Students of Boise State University

Although this file was scanned from the highest-quality microfilm held by Boise State University, it reveals the limitations of the source microfilm. It is possible to perform a text search of much of this material; however, there are sections where the source microfilm was too faint or unreadable to allow for text scanning. For assistance with this collection of student newspapers, please contact Special Collections and Archives at archives@boisestate.edu.
Faculty Senate approves plus/minus grading

By Erin

The Faculty Senate voted to recommend the adoption of a plus/minus grading scale, but student leaders are upset and say they have been left out of the decision-making process.

The policy would change BSU’s current grading system to a plus or minus grade format on a range of 90-60 percent, rather than the current 4.0 scale.

The recommendation now goes to President Darryl Jones and the Board of Trustees to vote on the issue before the Faculty Senate approves the new decision on the Senate floor.

The poll, though not scientific, indicates that the majority of stu- dents do not want the current grading system.

The recommendation was made by a faculty committee, who said there was a need to see a change in the system. The recommendation was presented before voting on the measure.

The policy would be in effect starting in the 2003 spring semester, according to Ruch.

The ACHD is working on the feasibility of installing permanent pilings along the Fairview Avenue Bridge to help prevent additional scour. Brown said the ACHD has already funded the temporary fix, which is expected to cost over $1 million. The project ended ahead of schedule and over budget.

Brown said the ACHD discovered similar local scour problems at the Fairview Avenue Bridge and the capital Boulevard Bridge. The latter bridge proved out after rehabilitation on the Capitol Boulevard Bridge was completed the temporary fix, Brown said. The ACHD also discovered similar local scour problems at the Fairview Avenue Bridge in September.

Brown said the construction project ended ahead of schedule due to delays in the project, leaving the structure in much better condition than it was. "Overall, we're really satisfied with the results," he said.

Brown said the ACHD is currently studying the feasibility of installing permanent pilings along the Fairview Avenue Bridge to help prevent additional scour. The temporary fix, Brown said, would not prevent further work being done for at least a 100-year event, he said.

Plus/minus grading system offers more minuses than pluses

A new grading policy to replace the plus/minus grading system recently instituted at Boise State University (BSU). This new policy, which was introduced in an effort to provide a more accurate reflection of student performance, has met with mixed reactions from students and faculty alike.

Most likely to be affected by the new policy are the core classes, many of which are already using a plus/minus grading system. Under the new policy, a C would no longer be considered a pass, but would instead be considered a failure. This change is intended to teach students the importance of working hard and to discourage them from taking easy classes.

However, some faculty members are concerned about the impact of this new policy on student motivation. They argue that a C should still be considered a pass, as it represents a level of understanding that warrants further study.

One faculty member, who asked to remain anonymous, stated, "I think that a C should still be considered a pass, as it represents a level of understanding that warrants further study. I worry that the new policy will discourage students from taking challenging classes, which is counter to our goal of expanding their knowledge and critical thinking skills."

On the other hand, some students are enthusiastic about the new policy. They argue that a C should be considered a fail, as it represents a lack of understanding that requires further study.

One student, who requested to remain anonymous, stated, "I think that a C should be considered a fail, as it represents a lack of understanding that requires further study. I welcome this new policy, as it encourages me to work harder and to take classes that will push me to my limits."

The change has been met with mixed reactions from students and faculty alike. Some are enthusiastic about the new policy, while others are concerned about the impact on student motivation.

Enron shows willingness to finance executive reform

I was not surprised that everybody loved Ken Lay, HP's CEO, who is credited with creating the dot-com bubble, and to everyone's amazement he was not even reprimanded for his role. I was also not surprised that the board of directors and everyone else in the executive compensation committee did not do, and that it is where the finance reform legislation was debated.

Robert B. Mundell, a Nobel Prize-winning economist, has been trying to make a fortune off public concern about campaign finance reform. He could get rich when the public fairly begins to take a closer look into the president's eyes. Of course, this is all based on a theory and not on any evidence. For example, if you have a history of bad Republicans, or if you have a history of bad Democrats, or if you have a history of both bad Republicans and Democrats, you are not likely to have a history of good Republicans or Democrats.

Everybody knows that Enron gave large sums of money to both Democratic and Republican candidates during the last election cycle. It is not clear whether there was any quid pro quo. For example, did Enron give money to support the campaign of a politician who would later vote in favor of Enron-related legislation? It is not clear whether there was any quid pro quo. For example, did Enron give money to support the campaign of a politician who would later vote in favor of Enron-related legislation?

I am not saying that there was any quid pro quo. I am saying that there were some interesting things going on in the last election cycle. And those things may be related to the fact that Enron gave large sums of money to both Democratic and Republican candidates during the last election cycle.

Steelheads victorious on another student night

By Phil Bailey
The Arbiter

For the second straight week, the Boise State Steelheads offered a rubber game on Wednesday night before a near capacity crowd.

The Steelheads remain unbeaten in 2001-02. The Steelheads beat the Boise State regular season record of 18 straight wins.

The victory improves the Steelheads overall dual match record to 18-1-1, and finishes the regular season with a 5-2 mark in the Pac-10 Conference.

The victory was the 18th straight win at home and the third win this year against the Gold Kings.

The victory improves a record in regular season games and remains in front Colorado and San Jose State for first place in the Western Collegiate Hockey Association.

With the victory, Boise State becomes only the second team in the WCHA to win 20 straight home games.

Boise State also posted a 17-11 win in the win streak and a 22-13 win to give the Broncos a 9-5 overall lead over the Miners.

The victory was the 18th straight win at home and the third win this year against the Gold Kings.

You See It. We Feel It.

Boise State (11-15 overall, 5-11 Western Conference) improved to a record of 10-10 overall and 7-8 in the Pac-10 with the 18th straight win at home.

The victory was the 18th straight win at home and the third win this year against the Gold Kings.
Diversions

Nearly 900 people packed the James Redfield Student Union on Feb. 25 for the 23rd annual International Food, Song and Dance Festival.

The International Student Association sponsored the event that brought Boise State's diverse world community to a common stage.

The event was a veritable smorgasbord of international cuisine, music, and dance.

First on the itinerary was the dining portion of the program, which showcased a global fusion of cuisines.

The menu featured a traditional masala dish from India, Thai-style yellow curry, tortilla de patata, a Caribbean dish, and a tropical fruit dessert from Costa Rica.

After most of the appetites were sated, then came the parade of flags, presented by the ISA.

Next on the stage was the Shatakshi Goyal family from India. The four-piece family band enchanted the crowd with traditional Indian drumming and dancing. The men wore dhotis, and the women were adorned with jewelry. One of the women did a solo dance celebrating the harmony of nature, dating back several thousand years.

The Vietnamese Student Association then presented a traditional dragon dance. As the dragon warmed up in the hall, the audience exploded in applause, yielding many laughs and a few groans.

The Bosnian dance troupe Mladl Behar performed "Young Blossom," which depicted the peaceful interaction between men and women.

The Bosnian dance troupe Mladl Behar performs "Young Blossom."

After a short break, classical guitarist Elkin Garcia, a sophomore music student with a performance emphasis, told the crowd how diverse our campus really is. Garcia is a flamenco guitarist who was working the spotlight, and he was expected to be a hit in the festival.

"This is a great event," Elkin Garcia said.

A dancer from Boone Highlanders performs solo.

"Another activity in April, will be the festival," Garcia said.

After most of the appetites were sated, then came the parade of flags, presented by the ISA.

Next on the stage was the Shatakshi Goyal family from India. The four-piece family band enchanted the crowd with traditional Indian drumming and dancing. The men wore dhotis, and the women were adorned with jewelry. One of the women did a solo dance celebrating the harmony of nature, dating back several thousand years.

The Vietnamese Student Association then presented a traditional dragon dance. As the dragon warmed up in the hall, the audience exploded in applause, yielding many laughs and a few groans.

The Bosnian dance troupe Mladl Behar performed "Young Blossom," which depicted the peaceful interaction between men and women.

After a short break, classical guitarist Elkin Garcia, a sophomore music student with a performance emphasis, told the crowd how diverse our campus really is. Garcia is a flamenco guitarist who was working the spotlight, and he was expected to be a hit in the festival.

"This is a great event," Elkin Garcia said.

Nearly 900 people packed the James Redfield Student Union on Feb. 25 for the 23rd annual International Food, Song and Dance Festival.

The International Student Association sponsored the event that brought Boise State's diverse world community to a common stage.

The event was a veritable smorgasbord of international cuisine, music, and dance.

First on the itinerary was the dining portion of the program, which showcased a global fusion of cuisines.

The menu featured a traditional masala dish from India, Thai-style yellow curry, tortilla de patata, a Caribbean dish, and a tropical fruit dessert from Costa Rica.

After most of the appetites were sated, then came the parade of flags, presented by the ISA.

The Miler is offering short fiction, poetry and prose for the Diversions section, student talent solicited a plus.

Helen Rother, a BSU graduate and English student teacher, throws down some words during the “Poetry Slam” held in the Open Center last Thursday night.

Joey Ramone, a member of the early punk band the Ramones, was known for his distinctive voice and his energetic stage presence. His music and style were influential in the development of punk rock, and he remains a legend in the punk rock community.

Ramone was born in New York City in 1951 and was diagnosed with cancer in 1990. He continued to tour and record throughout his illness, releasing his final album, “This Is It,” in 1996. Ramone died on April 15, 2001, due to complications from cancer.

Ramone’s music was characterized by its simplicity and directness, and he is often credited with helping to define the punk rock genre. His songs often dealt with themes of alienation, rebellion, and personal struggle, and he was known for his energetic and charismatic live performances.

Ramone’s death was a significant loss for the punk rock community, and his music continues to be influential and beloved by fans around the world. Many artists have paid tribute to Ramone, and his legacy as a pioneer of punk rock continues to inspire new generations of musicians.
This text contains various sections, including a weekly horoscope and a crossword puzzle. The horoscope provides predictions for different zodiac signs, while the crossword puzzle offers a set of clues for word-solving. The text appears to be a mix of horoscope readings and columns, possibly from a newspaper or magazine. The horoscope section seems to be tailored for different astrological signs, offering advice and predictions based on the reader's zodiac. The crossword puzzle consists of a grid with numbers indicating the size of the answers and clues that need to be filled in with the correct words. The layout is typical of a typical newspaper or magazine article, with sections clearly delineated and content organized to cater to different interests such as astrology and word play.
