Keiser stated that he anticipated no changes in the tenure system until at least the beginning of the next academic year. Keiser went on to restate his position on the entire faculty tenure issue. He stated that his tenure was supposed to be rare at the University; the acceptance of early tenure applications was an effort to set higher standards for faculty positions. Keiser felt that his policy of non-acceptance of early tenure applications for faculty members that qualify for tenure by the regular method but cannot receive such status in their departments because of the lack of an open tenure faculty position, Keiser stated that the University and the State of Idaho have agreed to allow the faculty member in question to stay on in a probationary status until a tenure position becomes available.

Keiser went on to state that he felt the faculty should provide some type of system that would indicate when a decision would be reached when two or more faculty members were eligible for the same tenure slot.

As for changes in the entire tenure system, Keiser outlined some of his preferences for such change. He stated that he would like to see the implementation of two different lengths of probationary periods; one for faculty with previous experience and the other for faculty without. There is also a need for a graduated quota system that would be smaller at the school and departmental levels according to Keiser. Then, too, a university-wide committee on promotion and tenure would also be an advantage to BSU.

At this point, however, Keiser wishes to facilitate more campus-wide discussion of the entire tenure issue before any firm proposals for change are presented to the State Board of Education for consideration.

Overall, Keiser sees the implementation of more rigid standards for that granting of tenure as essential to the long-range survival of the tenure system itself.

New School Adds Strength

The Committee on the proposed School of Public Affairs met for the second time on October 17 and voted to expand its membership to include an additional faculty member and student from each of the five departments originally appointed to the committee by BSU President John Keiser.

The new voting members will be selected during the interim period prior to the next committee meeting which is scheduled for the 15th of October.

According to Keiser, the School of Public Affairs originated after a consideration of a variety of proposals to reorganize the School of Arts and Sciences. Keiser stated that he was indeed interested in more than just reorganization. He wants the proposed School to utilize all the public facilities and agencies available in a state capital. The creation of the school is also an attempt to better serve the area community as well.

Keiser stated that the future emphasis of the school will be different from the approach the School of Business takes with regard to public issues. Indeed, Keiser sees the creation of a new School of Public Affairs as a way to eventually strengthen the departments involved as well as increase campus awareness of public issues and services.

A man afflicted with cerebral palsy eases out of his wheelchair onto a mat in the weight room where the instructor assists him in stretching out. A student with an injured left leg is doing special exercises to rebuild muscles in the leg. Another student, paralyzed from the waist down, is working his arms on the weight machines.

According to Steve Wallace, the instructor, this is a regular scene in the Adaptive Physical Education class at Boise State. Adaptive Physical Education class at Boise State. Adaptive Physical Education (PE) class was originally intended for students injured in regular P.E. classes, according to Wallace. They could exercise until the injured healed, Wallace said, then return to the original class so they didn't lose credits.

Bry Nichol, a student assistant, said injured students still attend the class. "We usually have quite a few people with knee problems," said Nichol.

"Adaptive Physical Education is offered twice a week, Monday and Wednesday 2:45 to 3:45, and Tuesday and Thursday 2:45 to 3:45. One credit is offered for the class, according to Wallace, but it can be taken for credit as many semesters as the student needs it."

Contemporary and experimental collage and printers' ink works by Boise native James Steehr, art, photography and crafts instructor at Hillside Junior High School is on display at the Boise State University Gallery through Nov. 1. Also being shown are landscapes, portraits, and still lifes by Oliver Peterson, winner of the 1976 Fourth Annual Goverment's Award in Art, and 10-year chairman of the art department of Idaho College, Reburg. The BSU Gallery in the Liberal Arts Building is open weekdays from 9 a.m. to 4:30 p.m.

"Some students come to both classes," said Nichol, "because on Tuesday and Thursday they can swim. The guys really like to swim those days because the lifeguards are a couple of the prettiest girls on campus."

Wallace took over the Adaptive P.E. class seven years ago when he first came to Boise State, and has built up the program since then. "Just the last two or three years it's been getting going and really catching on," said Wallace, "it's probably its dynamic personality. The class had only one student the first semester. Seven years ago, according to Wallace, continued to page 5.
ORGANIZATIONAL NEWS

After weeks of putting it all together the BSU Travel Club is now ready to open its doors to all. The framework has been set and the first couple of trips are in the planning, what is needed now are those students of Boise State who want to travel, and learn something too. Possible sites for up coming trips include Yellowstone in the winter, Reno, Carson City, and other surrounding sites. Nothing is absolute so ideas are still more than welcome. The first open meeting for all is Wednesday, 34 at 5:30 in the Ada Lounge.

Friday, October 26, after the Ralph Nader lecture, an organizational meeting for Idaho Student Public Interest Research Group is planned. The place and time will be announced at the lecture. ISPRI is being created at BSU and if it is well accepted will expand state wide to BSU and if it is. So be in on the very ground this is going to happen.

The BSU Young Republicans will be holding their first organizational meeting Thursday, November 1st, at 4:00 pm in the Tele-Phone Room of the SUB. Up coming events will be discussed. For more information contact Catherine Waddell, president of the Young Republicans.

The Organization of Student Social Workers will be meeting with President John Kaiser Friday, October 26, from 12:30-1:30, in the Science Education Building, room 723. Issues to be discussed are the problems of alcoholic, drug, and other individuals.

ASBSU NEWS

At the ASBSU Senate meeting on October 17, $3440 were designated to various Boise State departments and associations. KBSU was given $460 for a training convention in Los Angeles, the Communication Department received $250, the Ethnic Relations Program $150, Public Relations $250, and the Cultural Affairs Committee $250. The money was allocated from the Student Affairs Fund and is to be used for the upcoming basketball season.

Students who are supporting the "Hugh Panther Lectures" who donated $100 and matching funds of another $100. The Programs Board was given $100 for an addition to their budget.

ASBSU Vice President Gustavesen appointed the following Senators to University Committees: Broadcasting Board -David Huntington Publications Advisory Board -Both Sommers and Young Student Handbook Committee -Chairperson -Mary Lou Virgil Academic Affairs Committee -Bev Nichols

Due to lack of Revenues, BSU will be left without a pep band for the upcoming basketball season. The Athletic Department has requested any interested student that would like to perform, to contact Bob Rosenthal (385-1513) or Ron Stephenson (385-1513) for more information.

EDUCATIONAL NEWS

Learn about the variety of careers available in professional nursing at Nurse Careers Night October 29 at 7:00 pm in the BSU Science Education Building, room 163. No registration is required. A tour of the nursing facilities will be available in the evening's schedule.

Nothing is absolute so ideas are still more than welcome. The first open meeting for all is Wednesday, 34 at 5:30 in the Ada Lounge.

The arrival of mid-semester brings students the added pressure of mid-term exams, Homecoming week, and whereabouts. But before suicidal depression sets in, remember only 61 days till Christmas!
Senate Behind the Scenes

Many Ad Hoc committees have been formed for problems that didn't directly fit into a standing committee. This year's policy is to keep those standing committees busy and actively solving problems so only two Ad Hoc committees have been formed. The Pavilion issue has been placed in an Ad Hoc committee and is responsible for choosing a board of governors to oversee all Pavilion affairs. The second Ad Hoc committee is in charge of the BSU Day Care Center.

Student Activities Director Christa Box was one of the many BSU faculty and staff members available to welcome the family & friends of university students during BSU's "Family Day". Photo by Berne Jackson

Students are urged to bring their concerns and problems to the Senate as both are of interest to ASBSU Senators.

Boise State's first Family Day celebration in recent years was a moderate success with a wide number of parents, family and friends of BSU students participating in the events sponsored for the October 20 occasion.

Letha Mercy, executive assistant to BSU President John Keiser, was responsible for coordinating the events which included open houses sponsored by various fraternities, sororities, dormitories and other organizations; a presentation on the soon to be constructed multi-purpose pavilion and a festive dinner served to students and friends in the Student Union Building.

According to Mercy, the Family Day tradition was rekindled in an effort to give the families of students an opportunity to experience the kind of life their student has at BSU.

The department of Teacher Education and Librarianship accounts for the bulk of the program and the faculty within the School of Education. This department is the most useful to the teacher education student since it gives the training and qualifications for certification to teach elementary or secondary education. For secondary teacher education, students participate in an unique program where the School of Education cooperates with departments across the university. The major in the Arts and Sciences and also participate in the secondary teacher educational program in Education.

The department of Health, Physical Education and Recreation provides teacher education in the field of Physical Education. They prepare students to teach physical education in both elementary and secondary schools as well as providing a wide variety of physical education classes for any university student.

The department of Psychology also resides in the School of Education and is a department "tremendously supportive of the furtherance of teacher education," according to Dr. Hart. Psychology majors usually prepare to go on to graduate school rather than train to teach.

The School also has the Counseling and Testing Service, a program serving all university students. It provides testing services and counseling for the personal, social and vocational needs of the individual. The service staffs four full-time counselors who are available at no charge to BSU students. "Boise State is extremely fortunate" to have this service Dr. Hart said, "I am tremendously proud of their operation."

Recently two accreditation teams visited the School of Education to

CONTINUED TO PAGE 5
School
CONTINUED FROM PAGE 4
review the teacher education pro-
gram. The National Council for
Accreditation of Teacher Educa-
tion (NCATE) reviewed the
school’s programs the first of this
month and the Professional Stan-
dard Commission of the State of
Idaho visited the school last week.
Both teams gave “very positive” reactions to the school’s program according to Dean Hart, although there were no official results given.
The national team reviewed the
school’s program for accreditation,
since all programs, except the
School of Education and the
School of Arts and Sciences “truly
impressed” both accreditation
teams. Dr. Hart stated that the
school found “real cooperation through-
out the university’ and that there
is “not just a system of cooperation.”
The results of the visits will be
available in several months.
Changes in the School of Edu-
cation since Boise State became
an university have been in develop-
ing a graduate program. The
school has a Masters program in
elementary education which has
emphasized in early childhood,
special education, reading, or for
those who do not want to specialize
in any particular field, content
enrichment. Graduate students
may also enter into a Masters of
Secondary Education where the
graduates enroll in 18 credits in
his or her major, plus six credits in
teacher education and another six
in either of the two fields.
Additional options for under-
graduate students will soon be
added to the school’s program.
People interested in teaching, but
not in a school situation, will soon
be able to take classes directed
towards them. This program will
focus on serving in an educational
capacity in an institution, such as
the WACA, an industry, or govern-
ment.
Students now have the advan-
tage of a recently developed
teaching program that has a
bilingual/multicultural setting.
This program offers a “trai-ning
environment we can make, particu-
larly within the Treasure
Valley,” Dr. Hart said.
Other optional fields in physical
education are currently being de-
dsigned on the Masters level. These
options would be in physical
education but without a teaching
emphasis, sports medicine is
being discussed as one of the
options. However, the details have
not been worked out for these
programs.
Soon, a Masters program in
consulting will be offered for
those wanting to work in
schooling, industry, communities or
agencies. Currently there are no
programs offered for individuals
interested in this field in this area
in the state.
Concerning the 1 percent initia-
tive, Dr. Hart said that the School of
Education still retains the high
quality of education but if further
reductions in the budget are
made, certain programs or a loss
of quality will result.
The last cut resulted in a loss of
elementary education faculty
member. This has meant some
“retrofitting on the part of the
faculty to cover that vacancy.” Dr.
Hart believes that the faculty is
“clearest and quickest” to influence
quality and has worked hard to retain current positions.
The effect of the cut has also
been felt in supplies and equip-
ment, but the school is still
“surviving.” Dr. Hart senses an
effect on the faculty moral be-
cause of the insecurity of the
future, however, “to the faculty’s
credit they have not let it influence
their performance at all.”
A wide variety of internships are
available through the School of
Education. All teacher education
students must teach in a school
setting for a varying length of
time, usually in Boise or Meridian
schools. Dr. Hart said that there
are currently enough student
teaching positions for all teacher
education students.
The department of psychology
also has internships available in
psychologically related fields.
Interns assist professionals in
some way to learn more about the
profession, although they do not
themselves do the work, which
requires a graduate degree.

and now there are about ten
students in each class.
“Part of the requirement of
the class is to listen to Stan’s
terrible jokes,” said Nichol.
During winter weather the stu-
dents can play basketball, volley-
ball, soccer, or whatever they like,
said Wallace. According to
Nichol, “the people just come in
to stretch.”
“Me need more student help,”
said Nichol, “sometimes we have
four people in a wheelchair and
only two who can handle it.”
According to Wallace, men are
needed to help the male students
get ready for swimming in the
Tuesdays and Thursdays class. The
party could then swim on their
own for the rest of the hour.
A new option for under-
graduates is to teach tennis,
volleyball, and basketball at Boise
State.

PCP Becomes a Favorite

(CPS) - The worst drug problem on this campus, "Vvanyte Tipton of Southern Arkansas University asserted last spring, "is Angel Dust. It's not liquor or marijuana or anything! Everybody's talking about Angel Dust now. And this is a small, conservative southern campus. If it's big here, I can't imagine what it's like on other campuses."

Despite unpredictable reactions, bad street reviews, and potentially lethal dangers, Angel Dust -or PCP- does appear to be growing in popularity on campuses. National statistics suggest the drug is most popular in Los Angeles, Detroit, Washington, D.C., Chicago and New York. Yet everything about the drug makes its use difficult to trace. School officials can only speculate about on-campus use, and, because of the mystery, treating PCP overdose cases is getting harder.

"The problem with PCP," warns Dr. Mark Schuckil of the La Jolla, Ca., Veterans Administration hospital, "is that the dose that makes you spacey is near the dose that makes you dead."

While the debate unfolds, the problem, according to hospital, coroner, and drug abuse program reports, seems to be getting worse. The Drug Enforcement Agency (DEA) has also noticed an increase in use. The DEA has closed 24 PCP labs so far this year, and confiscated 1.4 million doses. A DEA spokesman says more drug users are turning to PCP because of spot shortages of other drugs, because most laws regulating PCP use are relatively lenient, and because PCP is easy to manufacture.

Most doctors involved in PCP treatment, however, are worried that the statistics don't suggest just how bad the PCP problem is.

One reason statistics may not accurately reflect the dimensions of the problem is that PCP is sold under at least 30 names, ranging from Angel Dust to Hog to Rocket Fuel to Surf to Spentollo to Amotlo. Pushers often represent it, moreover, as other substances.

In fact, Dr. Schuckil says that relatively few drug users use PCP knowingly, since PCP is typically mixed with other drugs like LSD, cocaine, and marijuana.

Consequently, PCP overdoses are frequently diagnosed as other kinds of overdoses, and sometimes even as symptoms of psychological disorders, which PCP reactions can emulate. The lack of medical knowledge about the drug users from the drug's episodic bouts of popularity.

It was initially developed by the Detroit-based Parke-Davis drug manufacturing firm as an anesthetic. It showed up on the streets of San Francisco a few years later, but developed a bad reputation and dropped out of wide use in about 1968. It briefly reappeared under the street name of "hog" in New York City before dying out again.

It was back in general use again last 1977, when NIDA found that nearly 14 percent of the 16-to-25-year-olds admitted for emergency psychological treatment had used PCP. Similarly, a study of 19 PCP-related deaths in California revealed that might have been from "they may misinterpret why the victims died. Eleven of them, for example, died of drowning, one while in a shower.

Yet death from a PCP overdose is uncommon, Shuckilt says, as long as there's adequate medical treatment. Since the symptoms of PCP overdose are not unlike those of other drug overdoses, as well as of schizophrenia, moreover, administering the correct treatment can just be a matter of luck. Emergency room personnel rarely test patients for PCP overdose.

Developing a test and a treatment was a major reason for the controversial NIDA proposal to give PCP to humans.

One reason humans take the drug out of the laboratory, Schuckilt says, is that PCP is "a dissociative anesthetic." Asked to explain what that meant, Shuckilt said, "It disconnects your mind from your body."

Are they living in the same world?

Outwardly, Episcopalians are pretty steeped in tradition. But in their relations with the world about them, they're "very" and "very" of a series presented by

KCU Canterbury Club

The Student organization of Christian Unions, study and socializing. KCU meets weekly at the Episcopal Student Center.

10th & Grove Downtown

Thurs 8 p.m.-1 a.m. Fri & Sat from 8 p.m. until 4 a.m.
Students interested in obtaining a voice in public policy decisions in Idaho are urged to attend an organizational meeting of the Idaho Public Interest Research Group (ID-PIRG) following the Ralph Nader Lecture on October 26.

The Idaho PIRG organization anticipates being statewide and combining the resources of every college and university in Idaho. The meeting place will be announced at the lecture. All interested students are urged to attend. For more information contact the student coordinator, Bob Irwin, at Idaho Consumer Affaire, 343-2356.

The problem with most groups of this nature has been the lack of continuity. What will make Idaho PIRG unique is that it is to hire a staff of professionals to help in their activities. Students hiring professionals to work for them is not a new concept. This idea has been implemented by other states. The first was in Oregon back in 1971, when students created the Oregon Students Public Interest Research Group (OSPIRG). They were soon followed by students in Minnesota with the Minnesota Public Interest Research Group (MPIRG). Eight years later these groups are still operating, and they have been followed by many others.

The areas of concern for Idaho PIRG are broad. Ralph Nader outlines some of the areas for action: "Student investigators working with professionals can begin to probe deeply into the activities of city and state administrative agencies to ascertain whether they are carrying out their legislative mandates. They can scrutinize the market place for evidence of unfair trade practices. They can examine factory conditions to uncover occupational health or safety hazards. They can study taxation systems to determine equitability. They can act as monitors to guard against discrimination on grounds of race, sex, or creed. Finally, they will stand ready to act in new areas affecting the general public as those areas emerge." Two such areas include environmental and nuclear concerns.

The proposed financing of Idaho ISPIRG will have to come from the students in the form of a national fee increase according to Irwin. Unlike the Pavillion, students who do not support the PIRG concept will not be forced to support it. Idaho PIRG may set up a fund after each registration period to give refunds to those who desire it. The proposed fee increase will be in the neighborhood of $3.00. A final determination of funding will be made at a later date.

Those interested in ISPIRG should attend the Ralph Nader Lecture, Friday evening in the BSU gym. ISPIRG is open to conservative and liberal students alike, as this will insure operating in the public interest as opposed to the private interest.

**Chicken Takes Over**

(Campus Digest News Service)

In the battle of the fast food chains, the chicken is now king because while the price of chicken is dropping the price of beef soars.

Kentucky Fried Chicken, Church's and other fast-food chains that specialize in chicken report increases, or a leveling off of unit sales and real growth. Although gasoline problems have caused an overall drop in the general public's disposable income. Two such areas include environmental and nuclear concerns. The Agriculture Department reports that wholesale poultry prices are now 40 cents a pound, a drop of 16 per cent compared to prices a year ago. Wholesale beef prices are about $1.71 a pound, a rise of 18 per cent.

A spokesman for Church's says that a quarter-pound of fried chicken costs about half the price of a quarter-pound hamburger. To Kentucky Fried's "Fedora," the chicken chains are taking business from the hamburger restaurants.

A spokesman for the Wendy's hamburger chain says that although the chains have a value advantage, "Americans are burger eaters and we'll get them back when they get used to the high prices."

JouHN-PaULm IN CHICAGO

OUTRIDER
by Garry Willis

John-Paul in Chicago

Students live, not by test alone nor by every work that proceedeth forth from the professorial mouth, but life is to be found in the congregating of students and the relating of ideas between members of that congregation. The rush from a last class called "Letters to the Editor," stands empty much of the time. Yet, this section is specifically designed for the reader to air ideas: gripes and praise, or whatever. This section provides one way for you to exchange of ideas. The subject matter in this section should be of fairly broad interest and approached in such a way as to relate to the major reason for the paper's existence...it is unfortunate for a paper of the Arbiter's quality is...The staff struggles...goals, but don't know what they are or why they are called goals. Settled goals seem to remove some of the mystery or romance from life...
For some time I have been meaning to respond to a statement made in the Arbiter concerning student government. The great editor (name unknown) commented that no serious student would get involved in student government. There wasn't much elaboration and I was left wondering what constituted a "serious student" and why such people didn't want to become involved in student government.

At the risk of presenting a strawman's argument, I'm going to make some assumptions about what the author meant and then proceed with a contention of my own.

"Serious student" I'll define as someone whose first priority is student government. A serious student, I will also assume, comments that no serious student see becoming involved in student government as a hindrance to achieving the highest grade point average (GPA) possible. Outside interests such as student government would be looked upon as a distraction which could only hinder performance. That represents by first assumption.

My second one: not only does the serious student see becoming involved in student government as a hindrance to achieving the high GPA, but also she/s/he views it as a worthless endeavor, worthless because student government has no meaningful purpose; it lacks validity.

Now, finally, comes my response. The "serious student" syndrome is symptomatic of the "serious citizen", or "serious businessperson." Those individuals afflicted operate from an ethnocentric philosophy—everything revolves around her/his personal needs and desires. It's an all-out effort to better oneself and "to hell with others." As long as the decisions made by government are not too outrageous or confining, then who cares—at least the decisions fall as they may.

But what happens when those decisions begin to seriously detract from the individual's self-aggrandizement? What then, when she/he is forced to break from the comforts of a private world to discover that the decision-making process has been far removed; in fact, it has been adjusted completely out of their reach. Now the decisions, regardless of predictability, must be accepted. The point is that diverting oneself from the policy-making process leaves it open to a select few who might possess that slowly acquired power.

Whether it be student government or national government, individuals have the prerogative to participate in molding the decisions which daily affect the lives of their peers; too many, however, neglect to exercise that option—which is truly unfortunate. When people shun an opportunity to become involved in the decision-making process, they only help to entrench the medium of control they have over their lives.

Logic would seem to dictate that even if it is to only protect one's self-interest, participation in decisions should be the highest priority for any "serious person." Sincerely, Mike Craven, ABBU President

Letters continued from page 8

I took upon ourselves the task of investigating the school curriculum in order to protect our children from the influence of those who would teach them such things as the process by which a person matures from a child into an adult, or even how the child himself arrived into this world. Your work has just begun. Please, on behalf of our youth, do not stop your crusade at this point.

If knowledge of such things as the function of the sperm, ovum, and vas deferens leads to experimentation on the part of our innocent youth, since those courses have been eliminated from the curriculum of many of the schools, we can now expect a decrease in the number of pregnant teen-age girls and the number of illegitimate babies, and in the incidence of venereal diseases.

Following the same line of thought, I would suggest you now turn your attention to other concerns right in the schools. Your next step, may I suggest that you investigate the vocational education courses. I do not believe that mechanics should be taught to young boys if those boys learn how to dismantle and repair a car, they will be able to steal a parked car more readily.

Next, I would ask that you investigate the debate courses taught in schools. There are especially harmful. If you young people are going to think for themselves, if they are taught the art of persuasion, we can logically expect a steady increase in the number of glib, fast-talking con artists.

Then, how about the physical education classes? There is a potential danger in developing the bodies of our youth. If they have strong, well-disciplined bodies, they can more readily scale walls, squeeze through tight places and otherwise use their strength and skills for such activities as illegal entry, etc. Track should be eliminated from all physical education courses. It enables the youths to run faster and could lead to an increase of "hit and run" crimes, such as purse-snatching. If this same youth has also been taught the fine art of wrestling, it definitely an unsafe place to send our children. Please continue the work that you have begun.

Perhaps with persistence, you can "turn back the clock" and return our school system to the very basics upon which it began, nothing.

Louise Moore

Editor, The Arbiter:

I am presently living in Washington State. I am from Hollywood, California. And I have the opportunity to live and attend school at Boise State. I would like to correspond and get to know as many possible "friends" before deciding. I am 20 years old, 6'1", slim, black and handsome. My interests vary but are mainly fashion design, people, nature, traveling, sports, all kinds of music, roller skating, disc jockey, art, poetry, photography, and just having fun out of life and its desires. This is important to me as I have no correspondence at this time. I will answer all.

Valle Vista, Va. 22182
Texas Students Slip Through Loophole to Get Jobless Benefits

(CPS) - Julia W. was lucky last year. She got one of the relatively few teaching assistantships offered in the University of Texas government department. She earned $2,500 and finished her doctoral work before her luck ran out. Soon she came across a job in her chosen profession. But Julia did something about it: she applied for unemployment compensation, naming the University of Texas as her most recent employer. Moreover, she got her aid.

She was just one of an untold number of former work-study students in the state who were trying to slip through a big loophole in a 1976 Texas law that made all state employees eligible for unemployment benefits. Since the law passed, students have claimed that university work-study programs made them state employees.

"These work-study students receive their salaries through state warrants," explains Pat Joiner of Texas Employment Commission, "and the state pays unemployment tax on them as employees."

The University of Texas has now sued to close the loophole. As official employer, the university must match the unemployment insurance a former work-study student gets.

The university's argument, according to its brief, is that only students can get work-study benefits, and the school doesn't fire students. Whether they drop out or graduate, they leave their jobs voluntarily, and thus are not eligible for jobless benefits. University officials won't speak about the suit. But one explained that the stakes could be raised if more former students heard about the possibility of unemployment benefits.

Until the case is settled, the state unemployment commission continues to approve applications from former work-study students, who thus far have generally been former graduate students. Joiner knows "this has been a working hardship on the University of Texas, and we don't want to do that. Just let the courts give us one decision."

He says that a 1976 Attorney General's interpretation had it that everyone who is paid through a state warrant is a state employee, and is therefore eligible for unemployment benefits under the new law.

That means that students at all state schools are eligible, though the University of Texas is the only one to have legally challenged the law so far.

Joiner has tried to make the university pay work-study students by some other method, but "they say it's not possible."

Law School Minority Enrollment Is Down

(CPS) The first law school classes to be fully processed under strictures of the U.S. Supreme Court's decision, 1978 Bakke decision seem to be a lot whiter than last year's first year students.

A number of law schools have reported significant declines in the representation of minority first-year students. The number of Chicago law students at George Washington University law school, for example, fell from nine to four this year. Harvard reported 10 minority students, as compared with 98 last year.

First-year law classes at Northeastern University, Berkeley, the University of Pennsylvania, and New York University, among others, included as few as eight.

The major exceptions to the trend were the University of Chicago law school, where there were nearly twice as many black first-year students than ever this year, but a lower percentage came to register. Penn admissions director Arnold J. Miller says that he was just a case of law schools competing for fewer minority students.

"There was an overall drop in the number of minority applications to law schools, which means that Harvard had to search a little further, and dig a little. When they do, it's a game of musical chairs, and it goes on down the line. But everyone has to dig deeper, or get fewer enrolled."

Cross-Country Team Places Fourth

Paul Rossi
Arbiter Staff

Boise State’s women’s cross-country team traveled to Pocatello for the Idaho State Invitational Saturday. BSU finished fourth overall with 89 points behind Wyoming, first, 30; Utah, second, 54; and Idaho State, third, 76. Jody Smith avenged last week’s loss to the Utah star who edged Jody out of first in the BSU Open last week at Ann invasion. Smith placed third in 19:56 thereby topping the 6th place Dalebout (20:53). Juanita Neff, 19:39, and Laura Anderson, 19:09, both from Division I Wyoming, finished one and two respectively.

Judy Smith, Jody’s twin, was keeping pace with her sister until a fall at the top of the first hill shook her up briefly. Even with the fall she was able to recover enough to finish 13th overall.

The weather was no help either as it was cold, windy, and rainy. “It was a real challenge and the girls handled it very well,” said head coach Basil Dahlstrom.

Other finishers for Boise State were Gail Smith (24), Cindy Bisler (25), Cherry Gardner (27), Beth Rupprecht (30), Terry Johnston (32), Lisa Pugliese (34), and Lisa Johnston (35).

All the races the girls have had up until now become meaningless on Nov. 3 when the team will travel to Spokane for the regionals.

The top three teams and the top fifteen individual athletes from that meet will move on to the Nationals to be held in Florida this year.

University Arbiter

Usual seem to be as much the rule as the exception in Division I-AA and after seven weeks of play there are no of late undefeated teams left. This is good and bad—good, in that it might almost assure that the official Big Sky champion, be in Reno or Montana State, will get into the playoffs if it goes undefeated from here on.

Bad, in that it doesn’t help football prognosticators one bit. Ah, me — Northern Arizona has been chopped down twice in the last two weeks, Gambling overcame no. 2 Jackson State after a tailoring early season, Florida A&M suffered its first loss to prideful Tennessee State, et al. Why is it that Boise State seems to do its best during seasons when it’s ineligible for post-season play? This would have been a marvelous opportunity for the Broncos to vault into the No. 1 spot—

Sour grapes. At any rate, only one game of the titanic struggle and class appears on the scene this week, and it may be less of an excitement than it promises, Eastern Kentucky, frustrated after a gutting 86-6 deficit of cross-state rival Vanderbilt, prepares to let it all loose against smart-aleck Murray State, and claim the undisputed Ohio Valley league lead.

In fact, for the rest of the season the only game in I-AA where both contenders will have a shot at a league title appears to be BSU’s Nov. 10 game at Reno. All the rest look to be decided by current league leaders and occasional spoilers.

But I digress — Idaho State takes a one-week hiatus to prepare for the Weber State Wildcats, who will face Boise State this Saturday. Considering Weber’s recent dumping of NAU the Broncos secondary best beware of Bill Kelly and Co. From all appearances, BSU’s Moving Company can take care of its own challenges.

Elsewhere, Idaho, flushed with a victory over Montana, travels to MSU flushed with a more significant victory over NAU the Lumberjacks themselves have a second goal in Northern Colorado after losing a national No. 4 rank and any chance for a Big Sky title Montana hosts a Vaillpack desperate for victory and a second straight I-AA playoff spot.

Facts and Fugue: Last Week: 6-3 (miscounted) cumulative: 28-201, .701 (yes) holding on.
Big Sky: 30-6, .833 (and I’m definitely not favoring Weber this week)

This weekend the Broncos, who are 7-6-1 for the season, travel to Ashland, Oregon for the Southern Oregon Invitational. BSU play the University of California-Davis, the University of Pacific, and Oregon College of Education.

This Week’s Curiosities:
Boise State State 26, Weber State 14
Northern Arizona 27, Idaho 20 (in)
Sewanee 7, College of Education 9

November 25, Nevada State 21, Montana 10
Northern Arizona 42, Northern Colorado 17

November 26, Portland State 21, Texas Southern 3 (OU)

Broncos Down CWU
by Mike Riplinger
Arbiter Staff

Tory Allen and Sue Schenk led the Boise State Women’s Field Hockey team as they romped over Central Washington University and University of Idaho last weekend. BSU did however suffer a surprise loss at the hands of Division I powerhouse, Washington State, in a close 1-4 game. Allen and Schenk knocked in two goals apiece and Joan Pittau added another as the Broncos blew out Central Washington 5-1. The highlight of the weekend was the win over Idaho, who the Broncos barely beat 2-1 in a double overtime thriller earlier this season. BSU continued the great defense that they’ve been demonstrating the past few weeks, shutting-out the Vandals. After a scoreless first half, BSU took it to the Idaho Vandals and whipped them 3-0, as Allen, Schenk, and Pittau each scored a goal. Allen also contributed two assists.

The first half was even, but we came out first up in the second half and scored early, which took

the Vandals by surprise,” said Coach Jayne Van Wassenhove. “After that score, we got our momentum up and became more and more aggressive as time went on.”

In the VBU game, the Broncos gave an excellent defensive effort, but were unable to score against the tough Cougars.

“Our defense looked very good against VBU, but their defense simply played a little better,” said Van Wassenhove. “Many aspects of our game went well for us and I’m happy with the girls efforts considering they played a Division I team,” she added.

“Our progress to this point in the season is encouraging. We hope to keep improving right up to regionals,” Van Wassenhove said. The regional qualifying tournament where only the top placer is eligible for the national, will be held in Eugene, Oregon on Nov. 9-10.

This weekend the Broncos, who are 7-6-1 for the season, travel to Ashland, Oregon for the Southern Oregon Invitational, BSU play the University of California-Davis, the University of Pacific, and Oregon College of Education.
Broncos Embarrass Bengals

by Mike Riplinger
Arbiter Staff

Boise State started slow but umuted it on in the second half to blow out Idaho State and earn a 44-0 win over the winless Bengals at Bronco Stadium Saturday night.

Behind the illusive running of Cedric Minter and the determined play of the defense, the Broncos routed the Bengals to keep Idaho State's perfect record intact 0-7.

"It was a tough game for us because Idaho State presented some problems in the first half. They were playing very good defense and made it hard for us to block them," said Coach Jim Criner. "We made some adjustments the second half and really came out after them."

Minter slashed through the Bengals defense for 141 yards on 17 carries and two touchdowns. His first TD came on a 69-yard burst late in the first quarter to put the Broncos on the scoreboard. Minter, only a junior, is 57 yards short of breaking the all-time Big Sky rushing record. "Former Weber State star Lee White holds the record, rushing for 3,062 yards between 1965-67."

"Last year we didn't have near the balance between our rushing attack and our passing attack as we do this year so we had to use Cedric more," said Criner of his All-American tailback. "But he's running better than ever, and with Tony Zahner healthy and sharing time with Cedric, we have a better rushing attack."

Zahner ran for two touchdowns and 98 yards on only 7 tries for an amazing 14 Yard per carry.

"Williams' key interception after only two plays had elapsed into the second half gave us a great emotional lift and started us rolling," said Criner.

"I am very happy with the play of our defense," said Criner. "They came up with the big plays whenever we needed them."

"Williams' key interception after only two plays had elapsed into the second half gave us a great emotional lift and started us rolling," said Criner.

"Scott led the defense with 14 tackles. "There is no question that he'll play somewhere in the pros, he's a great ballplayer," added Criner.

With wins over their in-state rivals, BSU has won the annual Gem State Trophy, which goes to the State Champion of Idaho. The award will be presented to BSU at the weekly BAA luncheon, Monday, Oct. 29 at noon in the Student Union Building.

"The Bronco's next opponent will be the Weber State Wildcats in Ogden, Utah. The Wildcats, 1-6 for the season, picked up their only win when they upset previously unbeaten Northern Arizona 34-10 two weeks ago in Ogden."

"It will take an outstanding effort for us to beat Weber because they have an excellent defense and play very well at home," said Criner. "They also have a big play man in quarterback Otto Ribary and has 74 tackles so far this year. He is helped out by sophomore linebacker, Danny Rich, who leads the team with 75 tackles."

Ribary, an exceptional wide receiver, is a first team All-Big Sky returnee and has 74 tackles so far this year. He is helped out by sophomore linebacker, Danny Rich, who leads the team with 75 tackles.

"It will take an outstanding effort for us to beat Weber because they have an excellent defense and play very well at home," said Criner. "They also have a big play man in quarterback Otto Ribary and has 74 tackles so far this year. He is helped out by sophomore linebacker, Danny Rich, who leads the team with 75 tackles."

TOURNEY PREPS

(UA)—After a successful weekend in which the BSU women’s volleyball team won two out of three league matches, the Bronco women now have more than a week and four matches to prepare for the intimate league qualifying tournament for regional play.

Coach Darlene Bailey said the squad, now 9-7 on the season, will need work on offense to fare well in the tournament in Ellensburg, Washington Nov 2-3.

BSU will have the opportunity to tune up with matches against smaller college opponents, Valleytech of Spokane and Northwest Nazarene at Nampa this Friday and Saturday, and College of Southern Idaho and Treasure Valley CC at home Tuesday night.

The Broncos faced the University of Portland 15-9, 13-15, 17-15 after coming from a 5-11 deficit in the third game; then took VUU 15-10, 15-9, Friday. The next day, Central Washington beat BSU in a tough match, 15-3, 15-17, 15-8.

Bailey noted, “Once again our defense was strong. Our offense improved but still needs work... Our passing broke down in the match against CUW” she said.

Boise State Hosts Meet

(Boise)—The Boise State cross country team hosts its only meet of the fall this Saturday, Oct. 29, at 11 a.m. The BSU Invitational, a 10,000 meter run at Ann Morrison Park, features the Broncos, Idaho State, Weber State and Eastern Washington.

“I do expect our runners to do very well in this 10,000 meter race,” BSU cross country coach Ed Jacoby said. “It will be excellent competition and a good tune-up before our Big Sky Conference meet in Provo on Nov. 18th.”

Jacoby said his team needs to get on the right track following a disappointing run at the BYU Invitational held in Heber City this past Friday. On a short 10,000 meter course, the University of Texas, El Paso was the winner with 27 points. Boise State finished 8th in the 11 team field.

Karl Knapp was BSU’s top finisher with a 30:14 clocking. Knapp finished 30th overall and was followed by teammates Dave Shaffer, 30:18, Howard Conley, 30:19, Tom Rothenberger, 30:45 and Dave Blackburn. UEP’s Suleiman Nyamby won the race in 28:00.5.

“I’m not pleased with our performance,” Jacoby said. “We need improvement and I know this group is capable of more than what we’ve shown to date. They also know it. We will definitely run better the next time out.”

Special Note

(UA) The deadline for filing rosters for men’s basketball and men’s volleyball has been moved up to this Thursday, October 28th.

For further information contact Ross Vaughn ext. 1131.
Bronco Cagers Begin Practice

The Boise State University basketball team began practice Monday, Oct. 15, in preparation for the 1979-80 season. The first Bronco game is Nov. 30 at Santa Clara.

BSU head basketball coach Butch Connor, in his seventh season at the helm, has 13 players on the '79-'80 roster. Connor, only one of two active coaches in the Big Sky to have won league titles (1975-76), is optimistic that his team will improve on last year's 11-15 mark.

"I felt last season we were hurt putting a relatively experienced team on the floor, and I anticipate great things from our guards. We should find the leadership and outside scoring punch we've needed," Connor said.

Returning to the frontline is 6-9 junior center Dave Richardson, an honorable mention All-Big Sky choice last season. Joining him will be returning starter John Anderson, a 6-9 senior forward, 6-7 sophomore forward Ruben Widerson, and 6-10 junior forward Larry McKinney, who is coming off a redshirt year. 6-9 John Mayfield will be playing in his senior year as a forward and back-up center. Two 6-6 freshmen, Derek Anderson and Randy Brown join the program this fall.

Tom Loy, a 6-6 senior will see time at both forward and guard. Two 6-3 guards, senior Lonnie Hughes and junior Rodger Bates are back, with three new players in the backcourt. Junior Dave Williams (6-1), Scot Ludwig (6-2) and Ken Copeland (6-4) bring experience and ability to the backcourt.

BSU Does it with KFXD Super 58 and XDFM 95
"Gamma Rays"
by Kim Dalrymple
Arbiter Staff

The Idaho Public Theatre's production of Paul Zindel's "The Effect of Gamma Rays on Man-in-the-Moon Marigolds" opens Oct. 25 for a two week run at the WQCA. The title of the play is a metaphor for Beatrice, a destitute widow who copes with failure by withdrawing into herself, and the effects, both good and bad, that she has on her teen-aged daughter, Tillie and Ruth. The Pulitzer Prize, Obie and NY Drama Critics Circle Award winning play is a drama with feline anatomy. The play will be presented in an intimate cabaret-style setting: small tables of four with wine and hors d'oeuvres available.

The play will be presented at 8:15 on Thursday, Friday, and Saturday nights, Oct. 25 through Nov. 10. Admission is $4.50 on Friday and Saturday, and on Thursday nights general admission is $3.50 with a special discount rate of $2.50 for seniors and students.

The troupe begins a two-week statewide tour, sponsored by The Idaho Commission on the Arts, at the end of November.

Besides playwriting, Paul Zindel is one of the foremost young adult fiction writers in the country. His works, which include "My Darling, My Ham-burger," and "The Man Who Stepped on My Eyeball," often deal with the creation of fantasy situations as a means of coping with unhappiness.
Ralph Nader to Speak at BSU

Ralph Nader, the nation's premier consumer advocate who has been called everything from muckraker to public defender, will bring his documented criticisms of government and industry to Boise State University in a guest appearance Oct. 26.

He will speak at 8 p.m. in the BSU gymnasium. Tickets will be available at the door for $3 general admission and $1 BSU student admission. Nader's appearance is sponsored by the Associated Student Body of BSU.

The crusading attorney first made headlines in 1965 with his book "Unsafe at Any Speed," the scathing indictment against the auto industry's production of unsafe vehicles. He has since been responsible for at least six major federal consumer protection laws.

Nader has also been responsible for the recall of millions of defective vehicles, advances in safety and improvements in sanitation, pollution control, advertising credibility and politico-economic power.

Today, he speaks of the growing "imperialism" of multinational corporations and of a convergence of giant corporate and government power that he says resembles the textbook definition of corporate socialism.

Nader argues that it is time for the consumer movement to advance from ad hoc reforms to structural economic change and new forms of consumer organizations.

After Nader's lecture Friday there will be an organizational meeting for a consumer advocate group, Idaho Student Public Interest Research Group (ISPIRG). Details will be announced at the lecture.

Hank Aaron Comes to BSU

What began as a child's love affair with baseball and culminated in a record-breaking home run will be the story presented by Hank Aaron, Boise State University's third guest lecturer for the year.

Aaron will speak at 8 p.m., Oct. 31, in the SUB Ballroom at BSU. Admission will be $2 general and $1 for BSU students at the door. Aaron's appearance is sponsored by the Associated Students of BSU.

Aaron holds 18 major league records and was voted most valuable player of the Atlanta Braves six times. He has been honored as National League most valuable player and named player of the year by Sporting News Magazine. In addition, Aaron held a place on the National League All Star Team a total of 16 times.

Heritage Repertoire Stretches All the Way From Corea and Chuck Mangione to Aron Copland's "Fanfare for the Common Man" and Faure's "Pavane," yet with every innovation the sound stays consistent. And with Woody's background, and his musicianship in general, that ain't a bad result.

Area Stamp Collectors Meet

BO-IDAPEX '79, the fifth annual stamp exhibition and course sponsored jointly by the Boise Stamp Club and the Boise State University Stamp Club will be held October 27 & 28 at the BSU Student Union Building, Big Four Room.

Show hours will be 10 am to 8 pm Saturday October 27, and 10 am to 5 pm Sunday October 28. Admission is free and the public is invited.

The purpose of BO-IDAPEX is to promote philatelic knowledge, philatelic research, and philatelic appreciation among stamp collectors and the non-collecting public.

The show will feature competitive exhibits from Boise, the Treasure Valley, and Salt Lake City. A power decoder and set of wine goblets will be awarded to the best exhibit. Other awards include silverware, stamps, medals, and ribbons. For the second year the Founders Award will be presented to the best exhibit entered by a Boise Stamp Club member.

Sixteen dealers from throughout the Northwest will be present at the show. The Boise Post Office will operate a branch station during show hours and will offer a pictorial cancel commemorating one of Idaho's endangered wildflowers. A cacheted cover designed by Boise artist Fred Fritchman will be issued in conjunction with the show.

The Talkies:
A Film Buy-Line

Our panel of critics rate a film a week, using a scale from 1 to 5 stars. One is low, four is high. There is a winner, a coming out to four-star system which the audience don't have to read. The pattern consists of three highly sophisticated students and one extremely naive student. The only way they can disagree is over the interpretation of some slap-stick comedy make up the very long and tiresome movie "10." An aging songwriter becomes obsessed with his increasing years and consequently young women. He ends upd scampering back to the comfort of his "elevator girl" and the "all that glitters is not gold" theme done over and over and... There are some really ridiculous scenes and situations, some tit and tat, and that's all there is to it. Don't Julie Andrews, Miss Wholesome herself, can't save this one. Forget it.

Don Barton--On a scale of one to ten, Blake Edwards "10" rate out at about a two minis. There are only a few moments of humor scattered through two long hours of beautiful people decadence, and these moments are only due to the efforts of Dudley Moore. The space between laughs are filled with boring conversations and musical drivel that is guaranteed to have you counting the lemons stuck to the back of the seat in front of you. Oh well, what can one expect from a movie that has Mary Poppins and a girl with rocks in her hair, as sex symbols.

Alice Jensen (O) Laced with overkill and cliché of script and scene, "10" nevertheless maintains believability of character, semi-sensitively portrays two generations and manages an occasional flash of quality. It's about 42-year-old George Webber's sudden compulsion to chase the disappearing rainbow of youth. He ends up scampering back to the comfort of his "elevator ma-"-"10." It in the Road" mentality. Moore handles well what spots of excellence his role possesses. Andrews is good as the successful singer and woman friends Sam (George's age) avoid- ing any traces of Mary Poppins. Finally, Be Derek as Jennifer the beauty is "a vision", but posses- ses enough intelligence and depth to prove she's more than lovely meat -- which the audience dis- covers no sooner in the film than Webber does. If it intrigues you, see it -- it's definitely not a must.

Barbara Jones ( ) Trite scene, "10" nevertheless main-"10", Alice Jensen (O) Laced with overkill and cliché of script and scene, "10" nevertheless maintains believability of character, semi-sensitively portrays two generations and manages an occasional flash of quality.
