Arbiter, March 14

Students of Boise State University
Ruch formally asked to resign

By Andy Benson

Boise State University President Charles Ruch officially received a resolution from the ASBSU Senate last week calling for his resignation. The resolution accused Ruch of showing a history of financial irresponsibility, a lack of leadership and a disregard for the students of Boise State.

ASBSU president Nate Peterson started the petition last January calling for Ruch to step down or resign. Peterson cited Ruch's response to the PeopleSoft software cost overruns as an example of an administration out of touch with students.

The resolution stated that open the university's financial situation to sponsor the petition. Ruch would be asked to resign at the next ASBSU meeting on March 5.

On Ruch refused to comment on the resolution. He offered the Arbiter to previous comments Ruch has made on the petition.

Last January, Ruch said he was not considering resigning. "I am disappointed that they felt I owe the students and the faculty to resign," Ruch said when the petition drive was announced. "I am not going to resign."

Boise State, ASBSU Senate plan to meet, negotiate

By Mary Margaret Rice

Stom-to-stom college graduates must stay their courses in and stand firm as they prepare to enter into today's economic turmoil.

The National Survey of Student Financial Aid, total employment is expected to increase by 14 percent from 141 million in 1998 to 161 million in 2008. However, the 20 million jobs that will be created will not be evenly distributed to the major industrial job groups in the economy.

The constant structural changes in the job market will be caused by computer technology, and a faltering economy aggravated by the Internet and new technologies. Occupations the best prepared for the job market will be those between 1998 and 2008. However, their computer systems analysts, computer software engineers, and computer programmers.

The projected fastest growing occupations are those in the computer support specialists, computer systems analysts, and computer programmers.

Boise State budget consolidation plan approved

Boise State will implement several cost-saving measures, including student fees and reduce budgets to accommodate an estimated $18.3 million shortfall in the fiscal year that began July 1.

The plan drafted by the University's Executive Budget Committee was approved by President Charlotte Buckel.

"We made every effort to preserve the university's academic programs and key personnel to maintain the quality of what we provide," said President Buckel.

"While this means a reduction in the quantity of what we produce, it by no means diminishes the quality of what we provide," she said.

National privacy expert to speak at Boise State lecture series

Charlotta A. Wright, a national expert on privacy issues and the economics of politics, will be the featured speaker at the Len B. and Grace Jordan Endowment Boise State Lecture Series at 7 p.m. Monday, March 19, in the Boise State University Student Union Jordan Ballroom.

The Len B. and Grace Jordan Endowment Boise State Lecture Series is sponsored by the Len B. and Grace Jordan Endowment, a program dedicated to encourage the study of public policy issues and to support scholarship and excellence in the field.

Dr. Wright will discuss her new book, Dependent on D.C., and her recent work of how dependence on the federal government has become integral to the fabric of modern American public policy. Her presentation will explain how America changed from a nation that governed the central government guided a relatively small role in the daily affairs of ordinary Americans to one in which there is almost no activity that the government does not regulate or manipulate.

Dr. Wright will describe the economic issues on which she works, with躺ijeonsupport from the Carnegie Council on Ethics in Public Life, a New York-based think tank.

Employers will be seeking students for full-time and internship positions in businesses and government agencies, including health care, insurance, technology, law, public administration, education, and politics.

Recruiters from approximately 30 companies and agencies will conduct interviews in one hour time slots. For more information, contact the Career Development Office at 426-4223 or call Leandra Abarusa in the Boise State University Student Union Jordan Ballroom, Ext. 426-4223.

The sixth annual Idaho Engineering Job Fair will be held from 9 a.m. to 4 p.m. March 19 in the Jordan Ballroom of the Boise State University Student Union.

"Students from Boise State's College of Engineering, Construction, and Information Technology are invited to participate. Free. Call 426-4223.

The Boise State budget is based on several cost-saving measures, including student fees and reduction of buildings and parking lot behind buildings for a week during the Christmas break, consolidating building use and reducing energy usage at campus buildings.

"We made every effort to preserve the university's academic programs and key personnel to maintain the quality of what we provide," said President Buckel.

"While this means a reduction in the quantity of what we produce, it by no means diminishes the quality of what we provide," she said.

The tutoring center implemented drop-in tutoring this spring instead of private instructional tutoring. "This experiment will last a little to the fall, and it worked really well, especially at the beginning," Coles said. If a student likes the tutor, they can use him throughout the semester, and they will then have to pay the tutor for 60 minutes of instruction. The writing center charges $10-$15 per hour, some even cost more.

"There's no change that I've seen due to any budget cuts coming," said Rick Leahy, Writing Center director, and "no change that I've seen to the tutoring center." The Writing Center doesn't have any budget cuts coming.

Tutors restructure and refocus
By Amy Wegner
The University's budget crunch has sent many programs scrambling to come up with ways to save money and place programs in cut. Some tutor programs are no exception.

But like most of the tutoring services will be cut, however, changes have already taken place, and many tutoring services have been modified for efficiency during the current school year, said Craig Nardone, Bureau of Labor Statistics chief. "The Nardone, Bureau of Labor Statistics chief. "The

I see the light on the evils of corporations

Seeing the light on the evils of corporations

I was on my way to the gym, and I saw a man talking to a woman about communism. The man was wearing a red shirt and the woman was wearing a blue blouse. I overheard their conversation and was struck by the passion in the man's voice. He was saying that communism was the only way to solve the world's problems, and that it was a system that would put people first, not corporations.

I approached them and asked if I could join the conversation. The man welcomed me with open arms and began to explain his views in detail. He told me that corporations were only interested in profit and had no regard for the well-being of their employees or the environment. He said that the current economic system was rigged against the working class and that it was time for a change.

The woman nodded in agreement and shared her own experiences with me. She spoke about how she had worked for a corporation for ten years and how she had never received a raise. She said that the only thing that mattered to the corporation was profit, and that workers were treated as disposable.

I could see the passion in the man's eyes as he continued to speak. He said that communism would be a new system that would put people first and that it would ensure that everyone had access to basic needs like food, shelter, and healthcare.

I was impressed by their dedication to the cause and I asked if there was anything I could do to help. They told me that the first step was to educate ourselves and to spread the word. They gave me some pamphlets and recommended that I read some books on the subject.

As I stepped away, I felt a sense of hope and excitement. I knew that the road ahead would not be easy, but I was determined to do my part in making the world a better place. I promised myself that I would read the pamphlets and books they gave me and that I would spread the word about communism to everyone I knew.

In the weeks that followed, I spent hours reading and researching the topic. I was amazed by how much I learned and how much I had taken for granted. I realized that the capitalist system was not just about profits, but about power and control.

I became an active member of the communist movement, and I started attending rallies and meetings. I was amazed by how united we were and how strong our commitment was. I knew that we were fighting for something truly important, and I was willing to do whatever it took to make it happen.

Years went by, and the movement grew stronger. We won some battles and lost others, but we never gave up. We continued to fight for a better world, and we knew that one day we would succeed.

I never forgot the man and woman I met on that day. Their passion and dedication inspired me to become an active member of the communist movement, and I am grateful to them for helping me see the light on the evils of corporations.
Affirmative Action is a principle that seeks to level the playing field by giving certain groups a head start in opportunities that were once denied to them. This concept is often controversial, as it aims to rectify past injustices and promote equality. However, critics argue that it can lead to reverse discrimination, where individuals from non-preferred groups face disadvantages.

Hasen, a legal scholar, explains that affirmative action programs were established to counteract past injustices and promote equality. However, these programs have been criticized for their unintended consequences. For example, some argue that affirmative action can lead to reverse discrimination, where individuals from non-preferred groups face disadvantages. Others argue that affirmative action can lead to tokenism, where individuals are hired or promoted simply because they belong to a particular group, rather than because they are the best qualified candidates.

Despite these criticisms, affirmative action programs have been successful in increasing access to opportunities for historically disadvantaged groups. They have also been effective in promoting diversity in the workplace and in higher education. However, the implementation of affirmative action programs has been controversial, and there is ongoing debate about their effectiveness and fairness.

In conclusion, affirmative action programs are an important tool for promoting equality and diversity. However, they must be carefully implemented to avoid unintended consequences. As such, the debate about affirmative action will likely continue for many years to come.
March madness getting madder

By Danny Shields
The Arbiter

It is just me, or is this year's NCAA basketball tournament going to be one of the best ever? In the past it was easy to find someone who would disagree with you, but not so much any longer. This is due in large part to the fact that there are more than 60 teams in the field, and that's not much of a reason to not love watching any March Madness game. This past weekend was a great one, and that's not much of a reason to not love watching any March Madness game.

If you ask me, the biggest game of the weekend was Tom Izzo's Boilermakers taking on Mike Krzyzewski's Blue Devils in Philadelphia. In my opinion, there was no greater East Regional game than this one.

The Big Ten and ACC have always been known for their conference battles, and this year was no exception. The Boilermakers and Blue Devils met in the second round of the tournament, and it was a game that lived up to the hype.

The Boilermakers, led by Eron Harris and John Shurna, took an early lead and never looked back. The Blue Devils, led by旋Sasha--. Koon and Kyrie Irving, fought back, but it was too little, too late. The Boilermakers won 78-69, securing their place in the Elite Eight.

But the Big Ten and ACC were not the only conferences that produced great games. The Midwest Regional was also filled with exciting battles.

The top-seeded Kansas Jayhawks, led by senior guard Ben McLemore, took on the second-seeded Florida Gators in a game that had everything: a hot-shooting Minnesota team, a late-game comeback by the Jayhawks, and a last-second shot by UF's Casey Prather to win.

In the end, the Jayhawks won 75-71, securing their place in the Final Four.

And then there was the West Regional, where the top-seeded Gonzaga Bulldogs, led by senior guard Kevin Pangos, took on the second-seeded Oregon Ducks in a game that was filled with twists and turns.

The Ducks, led by senior guard Arsalan Kazemi, took an early lead, but the Bulldogs fought back and secured their place in the Elite Eight with a 71-65 win.

Overall, it was another great March Madness weekend. There were plenty of upsets, plenty of exciting games, and plenty of reasons to love watching basketball. The tournament is sure to keep delivering exciting games for the rest of the month.

Concrete Blonde comes to Big Easy

Band reunites to cut new album

By J. Patrick Kelly

It's been eight years since Los Angeles-based goth-punk-rockers Concrete Blonde have been in the studio. And it's been almost that long since they've been on a tour dates zigzagging the lower 48 states. Concrete Blonde's last album was in 1994, "Still in Hollywood," and nothing says frozen like Concrete Blonde. Just thinking of the trio brings cold chills of nostalgia.

The band formed in South-Hollywood in the early '80s. They released a few singles and EPs before their breakthrough in 1987 with the single "Joey." The album "Still in Hollywood," released in 1987, included the hit "God Is a Tramp," but Concrete Blonde was mostly known for their brand of punk-folk to a growing audience in southern California. The band's biggest breakthrough was in 1988 with the release of "Concrete Blonde." The band's unique blend of goth-punk and folk-rock music gained them a dedicated following, and their music became a soundtrack for the generation of fans raised with the music of the '80s. The band's sound was characterized by their signature voice and their raucous live performances.

In 1994, the band released their second album, "Concrete Blonde's Reunion," which was well-received, but despite their success, the band broke up and took a hiatus from recording and touring. Over the years, members of the band pursued solo projects and other musical endeavors, but fans remained loyal to the band and their music.

Now, after a long wait, Concrete Blonde is back with their first album in eight years. The band has reunited and is poised to release their new album, "Still in Hollywood," in the near future. The album is a return to their roots and a celebration of the band's enduring popularity. The band's reunion has been eagerly awaited by fans, and anticipation is high for the new release.

The band's reunion has been a long time coming, and fans are excited to hear the new music. The band's sound remains as fresh and relevant as ever, and their music continues to resonate with new and old fans alike. Concrete Blonde's return to the studio and the road is a testament to the band's staying power and their enduring popularity. Fans can look forward to hearing new music from the band, and the return of their classic sound.

Concrete Blonde made its return announcement recently, and fans are eagerly awaiting the new album. The band's reunion has been a long time coming, and fans are excited to hear the new music. The band's sound remains as fresh and relevant as ever, and their music continues to resonate with new and old fans alike. Concrete Blonde's return to the studio and the road is a testament to the band's staying power and their enduring popularity. Fans can look forward to hearing new music from the band, and the return of their classic sound.

Weekly Horoscope

By Linda C. Black

Triune Media Services

Today's Birthday (March 16): You've had the ideas, drawn up the plans, built up your self-confidence. Now, it's time to ask for the money, whether you want it or not, so you don't completely get derailed. Don't spend it all in one place.

To the extractor: check the day's sign. Today is the easiest day of the week for you to ask for the money... The day is not going to go further.

Aries (March 21-April 19): Today is a 6-You do feel yourself getting stronger? It's the only sign that happens any moment now. You're consistent yet gentle, inspired to protest. Find that tough exterior leaves a hole in you. Spend a few days finding out who needs you most. Don't spend it all in one place.

Taurus (April 20-May 20): Today is a 7-You tell a friend or loved one you're going to do something, then forget it. It doesn't happen often, but maybe you'll think better of it. Even if you try, let's just say you won't be very sure.

Gemin (May 21-June 20): Today is a 6-Your goals are nowhere near big enough if you can accomplish them all by yourself. You need a team, and they're all around you. All they want to do is to keep the money coming. Today is a 6-You're wise and compassionate already. Would It be a thing to do something, or that's not happening, that's not happening, that's not happening... Today is a 7-Your attention is beginning to turn from practical matters to the right thing. Make sure the money comes in.

Cancer (June 21-July 22): Today is a 7-Your ability is beginning to turn from practical matters to the right thing. Make sure the money comes in.

Virgo (Aug. 23-Sept. 22): Today is a 6-Don't believe an investment you're contemplating. Avoid your common enemy. It's not a good idea to spend the money before you have to think about it. Today is a 7-Your ability is beginning to turn from practical matters to the right thing. Make sure the money comes in.

Libra (Sept. 23-Oct. 22): Today is a 6-You need to feel unselfish for long. Friends would be a thing to do something, or that's not happening, that's not happening, that's not happening... Today is a 7-Your attention is beginning to turn from practical matters to the right thing. Make sure the money comes in.

Scorpio (Oct. 23-Nov. 21): Today is a 6-You need to feel unselfish for long. Friends would be a thing to do something, or that's not happening, that's not happening, that's not happening... Today is a 7-Your attention is beginning to turn from practical matters to the right thing. Make sure the money comes in.

Sagittarius (Nov. 22-Dec. 21): Today is a 7-It's amazing how just being quiet can sometimes be a powerful message. Use this in the course of things.

Capricorn (Dec. 22-Jan. 19): Today is a 6-You've had the ideas, drawn up the plans, built up your self-confidence. Now, it's time to ask for the money. Whatever you want it for is justified, so you'll probably get it.

Aquarius (Jan. 20-Feb. 18): Today is a 7-Your attention is beginning to turn from practical matters to the right thing. Make sure the money comes in.

PISCES

How to make it happen.

...Dr. McFeltcher's Pencil.

Inquire about something... Are you going to the meeting? If you do it before being nagged.

Your goals are nowhere near big enough if you can accomplish them all by yourself. You need a team, and they're all around you. All they want to do is to keep the money coming.
