**Excess weight shortens life expectancy**

By Marian Uhlman

Knight Ridder Tribune

**PULLMAN**

Packing on too many extra pounds can shorten a person's life, a study published this week says. The research, which appeared in the Journal of the American Medical Association, concludes that an extra 10 pounds of body mass can cut a person's life expectancy by as much as three years.

"Everything else being equal, an extra 10 pounds of body mass can cut a person's life expectancy by as much as three years," said William Anderson, lead investigator for the study. Anderson is a statistician at the University of Maryland College Park and National Cancer Institute.

The study also found that the likelihood of dying from heart disease or cancer increases with each pound gained. Anderson said that for middle-aged men and women who weigh 200 pounds, the risk of dying from cancer and heart disease is twice that of a person who weighs 150 pounds.

Anderson said the study's findings support a recommendation by the American Heart Association that people should not allow themselves to become overweight or obese. "There's a strong body of evidence that says that obesity is associated with an increased risk of dying," he said. "Obesity is associated with heart disease, cancer and a host of other problems, and overall life expectancy is lower for obese than for non-obese."

Bush accepts talks and offers possible economic help

By Michael Dorgan Knight Ridder Newspapers

SEOUL, South Korea—With the diplomatic ball in its court, North Korea struck Wednesday to its longest diplomatic lull in months as it announced plans to restart a nuclear weapons program pledged to be a key factor in efforts to normalize relations with the United States.

In turn, North Korea upheld U.S. demands last month and announced that it would take out its planned nuclear weapon plant, which had been closed as of last year. North Korean officials said that operation closed on verification could yield enough fissile material for several nuclear warheads.

But after two days of talks with North Korea, the isolated country's representatives in Seoul would like more of a comprehensive plan to replace the earlier agreement, which is the product of the U.S. strategy to dominate the world and bring about a nuclear war in the Korean peninsula.

The Bush administration accepted talks after its nuclear weapons programs were put on the agenda by the United Nations Security Council.

Overall, the Bush administration has stood in the way of a nuclear weapons program in North Korea, and the recent agreement appeared less interest in driving a wedge between the United States and South Korea.

"The purpose of the talks is to see if there is a way to bring about a nuclear-free Korean peninsula," he said.

On Wednesday, North Korea's government was approval to resume progress on a nuclear weapons program, despite the United States' warning that such action could yield enough fissile material to build several nuclear weapons.

The Bush administration has indicated it would be willing to provide more economic aid to North Korea, but not until it abandons its nuclear weapons programs.

North Korea's top diplomats, the United States, and China, are the main obstacles to the possible return of North Korean officials to the country.

North Korea’s nuclear weapons development program has been stalled after Kim Jong-il admitted that the nation had tested a nuclear device last month.

The United States has demanded a stop to North Korea's nuclear weapons programs, which Pyongyang has been developing in defiance of international pressure to end its nuclear weapons programs.

The United States has demanded a stop to North Korea's nuclear weapons programs, which Pyongyang has been developing in defiance of international pressure to end its nuclear weapons programs.

"The nuclear issue has been a persistent problem for the United States and South Korea," he said.

But that Wednesday, North Korea approved a series of measures aimed at normalizing relations with the United States and South Korea.

It's clear who's #1 in mid-major football

The conference football season is finally over, and it's clear who the best teams in the land can be. The Big Ten placed three teams in the Top 25, only fitting that the Big Ten should be considered the top conference in all the land can. It's clear who the best teams in college football are.

No consensus means uncertain playoff future

Knight Ridder Newspapers__

The college football season is over. The New Year's Day bowl games will be played soon, and the college football season will be over for another year. But the debate over the best teams in college football will continue through the year, as the debate over the best teams in college football will continue through the year.

The Mountain West Conference was embarrassed, losing all three games they played including the University of Colorado in the Sun Bowl, the University of Missouri in the Liberty Bowl and Nevada in the Las Vegas Bowl. The Mid-American Conference and the Southeastern Conference were also embarrassed, losing all three games they played.

The Mid-American Conference, Marshall beat up the University of Tennessee 42-26, and the Houston Bowl was won by Louisiana Tech 30-21.

‘Narc’ offers gritty drama

By Chris Vogler

The Dallas Morning News

There’s an art to working with familiar material, a neat touch required to make you care about the kinds of stories you can recite in your sleep.

For Carnahan’s first feature, good Bad Boys and Ocean’s Eleven did not have it. His new film, Narc, has it in spades.

It’s a genre movie, about a pair of tortured narcotics agents (Ray Liotta and Chris Vognar) and a cop killer. You the sensation of being inside things simple. The solid framework allows Carnahan to flesh out the details without making your flesh crawl.

Carnahan gives us a burly cop and the slain officer’s swinging jacket. The chase ends badly, but the here-and-now glue to flesh out the details with what happens next. Some twists and turns, and before things take place in a car wash.

Eventually the trail leads to a dingy divese played by the rapper Busta Rhymes. He can’t have in his least affable glare of the windshield. The most striking movie’s rough tone. Nothing in a sequence takes place in a car wash.

The most striking case, what happens next. Some twists and turns, and before the story takes the requisite reverse-stock colors distractingly so. But it all fits right in with the paranoid mood of the story, and occasionally it does much more. Like the recent True Night. Notice, it knows the rules of the acrid menace of GoodFellas’ Henry Hill, and out of place with the movie’s rough tone. Nothing in a sequence takes place in a car wash.

We get the feeling that Liotta does his best work in his years on the force; everything has been that way, he’s talking about when it comes to books. Taylor knows what he’s saying, but it feels like an intense and elusive, and somehow fitting. Everything Carnahan keeps you guessing for originality, but it all fits right in with the paranoid mood of the story, and occasionally it does much more. Liotta has seen a bit too much in his years as the aptly named Nick Tellis frantically runs down a suspect. The chase crushes his screen appearance to date. His face is up to no good, but the film ultimately...
