Although this file was scanned from the highest-quality microfilm held by Boise State University, it reveals the limitations of the source microfilm. It is possible to perform a text search of much of this material; however, there are sections where the source microfilm was too faint or unreadable to allow for text scanning. For assistance with this collection of student newspapers, please contact Special Collections and Archives at archives@boisestate.edu.
**Students: Stop the bombing!**

**By Laura Wylde**

Boulder State students and the Boulder community joined forces Monday to express their solidarity of bombing of Afghanistan.

"If we bomb again, we must bomb with a purpose," said Shawn Soper, a student. "Stop bomb, stop killing, stop hurting." Students, parents, professors, Mr. Mall, Mr. Bishop, stop bombing" said Shawn Soper, standing among his friends, his brother, Victoria Everett. "Signs from the crowd read, "Stop bombing, its killing the children," and "What are you doing to our children!"

The spontaneous mission of the rally was to join people together in a group that will tell people about the war.

"I am thinking as many people as much short notice felt so strongly about but is made up of members of the community and BSU students. Today, they are meeting at 7 p.m. at the Boise Cable Center as the Boise State University Bombing Awareness Committee. This group is the first of many groups that will arise here in the future locations, people call for more awareness.

By far the most enflamed was the community and BSU students, true to form, rallied to the war. "They're not bombing inriO", they say high over his head. "No•••~ ..•~.·~;~, "They're not bombing inriO, they're bombing the Taliban military operations. The Taliban military operations", he said, the usual answer, "No•••~ ..•~.·~;~.

"While we're fighting for your country, we're being killed," Student said, "This is not good for this country." "Just look out here, we must want to live, but to be informed of what we're doing."

"We are fighting for peace and against war," one of the students in the crowd, "We are fighting for peace and against war."

"We are fighting for peace and against war," one of the students explained, "We are fighting for peace and against war." "We are fighting for peace and against war." "We are fighting for peace and against war." "We are fighting for peace and against war." "We are fighting for peace and against war."
Forensics team wins again

Molly Gribb stands next to permeameter, a device she invented which helps track water flow through sediment.

Molly Gribb, an associate professor of civil engineering who joined Boise State last fall, has invented a device which helps track water flow through sediment. Her invention, called a permeameter, has invented a device which helps track water flow through sediment. The instrument was first tested at the BSU, West Campus in Twin Falls, Nampa and other locations.

The permeameter, which moves through the soil, is a device that helps determine how water moves through the ground. Gribb said, “This is a really specialized problem, but it is important. If we can determine how water moves through the ground, it can help us predict and prevent contamination.”

Gribb's device can determine how water moves through the ground. It can help us predict and prevent contamination. The instrument was first tested at the BSU, West Campus in Twin Falls, Nampa and other locations.

Not the end of terrorism, say Cal State-Long Beach experts

The ongoing U.S. war against terrorism touched off a Cal State-Long Beach professor's continuing history that many people might not know about.

Prof. Barry Schwartz, a professor of history and political science, said Afghanistan is not a war on terrorism, but rather a group of warring factions that have proven to be oppressive, such as Saudi, Kuwait, Jordan and Pakistan.

"We can't use conventional bombing to bring them to their knees," said Schwartz.

"We cannot use conventional bombing to bring them to their knees," said Lawrence said.

"We cannot use conventional bombing to bring them to their knees," said Lawrence.

Ohio college fund cuts three times that of Boise State

By Mark Methvin

(BOISE) — It’s official. Boise State University President K. Todd Harrison said today (Monday) that the school’s Board of Trustees has approved a 2 percent cut in funds for higher education in Idaho. The cut is part of the overall $1.2 billion in education cuts that Governor Bob Rayner has proposed. The cuts are expected to save $3.6 million.

The cuts will primarily affect the higher education funding at the University of Idaho and the Idaho State University. The University of Idaho will receive a 10 percent cut, while the Idaho State University will receive a 7 percent cut.

The cuts are expected to save $8.4 million in state funds. The cuts will primarily affect the higher education funding at the University of Idaho and the Idaho State University. The University of Idaho will receive a 10 percent cut, while the Idaho State University will receive a 7 percent cut.

By Herbert London

...thing changed with the Vietnam generation. In the '60s and '70s college students lost confidence in the war's righteousness. There weren't any clear-cut moral objectives. They were delisted from the wall of liberal illusion. Appeasement that made terror possible. It was something of a bully. Another NYU student who saw the World Trade Center towers fall continues on, and at the same time, we have been introduced to a new idea: that we are the global community.

Our nation is not the one that we were raised to believe it was. Our nation is now a global one. Our nation is not just North America. Our nation is now the world.

We are all part of the same planet. We are all part of the same world. We are all part of the same community. We are all part of the same future. We are all part of the same destiny.

And that's what I like about coming out of the closet. Coming Out Week or Queer Coming Out Week. It's a time when we can come out of the closet. And you don't have to be gay to come out of the closet.

I'm not a gay person myself. I'm not a lesbian, I'm not a bisexual, I'm not a transgendered person. I'm just a normal person. I'm just a normal person who happens to be part of a gay community. I'm just a normal person who happens to be part of a gay world. I'm just a normal person who happens to be part of a gay community. I'm just a normal person who happens to be part of a gay world. I'm just a normal person who happens to be part of a gay community. I'm just a normal person who happens to be part of a gay world. I'm just a normal person who happens to be part of a gay community. Stuck in the middle with you

By Ben Schmitt

I was happy to see that the Arbiter published the Newbold article, presented by Jerel Thomas, in the last issue of the Arbiter. Taylor Newbold is obviously a brilliant student at Boise State University and has already written an article on fascism in the current issue. However, I would like to offer my own perspective on this topic.

In the wake of certain events over the last month, I have started to question how well I understand the people working for the right-wing. I started this tall-tale, either by my own volition or by necessity. I have always been interested in understanding people, even those of whom I disapprove. It is about the same amount of interest as I have in understanding people, even those of whom I disapprove. I am interested in understanding why you broke all your toys. These are work together, focus on what seems right, and screaming that Karl Marx stereotypes. Maybe we should do this. But then again, I’m not sure how to tell you the truth.

While it is true that the right-wing is a horde of brats such as “1984” and “1984” walking through the quad. I don’t think I wish’ve criticized fascism as much as I would like to or tening to Bob I will Jerel Thomas or ized as promoting economic and social regimentation, I wish to wonder and help the right argue this is comparable to ideologies do not describe a non-constructive and negative and non-constructive. I wish for more violence, and I happen to like trees and market, I would be able to buy a top ian what I was to try to classifying everything as the owners.

In the last month I have started to question how well I understand the people working for the right-wing. I started this tall-tale, either by my own volition or by necessity. I have always been interested in understanding people, even those of whom I disapprove. It is about the same amount of interest as I have in understanding people, even those of whom I disapprove. I am interested in understanding why you broke all your toys. These are work together, focus on what seems right, and screaming that Karl Marx stereotypes. Maybe we should do this. But then again, I’m not sure how to tell you the truth.

As I read the article, presented by Jerel Thomas, I was surprised to see the way in which the author presents his ideas. It seems that the author is not aware of the people working for the right-wing, and is considering them as the owners.

Bonds is the man
by Darrin Shindle

Is it just me, or is Barry Bonds the man? The records that he has set this season have made this the best season a player may have ever had.

Bonds did all of this while in the middle of a pennant race and rarely getting a decent pitch to swing at. He did all of this and will probably end up with another gold-glove award.

Is it just me, or is Barry Bonds the man?

Look at his stats for the season. He now has the most walks in a season with 177. He also had the highest on-base percentage in the National League since 1900 with .498.

Bonds would have a gap of 2-3 hours between pitches to swing at, in the midst of his home run spree, and still probably end up with another gold-glove award.

The records that he has set this season have made this the best season a player may have ever had.

Bonds is the man.
Boise State will look to rebound on Homecoming turf
By Charles L. Kittelson
Head of the BSU Football Program

The Boise State football team will play Tulsa University Saturday in the Broncos’ first Homecoming game in WAC play.

The Broncos are coming off a disappointing 64-14 loss to the Owls last weekend. "They showed us," Boise State Head Coach Dan Blankenship said in a press release.

Boise State will look to make the problems create in last week’s game go away this Saturday.

The ball. The Broncos who had looked good offensively until last week’s game – scoring 41 and 45 points in their two wins – even moving the ball against the defense couldn’t seem to stop Rice’s option attack. The Broncos’ first Homecoming game in WAC play.

Herm, had 125 yards on 21 rushes.

One of the keys for the Boise State defense will be the motivation. Boise State is not only playing for the WAC title, but they are playing in their home. The Broncos are running off a big win and they need to put behind them, and the easiest way to do that is to win with a victory over the分区.

The final point: Blankenship should also have the key in the Broncos’ following game against Fresno State Bulldogs.

The Broncos have been inconsistent and have issues with their leadership of Sophomore QB Ryan Dinwiddie, who is a 159.8 pass rating. On the defensive side of the ball, the defense couldn’t get through to get the ball.

Scoring 10-0 in the first half.

Gary Flowers has looked impressive in his quarterback position. Bronco for the nationally televised game.

The Boise State football team is averaging nearly 300 yards per game and has a history of big gains. The Broncos are averaging nearly 400 yards in the first half.

One of the spots where Boise State’s win wasn’t enough was the defense.

The Boise State defense has been inconsistent and have issues with their leadership of Sophomore QB Ryan Dinwiddie, who is a 159.8 pass rating.

Crouching Tiger, Hidden Dragon
Starring: Michelle Yeoh, Zhang Ziyi, Chow Chen, Chow Yun Fat
Director: Ang Lee
Rated PG-13

"GIRLS KICK ASS," holds especially to bad Bruce Lee dubs, but adds a femininity to the mix that makes this version more enjoyable. The story of a notorious thief, who killed Li's master and then disappeared, the movie focuses on the pursuit of revenge. An innocent princess named "Jade Fox" is suspicious but finds herself drawn to Li by the from of a mask, a beautiful play on the concept of appearances being deceiving. The beautiful aesthetics of the film are wonderfully enhanced by Yo Yo Ma's Academy Award winning cello soundtrack, making for an exceptional film experience.

The Haunted World continues to scare masses
By the Arbitrator staff
Once again, Steve and Scott Ethington are wowing the Treasure Valley with their haunted corn maze. The Haunted World, owned and operated by the Ethingtons, is billed as the largest and by far the scariest Halloween attraction in Idaho. The Haunted World contains a maze of winding, shadowed, corn-covered corridors and Halloween oddities. There is also a haunted insect museum that will get lost in, three pumpkins for kids to watch and learn about the life cycle of a pumpkin, and a happy and a very scary occupation. Over nine months of preparation goes into the seasonal production.

"To help out we have lasers, flashing lights, effects, electronics, goblins and pneumatic contraptions, as well as 60 live actors," Ethington said.

The corn maze measures 12 acres of flat, open field. To obtain the most out of the maze, there is educational information about the real world of Halloween oddities and haunted attractions.

The Haunted World will be open from dusk to 9 p.m. October 26-31. Mondays through Thursdays, and from dusk to 10 p.m. Fridays and Saturdays.

The haunted trail boasts several ghoulish characters guaranteed to scare even the bravest of kids.

The Haunted World is located on 1200 S. 1st, north of the Treasure Valley Junior High. From North Hwy. 52 take Exit 36 and travel east on S. 1st. Turn north on Chinden Blvd. and follow signs.

Most of the summer movie releases have been weak and disappointing, including the new releases this week. So far, the only film that has managed to capture audiences' attention is the recent release "The Da Vinci Code." The film stars Tom Hanks and Audrey Tautou and has been praised for its story and direction. Other releases, such as "Swordfish" starring Mike Meyers, and "Final Destination," have failed to draw large crowds. Overall, the summer movie season has been lackluster, and it appears that audiences are more interested in events and other forms of entertainment. As the season winds down, it will be interesting to see if any films will be able to turn things around.

Respiratory Therapy:
Your Job Fair Portfolio

The following are some of the things you should bring with you to the BSU Career Fair:

**Résumé** – Yes, you are required to bring one. And it better be an outstanding one because by the end of the day it is often difficult for recruiters to sort out the bad from the good. Bring at least two copies of your résumé for each company you plan to speak with. This is a good time to use colored résumé paper (colored, yet conservative). If you have multiple job objectives, bring multiple résumés. And do not bring a cover letter—you are the cover letter to your résumé.

**Letters of Recommendation** – Make copies of your top three letters of recommendation multiplied by the number of companies you plan to meet with. Make sure all of the companies you are interested in get copies of your letters of recommendation. It will force them to file you differently from the rest of their stacks of résumés.

**Portfolio** – Your 9″x12″ leather-bound or vinyl-bound portfolio will be used to store your résumé and letters of recommendation, and for taking notes after speaking with each company.

**Briefcase** – The amount of information you pick up at a job fair can sometimes be rather daunting. A briefcase gives you a mini-office with which to operate, including storage for the numerous informational materials you should receive. It also provides a much more professional look than the plastic bag most job fair attendees walk around with, loaded with their information cache of the day.

**Dress** – Image is crucial at a job fair—even more important than at a normal interview since decisions are made much more quickly. First impressions will make a difference! This is not the time to model the latest in campus fashion. Make sure you wear a classic business suit. Keep it conservative so that their focus is on you, not your clothes.

The Major Job Fair Error That Nearly Every College Student Makes:

They get in line! If there is one reality of life that college provides excellent training for, it is standing in line. Whether it's waiting in line at registration, waiting in line outside the bookstore for your textbooks, waiting in line at lunch, or just waiting in line outside your professor's office with the other three students who flunked the midterm, college is very good for developing the "there's-a-line-let's-stand-in-it" mentality. Rather than wasting your time standing in line, move around and speak with other representatives. Not only will this increase your exposure, but it will provide you the opportunity to better introduce yourself to potential employers.
Sample Student Questions to Ask Career/Job Fair Representatives

Provided by the Boise State University Career Center

For Students NOT Graduating This Year

What courses would you recommend I take to make me more employable with your organization or in this field?

What other things can I do (internships, volunteering, part-time employment, etc.) to become more employable with your organization or in this field?

Does your organization offer internship opportunities?

For Graduating Students

What types of skills are the most important to your organization?

What fields of study are most employable within your organization?

What opportunities are available for college graduates in your organization?

What are the typical career paths for college graduates starting in an entry-level position in "..." field?

What is the outlook for growth in your organization? Do you see the role of your organization changing? If so, how?

Are your employees required to relocate and/or travel?

Mention any related experience that you have and inquire about how this would affect your opportunities within the organization.

What is the typical time frame for employees to relocate and/or travel?

What fields of study are most employable within your organization?

How frequently does your organization require employees to relocate and/or travel?

What opportunities are available for college graduates in your organization?

For Graduating Students

What opportunities are available for college graduates in your organization?

How should I apply for a position within your organization?

What is the outlook for growth in your organization? Do you see the role of your organization changing? If so, how?

What are the typical career paths for college graduates starting in an entry-level position in "..." field?

Mention any related experience that you have and inquire about how this would affect your opportunities within the organization.

Interview Planner

By: Arbiter Staff

- Purchase correspondence paper stock (stationary and matching envelopes).
- Keep enough paper stock on hand to print your resumes, cover letters, and other correspondence on matching stationary and envelopes.
- Know the standards for writing cover letters, thank you letters and when to phone. The library and BSU Career Center are good places to go for help if you are uncertain.
- Keep track of all career related written and verbal correspondence.
- Identify your basic interview wardrobe: select one or two outfits or suits that are considered fairly conservative for your field.
- Locate your local overnight or one-hour dry cleaner.
- Polish your business shoes.
- Always have extra, clean copies of your resume with you.
- Keep an interview folder to bring with you on interviews.
- Keep on file a brief summary of your skills and your goals, and a pen and some paper to take notes after the interview.
- Bring to the interview; your interview folder, the names of people you are meeting and the address with directions. You may also want: a comb, tissues, breath mints.
- Make sure you can be reached, whether by phone, fax or email.

Graduate and Professional School Day

The Boise State Career Center will sponsor the third Graduate and Professional School day, Tuesday, November 13 in the Student Union, Jordan Ballroom, from 3:00 p.m. to 7:00 p.m. This event is for all students and community members interested in advanced degrees. Representatives from national, regional, and local schools will be present to talk to students about MBA programs, healthcare programs, law school and many other areas of interest. This will be an excellent opportunity to find out admission requirements, program qualifications and general information about the schools and the graduate programs they offer. Programs attending are listed on the following website: http://career.boisestate.edu/grad-day.htm

If you have any questions regarding this event, please contact Alan Bakes at the Career Center, 262-1747.

Boise State University Career/Job Fair
Wednesday, October 17,
9:00 a.m. - 3:00 p.m.
Student Union Jordan Ballroom

The Career/Job Fair, sponsored by the Boise State University Career Center, is an excellent opportunity for all levels of students to establish contacts and network with employers, discuss internship opportunities, obtain information to solidify career choices, learn about the job market and career opportunities, and discover tips on what can make them more marketable upon graduation. Graduating students or students seeking internships should dress professionally and bring resumes to distribute to interested employers.

Career/Job Fair Tips...

Use this event as a networking opportunity - have a positive attitude and talk positively about yourself. Research the organizations that will be attending; visit the Career Center's website: career.boisestate.edu/careerfair.htm for a list of the organizations coming and for links to several of the organization's websites.

Prepare questions ahead of time to ask the representatives.

Make a great first impression:
- Make eye contact
- Smile
- Shake hands firmly
- Remember their names

Practice introducing yourself:
- What is your major or what major(s) you are considering?
- What level you are in college - are you just beginning, looking for an internship or getting ready to graduate?
- What are your interests?

Have a resume prepared for the fair if you are getting ready to graduate or are seeking an internship.

Prepare a system to remember who you have talked with and what information was provided to you:
- Obtain and keep business cards
- Take handouts and other information provided to you
- Develop a follow-up letter to send if you have given your resume to a representative.

Explore all your options:
- Speak with many different representatives - they are attending to provide students with valuable information regarding their organizations.
- Representatives are excellent resources to help in your career decision making

The Career Center can assist you in your career-fair preparation and follow-up - let us know how we can help you!

Boise State Career Center
1173 University Drive
(208) 426-1747
E-mail: career@boisestate.edu
