VOLUME XIII, ISSUE 2

## Cutbacks in Core Courses Planned

by Laurie Johnston  
Arbiter Staff

Cutbacks are once again in store for Boise State, but this time they are not financial.

Faculty committees are more than two years into the groundwork of a monumental overhaul of the core curriculum, the general education component of Boise State University's requirements.

Currently the core curriculum consists of around 300 classes from which the student selects courses needed to fulfill the University Area I, II, & III requirements. Upon completion of the overhaul, the core choices could be slashed to as few as 30 classes.

Dr. Richard Bullington, BSU executive vice-president, said the target date for the first drastic curriculum change "in the history of the institution" is the fall semester of 1981.

His involvement began in spring 1978 when the Core Curriculum Committee approached him, when he was interim president of BSU, to bring in a consultant to examine BSU's core program. With the consultant's recommendations to pursue a more unified curriculum, an ad hoc committee was formed, headed by English Department Chairman, Dr. Charles Davis.

The ad hoc committee proceeded to extract a basic philosophy from among the different schools.

The ad hoc committee report said that the function of the university "is to establish an environment and provide the programs that will enable a student to become a scholar."

The new core classes will develop specific learning skills, concentrating on literacy, in each and every student.

According to the committee's report, "the ability to express oneself effectively orally, and in writing, to understand various forms of discourse, and to determine the purpose and assumptions underlying specific discourse" will be of prime importance.

To reach this goal, the committee has also recommended that each student "pass a competency exam in written English prior to admission to senior status."

The development of the critical thought process is an essential feature of a complete education,

the report said.

Dr. Davis said that his committee was concerned that teaching the non-major core classes not merely be the task of the newest faculty members. They should be taught by those faculty members who feel a genuine interest, thus providing a more valuable experience for the lower class students who are generally taking the core classes, he said.

The ad hoc committee also recommended that the university develop interdisciplinary studies between the humanities, social sciences, natural sciences and mathematics, to develop breadth of learning as well as the ability to learn.

**"A minimum grade of 'C' will now be required in all core classes..."**

A minimum grade of "C" will now be required in all core classes, as well as in the major field. All departments will pull together in working toward the development of junior level writing skills, the report said. These features should create the motivation and the ability to pursue learning not only on campus, but beyond graduation, developing true scholars.

With the recommendations of the committee in hand, Dr. Bullington received an okay from the State Board of Education in June to proceed with the revision. A "blue-ribbon" faculty committee was appointed to identify those courses which will satisfy the basic philosophy outlined by the ad hoc committee.

The recommendations of the committee are expected by December, so their findings may once again be presented to the State Board.

Implementation will take place upon the approval of the State Board in time for the fall 1981 schedule and catalogue.

The core refinement plan which Dr. Bullington called "a most unique approach in the state system" is an idea gaining attention throughout the country. Area schools such as Lewis & Clark and Idaho State University have been considering similar changes.

Building activity like that shown above was what ASBSU Senators saw when they were taken on an inspection tour of the Pavilion site Monday afternoon. Site supervisors told the senators that construction was on schedule and that concrete pouring for the South concourse level should begin in a few days.

## Campus Activists Organize

By Ryndy Rudd  
Arbiter Staff

This is the first part of a two-part series that will examine the Boise State Univ. political organizations that are forming to support Senator Frank Church and Congressman Steve Symms.

As the fall semester begins, there are a number of student political groups organizing and recruiting members. This is an election year and there are students on the BSU campus who are joining together to help in the efforts to elect the

candidates of their choice. One of the most volatile races in Idaho is the contest for the Senate seat that is presently held by Democrat Frank Church. He is being challenged by Republican Congressman Steve Symms, who has served in the House of Representatives for the last eight years.

If you entered the SUB through the front doors last Tuesday, you couldn't have missed the table that was set up and manned by the BSU Students for Frank Church. It was covered with posters, bumper stickers, buttons and other kinds

of campaign paraphernalia.

About 70 people expressed interest in helping the Church campaign and left their names and phone numbers so that they could be contacted later.

The "BSU Students for Frank Church" is a new organization that has been formed in the last few weeks, according to Carol Mackland, one of the co-chairmen for the group.

Mackland, a senior majoring in political science, shares the chairmanship with Andy Little.

# BILLBOARD

## ANNOUNCEMENT

Tutoring will be available in all subject areas beginning Sept. 15th. More tutors are needed in all areas. If interested in getting a tutor or being one call 385-3993 or go to Room 114 of the Ad bldg.

## 3-man basketball

Registration open at Fort Boise Community Center September 10 through September 24 for 3-man basketball. Team registration fee of \$45.00, library cards of city residents, \$1.00 out-of-city player fee and team roster limited to six people due at registration time. League play begins September 29. More information: Boise City Recreation Department at 384-4256.

## EVENTS

"Five Senate Seats, Mr. and Ms. Bronco can pick up applications and nominating petitions at the Student Activities Office in the Student Union Building. All petitions must be returned accompanied by a 5 x 7 photograph NO LATER than 4:00pm on Friday, September 19, 1980. The primary election will be held on October 8th and 9th. The general and homecoming elections will be held on October 29th and 30th.

Mr. and Ms. Bronco will reign over all homecoming activities and events. The candidates must be sponsored by an on-campus organization. Applications for these positions can also be obtained in the Student Activities Office. (Petitions are not necessary)

The Outstanding Faculty or Staff member will also be elected during the general elections. The faculty or staff member must be nominated by an individual student or student organization in order to be placed on the ballot. The awards will be given during homecoming week. Applications can be obtained from the Student Activities Office.

The ASBSU Senate will have five seats open for this election. Students from each school are encouraged to obtain an application form and nominating petition from the Student Activities Office. These are to be completed and returned to that office by 4:00pm, Friday, September 19th.

## FDA Safety Investigator Speaks at BSU

Federal Food and Drug Administration consumer safety investigator Carol Heppie will give a free public address at the opening of the one day Boise State University Communication Department annual high school debate workshop Sept. 20.

Heppie will discuss the 1980-81 high school debate topic, "How can the interests of United States consumers best be protected?" She will speak at 9am in the Special Events Center.

For further information about the debate workshop activities, contact Dr. Suzanne McCorkle, 385-3928.

## Alums Celebrate

The annual wine tasting reception sponsored by the BSU Alumni

Association will be Saturday, Sept. 13 at 5:30pm at the Union Pacific Railroad Depot Gardens before the BSU Broncos-Southeastern Louisiana football game at 7:30pm.

All alumni and friends are welcome.

## Intercollegiate Debate and Speech Team

Dr. Suzanne McCorkle, director of BSU Communication Activities and Forensics, has announced the start of the 1980-81 speech season with an organizational meeting Tuesday, September 9 at 3:30 in LA 207.

The speech program serves three groups of students—education majors who wish to prepare for coaching high school speech or debate, students who wish to improve their general speech or communication skills but don't want to travel and compete with other schools, and students who wish to travel and compete as the BSU Intercollegiate Speech Team.

Students may receive credit for participation and training through CM113 or CM 314.

This year's debate topic is one of special interest, dealing with U.S. foreign military commitments.

Resolved: that the United States should significantly increase its foreign military commitments.

For more information, contact Dr. McCorkle at 385-3928.

Beginning this fall, an internship program sponsored by The Northwestern Mutual Life Insurance Company will be offered to seniors, juniors and exceptional sophomores in

any major.

The purpose of the program is to give students the opportunity to sample an interesting and challenging career of professional service while attending college.

Some of the advantages offered to the students include; appropriate compensation for their efforts (currently \$8 to \$12 per hour), it can help the student narrow his or her career options to the best available and give them a "head start" on the career that they may choose. It may also alleviate the problem of obtaining a summer job. The least that the internship could provide is some type of practical job experience to put on a student's resume. In addition, BSU offers up to 3 hours of academic credit for internships.

If you want to become an intern with "The Quiet Company" then contact Don Frasier or Hank Weatherby at Northwestern Mutual Life Insurance Company, 2309 Mountain View Drive Boise, Idaho 83707. Phone: 377-0210.

E=MLC?

Are you a college student over age 21? Come to a free public conference on the non-traditional student at Boise State University Sept. 12-13. "Education - More Life Choices" will include workshops on the problems and goals of older students such as study skills, financial aid, stress, veterans' problems, and employment opportunities. One BSU credit hour will be offered for a \$10 fee for the conference which will be conducted in the Boise State Student Union Building. For pre-registration and further information, telephone 385-3327.

## Canterbury Activities

The Boise State University Canterbury Club of the Episcopal Church has scheduled a variety of activities for the coming year.

On Wednesday evenings at 7 p.m., Rev. Bob Cross will celebrate a Creative Eucharist in the Christ Chapel.

Every Wednesday from 11:40 a.m. to 12:30 p.m., a "brown bag" Bible study will be held in the St. Paul's Catholic Student Center. The Bible study course will be in Christian experience, with student and faculty participa-

tion.

A Sunday fellowship program and supper will be held weekly in the St. Paul's Catholic Student Center from 4 p.m. to 7 p.m.

A "Canterbury Club Discovery Weekend in Paradise" in Paradise Point, McCall will be held on Sept. 19-21. Father Mike Mahoney will be the spiritual director.

Canterbury members and friends are urged to attend.

For further information contact: Herb Runner at 385-1613 or 343-4183, Ed Mahoney at 343-3066, or Bev Lung at 377-0097.

## SUB Receives New Director

# Freeburn Sees Bright Future

Dennis Freeburn is the new director of the Student Union Building, replacing Fred Norman. The Arbiter talked to Freeburn about his new job and the future of the Student Union Building.

**Arbiter:** When did you take over as director of the SUB?

**Freeburn:** About August first.

**Arbiter:** And you came here from South Dakota?

**Freeburn:** Yes.

**Arbiter:** Exactly what does the director of the SUB do?

**Freeburn:** My responsibility really covers the total scope of the Union operation, in addition to coordinating and overseeing the area of student activities on campus. By the Union, I really mean the operational aspects of the building as well as the program related things that might take place in the building.

**Arbiter:** Do you have anything really new that we are going to see from you in the line of student activities involving the SUB?

**Freeburn:** O.K., I think I've got some ideas that we might want to look at in terms of new things, new services perhaps for the Union, and perhaps maybe new things tied in with programs. One of the things we are probably going to have to do in the next few years is to look for other sources of revenue to provide support levels for the Union operation. But we must mind that those kind of revenue generating sources also have to be services that will be amenable for student use. What I'm really saying is that while we need additional revenue sources we also want to be able to provide good services for students.

**Arbiter:** By additional revenue services do you mean like renting rooms in the SUB to outside groups?

**Freeburn:** Rentals, but things that would also be a service. For example the most rapidly growing kind of service for a university community are things like a branch bank, something that would be here on the campus to provide service for students in the university community but also generate income for the building terms for rental space, that kind of thing. Or an automatic teller machine that would be located in the Union. This is the kind of thing we are looking for. Another idea might be a travel agency in the building that could service the needs of students, and we have students traveling all the time. This could tie in with our travel club, in some way, but it would also provide the common kinds of services a travel agency provides.

**Arbiter:** These things would be sort of like the Head Shop that we already have in the building?

**Freeburn:** Right, sort of a joint service for the students and the building. I don't think we can have one without the other. We don't want to turn the SUB into some kind of commercial enterprise, but going to these kinds of additional

sources of revenue seems to be the trend in SUB's across the country. Another thing that I think we really need, and that some students have already commented in favor of, is some kind of art gallery in the building. It would be a permanent facility that we could do some things in from the standpoint of visual art. Some art shows have been done in the past but we really don't have a space in the building that is being set aside for that purpose. I think that is of interest to the University community. Also perhaps the acquisition of some kind of permanent art collection including student work could become a permanent part of the building.

Another area I am personally interested in and that has great potential for our location is the development of an outdoor education program. We already have the outing center, which provides a good rental service in terms of equipment rental and this sort of thing, but we don't have an education program that comes out of the Union. Idaho State has had a program for a number of years in this area and it's excellent. I happen to think that given our locale we're in even a better position than ISU to take advantage of the outdoor activities that people are so interested in in our area. So that's an obvious extension of a Union program and a Union service.

**Arbiter:** Would the people teaching these classes be students?

**Freeburn:** It could very well be. Most of these programs develop by way of acquiring the services of someone who has really got some expertise in the outdoors, perhaps with a background in mountaineering, kayaking, rock climbing, these sort of things. This person could teach outdoor skills to students, who in turn would go out and teach skills to other students. These programs usually start out kind of small and develop over time, and I think we have excellent potential for development and that there would be a real interest in that kind of activity.

**Arbiter:** I think that some students are unaware that the rooms in the SUB are available for the use of student groups. How exactly do student groups go about using rooms in the SUB?

**Freeburn:** We have a number of different sorts of meeting rooms suitable for a number of purposes and these are available for student organizations free of cost on a first come first served basis. All they have to do is come down to our scheduling office on the first floor of the SUB and get a room scheduled for their meeting, workshop, or whatever. In addition to rooms, if the groups require other kinds of services, food service, aids to conduct meetings, we can help them with those kinds of things also. Many of the student organizations take advantage of the services available in the SUB but we would like all of them to do so.

**Arbiter:** Getting to the physical aspects of the building, there have been a lot of problems with leaking roofs in the SUB in the past. Has anything been done about this problem?

**Freeburn:** There was apparently a roof resealing project completed, I'm not sure of the date because I wasn't here then, but it didn't take care of the problem. We have allocated a certain amount of money for another roof resurfacing to solve the leaking roof problem and that should be done by the time the rains come. The building is now fifteen years old and is at the point where we have to start worrying about the things that have to be replaced and refurbished.

**Arbiter:** Some of the rooms in the SUB, I'm thinking particularly of the cafeteria, have a kind of institutional austerity. Are there efforts being made to bring a warmer atmosphere to the SUB, and is this going to be an ongoing effort or are fund shortages going to make that impossible?

**Freeburn:** Funds are obviously a source of limitation, there is no question about that, but I think that given even our limited resources we are going to do everything we can to see to it that some of the

atmosphere is changed. Often times you can improve atmosphere, at least in a cosmetic sense, without the cost of major remodeling. In the snack bar area we recognize that there is a real need to remodel that facility, not only from the standpoint of getting more food out more quickly but also from an appearance standpoint too. There was a student committee organized last spring to look into that problem and they will be working on it this year also. There are some really exciting things that can be done to change the atmosphere in the snack bar and get rid of the high school cafeteria feeling that exists down there right now. There are a lot of things that interior design people can do to that area to make it more comfortable for not a lot of money.

**Arbiter:** Are you going to kick the Arbiter off the second floor?

**Freeburn:** (Laughing) No, has it been suggested in the past? Seriously, I would like to say that as the director of the SUB I'm really concerned with supporting student oriented, and student run activities and programs. The facility of the Union is here but it is up to the students to use it to the fullest extent.

## Cold Drill Seeking New Quality Material

The Cold Drill, Boise State University's national award-winning literary magazine, is in need of a variety of material for its 1980-81 edition.

The magazine's editors, Linda McAndrew and Sally Thomas, seek quality manuscripts on a variety of subjects, in a variety of forms, including poetry, short story, essay, interview, review, play, and telescript.

They are particularly interested in material with a focus on the arts and entertainment, science fiction, and children's literature.

## Church

CONTINUED FROM PAGE 1

They decided to organize the group as a way to make BSU students aware of the campaign and the issues that are at the heart of it.

Mackland and Little stress the fact that membership in the group is voluntary, and that no one is being paid to help with this facet of Church's campaign.

The group is independent of the University Democrats and would like to remain as separate as possible, although it hopes to join the University Democrats in sponsoring some rallies on campus.

Mackland expressed her concern about the general lack of interest on the part of college students and their reluctance to become actively involved in politics.

students and their reluctance to

run into is the tremendous amount of student apathy," she said.

"We hope we can be successful in our efforts to raise the level of political awareness in the student population at BSU.

"If we can stress the importance of the student vote, and make them realize that they are a part of the political process, maybe they will pay attention to the controversies, and make a solid and well-informed choice when they go into the voting booth," Mackland said.

For further information contact Dr. Robert Papinchak in the English Department

run into is the tremendous amount of student apathy," she said.

"We hope we can be successful in our efforts to raise the level of political awareness in the student population at BSU.

"If we can stress the importance of the student vote, and make them realize that they are a part of the political process, maybe they will pay attention to the controversies, and make a solid and well-informed choice when they go into the voting booth," Mackland said.

Mackland said the group hopes to have a table set up in the SUB at least one day a week until the election in November. The Students for Church will be meeting soon to plan more activities and some rallies. The time and place will be announced at a later date.

## MOVIES

11-12-14 Single Feature

Picnic at Hanging Rock

A Film by Peter Weir

From Atlantic Releasing Corporation

Peter Weir's haunting mystery explores the disappearance of three Australian college girls during their Valentine's Day picnic in 1900. Rich visual imagery, captivating photography and a hypnotic musical score make this an irresistible film.

18-19-21 Double Feature

Cinderella Liberty

S.P.B. movies are shown each week - 3 times a week in the Student Union Building Ada Lounge. Show times are Thursday at 3:00 p.m., Friday at 7:30 p.m., and Sunday at 6:00 p.m. Prices are:

Students w/photo ID:	Non Student:
\$1.00 single feature	\$2.00 single feature
\$1.50 double feature	\$2.50 double feature

Or one Ticket Booklet Ticket

The ticket booklet is available at the S.U.B. Info Center or at the door of the movie and has ten tickets—each good for ten single or double features. More than one person can share a ticket booklet, and booklets are good throughout the fall semester. The price is \$5.00 for students with photo ID, \$10.00 for non students.

The Student Programs Board is always ready for new members. If you're interested, call 385-3297.

# BSU Pushes for Non-traditional Programs

By Marianne Flagg  
News Editor

If you're 22 years old and attending Boise State University, or contemplating returning, you are a member of the fastest growing college population in the country—the nontraditional student.

In an attempt to reach out to the group with information about college programs and career opportunities, Boise State will present a two-day conference, "E=MLC<sup>2</sup>": Education Means More Life Choices," for the nontraditional student on Friday and Saturday, in the BSU SUB Ballroom.

The conference will begin Friday at 9:30 a.m. with a keynote address in the Ballroom. Workshops will convene at 11 a.m. and continue throughout the day.

On Saturday, advisors and registration materials will be available for anyone interested in late registration.

The conference's keynote speaker will be Dr. Robert A. Pringle, nationally known expert on non-traditional student programs.

Dr. Ben Parker, conference

director, said the program is an attempt to debunk myths concerning nontraditional students and to demonstrate that "learning is a life-long process."

Parker said that many older students underestimate their contributions and potential for success as college students, becoming victimized by self-doubt and myths.

"Many older students don't look at their own assets," he said.

Frequently, older students returning to college after years of having been out of school, are afraid that younger students don't want them in class.

"Younger students do like older students in class," Parker said.

"Nontraditional students tend to be more serious and more directed," he said. "They have responsibilities that younger students don't have."

Parker said one indication of the wide-range acceptance of older students on campus is the election of nontraditional student Sally Thomas as student body president.

BSU is ideally suited for programs directed toward older stu-

dents due to its location and average student age.

"The future of American universities and colleges is in the urban areas," Parker said. In the case of Idaho, BSU is at an advantage."

Parker said the average student age at BSU is 28.

"Fifteen percent of the students at BSU are women over 30," he said.

### Campus Digest News Service

(CPS)The Census Bureau reports that more than one third of all college students are 25 years or older. Most of the older students are enrolled on a part-time basis.

The report also shows that for the first time since World War II, there are more women than men enrolled in college.

A study conducted by the Carnegie Council on Higher Education predicted that by 1990, half of all students in American colleges and universities will be nontraditional students.

Dr. William Keppler, dean of

the School of Arts and Sciences, said that the area of nontraditional student education "is the area of higher education 'I'm most concerned about.'"

Although Keppler said in the past BSU did not do as much as it could have in the way of nontraditional student programs, changes can be made, within budgetary limits, to allow more core curriculum offerings at night.

The amount of core curriculum offerings at night is insufficient to allow night students to earn a degree, Keppler said.

Keppler said the program could be corrected by seeing that one of every three sections of a core course is offered at night.

The conference will feature a series of workshops designed to acquaint the nontraditional student

with financial aid programs and skills needed for survival and success in college.

Among the workshops to be offered are small group and panel discussions on veteran's issues, competing effectively in school, coping with academic and personal stress, financial impact versus career opportunities, and resume writing and interviewing techniques.

One credit hour can be earned at the conference for a \$10 fee.

Instructors and guest speakers in various disciplines will act as facilitators for the workshops.

The conference came about as result of research conducted by Communication major and non-traditional student Mercedes McCarter. McCarter is the conference coordinator.

Susan Lucason and Sheri Stevenson are associate conference coordinators.

## Evans Pulls Opposition

# Coalition Ripps Gov. Speech

The Snake River Alliance reacted strongly Thursday to Gov. John Evans' statement that it "may be economically unfeasible to eliminate every bit of the radioactive material" currently being injected into the Snake River Plain Aquifer by the Idaho National Engineering Laboratory.

Snake River Alliance member Steve Jennings called the statement a "repudiation of the Governor's own blue-ribbon Radioactive Waste Task Force's principle recommendation."

In December 1979 the task force recommended that "the Department of Energy stop the practice of disposing of low-level radioactive wastes to the aquifer."

In what the Alliance called "another major reversal of State policy," Evans announced Wednesday that he was withdrawing

opposition to the storage of commercial radioactive wastes at INEL since he was convinced that there was no alternative site available.

"Gov. Evans may be 'convinced' that Idaho should accept more radioactive wastes from out-of-state, but many Idahoans are not," Jennings said.

Jennings indicated that the radioactive waste issue "will be an

important one in this fall's elections and in 1982 when the Governor's term is up."

The Alliance is part of the Coalition for a Clean Aquifer, a state-wide organization of citizens groups.

The Coalition will hold a rally at the INEL on September 13 and will call for full implementation of the Task Force's recommendation.

## B.U.S. Plans New Stops

Beginning Sept. 2 a new bus passenger loading plan, called "skip-stops", will be introduced by Boise Urban Stages on University Blvd.

Ken Pidjeon, B.U.S. assistant manager said the University Blvd. plan is the first of a state-wide program to "keep bus schedules reliable by trimming the time it takes to cover the 20 city routes." This plan will also enable drivers

to make transfer connections and help control operating and maintenance costs.

BSU passengers will have time to become familiar with the new designated stops through an informational program conducted by B.U.S.

No passengers will be passed by until bus stop signs are installed along University Blvd. After signs are installed, drivers will load passengers only at those stops.

# College Costs Hit Record Levels Again

(CPS)—The cost of going to college has hit record levels again.

The most recent data, released by the College Board, show that the average tuition in private, four-year schools skyrocketed by 10.1 percent during the last academic year, to \$706. If that wasn't enough, the total price of a college education—including housing, supplies, and tuition—increased even more.

The Board said an average student at a public, four-year school can expect to spend \$3409 in 1980-81, a 12.7 percent increase over 1979-80. Average costs in private, four-year colleges are up 14.3 percent, to \$6082.

Inflation, of course, is being blamed for the increases. Since the 1977-78 academic year, tuition has been pushed up 25-28 percent at private schools, and 19-21 percent at public institutions.

But inflation is not the sole source of the financial chaos currently afflicting most of the nation's colleges and universities. Spurred somewhat by the 1979 passage of California's Proposition 13 and other cost-cutting measures, many state legislatures have become more fiscally conservative.

Furthermore, the recession has dwindled fat state budgets to rib-showing levels. Some 20 states report declining revenues, according to Jacob Stampen, senior policy analyst at the American Association of State Colleges and Universities. Stampen said states like Washington, with cutbacks in its lumber industry, and Michigan, with auto production down, may be especially hard hit. Public schools in those states can consequently expect less state aid.

## Colleges Suffer Revenue Loss

Campus Digest News Service

(CPS)—Several California colleges and universities are suffering from the actors' strike. Many of the major motion picture companies use the local campuses to create an Eastern college look without all the trouble of expense of going east. USC, Pomona, California State University at Northridge, and UCLA are all favorite filming sites.

The revenue received from filming is down as much as 50 percent at some of the schools.

But cost increases at private schools may have gotten high enough to convince students who would have enrolled at them to go to public colleges instead, according to some observers.

"The increases at private colleges may make students think twice about where they want to go to school," warned Steve Lelfman of the Coalition of Independent College and University Students.

"And current students may have to ask themselves (if they can) really afford to continue at the institution they're at."

## CAMPUS OPINION

### The ARBITER Poll

A weekly feature of the *Arbiter* will be a random-as-possible, man-on-the-street poll, conducted by an *Arbiter* staff writer.

This week the poll will pose a timely question to 50 students on campus. It is intended as an informal barometer of the student mood and is neither designed nor intended to be a scientifically accurate analysis of student opinions. Beginning next week, the number of students polled will increase to 100.

This week, *Arbiter* staff writer Laurie Lowe asked students:

"Given the choice between a \$40 fee increase or an institutional declaration of financial emergency, which would you prefer?"

RESULTS:  
 Fee increase.....35 (70%)  
 Financial emergency.....15 (30%)

By a wide margin, most students polled said an increase was inevitable.

As one student said, "why not, everything else is going up."

One student said an increase was preferable to losing good instructors and lowering the "quality of education."

Another student opposing the increase said a declaration of financial emergency might "help get rid of non-essential teachers."

# ASBSU Supports Money Increase

(JA)—On Sept. 3, BSU Student Body President Sally Thomas called an emergency meeting of the ASBSU Senate to vote on a measure declaring student leader support for the proposed \$40 fee increase. The resolution contained the following provisions:

1. ASBSU supports a temporary fee increase of \$40 per semester for full-time students, \$4 per credit hour for part-time students, and \$150 per semester for non-resident students. By temporary, ASBSU [intends] for the increase to be effective during the Spring '81, Fall '81, and Spring '82 semesters only.

2. ASBSU supports Boise State administrators' decision for cuts during the current fiscal year in the following categories and amounts: land acquisition, \$150,000; operations, \$90,000; salary savings, \$100,000; and capital improvements, \$25,000.

3. ASBSU offers support for the above items contingent upon there being no declaration of financial exigency made during the current academic year.

The Senate also supported efforts to generate additional revenue through "program cut-backs and consolidation" measures, which would require intercollegiate athletics become self-sufficient (beginning with a phase-out of the students' athletic fees),

legalized sale of liquor on campus, and a severance tax or 1 cent sales tax levied through the state with revenues directed towards education.

In other Senate business:  
 \*The Senate voted to reallocate \$1000 appropriated to the Day Care Center for classroom and learning equipment.

\*The week of Sept. 8-13 has been proclaimed as Nontraditional Student Week.

## Student Insurance Automatic

Many students at Boise State are unaware that all full-time (8 or more credit hours per semester) students are automatically included in the University's medical insurance plan, the cost of the insurance being part of their full-time fees. The student medical plan covers students at home, at school, or while traveling for twenty-four hours a day during the policy period. In order to make a claim on the policy students need only to fill out a claim form available at the Student Health Center located across the street from Campus Elementary School. If a student is away from the University during illness or injury a claim can be made if the student obtains a receipt for medical services and presents this receipt to the Health Center upon returning to campus.

Although all full-time students are automatically covered by student insurance the insurance is not mandatory. Those wishing to receive a refund on their student insurance can do so by contacting the campus insurance representative, Bob Bower, in the ASBSU office, located on the second floor of the Student Union Building. Claims for insurance refunds for the 1980 Fall semester must be made by September 30.

## Free PIPP Posters Available Again

The Poetry in Public Places (PIPP) poster series will be available for the fifth year this fall from Boise State University.

The colorful free posters with poetry written by BSU students will be printed in a series of eight; four of which will be mailed out during fall semester, and four during the spring.

# HP Professional Calculators. Because the most critical time in your professional career is right now.

Ask any professional about Hewlett-Packard calculators. You'll discover they're the ones dedicated to solving your problems. In the world of calculators Hewlett-Packard means outstanding performance: the most advanced functions and programming features to save you time and increase accuracy; the most advanced design to give you greater ease-of-use; rigid quality control for flawless performance year after year; the most comprehensive and easy-to-read documentation; the most extensive selection of software solutions so you can spend your time solving problems instead of writing programs; and Continuous Memory in programmable models so you can retain your programs and data, even when the calculator has been turned off.

Hewlett-Packard features six different calculators starting at just \$70\* to provide professional solutions to problems in science, engineering and business throughout your academic and professional career.

- HP-32E Scientific with Statistics
- HP-33C Programmable Scientific with Continuous Memory
- HP-34C Advanced Programmable Scientific with Continuous Memory
- HP-37E Business
- HP-38C Advanced Financial Programmable with Continuous Memory
- HP-41C Alphanumeric Full Performance with Continuous Memory

So visit a Hewlett-Packard dealer now. Then make the professional decision: buy an HP. For details and the address of your nearest dealer, CALL TOLL-FREE 800-547-3400, Department 658M, except from Hawaii or Alaska. In Oregon, call 758-1010. Or write: Hewlett-Packard, 1000 N.E. Circle Blvd., Corvallis, OR 97330, Dept. 658M.

## Draft Protestors Claim

## Registration A Failure

The following College Press Service article focuses on the national perspective of the anti-draft registration movement. Next week, the Arbiter will cover the movement from a local viewpoint.

(CPS)—David Hartman, a 19-year-old political science junior at California-Berkely, remembers the confusion started when he first read about military registration last January. It hasn't ended yet.

"At first I thought, 'There's no way I'm going to register,'" he recalls. "But then I thought of the consequences." Failure to register can bring penalties of five years in prison and a \$10,000 fine.

Not knowing what he should do, he consulted friends and family, though "I knew what they would say." "I had no one to turn to."

Hartman ultimately decided to register, but his confusion persists. "I can say I won't go and fight in a war," he states, and then adds with a reflective smile: "Of course, it's easy to talk now. When the time comes..."

So it went this summer as approximately four million young men across the country tried to make up their minds what to do about military registration. Hartman's confusion was typical of the four men College Press Service followed through their decision making.

As James DeVoto of Atlanta put it: "There was no way to be right about this."

DeVoto, Hartman, and David Barardi of Cleveland finally decided to register. All recorded on their registration forms that they were complying with the law under protest. "I was too scared not to register," DeVoto explains, "but I feel like I'm chickenshit for being scared. My protest note doesn't make me feel like a man."

All four young men—the one who has yet to register requested anonymity—had little trouble finding advice during their ordeals. A bewildering number of protest groups completed for their attention. Though DeVoto was the only one to seek out counseling help, all encountered a lot of protest literature.

The Central Committee for Conscientious Objectors, based in Philadelphia, distributed "over 100,000" protest cards nationally for people to record their anger.

Steve Gulick, Philadelphia coordinator for the War Resisters League, estimated "about 20,000 have filled out the cards."

Vincent Cobb of the American Friends Service Committee, an anti-war group associated with the Quakers, "couldn't even begin to estimate" the number of counseling letters his group distributed to 18- and 19-year-olds across the country.

"We didn't necessarily wait for people to come to us," Cobb understates. He says the Friends' Denver office alone culled 52,000 names and addresses from drivers license records, and sent them letters explaining what options were available.

Protest leaders are bullish about the results of such efforts.

At different points during the registration process, protest leaders estimated that anywhere from a half million to two million people refused to register.

The Selective Service System reports it still doesn't know what percentage of the population complied with the law.

Paul Mocko of Selective Service says the agency "won't have very reliable numbers until October." Yet because of the rumors and widespread speculation, "we will publish a less reliable set of preliminary figures." At our press time, the agency had temporarily delayed publication of the figures.

"No one knows yet," Mocko says. "It's that simple."

Similarly, no one knows how many people registered with written protests on their forms.

Mocko points out that notes like "I intend to file for conscientious objector status" written on the forms "mean nothing to us now, mostly because we don't want any information on classification now."

Yet Selective Service keeps "the card on microfilm, so we can see the message if and when it becomes relevant. We'd much rather have people do that (write a protest message on the card) than not register at all." He stresses the sentiment applies to those who still haven't registered, too.

Many anti-registration groups advised eligible males to write messages on the forms both as a legal means of protest and as a precedent for applying for conscientious objector status. "Theoretically, it has no legal standing. But we recommend that you keep copies."

Much of that kind of counseling took place directly at post offices during registration.

Near the University of Tennessee in Knoxville, for example, leafleters distributed handy "I am registering in protest" stickers to put on registration forms.

A group called Movement Against the Draft roamed northern Illinois post offices with flyers advising registrants what they should write on their forms (a statement that the registrant wouldn't surrender his right to privacy and what not to write on the forms (his social security number).

Inevitably, there were complaints that some of the counseling was too general and even counter-productive.

The Minnesota Public Interest Research Group concentrated on defining three general choices for potential registrants: they could evade registration, apply for conscientious objector status, or "register and fight."

David Barardi, an 18-year-old soda salesman in Cleveland, felt the c.o. counseling was misleading.

"I'd pretty much decided to register as a c.o. after I talked to some anti-draft guy from Cleveland State or somewhere," he says. Barardi went to register only to find there was no "box to check. I asked the clerk at the counter, but he didn't know anything. He was just a clerk."

Barardi, angered upon discovering conscientious objector status was not possible at the moment, says he "winged it" by writing "I protest" on his form.

He had hoped there'd be "some protesters" at the post office to give him last-minute advice, but "they were just there the first day, I guess."

# Legal Heat Starts Soon

Washington, D.C. (CPS)—Those who refused to participate in military registration during the summer probably won't start feeling legal heat from the government until October, according to a Selective Service System official.

Paul Mocko of Selective Service says his agency most likely won't begin referring names of 18- and 19-year-old non-registrants to the Justice Dept. for prosecution until "we get everybody into the data base."

"That's our main priority and will remain our main priority through October. Then the activity will probably center on enforcing compliance with the law."

Mocko was unsure what that "activity" would be. "Right now our plans are pretty sketchy."

Normally the Selective Service System identifies possible evaders, and the Justice Dept. investigates and prosecutes them.

"There is no way I can speculate what action the (Justice) department might take" when it gets names from Selective Service, says Justice Dept. spokesman Dean St. Dennis.

St. Dennis maintains that, without knowing what the case load might be, Justice has not yet even made any internal organizational moves to accommodate the added work.

Most government officials contacted for this story chose not to dwell on enforcement measures. There have been scattered reports that the Carter Administration intends to defer energetic pursuit of evaders until after the November election.

An anonymous "Selective Service official" was quoted in a July *Wall Street Journal* article as saying the government planned a "soft" approach toward non-registrants.

But the report prompted angered Selective Service Director Bernard Rostker to warn: "This is not Mickey Mouse. It's not 'ha ha' catch me if you can." A person who fails to register is a felon. Make no mistake about it."

"The kid who throws down the gauntlet to the government will be prosecuted," Rostker told the *New York Times* in August.

Until then, however, the government is giving people the chance to register late.

Mocko recalls that in 1972, when he began working for Selective Service, "about 85 percent registered on time, and about 15 percent registered late. Of course at that time the draft and the war were the big issues, not registration."

So the system will wait until later in the fall to discover "who we don't have," Mocko says.

To do so, "I'm sure there'll be some comparison" between the list of registrants and "some other data base, though we don't

know which one yet."

Rumors that Selective Service plans to track evaders through Census Bureau, Social Security, and even school registration lists have been met by counter-threats.

Census Bureau Director Vincent Barraba maintains that "information gathered through the Census Bureau will remain strictly confidential, as stipulated by the law."

American Civil Liberties Union lawyer David Landau charges that using any other government lists would violate the privacy Act of 1974. He promises the ACLU will sue if Selective Service spokeswoman Mary Ellen Levesque says her agency would seek a waiver of the Privacy Act "if it's really necessary."

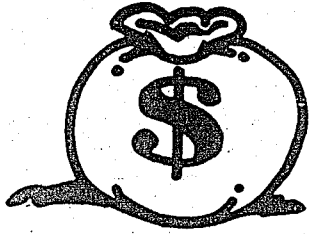

St. Dennis says "it would be premature" to describe what the Justice Dept. will do when it gets evaders' names, regardless of how they're obtained.

He points out that not all those cases turned over to the Justice Dept. would end up in trial.

Between July, 1964 and June, 1973, St. Dennis says, Selective Service referred to the Justice Dept. 186,711 names of possible draft law violators. Yet only about six percent of those were actually tried. Five percent of the total were ultimately convicted.

Nearly 85 percent of the indictments during the era were dismissed before trial because the accused violator finally agreed to obey the law, St. Dennis says.

## Retention is Major Problem

*Campus Digest News*

College and university presidents are concerned about the effects of declining enrollment in the next 10 years.

Researchers at the University of Northern Iowa conducted a survey to find out what worried college presidents most. The presidents surveyed felt that the financial problems they are suffering due to inflation would be overshadowed by the problems of retaining students in the years ahead.

## Editorial In From the Cold

With all the stealth of an elephant charge, Mr. Abbie Hoffman—Yippie leader, member of the board of the Chicago Seven, author of *Steal This Book*, and showman extraordinaire—tramped back into the center ring of America's media circus. The Hoffman of the Sixties always had a smooth aptitude for grabbing headlines and the Hoffman of the Eighties apparently hasn't lost the old touch. It was this facility of Hoffman's to achieve notoriety that often brought charges from his critics that he was involved in the movement more for the benefit of his own ego than for the furthering of political ideals. But regardless of whether Hoffman was a mere showman using the political arena of the sixties for his stage, or a dedicated idealist, the actions of Hoffman did a lot to bring the ideals of the movement sharply to the attention of those in power and to eventually see some of the ideals the movement was struggling become realities. Hoffman struck out at orthodoxy at a time when it was both necessary and dangerous to do so: for this Hoffman deserves some respect.

However, with the old, irreverent Hoffman in mind, it was quite disconcerting to hear the new Hoffman say that he had come in from hiding because he thought that the political climate in America was better. Better? Better in only the most superficial ways. It is true that dope is almost legal (in some states), that the draft is gone (for now), and that the war in Vietnam did end (when Nixon was good and ready for it to end); but when measured against the yardstick of what was sought during the Sixties, nothing really basic has changed. Toys like the M-X system, cruise missiles and stealth planes bring us closer to the brink of total war than we were during the very height of the Vietnam era. Our next President will very likely be either fear-monger of the worst sort or a conformist pseudo-liberal, and, as the Miami riots proved, racial equality is still a long way off. If Hoffman really believes that America has a better political climate than when he went into hiding, maybe he really is the misguided youth that the Agnews of America always claimed he was. But trying to guess what an ace bullshitter like Hoffman is really thinking is like trying to predict the weather west of the Mississippi, a job for fools and Easterners.

DB

## Off the Cuff

It seems that the BAA's offer of a brass name plate to any non-BSU student who donated \$50 or more to the Pavillion almost back-fired on them. The U of I student body president and senate got together \$50 and donated it to the Pavillion fund on the condition that their brass name plate read "Vandals are #1." The BAA refused their offer on unspecified grounds, which hardly seems the sporting thing to do. Maybe the BAA will change their mind if they get desperate enough—God knows they need all the help they can get.

DB

It is common knowledge by now that the State Board of Education, at its meeting last week, decided formally to consider the imposition of an additional \$50 per semester fee to full-time students at Idaho's universities. Idaho's universities included, of course, Boise State University.

Given the facts anyone who would or had to take the time to hear them; the question before us is not "how do we block a fee increase?" rather the question is "how do we keep that increase within manageable bounds?" The answer does not lie with students, nor with administrators, nor with the Board. That answer lies with the Idaho State Legislature.

It is not a moment too early to start working on that legislature to get fair funding for higher education. The one thing legislators listen to is the call of re-election. This is an election year and those who want to take a part in making this state's decisions are paying close attention to what their constituents say.

Students at Boise State can vote—most of them don't. And

that is precisely why legislators listen only partially, if at all, to students. This is the year for change. This is the year for BSU students to become active politically. And this is the time of the year to do it, and to do it visibly.

Students at Boise State will continue to bear an increasing cost of higher education—with insufficient support from the other citizens of the state, unless we gain that support in the political arena. The State Board moved to tell the State Legislature how badly underfunded is higher education. Now it is our turn to do the same.

Here is a four-fold path to progress that must be followed if we want any influence with the 1982 legislature.

1) call the Legislative Public Information Center, 334-2000, or come to the ASB Offices and ask for a list of how State Legislators voted on last year's tuition bill. Those who voted yes voted for students to continue to shoulder the brunt of the costs for higher education;

2) Find out what district you, your

family, and your friends vote in, then contact the candidates for state representative and senator and ask them what they will support to fund higher education: student fees (tuition) or more appropriated dollars (which may mean a tax increase;

3) Share the wealth. Pick up the phone and call home or write a letter to tell people you know how to vote and why. And don't forget to call the legislative candidate and tell them why you will work for or against his/her election, then work. Above all, be visible as an interested constituent.

4) Vote

The next election will be two years from now. An unsympathetic legislature could push through a tuition bill this next January secure in the knowledge that people do forget and will before the following election. Now is the time to act.

Of course, we could always kick back and let someone else do it for us—or is that let someone else do it to us?

## The Innocent Bystander

### The Awful Truth

by Arthur Hoppe

It was bound to happen. Americans are growing increasingly concerned about what they ingest and the food labeling laws are consequently growing increasingly severe. But what of the poor souls who are invited out to dinner and must gamble blindly on the scientific judgment of their hosts?

It was scarcely a year ago, for Vamplew, the noted consumer advocate and author of the best-selling *You Are What You Ate*.

In addition to espousing the cause of truth in labeling, Francine is a marvelous cook and we were looking forward eagerly

to a stimulating evening out.

"Do have one of these hot Bavarian cheese puffs with artificial mushroom chips," she said, passing the hors d'oeuvres. "I think you will be amused by the hint of trisodium inosinate—even though Food & Drug Administration studies indicate that it can cause indigestion in laboratory rats."

I said I thought I'd try one of the reconstituted hard-boiled eggs instead. Francine said she hoped I wasn't allergic to calcium pantothenate. Glynda asked what the dip was.

"Oh, it's copper glutinate, riboflavin phosphate and a few minced clams," said Francine. I was glad when she announced dinner was served as I was getting hungry.

The first course was mock turtle soup. Francine rose and tapped her glass with her spoon. "This mock turtle soup, you should know," she said, "contains mock flavoring, mock coloring, mock parsley, mock carcinogens and real artificial preservatives."

"Oh, I do think people should eat more artificial preservatives," said Glynda, always one to compliment the hostess. "I'm sure they make you look younger."

The soup was followed by monosodium glutinate, droxylpropyl, sodium caseinate and a little lettuce. "That's the best droxylpropyl I've ever tasted," said Glynda. "Wherever did you get it?"

"Oh, I know this little pharmacist," said Francine, modestly batting her eyelashes.

The entree, Francine informed us, was "a basic Ferrous Sulfate Quiche a la Dow with a touch of pyrodoxine hydrochloride to add zest."

"Gosh, Mom never made a quiche like that," I said.

"But you haven't had a bite yet," said Francine.

"I ate at the drug store," I said.

Glynda said she simply must have Francine's recipe for "the incredibly delicious folic acid sauce" on the string beans—if, indeed, they were string beans.

Francine said they were, indeed, string beans and the recipe was right out of the *Du Pont Gourmet Cookbook*, the one titled "Better Living" through Chemistry.

"It's really simple," she said. "First you mix two grams of alpha tocopheryl acetate with a pinch of zinc oxide in a mortar with a pestle. Then, in a warm test tube..."

But I was no longer listening. I had just decided to go on the Miracle Six-Day No-Cal Diet.

That saved me from the dessert of monocalcin phosphate (a substance, Francine explained, which "regulates tartness") tarts. These were followed by "assorted after-dinner artificial flavorings."

"But please don't mix the banana mocha with the lemon butterscotch," she warned, "as they can produce an adverse chemical reaction which releases a crowd-control agent."

After warning us to watch for signs of dizziness, drowsiness or disorientation for the next 48 hours, Francine bid us all a cheery good night.

On the way home, Glynda asked me if I still favored consumer education and truth in labeling laws. I said I preferred eating.

The Exchange

# The Case of the Missing Course

Was it Mark Twain who said that a student should be careful not to let his schooling interfere with his education? Whoever said it was right. Students of the 1980s should give special heed to Twain's advice, for what is said in the classrooms of our nation's 3,000 universities—BSU included—often never touches on the single most important fact of our time: namely, that the human race is perched on the brink of annihilation. The vast majority of college courses seldom if ever ask students to reflect upon humankind's perilous situation; and that classroom oversight is why students must take it upon themselves to become truly educated, to become informed about and to consider the terrifying consequences that may follow from our actions or our inaction. Unfortunately, a number of roads lead in the direction of human extinction.

The most obvious path to destruction remains the one that we discovered at Hiroshima and Nagasaki thirty-five years ago. If you have only a vague notion of

what happens when an atomic bomb falls on a city, then read John Hersey's *Hiroshima* and multiply by thousands the horrors he describes if you want to arrive at the sense of what an all-out nuclear war would be like in 1980. We can destroy the Russians many times over; they can kill all of us several times for good measure. The fact is part of the strategy of the Soviet-American nuclear arms race and is called Mutual Assured Destruction, known by its very appropriate acronym: MAD. Few if any classes at BSU will ask you to think about MAD or about the proposed MX missile system, which is our current \$100,000,000,000 escalation of the nuclear MADness. But you'd better learn about it and you'd better think about it if you care at all for humankind.

The only explosive force which matches that of the Bomb is humankind itself—the population explosion, the second avenue to obliteration. With more than 4,000,000,000 people on the globe, the earth's human population

expands by some 200,000 each day; that's more than an extra Idaho each week and a whole new U.S. every three years. Although some encouraging signs point to a slow-down in the boom, exponential growth seems almost inevitable for the next half century. In only a few classes at BSU can a student learn about the complexities of the population problem. Start your self-education with a reading of Paul R. Ehrlich's *The Population Bomb* (1968) and with Philip Appleman's edition (1976) of *An Essay on the Principle of Population* by Thomas Malthus.

Of course, the mere presence of additional billions of people won't automatically mean the demise of the human species. In fact, the presidential candidate for the Citizens' Party, Dr. Barry Commoner, has argued cogently that better social organization, a more equitable distribution of goods and services, and a wiser use of resources would make it possible for us to sustain a population considerably greater than the present one. See

Commoner's *The Politics of Energy* (1979) and the political platform of the newly formed Citizens' Party, 525 13th St. N.W., Washington, D.C. 20004. Even Commoner would agree, though, that an exploding population makes scarce resources disappear more quickly, increases the international tensions that can lead to war, and damages the environment in countless ways that may one day prove to be fatal. The wise student will try to learn more about these matters by spending a good part of his free time in the periodicals section of the library.

Do you think that I exaggerate? Are you telling yourself that you can't change all that, so why worry? You're waiting for me to expand on my reference to the Citizens' Party with the usual plea that you swallow some party line, right? I admit that I think we can avoid catastrophe, but I haven't a true believer's faith in the solutions which seem wisest to me at the moment. I do have faith in the university—in its students, its faculty, and its library; in its

potential for education—but *not* in its institutional aspects, those parts of the university which Mark Twain would have called schooling and which exist to maintain the status quo and to perpetuate the privileges of a fortunate few. To prove that my belief in the saving power of education is no more and no less than faith, I'll close with a poem by Emily Dickinson, who saw that everything—salvation and destruction—rests with us:

The Brain—is wider than the Sky  
For—put them side by side—  
The one the other will contain  
With ease—and You—beside—

The Brain is deeper than the sea—  
For—hold them—Blue to Blue—  
The one the other will absorb—  
As Sponges—Buckets—do—

The Brain is just the weight of God  
For—Heft them—Pound for Pound—  
have any better lunch?  
As Syllable from Sound—

Jim Maguire,  
English Department

## Letters To The Editor

### Reagan for President?

Guest Opinion

Just a few weeks into his presidential campaign, Ronald Reagan already has made a lions' share of verbal blunders. The strong public reaction to some of his recent statements should warn us of the potential consequences of electing this man as president.

Mr. Reagan recently voiced his support for the re-establishment of "official" relations between the U.S. government and Taiwan despite the fact that Washington recognizes Peking as the only legitimate government of China. With a few words, Mr. Reagan not only infuriated nine-hundred million Chinese, but also threatened the stability of a delicate political relationship between Peking and the U.S.. Successful U.S. foreign policy requires a perceptive leader experienced with the intricacies of international diplomacy. The United States cannot afford to elect a leader whose diplomatic "skills" consist primarily of an ability to alienate large numbers of people with rash, blunt statements.

In a recent campaign speech, Mr. Reagan stated that the Vietnam War was a "noble cause." One wonders how it is possible to consolidate a decade of raging controversy into two words.

Mr. Reagan has also publicly questioned the theory of evolution and accused President Carter of creating "a very severe depression." When asked if he perhaps meant to use the word recession, Reagan stated that he was speaking of depression in the "human" sense.

The contention that Mr. Reagan, if elected, will surround himself with competent advisors who will effectively muzzle his thoughtless statements is questionable. His current campaign advisors have not been able to do so; why should future advisors have any better luck?

Thus far, the damage has been done primarily to his own campaign. However, we cannot afford to elect Reagan to a position where the consequences of naivete' will

be far more serious. Our nation cannot tolerate such a blatantly simple-minded leader.

Cathy Hancock

### Alone

Editor, the Arbiter:

29 year old white male prisoner. Am very lonely. Without family or friends. Wish to correspond with male or female students. No racial hangups. To share lifestyles & experiences. Answer all letters.

### Please Write

Editor, the Arbiter:

Death Row prisoner, male, age 29, desires correspondence with either male or female college students. Wants to form some kind of friendly type relationship and more or less just exchange past experiences and ideas. Will answer all letters and exchange pictures. If interested write to: Luis Mata, Box B-37768, Florence, Arizona 85232.

Sincerely Yours,  
Luis Mata

### Conservation

An open letter to all BSU students:

All students interested in conservation and the wise use and management of Idaho's rich natural resources are invited to attend this year's first meeting of the Boise State University Conservation Group. This meeting will be held at 5:00 PM on Monday, Sept. 15 in the Caribou Room of the Student Union Building.

Past group activities have included lobbying for legislation creating the Snake River Birds of Prey National Conservation Area, submitting comments on Environmental Impact Statements, participating in televised debates, bat-

tling the Sagebrush Rebellion and supporting the creation of the River of No Return Wilderness Area.

Upcoming activities this year will include commenting on the Bureau of Land Management's Wilderness Review, working to help re-elect Idaho senator Frank Church and state senator Ken

Robison as well as helping to elect Dr. Richard McCloskey (BSU Biology prof.) to the Idaho senate. Furthermore, we will be supporting other Idaho legislators who have good environmental voting records in this election year.

Our group is action oriented. Please don't show up unless you are willing to be put to work and

want to contribute in some way to the group. But if you care about wilderness and wildlife, air and water quality, scenic areas, and are willing to work for positive changes, we can use you. Join us.

Bill Laurance  
President,  
BSU Conservation Group

## Not a job . . . a Career!

Become an assistant to a physician or dentist in 14 weeks

The AMERICAN Institute of Medical-Dental Technology offers:

- ★ Morning, afternoon and evening classes
- ★ Modular classes
- ★ Continuous enrollment
- ★ Informal
- ★ Maximum 15 students per class
- ★ Qualified instructors
- ★ Personalized instruction
- ★ Career guidance
- ★ Internship
- ★ Placement assistance

# Bankcard Bingo

If you have had much opportunity to deal with the merchants of Boise you probably already know that they welcome a check with the same warmth and pleasure that the Romans would have shown to a barbarian and his pet elephant come to town for a little rape and pillage. "Come on," I say to a pimply faced assistant manager who probably sleeps in his red courtesy vest, "I have just shown you five forms of picture I.D., the deed to my house, and my fraternity's secret handshake. Can't you possibly accept a check?" "Nope," says Albert Einstein in Acne, "ya gotta have a bankcard."

A bankcard, for those of you who aren't proxy to all the inside conspiracy information which I hear from my buddy Phil Phobia, (a man so caught up in plots that he keeps petitioning the government to re-investigate the Cain/Abel case as a possible conspiracy), is a ploy by wallet manufacturers to add extra plastic to American wallets, thus making them wear out faster. The wallet trust has done such a good job that unless you live in Allalacia or the Yukon Territory, where check writers are commonly fed to the

wolves, life without a bankcard is about as pleasant as Intermediate Accounting on a Wild Turkey hangover. For the above reasons I decided that a bankcard I must have. It couldn't be very hard to get one; after all, I had been banking at the same bank for eleven years without letting my balance get lower than \$1.37 more than once or twice. Full of optimism I turned my face towards Bankland and scratched off.

Upon entering the bank I went up to a smiling woman, told her of my desire, and was instantly directed to an unsmiling woman whose nameplate identified her as Mrs. Borgia. Her resemblance to the Dragon Lady in the old 'Terry and the Pirates' comic strip was uncanny. "Hi," I said in my best Eddie Haskel voice, "I would like to get a bankcard, I want to take my place in society." In the pause before her answer I was suddenly made aware by the way Dragon Lady's X-ray stare was aimed at my chest that I had already made mistake number one—never wear a t-shirt with the name of a non-Ivy League school emblazoned on it when trying to impress anyone in the money business. It is the moral

equivalent of wearing a butchers apron to your murder trial. "You know," hissed D.L., "that you have to have money in your account to have an Ultra Gold Eagle V Instrumentator Card?" Pipping back in somewhat abashed Eddie talk I responded, "Uh yeh, sure. I got money." "Well fill this form out and if you finish bring it back to me," said Lizzard Woman as she went back to foreclosing on orphanages or whatever she was doing before I shambled into her sphere of influence.

"Ah, a form," I thought as I walked back to the leatherette couch next to the drinking fountain, "I'm on home turf now." Five years of working for the government had taught me one or two thousand things about filling out forms. These bank clowns could take lessons from the lowest Forest Service grunt on how to write a confusing, prying, impossible to fill out form. Unfortunately for me the bank apparently had taken more than one lesson. The form didn't even get around to last name first, first name last until page seven. "Who was your Grandmother's favorite stock car driver?" "What kind of crystal do

you use when the boss comes over to dinner?" "How many years have you lived at your present address?" (years? I move every 6 months as a matter of principle.) "List five people, incomes over \$20,000 a year, who would lay down their lives for you in combat." "Give a three letter word for a river in England." (I got that one, The Wye. It proved to be the only one I did get.)

Knowing when I'm beat I resolved to carry cash. Walking to a trash can close to the fire-breathing financier's desk I loudly ripped up the form and said "Screw it" but not as loudly as I would like to think that I did.

I read that the Stockholm,

Sweden police department once mounted a campaign to stamp out bad check writing by making merchants more cautious about accepting checks. It became so tough to write a check in Stokholm that everybody took to carrying cash, and the figures for bad check writing plummeted to an all time low as a result. The police would have been really pleased with their successful campaign except for one minor detail: violent mugging statistics suddenly went through the ceiling. Mugging had become more profitable with all of the people carrying cash. When they find my battered, half-dead body next to my empty wallet, you can thank the bankcard for it.

## Young Genius Dies

The 'Dungeon Master' Suicide was not a Dungeons and Dragons Victim at all, insist the fellow students of apparent suicide James Dallas Egbert iii.

Egbert, 17 at the time of his death, disappeared from the Michigan State campus for 28 days last summer. A private investigator theorized the disappearance was related to an elaborate Dungeons and Dragons game. The investigator found Egbert well in a Texas motel room, but hasn't revealed any further details.

A year later, on Aug. 17, Egbert died of apparently self-inflicted gunshot wounds in Dayton, where he'd lived since the 1979 incident.

But Egbert's acquaintances at Michigan State now vehemently disagree with popular speculation

Egbert was "disturbed" by the fantasy game or even his homosexuality. Phil Boyer of MSU's Lesbian/Gay Council says Egbert's homosexuality "was not an extraordinary problem."

Few professed to knowing Egbert well, but all discount the sensational gossip. They attribute Egbert's problems to being a precocious 15-year old freshman "dumped in a dorm" with older, more mature people, as one member of the campus Tolkien Fellowship put it.

Egbert's "fairly obvious" problem, adds fellowship President Marjorie Foster, was that "when you're very smart you sometimes get isolated. He needed some time to grow up. I think he was very lonely."

# Defaults Decreasing

Campus Digest News

The National Direct Student Loan program has reported a drop in the number of student defaults on student loans. It is the first decrease in the history of the program.

In 1979 the default rate was 16 percent as compared to 17.4 percent default rate in 1978.

The highest number of defaults are from Guam. North Dakota has the lowest default rate.

# Tables Turned

(CPS)—Oregon's teachers' handbook's section on plagiarism was lifted from Stanford's teacher's handbook. A student who'd taken courses at both universities discovered the crime while looking up professors to write recommendations for him. "The thing that upset me most was the hypocrisy," says student Tak Sukekane.

The discovery led to a round of apologies. Both Oregon and Stanford officials excused it as "an oversight." Though Sukekane continues to accuse Oregon of "willful stupidity," Oregon grad school Dean Aaron Novick says the teachers handbook is being re-written.

# Sign Carefully

Campus Digest News Service

Increasing numbers of students choose to live off campus each year, renting apartments from sometimes not-too-dependable landlords.

One complaint often lodged against landlords is that they fail to return security deposits when tenants move out. Disputes over damages incurred can be prevented if the proper precautionary steps are taken.

The landlord should inspect the apartment with the tenant before the tenant moves in. If the landlord is unable to inspect the premises with the tenant, then the tenant should get two responsible adult witnesses. The witnesses should not be relatives or parties to the lease. It is recommended that there be witnesses even if the landlord is able to join in the inspection.

When inspecting the rental unit, all damages should be recorded on a checklist.

When inspecting the apartment the renter should pay special attention to the following:

- Rooms should be clean, free of vermin and have no excessive moisture. If the apartment is dirty, some of the money charged for a security deposit should be deducted for cleaning expenses the renter will incur. If the tenant does accept a dirty apartment, which one would not have to do, it would still be necessary to clean the apartment when moving out.

- Be aware of hazardous conditions. Some things to look for include faulty wiring and poorly maintained heating systems. You might want to call the city's Public Works Department or the Fire Department's Fire Prevention Bureau for an inspection.

- Make certain the furniture in the apartment is the furniture listed in the lease.

- The tenant, landlord and witnesses should sign and date the checklist. Give a copy to the landlord and keep a copy for yourself.

# Director Resigns

BSU opera theatre director William Taylor has resigned to become director of opera and musical theatre at Bowling Green State University, Bowling Green Ohio.

During his nine years at Boise State, Taylor has directed or conducted about 18 opera and musical theatre productions. He has made numerous solo appearances with the Boise Philharmonic Orchestra, and has participated with the Boise Civic Opera, for which he directed the 1979 production of Puccini's "La Boheme" and also sang the role of Marcello.

A master of music graduate of Indiana University, Taylor came to Boise State nine years ago after sixteen years with the vocal music faculty of Southern Illinois University, Carbondale. For the past two years he has been Pacific Northwest governor of the National Opera Association. He was a 1960-61 Fulbright scholar at the Rome Opera House.

## New Desk Now Open

In order to provide library users with a broader range of evening services, the library has, on an experimental basis, established a service desk on the second floor. The desk will be staffed by librarians from 6:30 p.m. - 10 p.m. Monday-Thursday. The intent is to provide users with professional help in the areas of Documents, Maps and the Curriculum Resources Collection. Formerly only student assistants were available to handle student needs in the evening hours. Should this new service prove effective after a four month trial period, it will be continued for the rest of the academic year.

The 2nd. floor will be closed at 10 p.m. Monday-Thursday when the librarian goes off duty. The first, third and fourth floors of the library will remain open until 11:00 p.m. as in past years.

## After Handling Utes 28-7

# Broncos Prepare to Face Louisiana

by Bud Humphrey  
Arbiter Sports Editor

Fresh off a stunning 28-7 victory over a highly-touted University of Utah team, the Bronco football squad will return home to face the Southeastern Louisiana Lions, a team which, according to BSU head coach, Jim Criner, is much like his own offensively and defensively.

The game starts at 7:30pm Saturday, at Bronco Stadium. When they have the ball, the Lions will run an option from the "I" formation—Boise State's basic set—or drop back, and they have the "good skill people" to back up all such maneuvers, Criner notes.

On defense, "they are a 5-2 team much like ourselves, not a stunting team, and I think they are like us in that they bend but don't break."

As such, will Oscar Lofton's team give the Broncos a mirror-image struggle, perhaps to a 10-10 tie or a hard-fought 3 point win for whichever team gets the breaks?

Much like the Utah team BSU faced last week, SLU returns a talented running back, Mack Boatner, to go along with a seasoned quarterback, Johnny Wells, and receiver, David Patterson.

Again much like the Utes, the secondary is the best feature of the defense. Four veterans fill the defensive backfield, with speedy Cedric Patton and Anthony Vereen, returning after a year out with injury, cornerbacking in front of Orlando Whitlock, who also does some punt returning, and Herman Colly. A good midsize linebacking corps backs up a line that may be light on the ends.

And exactly like Utah, Southeast Louisiana has the Broncos first on their schedule after a 6-5 season. The Lions, a Division I-AA team like Boise State, face a heavy schedule of tough Southern teams after Boise State.

Last Saturday's game may have been planned to be Utah's warmup for Nebraska this week, but turned into a moral rout for the Broncos. While the offense built up a three-touchdown lead over the first, second quarters, the defensive linebackers did much to help protect that lead with three

interceptions, each at a time when the Utes were threatening to score.

The Broncos established offensive authority early, as Joe Aliotti engineered a combination of short passes and deceptive draws, plus two timely long passes to Lance LaShelle, that ended in touchdowns the first two times Boise State had the ball deep in their own territory.

The offense was stymied through most of the second and third quarters, but Ron Chatterton, Dan Williams and Ray Santucci successively keyed the "bend but don't break" defense by intercepting passes within their own 20-yard line.

The fourth quarter sparked the offense again, as Terry Zahner and Cedric Minter each got a chance to shine in touchdown drives. Zahner was BSU's leading rusher with 113 yards and two TDs and Minter, whose late 4th-quarter score nailed down the win, had two touchdowns of his own and 103 all-purpose yards.

In addition to the interception, Williams led the defense with 16 tackles, six of them unassisted, two sacks and two pass deflections. Santucci followed with 13 tackles, blitzed for a QB sack, and ran back three punts for an average of 20 yards apiece. Jeff Taylor keyed the line, with six tackles and two sacks in home territory.

Three Broncos were injured and had to be withdrawn from the game, but are expected to start this Saturday. Kenrick Carnerud, sophomore kicker, scored two extra points, and kicked a field goal that was nullified because of a penalty, before his left ankle was injured when Ute lineman Bill Gompf blocked an FG attempt. Freshman Tim Klana came through with points after for the last two Bronco touchdowns.

Also, sophomore Harry Stokke and junior Bill Madinger, strong side interior linemen, appear healthy enough to play this Saturday in front of Jim Valaile and Norm Rawlings, who did much to power Minter and Zahner through the Utah defense in the late going.

The game against Southeast Louisiana will be broadcast over KBOI Radio, 670 AM.

## NAU and Reno Win First Games

(UA)—Nevada-Reno showed an awesome rush defense, and Northern Arizona's Frank Hawkins tore up that of the opposition, as both teams aided Boise State in giving the Big Sky conference an undefeated opening week against high-caliber opponents last Saturday.

Hawkins, an All-American and All-Big Sky fullback last season, stayed true to his form by rushing for 110 yards against Texas A&I, enroute to a 24-11 Northern Arizona victory. Losing two fumbles and an intercepted pass, the Lumberjacks forced the NAIA national champions to cough up

the ball seven times.

Meanwhile, in Baton Rouge, La., freshman quarterback Jeff Ardito started in place of an ailing veteran and led the Wolfpack to a 20-0 win over Southern University. The defense held its hosts to negative yardage running, and 142 total yards for a 2.5 yard per play average.

Only two touchdowns were scored against all three teams: against Boise State, a second-quarter pass gave the Utes their only TD, and Northern Arizona allowed the Javelinas a TD (plus a two-point conversion) on a surprise 99-yard punt return.

Joe Aliotti, shown in practice before last Saturday's game against the University of Utah, went 12 for 16 passing without an interception in that game, for a phenomenal 75 per cent record so far this season. The Bronco quarterback already holds the Big Sky Conference record for season pass percentage, completing .658 of his passes last year.

Photo by Dick Selby

## Karl Knapp

# Track Coach's Duties Eased

(UA)—When Boise State hired Joe Neff as head women's track and field coach earlier this summer it got a two-for-one bargain, and Ed Jacoby is probably a happier man because of it.

Neff, the former head cross-country and track coach at Lodi High School in Lodi, California, takes over this fall not only the head women's track position, but also as the men's and women's cross-country coach. A 1:49 half-miler at San Jose State in the mid-sixties, Neff will also handle the men's distance corps during the track season.

Clearly, the addition of Neff to the Bronco track program is a welcome respite for Jacoby, the men's head coach and coordinator of track and field at Boise State. Jacoby will now be free of cross-country coaching responsibilities, enabling him to spend a greater deal of time with the track team during fall workouts.

Not that Jacoby ever minded

coaching cross-country, but the eighth year head coach has his hands full enough this fall as it is. Boise State is combining its men's and women's programs this year, with Jacoby overseeing the sprinters, hurdlers and field event people, while Neff handles the middle distance and distance runners.

If Neff's main objective at Boise State is to build "a successful, respectable distance program," his desire to stimulate community interest in distance running is not far behind; the two are definitely related, as he sees it, and community support is something of a must if the distance program is to burgeon at Boise State.

"I'm totally dedicated to the idea of promoting distance running in the community," stated Neff, who during his seven year stint at Lodi High School coached several league championship teams in both track and cross-country.

Although Neff is a newcomer to college coaching, he is nevertheless acutely aware of the severity

## Sign Up for Fall Intramurals Now

(UA)—STILL TIME! Yes, you of the classroom doldrum and the free-floating nervous energy: the time is now to sign up for Intramural Tennis, Softball, and Men's and Women's Flag Football. If you're quick enough, you can get up a roster for one or more of the above programs and sign up in the Intramurals Office, Aux. Gym 102 BY THIS AFTERNOON (Sept. 10) and get on the schedule for this weekend (tennis) or the next few weeks (other sports).

Details? Call the Intramurals Office, 385-1131.

Preview

# The Rest of the League

by Bud Humphrey  
Arbiter Sports Editor

(UA)—Last week, we previewed Northern Arizona and Nevada-Reno, which started their seasons last Saturday, along with Boise State, all successfully. This week we will preview the Big Sky Conference schools that start their seasons this Saturday.

## Montana State

Like the Sonny before him, Sonny Lubick doesn't like to lose. And he makes sure his teams don't.

So with the loss of 12 starters from the 1979 Big Sky champion team, including blue-chip kickers, receivers and defensive backs, what can Lubick do but carry Sonny Holland's banner and rally for teamwork?

Consistency and conservatism have always been the hallmark of the MSU teams of the last dozen years. This season, it won't hurt to have last year's starters on every inside line position to protect sophomore QB Barry Sullivan, who by midseason 1979 had found his place shooting at three receivers, all of whom have now graduated. In 1980, Pat McLeod may be a prime target, and Tom Fox will

lend experience at tight end. Spurning the juco route, just like Holland, Lubick looks to last years reliable lettermen for starters in the backfield. Jeff Davis will return as a not-very-big fullback, and the tailback spot will likely be filled by Steve Roderick, mostly untested, but—well, he's part of the team.

The biggest loss MSU sustained in the defense was Stu Dodds, All-Big Sky not only as a free safety but as well as a punter. While Terry Alberta moves up to the kicking chores, two lettermen will compete for Dodds' old spot, to play alongside strong safety returner Tim Strudevant. Starters also return at the cornerbacks.

Backups beyond two-deep in the offense will be provided by Montana State's usual bumper crop of in-state and Wyoming freshmen, in the true Holland style.

But the front line may be the key to any MSU defensive success or failure. While two classy linemen have graduated, middle guard Ron Ranieri is one of the top returners in the league on the line, and hard-hitting seniors fill out the front four.

Top and sixth-place tacklers-per-game in the league last year, Jack Muhlbeier and Dave Semmelbeck, will return to make

MSU's defense an all-round threat.

Really, when Sonny Lubick was picked two years ago to replace Sonny Holland as MSU's football coach, adherence to tradition must have been top priority. Seems to have worked. After all, like Sonny, like Sonny...

The Bobcats open play this year at North Dakota U., Sept. 13.

## Montana

One of two first-year coaches in the Big Sky this year, Larry Donovan is at least entering the job without strikes against him.

A defensive specialist, Donovan welcomes some strong players back from a fair-to-mediocre defense. Kent Clausen, who didn't realize his potential as a MLB last year because of a back injury, will key a four-man linebacker corps populated by last year's starters, Randy Laird and big soph Curt McElroy, plus an extra JC product, Dennis Bowman. These, plus a three-man line, formed the mediocre part of the Grizzlies' defense last year, and a high priority is the re-formation of the unit into a less porous wall.

Unfortunately, since more of the conference is passing, the "fair" part of Montana's defensive squad

Darlene Bailey directs the women's volleyball team toward a tough season that begins Sept. 19 at Moscow.

Photo by Paul Rossi

## Volleyball Squad Returns Experience

(BSU)—With only two players having graduated off the 1979 squad, the Bronco women's volleyball team looks anxiously to 1980. Returning for the Broncos are centerblockers Charlotte Kim and Kristi Brockway. Kim led the 1979 team in total kills with 164, and Brockway recorded the team high of 35 service aces. Both Brockway and Kim led the Broncos in stuff blocks.

Sophomore setter Beth Bergin also returns for BSU. Bergin directed the Broncos 5-1 offense in 1979. She will be joined by freshmen setter Maria de Lorenzo. De Lorenzo, from Wood River High School in Hailey, ID, helped lead her team to the 1978 Idaho State Championship. Other returning players are Linda Beller, Barb Machado and Rhonda Sprague, all of whom saw a lot of action in 1979.

The returnees will be joined by a strong corps of new players. Pam Hadley comes to BSU from Moorpark Junior College in Moorpark Ca., where she was voted first-team All-Western State Conference. Hadley led the conference in hitting consistency and was voted most valuable player on the Moorpark squad which tied for first place in the conference.

Freshman Lisa Pickering will also add power to the Bronco's front line. Pickering attended Santa Ana High School in Santa Ana Ca., where she was selected first-team All-CIF (California

Interscholastic Federation) in both 1978 and 1979.

Junior Laure Tucker, 6-1, will draw centerblocking duties in 1980. Tucker was an All-Conference pick in both volleyball and basketball at Casper Junior College in Wyoming. Also from Casper J.C. is 5-8 hitter, Rhonda Cochran. Cochran was selected to the Junior College All-Region IX team in 1978.

"Our offense will be much stronger this year, particularly with the addition of Hadley and Pickering and the tremendous improvement of Kim. We also have more depth at the setting position. De Lorenzo and Bergin have the ability to really move the offense," said head coach Darlene Bailey.

"Even with a more balanced offense our passing and defense, which were our strengths last season, have improved. The girls are performing as well at the beginning of the season as we ended out season in 1979," added Bailey.

The Broncos are beginning their third week of practice in preparation for their opening match on Monday, Sept. 22, against the Weber State Wildcats. NNC and Weber State will square off in a preliminary match at the BSU gymnasium at 6:00 p.m. The Bronco-Wildcat match will follow at 7:30 p.m. Admission is \$1.00 for adults and 50 cents for students. Full-time BSU students are admitted free.

# BUS STOP

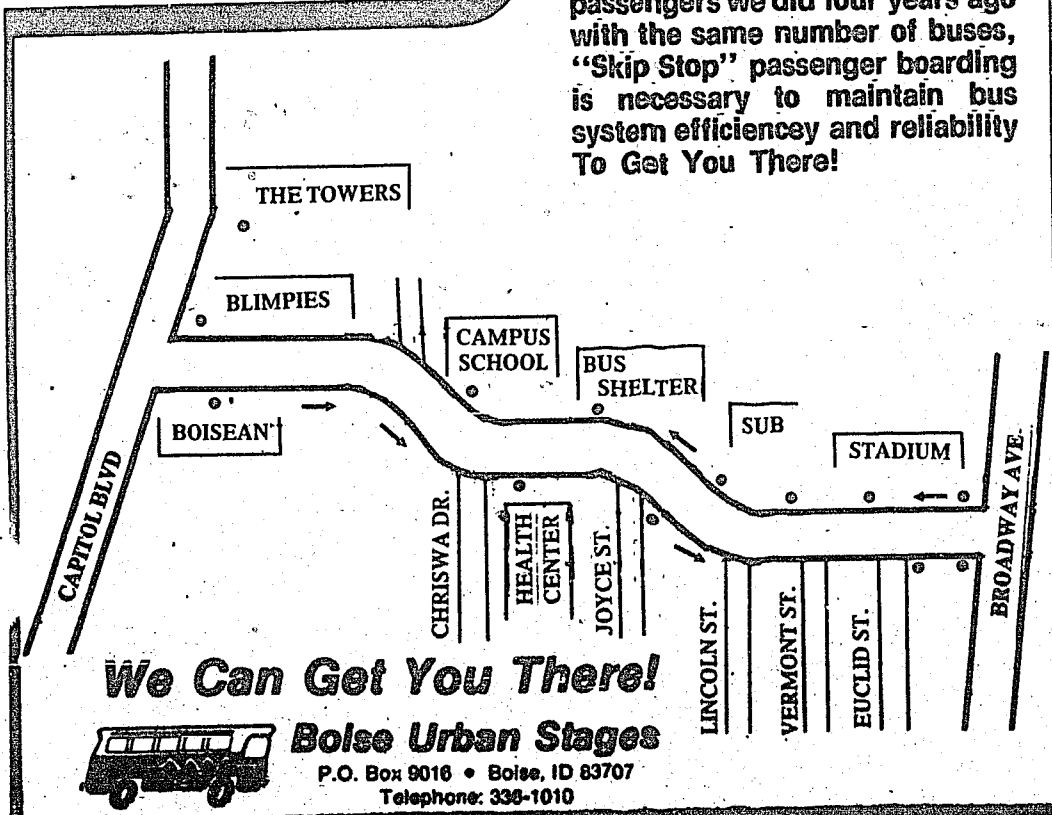

Designated  
Passenger  
Loading Along  
University Blvd  
Effective:  
September 22.

"Skip Stop" passenger loading at designated stops will maintain reliable schedules, transfer connections and help control maintenance and fuel costs.

After Bus Stop signs are installed along University Blvd in late September, drivers will stop only at the designated locations shown by dots on the map below.

For your convenience, please become familiar with the designated Bus Stops. If you could help us by using the loading stops immediately, we'd appreciate it.

Since we transport twice the passengers we did four years ago with the same number of buses, "Skip Stop" passenger boarding is necessary to maintain bus system efficiency and reliability To Get You There!

We Can Get You There!

## Cross Country

CONTINUED FROM PAGE 13  
of competition his teams will face this year and avoids making any rash predictions concerning their performances.

This is not to say, however, that Neff doesn't expect a lot from his teams this year. "The one goal I have for every athlete is that we realize the full potential we have for this year," said Neff. Considering that Neff believes his women's team has "potential for success at very high levels" and that his men's team "is very talented," the realization of Neff's goal could lead to a successful season for the Bronco harriers.

And while Ed Jacoby may sometimes miss coaching the men's cross-country team this fall, he won't miss the days of trying to juggle a track program and a

cross-country program simultaneously.

Joe Neff

# Big Sky Players of the Week

(UA)—Everything went the Broncos' way last weekend at Utah, to such an extent that the Big Sky Conference saw fit to declare Boise State players as both the Offensive and Defensive Players of the Week.

Terry Zahner had been the number two tailback for BSU much of last year, but in Utah he was tops in ground gaining, with 113 yards overland. Stretched out over 16 carries, that gives him a highly-consistent 7.1 yards a carry, with a long gain of 18 yards. The Pinole, CA senior moved up to second place in Boise State career rushing yards with 1,625, beating out Fred Goode and John Smith and second only to Cedric Minter.

Dan Williams lived up to his preseason promise as a senior

Terry Zahner Dan Williams

inside linebacker, and collected a team-leading 16 tackles, six of them unassisted, against the Utes. In addition, Williams came up with a crucial interception, and deflected two Ricky Hardin passes to earn his defensive Player of the Week honors.

This is the first time either player has been titled Big Sky Player of the Week.

# BSU Tennis Courts Near Completion

(UA)—Tennis classes will start on campus September 15 whether the new asphalt courts are ready by then or not, said Bill Bowman, chairman of the Physical Education Department. But the courts, next to Driscoll Hall and the Music-Drama Building, could be in shape later that week, giving Boise State students an on-campus tennis surface for the first time in a year.

The project, which comes mainly from funds for the pavilion (as the multi-purpose structure is being built where the old courts once resided), will feature 8 full-size courts. Lighting will be up to standards recommended by the U.S. Tennis Association, which university architect Chet Shawver said was lacking in the old courts.

Bus Connor, who teaches many of the tennis classes and coaches varsity tennis at BSU, said the classes need more students than are presently enrolled. The fact

that last year's classes were held at commercial courts across town could have lowered interest, he said, but with the on-campus courts the objections should be met.

Classes will start September 15 and run for nine weeks, so there's still plenty of time to add them to a schedule, noted Connor. All sections are open except one.

The reason the courts won't be ready on Sept. 15, according to Shawver, was a delay involving a fencing contractor who otherwise was "very cooperative" in the short-notice project. The entire court area will cost about \$140,000 rather than \$220,000 a previously planned project would have cost.

Before the Morrison Center site was relocated next to the Towers, according to Bowman, the courts had been planned to be built in two sections, one near the Towers and one near the SUB.

# The League

CONTINUED FROM PAGE 14

has been the secondary. Strong safety Jay Becker is a sure bet, but a few freshmen may have to chase passes before a solid defensive backfield is found.

The Grizzly offense is just as star-studded and just as questionable. Rocky Klever was moved to tailback two years ago from QB to make room for a Bob Boyes centered shotgun. Now Klever is himself the center of the offense, returning as the team's leading ground gainer and with a better passing record than the quarterback apparent, Bart Andrus. Also helping out in the sprintout pattern will be mirror tailback Bob Cerkovnik, with FB Wayne Harper doing some blocking.

Donovan went to the jucos for receivers and came up with Mike Alex, who has played both WR and tight end. Alex will join returner Bill Lane to flank an interior as iffy as three potential starting sophomores can make it.

One commodity the state of Montana never runs out of is kickers, and prep All-American Dean Rominger will give UM's kicking game a welcome boot.

Confusion, yes. But for a defense-oriented coach, it's hopeful confusion, and Montana can clear a lot of things up during

its Sept. 13 home opener against Simon Fraser of British Columbia.

## Idaho State

How do you improve on an 0-11 record? It's first-year coach Dave Kragthorpe's job to count the ways.

First, schedule Weber State twice: you're bound to beat them at least once.

Second: surround yourself with assistant coaches who share your passion for the pass and a speedy defense.

Now the third step many coaches might take is to fire all the returning lettermen, top down. Kragthorpe, though, keeps his 31 returners, 14 of whom started last year. And that may not be a bad move, considering how close last year's Bengals came to upsetting several powerful teams.

Talent returns: QB Dirk Koetter and receiver/tailback Jerry Bird will come back, along with an experienced two-deep offensive line, which Kragthorpe admits may lack a leader, though left guard Dan Kinnurien may emerge.

On the other side of the line, linebackers Marvin Lewis and Dave Walser return to harass opposition QBs (they split 12 sacks last year), with Greg Feightner

INTRODUCING THE...

# INFLATION STOPPER COUPON SYSTEM

The plan we want you to consider is The New 321 plan designed with you in mind. THE NEW 321: A meal plan that has been tested for many years on campuses just like Boise State. Essentially, it offers the ultimate in flexible dining.

- Eat as often as you like, where you like, when you like
- Bring friends to meals
- 100% useable for anything from a coke to a steak dinner
- Buy food to take with you into the mountains
- It has no limits short of what you pay for it: This plan is for you.

## HERE'S HOW IT WORKS!

Each coupon book sells for \$43.65 plus tax... you receive 40 coupons good in either the on-campus boarding program (all you can eat!) or in the snack bar for anything from snack items to those "Mama Harris" deli sandwiches!! PLUS for every coupon book you buy you get 5 extra coupons worth \$5.46 FREE... that's an additional 12.5% more in food values you can use and stretch those food dollars!

Coupons are good in the resident hall dining program:

Breakfast	one coupon
Lunch	two coupons
Dinner	three coupons
Steak Dinner	four coupons

Coupons are like cash in the snack bar:

Each coupon has a cash equivalent of \$1.07 on any of the many items offered in the snack bar

## GUARANTEED UNINFLATION

Our 321 Coupon Program Saves You Money

The more you eat, the more you save. That's the truth. If you are a hungry eater, the 321 coupon program is for you. And everytime you dine with us, the high cost of food glides right by, and you glide right out, appetite satisfied at no more cost to you!

Sound like a good deal? We'll be happy to explain this new and exciting food program... or sell you one! Just stop by the food service office in the student union building and be prepared to save money!

CONTINUED FROM PAGE 15  
defending the middle. Bob Matsey will range at the strong safety spot, and Kort Orr and Jack Lewis add quickness to the defensive line.

In addition, the precious toe of Case deBruijn (second team All-Big Sky) will 3-point the Bengals out of trouble more than once.

Of course, under a new coach, nobody's job is truly safe, and even local star Koetter will have to bow down to transfer Mike Machurek for most of the starting.

Transfers fill most offensive skill positions: TE Rod Childs, not the strongest at blocking, will add a passing threat, Lamar Fite will do some scampering from tailback, and California juco standout Chris Corp will flank.

Four defenders, along with Fite, followed quarterback coach Mike Sheppard from the now-defunct U.S. International University grid program. John Naut and Keith Porter, excellent pass rushers, take spots on the defensive line, while cornerback William Harrison and free safety Aaron Graham round out the D-backs.

The biggest question mark for the Bengals is reserve strength in the defensive line-linebacking corps, but if Idaho State manages to avoid its usual plague of early-season injuries, they could be the conference's most dangerous spoiler.

September 11 the Bengals open their season at Utah State.

### Weber State

Too bad for Pete Riehlman. His coaching style is that of a Johnny Majors or a Joe Salem: he has a history of taking over laager teams and, within a short few years, building strong programs. The trouble is, that's tough to do in a conference that's growing competitively as fast as the Big Sky.

It's so tough for Riehlman, in fact, that while at Cal Poly-SLO he had a powerhouse his second year, the Wildcats have lost nearly twice as many as won for his three seasons. Basically, it's a pay-off or pack-up time for Riehlman.

To add to the problems, much of what gave Weber its flashes of brilliance in offense last year—

quarterback Big Bill Kelly—is gone for academic reasons, though all-stars return in guard Tim Small and WR Curt Miller.

QB hopes rest solely on Bill Tantillo, who was undistinguished last year before Kelly took over starting chores. However, besides Miller, Tantillo will have apt targets in receivers Duane Benton and Eric Allen, a California JC transfer.

All starters return on the offensive line—many, including Small, sophs—and additional blocking for the pass game can come from returning fullback Willie Glasper.

The biggest personnel weakness will show on the defensive front, but some positions have been shored up with JC talent. Linebacker could be a strong position, with second-team all-stars Mike Humiston and Danny Rich returning.

The pass coverage is the most consistent Wildcats defensive squad. Mike Massey leads an experienced and quick backfield.

Such material, though somewhat spotty, could pull together in time for Weber's Sept. 13 opener

at Northern Iowa, and possibly provide WSC's first winning season since 1971. With a schedule that includes Idaho State twice and four indoor games, the chips may yet fall in Weber's direction.

Pete Riehlman, though, speaks and acts cautiously these days.

### Idaho

Good thing Jerry Davitch switched around his offense a lot last season; only six of last year's usual starters are returning (and that includes the punter and place-kicker).

What is returning is a plethora of seasoned running backs and receivers behind a starting ensemble of experienced offensive linemen. Russell Davis and Terry Idler will more than fill in for graduated RB Tim Lappano's absence, and Jack Klein will lead three other capable wide-receivers to flank a line that starts solid, but may be lacking in depth.

At the quarter, Ken Hobart and Ben Bubak, both transfers and the former an Idaho product, have beaten out returner Rob Petrillo, and the pass offense should open

up some.

Defensively, Davitch has quite a job in raising the Vandals from their Big Sky next-to-worst standing.

The line was full of holes last year, and noseguard Paul Griffin and tackle Dan Saso were recruited from the west coast junior colleges to help returning end Jay Hayes patch things up. A great deal, however, will depend on walk-ons to bolster the line.

More encouraging is a contingent of returning linebackers, led by sophomore sensation Sam Merriman, second in conference tackles per game in 1979. In addition, many defensive backs return as well as transfer to Idaho, notably Ray McCanna, who intercepted five passes last year for Idaho.

At least one first-team all-star does return: the place-kicker, Pete O'Brien, who made 8 of 9 field goals his sophomore year.

Davitch keeps threatening to coach the Vandals to their third winning season since 1963, but hasn't made it in two tries. Give him another year: this young squad might yet come through for him by then.

Idaho's first game, Sept. 13, is against Pacific in Stockton, Calif.

## Pac 10 Cut

Campus Digest News Service

What was once known as the Pacific-10 conference now seems more like the Pacific-5 instead.

A total of five Pac-10 football teams have been suspended for not abiding by academic regulations. The universities which are unable to compete this season include the University of Oregon, University of Southern California, University of California at Los Angeles, Oregon State and Arizona State University.

The teams were penalized because the schools were violating conference rules forbidding falsified transcripts, unearned credits and the intrusion of the athletic department into the academic process.

The teams were ineligible to participate in the league's 1980 football championship and any of the post-season games, including the Rose Bowl.

Oregon also had three of its players declared ineligible for the entire 1980 season when the players accepted free airline tickets through their coaches.

The Pac-10 investigation, which began last October, led to one of the biggest scandals in the history of intercollegiate athletics. The allegations led to other conferences, the National Collegiate Athletic Association and law enforcement officials conducting their own investigations.

One of the additional sanctions required U.C.L.A. to forfeit all the games in 1977. Oregon State forfeited its 1977 and 1979 wins and the University of Oregon forfeited the games of 1977, 1978, 1979.

U.S.C.'s track-and-field team has been prohibited from participating in the conference or in N.C.A.A. championships in 1981. Points won by ineligible athletes during the 1978 Pac-10 championships have been eliminated. This move deprives U.S.C. of its 1978 conference title.

Additionally the University of Oregon's football team has been declared ineligible to compete for two years. Three of its freshman football scholarships have been taken away.

Oregon's record for any meets in 1980 was adjusted for having ineligible athletes participating.

## Programs Board Plans Activities

(UA)—This year the Student Programs Board has planned a variety of films, concerts, lectures, and special events with two thoughts in mind—an emphasis on lower ticket prices and first rate alternative programming that will be entertaining and enlightening for both full and part-time students.

Brad Martin, Special Assistant to the SPB, said that "if students attend these free and inexpensive events they will all broaden their entertainment tastes."

The SPB received \$58,000 from the ASE/SU senate for the 1980-81 season. Of the \$58,000, \$13,600 was allotted to concerts, \$7,900 for films, \$11,700 for lectures, \$2,700 for special events, and \$10,000 for the fine arts program.

Nancy Fredericks, chairman of concerts, has a series of coffee house concerts called Java Night Music. This series contains mainly soft rock performers.

Most of the concerts are free except for one; the ticket price for the concert by the 20's jazz duo of Boden and Zanetto is \$1.00. Refreshments will be provided.

The series starts Sept. 11 with Chip Murray, and additionally includes Wilson and Caine, Spike Erikson, and folk guitarist Sue Croner. Other major performers this fall will include The New Deal Rhythm Band and the Dave Grisman Quartet.

Ruth Lowery, chairman of films and fine arts, has brought a total of 42 films by buying a new package offered by Films that were brought in last year. In the month of September alone the SPB will offer 3 popular films.

The films include: *Picnic at Hanging Rock*, Sept. 11, 12, 14, and *Story of Adelle H.*, Sept. 25, 26, 28. *Small Change* and *The Story of Adelle H.* are both directed by Francois Truffaut, who played the French scientist in *Close Encounters of the Third*

*Kind. Picnic at Hanging Rock* is directed by Peter Weir.

The two classics being offered later in the fall semester are a double feature of *Citizen Kane* and *The Philadelphia Story* which will be shown Oct. 23, 24, 26.

Other films include: *Dr. Zhivago*, *A Simple Story*, *The Sunshine Boys*, *Saint Jack*, *Cinderella Liberty*, *Cat and Mouse*, *Autumn Sonata*, *Three Women*, *Nanook of the North*, and more.

Two new features of the film program include ticket booklets and multiple showings. The ticket booklets are available at the SUB information booth and have 10 tickets for \$5.00 for students, and 10 tickets for \$10.00 for non-students. Each ticket will be good for a single or double feature.

Film tickets will cost students \$1.00 for single features and \$1.50 for double features; non-students will pay \$2.00 for single features and \$2.50 for double features.

The multiple showings include a 3:00 p.m. Thursday matinee in addition to the 7:30 showing and the 6:00 p.m. Sunday showing.

Lowery has planned fine arts performances by David Grimes, a classical guitarist, on Oct. 7-8, and the Northwest Dance Symposium featuring Karen Attix of San Francisco and the Bill Evans Co. from Seattle on Nov. 13-16.

Annie Malcolm, chairman of lectures and special events, has planned three lectures beginning with Monte Wilson's lecture on Mount St. Helens, Sept. 9th. The lecture will be held in the SUB Ballroom.

Victor Machetti, former CIA agent, who wrote *The CIA and the Cult of Intelligence*, and Richard Brautigan, author of *Trout Fishing in America*, will also hold lectures. Comedian Marcia Warfield will perform at the end of the semester.

"Twentieth Century Egyptian" is the title of this painting by John Taye, BSU assistant professor of art. This and other selections will be shown on the first floor of the library through September.

## Boise Gives 10 Choices for After-hour Alcohol

by Terrie Rowley  
Arbiter Staff

Are you new to Boise and BSU? Do you wonder where the hot spots are? Then this article is dedicated to you. Bear in mind that Monday night isn't the best night to Bar Hop but it was a welcome change from the (already) piles of homework.

The first stop was Burger and Brew on Broadway. Inside are pool tables, pin ball, burgers and brews.

Brews sell for 99 cents a 20 ounce glass during happy hour. The atmosphere is low key, easy to talk in or enjoy a quiet pool game.

Not much was happening at B & B (after all it was Monday) so we strolled up to the Ram. The Ram has something going every night: Monday night Football, Ladies Night, Wheel of Fortune, Western Night, and Happy Hours.

They serve dark beer on tap and feature some of the best deep fried mushrooms in town. BSU Alumni never fade away...they're at the Ram.

Down the street we illegally parked in front of a dive bar called, "SUDS." As we walked in we expected to duck as a body was being thrown out the door. Instead we were accosted by a friendly ex-DJ from KBSU.

Maria, at the bar, claimed that SUDS had the hottest pool players and the cheapest beer. The pinball machines are reputedly "easy to whip."

They also offer free beer to reporters so when you're broke you might find that information useful.

Desmond and Mollie's is a hop, skip and stumble away. D & M's is the no-nuke, semi-gay, no draft (except beer), leftist type hangout.

They feature teas, subdued lighting, chess, backgammon, bagels, wine and (of course) beer. It's a good place to wait for your pizza to cook at the Flying Pie.

D & M's also has the widest range of entertainment in town. Expect Chip's guitar, Chris' belly-dancing, a one act play or just go in the bathroom and read the graffiti. It's great!

TK's is across from Bronco Stadium, next to the river. A fire normally roars later in the fall in the meantime pool, pinball and shuffleboard abound.

A friendly bartender assured us that his 13 ounces of draft at 55 cents is a great buy. TK's is low key and very informal so don't take your mom there.

Casey's is located up on Vista.

You can play pool, sit in the beer garden, drink cheaply and get rowdy. Casey's has been a student hangout as long as anyone can remember- or as long as anyone can perceive.

On the way to the 8th Street Marketplace we stopped at the Iron Gate, which holds the honor of being THE closest bar to Campus. It's located above the coffee shop of the Ramada Inn.

Drafts are 75 cents, Happy Hour is 4:30-6:30 and features 2 for 1 drinks. Martha the bartender reported that the "Gate" has beautiful waitresses and barmaids, with the exception of Dave.

Dave loves sweet young college ladies (for a good time call 1-800-342-0624) and will offer them drinks for \$1.00 upon request Thursdays.

We swaggered by Victor's, a private club across from the Towers. We didn't go in because neither of us possessed a membership card.

If you are a member you and limitless friends can enter to dance on a lighted dance floor, sit in private booths or jacuzzi to your hearts' content. Skinny dipping in the pool is something to do for a change from the BSU Fountain.

Whiskey River features foot-stompin' and heel clickin' music, fair priced drinks and unstable tables. Well maybe it was the reporters that were unstable, after all, we had to sample a few drinks here and there.

Rowdiness is prevalent at Whiskey River and shouting your conversation is perfectly acceptable...wear your hat and boots.

We practiced the fine art of lip-walking over to the Cedars for the quiet, peaceful atmosphere and a backgammon game. There the bartenders gave us plenty of Capaccino (an Italian coffee), beat us at backgammon, and got us home safe and sound. Always trust your bartenders.

## Arbiter Weekly Book Review

Sky, Gino. *Appaloosa Rising: The Legend of the Cowboy Buddha*. New York: Doubleday Inc., 1980.

Boise author Gino Sky has constructed a novel set in a mythic Stanley Basin concerning the efforts of some modern back-country cowboys and cowgirls to find spiritual contentment in their lives. The characters of the story try to identify their cosmic consciousness in the essence of a hybrid oriental god combined with the materialism of the pick-up truck. *Appaloosa Rising* may be approached on several levels. If looked at as a serious work of fiction in which the author believes what he is trying to create the novel is a dismal failure. There are contradictions and inconsistencies in the novel which indicate either that it needed further editing or that the author was not in control of his material. For example, at one point in the novel Sky tears into the materialistic tourists who infest the pristine

Stanley area by describing a pair of Winnebago-driving urban cowboys who are dressed in skin-tight designer jeans and rhinestone western style shirts. This disgusting pair of pseudo-cowboys unsuccessfully hustle and then in frustration rape a Native American woman who, Sky tells us, is dis-interestedly cruising the Stanley bar(s). And then Sky describes the results of his cowboy hero's visit to the mountain to have a vision and come to terms with his wife's desertion of him. The hero is rewarded for his attempts to be a visionary by the Cowboy-Buddha with a sex goddess who makes love with the hero for several days and then gives birth to a shiny new pick-up truck. The hero returns from his vision dressed in skin-tight leather western style jeans and a pearl buttoned leather shirt with a silk bandanna driving his chrome engined truck. I fail to see the contrast between the disgusting urban cowboys and their brand of

materialism and the terrific good-guy and his brand of spiritualism.

There is another possibility which may rescue *Appaloosa Rising* from a blanket condemnation which is that Sky's novel is a parody of the bad efforts to create a mythical novel along the lines of the novels of Tom Robbins. The success of Robbins' well constructed tales of metaphysical mis-adventures has spawned a school of less apt imitators. If we regard Sky's descriptions of various causes and effects, such as the cowboy-visionary's conception of a logical and extreme end as satire then *Appaloosa Rising* may be worth reading. If, on the other hand, we regard Sky's novel as a straight attempt at fiction we would be better to burn the novel in our wood-stoves while we eat organic granola and brew a pot of herb tea.

Elliot Blake

# The Talkies

## A Film Buy-Line

This week the Talkies reviewers went and saw *No Nukes*, a combination concert and protest movie featuring a cast of top name musicians. *No Nukes* is currently playing at the Overland Park Cinema.

### No Nukes

Hans Lieberman (★)

Watching *No Nukes* is not unlike taking a long car trip; eventually you get tired of the radio, the scenery, or both. Or else you get carsick. While I avoided the latter (if only because I was stationary), I was not so fortunate on the first two counts. Concert films have never really caught my fancy anyway, so I am perhaps somewhat prejudiced towards *No Nukes*. However, *No Nukes* is not without some redeeming, revealing qualities. I learned, for example, that Graham Nash doesn't wear any underwear when he performs, and that Bonnie Frank—the great performer that she is, can be a real pain in the neck offstage. In regards to the coverage given to the actual anti-nuclear movement itself, *No Nukes* holds it to a bare, mediocre minimum.

Stay home and listen to Jackson Browne on your stereo, unless you want to see a spastic-like Bruce Springsteen flip out on stage.

Anthony Burt (★★½)

Crisp and colorful cinematography by Laszlo Kovacs, intercuttings of backstage action and pre-concert strategy sessions, clips from tv's *The Big Picture* and Defense Department A-Bomb propaganda films, and interviews with Seabrook site protestors and concert artists enliven what otherwise would be a standard concert film. Nuke politics and music generally fuse well—James Taylor and Bruce Springsteen give particularly impressive performances. The only embarrassments are Graham Nash's "Barrel of Pain" and Gil Scott-Heron's "We almost Lost Detroit," both tedjus, tuneless and didactic.

Don Barclay (★½)

I went to *No Nukes* rather reluctantly, I don't like concert films (why drag yourself to a theatre with a bad sound system when you can sit at home and listen to the same music on your stereo) and I really get tired listening to Famous People go on and on about things of which they know absolutely nothing. *No Nukes* proved slightly surprising in that the Famous People kept their opinions to a minimum, allowing most of anti-nuke message in the film to be delivered in a rational, unemotional, and almost

objective manner. Regardless of what *No Nukes* says it is still a concert film of the common garden variety; all I could feel at the end of it was relief.

Marianne Flagg (★★½)

*No Nukes* seems to be two films edited together, one musical, the other political and social propaganda. As an anti-nuclear PR piece, the movie manages to avoid the strident quality characteristic of no-nuke groups. Ralph Nadar does pop up periodically to warn of the Big Melt-down soon to hit.

Musically, concert film buffs like myself (I seem to be outnumbered here) will find *No Nukes* very entertaining on the whole, and in spots, quite dazzling.

Fans of Bruce Springsteen will be blissfully surprised to see a close-up view of "The Boss." The last time I saw him in concert I was in the 60th row and saw him only when he lept up in one of his heels-to-ass jumps.

Jackson Browne, Bonnie Raitt, and James Taylor and Carly Simon prove to be not only exciting performers, but also quite charismatic individuals.

The Doobie Brothers give a good just-like-their-records show and Graham Nash has a nostalgic sing-along with the audience on "Our House."

For me, the only letdown is a shot of Jane Fonda in one of her righteous screeds, decked out in the best Rodeo Drive has to offer.

Warren Felton, a wool spinner, was one of the numerous craftsmen and artists displaying their work in Julia Davis Park during the "Arts in the Park" festival held last weekend. Beautiful indian summer weather attracted capacity crowds to the three day celebration of aesthetics.

Issue #3 of the Arbiter!  
Mark Vaughn's 20th birthday!

## Personals

MDM—I won't mind walking in the snow, as long as you'll warm my toes afterwards. Also, Saturday night is not alright for fighting. Let's keep it simple.—L.Y. CRR

LNS—you are living proof that pignies are real people too, THAT'S INCREDIBLE!!

## Declassified

I really hate this job. I want to write for the National Enquirer and cover the extraterrestrial boat. Do all the stories about the six-year-olds from Emporia, Kansas who start acting strange and begin to glow in the dark. Or about how Jackie was abducted by a UFO and told about her husband's death (Ari or Jack) a week before it happened. Bellybuttons, UFOs are entering our blood system and giving us cancer throughout Bellybuttons and the government isn't doing anything about it says scientist. And Billy Graham believes in UFOs and that they can affect the outcome of the Master's Golf Tournament. They are in the water, they are in the air, they watch me undress at night! Oh God, help me. This week's contest is the same as last week. There is a copy of Mac Arthur waiting for anyone who can come into the Arbiter office and tell Cathy the office manager what Gen. Doug Mac Arthur used to smoke in his corn cob pipe. While they last.
