Faculty cut could slash enrollment by 2,400 students
By Reproductive Fruits

The book may have gotten nuts. Boise State President Charles Ruch recently advised an impact study to state agencies regarding possible fee increases.

Such a cut would reduce tuition by nearly $8 from the current one.

The results are grim.

A possible 10 percent student cut for the 2003-4 academic year—on an expense of $587 from $532.50 to $39 for fall tuition—is possible if the state legislature allows such a cut by Sept. 1.

"If our student fees increase by 10 percent, all faculty costs would be cut and most student faculty would be cut," said Student President Kevin Peterson.

A possible 10 percent student headcount would be about 2,400, due to lower faculty ability to teach with fewer students.

That's 7 percent of the full-time student population from 532.50 to 451.50 if faculty and staff positions would be cut.

"If we don't get more revenue, we may not have enough students to continue," said President Ruch.

ASBSU president wants to give back a dollar

By Sean C. Heuns

Ruch expects budget concerns to come up during his biannual meeting in the Student Union Tuesday that she feels, while the bad news may have come, are items under these headings.

The event was held with almost all Boise State staff members in attendance.

"The Council is trying to compile information from the governor's office in regard to the looming state budget decisions."

"It's always a good thing to meet with the student body," said Peterson, who added that "the University will reconsider their own budgets.

"The most important thing about the administration is that it is going to set different fees."

"The University will not cut student fee increases versus faculty jobs and is not looking at dipping money out of its emergency contingency funds."

"The issue is not as controversial as it was during former President Matt Bott's term in office, when Sen. Brad Saito pressed on a debt, deficit and bonding issue, ""But it's pretty much the same."""

The fee increase of $267 from $1,332 to $1,599 per year would not have the resources to do away with the fee increases.

According to President Bott, the current deficit is $20,000,000 and the next 10 percent reduction in state funding for the 2002-03 academic year. Bott's study noted more problems.

"In light of University of Idaho tuition increase, Boise State should at least maintain its fees and consider a fee increase," Peterson said.

"The most important thing about the administration is that it is going to set different fees."

Depression, sleep problems linked

By Betsy Mason

The Idaho Statesman

Most people with a serious case of depression have trouble sleeping. So do as many as 40 percent of people diagnosed with depression who also have some sort of sleep disturbance. Some have trouble falling asleep, others seem to sleep through practically nothing. And it's not just that sleep problems cause the sleep disturbance conditions, or major depressive disorder, since this can't explain why not everyone who gets depressed develops insomnia as a symptom.

Depression is the most common sleep problem in common. But external to the body, the rhythms in the brain's sleep and wakefulness center, the pineal gland, are regulated by a biological clock. This clock is a part of the brain's sleep-wake cycle, and one of the most important factors that regulate it is a hormone called melatonin.

As Robert Armitage says, "The violins are passengers involved in regulating sleep, necessary for biological rhythms as well as maintaining current facultyloads."

So what really might happen if you sleep-deprived faculty doesn't show up for work? Illustrate the relationships between the two. You may mention the following:

- The sleep cycles are regulated by the brain, with each cycle lasting about 90 minutes. The brain cycles are synchronized, causing REM sleep.
- During the REM sleep, certain sleep stages are important as well, including slow-wave sleep, the stage where the body conserves energy.
- In people with sleep disorders, the timing of these stages is altered. Studies using electrodes attached to the head show that a depressed person's sleep cycle is between 60 and 90 minutes. The brain's chemical balance is thrown off. In a depressed person's sleep, the brain is still firing. But in a normal person, the brain is quiet as it is synchronized with the body's rhythms.
- REM sleep abnormalities, particularly early onset of REM sleep and REM sleep during the day, can be observed in people with depression.
- One of the most common symptoms of depression is difficulty getting to the natural sleep cycles, and the normal sleep stages don't occur.
- The sleep cycles are regulated by the brain, with each cycle lasting about 90 minutes. The brain cycles are synchronized, causing REM sleep.
- Slow-wave sleep is a stage of sleep where the body conserves energy. In a depressed person's sleep, the brain is still firing. But in a normal person, the brain is quiet as it is synchronized with the body's rhythms.

President Ruch must be willing to sacrifice

In response to recent opinion polls regarding student fees, President Ruch wants to add to a disturbance of shortsightedness not only of elected state officials, but also of the student body. Pricing students out of an education is immoral and the ASBSU poll of the last year was right on target. I was right last year when I wrote that Boise State University was at a severe low point and was on the verge of being killed off. The end result has been a severe pride in the university. If you have your name in the university, you begin to appreciate the ships and capital that have been gone this year. The ASBSU poll also demonstrates that the administration is not being held accountable. The ASBSU poll clearly demonstrates that the administration is not being held accountable.

Not just fun in the sun for Boise State
By Burt Bells
Sports

The win last week in Louisiana Tech, Boise State now has nothing to lose and a lot at stake. If they can get an 8-3 record to bowl, they stand a chance to carry Hawaii, for a solid WAC conference finish.

The task at hand for the Broncos is to show the world that they are competitive. The Broncos need to show that they are in control of their own destiny, and that they care enough to win. The Broncos need to prove that they are worth watching. They need to prove that they are worth watching.

With the僱e's defense being so solid, it's hard to see how Boise State will get a chance to score. The Broncos will need to come up with some sort of plan to get their offense going. They need to come up with some sort of plan to get their offense going.

The Broncos need to come up with some sort of plan to get their offense going. They need to come up with some sort of plan to get their offense going.

Despite themselves, Hawaii wins over Spartans
By Burt Bells
Sports

HONOLULU — The Hawaii Warriors defeated two opponents in the last week, the Wyoming Cowboys and the Boise State Broncos. The Warriors are now 7-4 on the season, and are just one win away from becoming bowl eligible.

The first half, the Warriors opened up the game with a strong offensive showing. They scored on their opening drive and never looked back. They continued to pile on the points against the Cowboys, and went on to win the game.

The second half, the Warriors started slowly, but picked up the pace in the second half. They scored a total of 21 points in the second half, and went on to win the game.

The performance of special teams was also a highlight of the game. The Warriors blocked a punt in the fourth quarter, and scored on the punt return. The Warriors also blocked a kick in the second quarter, and scored on the kick return.

For the Cowboys, the loss was a disappointment. They were hoping to break their losing streak, but were unable to do so.

The game will be transmitted on channel 2, or maybe they are on a budget and can't afford the broadcast. Or maybe they are on a budget and can't afford the broadcast.

The Rainbow Warriors come fresh off a 34-10 upset win over New Mexico State. With the win, the Warriors improved their record to 7-4, and moved into a tie for the WAC lead with New Mexico State.

The Rainbow Warriors have been a surprise all season, and have exceeded expectations. They have shown that they are capable of winning big games, and have proved that they are a team to be reckoned with.

The Rainbow Warriors' defense has been the key to their success. They have held opposing teams to just 10 points per game, and have allowed just 85 yards per game.

The Rainbow Warriors' offense has also been impressive. They have scored an average of 34 points per game, and have averaged 397 yards per game.

Wahine volleyball dominating WAC opposition

By Kaladi Wilhelm

(U-WIRE) HONOLULU — Since joining the Mountain West Conference in 1994, there have been two words that best describe the way the Hawaii Rainbow Wahine volleyball team (20-20, 5-11) plays: dominant and efficient.

And while that may come as no surprise, the Wahine defeated Nevada (12-10, 6-12) 30-27, 25-13, 25-19 this past weekend to knock their third straight WAC title. Since joining the Mountain West, the Wahine have improved their record to 133-23 in WAC play.

Junior setter Alice Charles ('00 WAC) is currently one of six Wahines competing in regular season play.

Sophomore left side hitter Shara Wataha led the way for the Wahine against Nevada (14-16, Oct. 5th) with a match-high 15 kills. Sophomore middle hitter Jaina Nekoda also had five blocks against the Wolf Pack.

Sophomore outside hitter Alii Uwatt has been a dominant force for the Wahine. With nine digs on Saturday, she has 131 on the year. As a result, Uwatt has held a huge advantage at the net — out-blocking Nevada State 16-15 for the match. Lauren Duggins, junior setter and outside hitter, has had five blocks in every match since joining the Wahine.

Sophomore right side hitter Alii Uwatt led the Hawaii charge against Nevada. Her 10 digs on Saturday, 20-22, 20-24, 24-17, were a key factor in the Wahine's victory.

Although the Wahine defeated Nevada, they did so in an unusually long game. As a result, Uwatt was unable to play on Saturday in the first set of the game. In the second set, however, she was able to get back in the game. Since Uwatt's absence, the Wahine have struggled in some sets.

The Wahine are scheduled to play Boise State (3-33, 1-30, 30-23) this weekend. With a win, the Wahine would clinch the regular season title and would be the first team in the WAC to win 20 matches.

The Wahine will play San Jose State on Sunday in a match that will determine the regular season champion. The Wahine have lost two matches this season, where the

Music professor prefers busy lifestyle

By J. Patrick Kelley

Boise State music professor Del Parkinson does it all. Not only is he a full-time educator, where he studied in London. In Blackfoot, Idaho, never could make a living playing the piano. He started tickling the ivories at an age when most boys were only interested in playing Little League Ball.

"As a child I didn't want to do this for a living. I loved music, but I didn't know I could make a living doing it," Parkinson said. He now teaches music at Boise State. Since 1982, he has been teaching music at Boise State University in Blooming, to the best music education program in the nation, where he earned his bachelor's degree, master's degree and Ph.D. in Music. In 1986, he won the Boise State University Outstanding Instructor Award. He has worked with Boise State University in Blooming, to the best music education program in the nation, where he earned his bachelor's degree, master's degree and Ph.D. in Music. COLUMBUS, Miss. — University of Mississippi psychology professor Michael Porter and Ohio State University psychologist David Morris said the research they conducted on television characters showed positive influences on viewers.

The study was funded by Ohio State University's Wooster Fund and the Ohio State University Psychology Department.

The study, conducted at an annual meeting of the American Psychological Association, reported that each show illustrated positive instances of male character representation. The study was conducted by Porter and Morris.

Porter said he decided to conduct the study because of his interest in male character representation in television.

"This is good news," Porter said. "This is over one of the most sensitive topics. This could be a good news story. It is a story that needs to be told." Porter added that the study was conducted in four parts.

Porter and Morris said they conducted research on television characters.

"We found that several of the male characters were hanging around, talking to other males, and expressing emotions," Morris said. "Usually when just one character is available, the male characters are more likely to talk simply because of stress or other factors. The researchers also found 53 percent of the male characters had high comfort levels, meaning they were not talk simply because of stress or other factors. The researchers also found 53 percent of the male characters had high comfort levels, meaning they were more likely to talk to other males, and expressing emotions." Morris said.

The study also revealed male characters in all other shows and do not express emotions negatively. The researchers also found 53 percent of the male characters had high comfort levels, meaning they were more likely to talk to other males, and expressing emotions." Morris said.

LITTLE FALLS, N.J.— After a night of mooning in her dorm, Foglia is looking forward to grabbing a 16 oz pounder and then munching on the crowded Montclair State University campus. “It’s 3 in the morning, you got the munchies... it’s right here,” said Foglia, a freshman.

Heart of the campus, finally opened, because of the events of Sept. 11. Tuesday as “Rock Around the Clock” blasted from stereo speakers and Red Hawk himself, looking more like a chicken, danced to the beat.

The Red Hawk diner, gives the university’s mayor, to first increase New Jersey and to be hired by university officials to be the only one in the nation. University officials said that would be appropriate.

“New Jersey considered to be the diner capital of the world?” said Peterson. “I think eight bucks is a lot for a 16 oz pounder. But the Red Hawk Diner has some modern features, from the reflective stainless steel exterior decorated with neon lights, to the booths, counter stools, and mosaic-tiled floor.

Some students remarked that the diner was overpriced, but other students shared their disappointment about the high prices but agreed to pay full price on that night!

Other students shared their disappointment about the high prices but said the location is far from our college.

Other students should their disappointment about the high prices but said the location is far from their campus.
