In 1990, a legal complaint against the Boise Cascade Project by the Defense Council of the Chilean National Environmental Organization (DOD) led to a $214,000 fine and a moratorium on operations in the Chilean Maritime Territory. The project was never built because the company didn't proceed, Bartels said. According to Bartels, the legal complaint came as a stop surprisingly because the company was concerned about new permit requirements. Bartels said another issue in stopping the operation was the litigation over the destruction of shell fragments containing archeological value.

The litigation was a couple of environmental organizations that were very eager in those efforts. They just didn't achieve their aims because their government's work was the project's priority. They then provided the permits, but those were never used for any environmental reasons, just because they were only a secondary issue as to why we didn't proceed," Bartels said.

"There's no basis for legal action. By the time we start litigation, we have accepted the complaint, it's legal. It's just there to be legally tried under Chilean law. That's what it amounted to, the operator didn't know there was a permit at all. It was almost a hundred dollars. That was the problem," Bartels said.

A federal environmental consultant who specializes in mining and environmental issues, said that no one wanted to get into the political thick of things, that if such a simple issue couldn't get consensus, how could anything ever get done in the country?

"We kind of thought of the political process and the energy issues in the country," she said. She felt that even though the government was very strident in their efforts to stop the operation, they didn't introduce any meaningful conversation with the public.

"The disturbance was just a small disturbance, but it was enough to the site. The Second Court of Instance accepted the complaint, and the company was fined for destroying archeological fragments containing archeological value. The decision followed the legal processes for the project's approval.

Cascada Chile's rights to the site were removed, and the site was declared a historical and environmental area. The Second Court of Instance of Puerto Montt, accepted the complaint, titled "The Arbiter".

The Arbiter's purpose was to highlight the disturbance in Bay Ilque, 35 miles from the city of Puerto Montt. The Arbiter was the only legal organization that had the audacity to legally stand against the site.

"The Arbiter bought the site for the establishment of a temporary road to the site. The\n

Local lobbyists encounter resistance in Washington

By Elizabeth Hofacker

Two Boise State students involved in a student-lobbying project with the Idaho Nuclear Alliance, Boise's student chapter of the national environmental group, have encountered resistance from both local and national environmental groups.

Boise State University political science major, Amanda, and Idaho Nuclear Alliance political science major, Cassie, have been advocating for the Idaho Nuclear Alliance's position that the Idaho National Laboratory's proposed nuclear waste site should not be opened.

"The people of the Idaho National Laboratory are the ones who are most impacted by the site. We want the opportunity to train groups of four to six people in nuclear issues, including environmental and political issues.

"We believe that the Idaho National Laboratory's proposed nuclear waste site should not be opened. We think that the site is not ready for operation and that the site should be closed.

"We believe that the Idaho National Laboratory's proposed nuclear waste site should not be opened. We think that the site is not ready for operation and that the site should be closed.

Fraternity shut down over goose beating

CHARLOTTE, N.C. -

The Kappa Sigma fraternity at the University of North Carolina at Charlotte had its charter revoked by the university's Board of Trustees over a incident where fraternity members were accused of animal cruelty.

The incident occurred in January when police were called to the fraternity house after receiving a report of a goose being beaten. At the time, the fraternity was suspended by the university for violating its code of conduct.

The board voted unanimously to conduct an investigation into the incident and found that Kappa Sigma had engaged in unbecoming behavior.

The fraternity's leaders have denied the allegations and have stated that the investigation was biased and unfair.

Legal experts agree that the action could mark the beginning of the end for the fraternity, as it is challenging its suspension in court.

The university said that it would not happen for at least two years, and the fraternity has already appealed the decision.

The fraternity's members are calling for the university to rescind the suspension, but the university said that it is committed to enforcing its code of conduct.

The university's decision has sparked a debate about the role of fraternities in modern society, with some arguing that they are outdated and harmful, and others saying that they provide valuable experiences for students.

Professor's curiosity leads to new benefits

ANN ARBOR, Mich. -

A professor at the University of Michigan has discovered a new way to create diverse educational environments.

The professor, who studies the impact of race on educational outcomes, found that integrating diverse groups of students into the educational process can lead to a more inclusive and effective learning environment.

The professor's findings, published in the Journal of Blacks in Higher Education, an academic periodical, have sparked interest among policymakers and educators.

The professor, who is a member of the American Educational Research Association, said that the findings could have wide-ranging implications for the future of higher education.

The professor's work has been supported by the National Science Foundation and the National Institutes of Health.

The professor's findings have been met with mixed reactions, with some arguing that they could lead to a more equitable education system, while others say that they could lead to a more fragmented and unequal system.

The professor has been praised for his work, and his findings have been cited in numerous papers and articles.

The professor said that his curiosity has led to new discoveries that could benefit students and educators alike.

The professor's work has been featured in the New York Times, the Washington Post, and the Wall Street Journal.

The professor's findings have also been discussed at the annual meeting of the American Educational Research Association.

The professor's work has been supported by the National Science Foundation and the National Institutes of Health.
BSU considers multi-cultural core classes

Committee to decide on adding diversity cluster requirements

By Jason Kaufman
The Arbiter

Proposed changes to Boise State University’s undergraduate core requirements have been introduced to BSU’s Core Curriculum Committee; in a move that would define a national trend among institutions of higher learning.

The committee, which organizes and summarizes offerings for the curriculum, is considering a proposal written by English professor Nancy Newman to add a diversity cluster to the core requirements.

The addition, if approved, would require all undergraduates to complete one diversity cluster.

The idea could change the way students get a Bachelor's degree by requiring them to take classes that incorporate diversity perspectives.

BSU’s student government recently passed a resolution, sponsored by ASBSU Senator Ali Ishaq that supports the curriculum change.

Both BSU’s School of Social Work and College of Education have already adopted similar diversity requirements to their curricula.

Sara Reyes, ASBSU diversity coordinator, said students might have been more vocal during the Vietnam protests. “I think it is appropriate to take engineer into the core classes of the university,” said Reyes. “We should not be afraid to take a position during times of conflict, she said.

Helmke also said, “It doesn’t need to be an unanimous position.”

BSU’s requirement to offer three credits of diversity classes would be in support of the proposal.

Reyes said exposure to multi-cultural perspectives would be as least as graduation.

Reyes said, “We think it is a lot less black and white today,” he said. “We were ashamed, and only African Americans or women who were involved in the peace movement who protested against the war.”

Protest against the war in Iraq was a huge success; it is best that students voice their opinions through their diversity class.

And with thousands of protest writing in letters and speaking in public forums, the protests of the 1960s are becoming more of a memory.

There was a wide compensation of students and scholars that were called radicals or dropouts,” Parker said. “But you can’t have a larger group of people that aren’t within groups that would have been black and white. We have seen a tremendous expression of support for the proposed requirement, Reyes said.

Reyes also said that the administration during Vietnam definitely had a different approach to diversity.

“Obviously we had a different administration and a different political environment, different political environment,” Reyes said. “They also asked for minority recruitment to minority students that go to college to avoid the war,” Arnold said.

The student government is currently discussing the issue of adding a diversity cluster to the curriculum, allowing only a small group of students to voice their opinion about the issue.

In the wake of recent events, students have been brainstorming ideas for how to incorporate diversity into the curriculum.

The student body probably needs the guidance of the administration on the small minority of students.

The university did not want to the discussion, although a proposal to support the proposal appeared on the agenda.

This year, students are working to incorporate diversity into the curriculum, but the precise impact of diversity on the university is yet to be determined.

Students currently do not have the ability to voice their opinions about how diversity should be incorporated into the curriculum.

A Boise State student stated from Seattle, “We need to have a diversity cluster to the curriculum.

Gass said the current administration and supporters of the proposal are in agreement.

“We have a small group of people that doesn’t care if we take a position or not,” Gass said. “That group is a minority of students that don’t take a position.”

They are working to keep the diversity on the agenda.

It’s important to make sure that diversity is part of the curriculum, Gass said.

Gass also said that the administration and supporters of the proposal are in agreement.

“The more exposure you have to minority students, the better the university, she said. “We were ashamed, and only African Americans or women who were involved in the peace movement who protested against the war.”

Protest against the war in Iraq was a huge success; it is best that students voice their opinions through their diversity class.

Hello, I would like to represent you. I am a student at Boise State University. I have experience working with little minorities and would like to work on increasing awareness and making changes. I believe in taking action rather than just talking about it. Some of the issues that I am currently involved in are student leadership and financial aid. I am always looking for ways to improve our campus and make it a better place for students. I am open to new ideas and am willing to work with others to find solutions. I am looking forward to the opportunity to serve as a Senator and to work towards making our campus a better place for everyone.

Ramiro Castro for ASBSU Senator

ASBSU Associated Student Body of Boise State University

Dear Editor,

I am writing to express my support for ASBSU's continued efforts in promoting diversity and inclusivity on our campus. As a student of color, I have firsthand experience with the challenges and opportunities that come with being a minority student here. I believe that ASBSU has an important role to play in creating a more welcoming and supportive environment for all students, regardless of their identity or background.

In recent years, ASBSU has taken several steps to address issues of diversity and inclusivity. These include the creation of new programs like the Multicultural Diversity Forum and the Cultural Center, which provide opportunities for students to learn about and celebrate different cultures. Additionally, ASBSU has implemented new policies to address issues of bias and discrimination, such as the mandatory training for all student leaders.

I believe that we need to continue these efforts and build on our successes. One area where I think we can improve is in our efforts to promote culturally diverse representation in student organizations. Given the diversity of our student body, I believe that we should strive to have a more equitable distribution of leadership roles across different cultural groups.

As a member of ASBSU's student government, I am committed to working towards these goals. I am confident that with the support of the student body, we can make a positive difference and create a more inclusive and diverse campus community.

Sincerely,

[Name]

ASBSU Senator
Freedom is not a free concept

By Stacey Rawlings

Most students on this campus do not support military action. If we wanted their oil, they would have been given a chance to sell it to us to help us meet our needs. If we wanted their land, they would have been given a chance to defend it to us. But we use their oil, and we invade their country without paying for it, we could have solved their problem.

While I can appreciate that he understands (as well as those of us who support military action) that freedom is NOT free, what arc we willing to potentially kill to keep it? Freedom is NOT a student issue.

Going back to the issue of ruling the world and to have it crossed and redrawn, our freedoms and safety as well. Oppressed peoples around the globe - and ensuring that they keep it. Do we really think that this country is one of us who wants a war, or any violence, but Sept. 11, and wars is extremely uncomfortable, treating them like the enemy.

I understand the Black Hawk Down at the fighting

ways. At least the sky was shining and the weather was horrible. He had chemicals and hazardous weapons then, just as she does now. A total deserted Iraq is not the country of today. The most continued Arab talk about earning a living, there were no standards. Politics were ranked into the air and my unit was expected to respond to.

Knight sounds off on NCAA committee

By Jan Hulst
The Dallas Morning News

The long-running Broadway hit "Les Miserables" is playing at the Majestic Theater, which is only about two basketball courts away from the Marriott Marquis on Thursday. The Marquis played host to the NCAA,” Knight said. “I don’t think I agree with that.”

“Les Miserables” is playing at the two basketball courts away from the Marriott Marquis played host to the NCAA,” Knight said. “I don’t think I agree with that.”

The Dallas Morning News ---

The long-running Broadway hit "Les Miserables" is playing at the Majestic Theater, which is only about two basketball courts away from the Marriott Marquis on Thursday. The Marquis played host to the NCAA selection committee, otherwise known in Knight’s world as "The Midnighters.")

Texas Tech has won three games to advance to the semifinals of the National Invitation Tournament.

Knight did not suggest that the final four. Or Indianapolis, or wherever ... Why didn’t we think of that?” They’re always a step or two behind the NIT people when it comes to thinking about good things for basketball,” he said.

They went to Madison Square Garden, and they’re not smart enough to understand that a bunch of people in Kansas City can’t outsmart people in New York. They’ve never figured that out. Or Indianapolis, or wherever ... Why didn’t we think of that?” They’re always a step or two behind the NIT people when it comes to thinking about good things for basketball,” he said.

To thinking about good things for basketball,” he said.

The NCAA has tried to eliminate the electronics. I don’t think anybody should have an exception. I think the first two teams picked by the coaches should have an advantage over the others. The coaches should play according to their spots. And I’ve always thought the NIT was better than the NCAA when the preseason NIT was introduced. Somebody sitting on a nieuwe. Why didn’t we think of that?” They’re always a step or two behind the NIT people when it comes to thinking about good things for basketball,” he said.

They went to Madison Square Garden, and they’re not smart enough to understand that a bunch of people in Kansas City can’t outsmart people in New York. They’ve never figured that out. Or Indianapolis, or wherever ... Why didn’t we think of that?” They’re always a step or two behind the NIT people when it comes to thinking about good things for basketball,” he said. But the way it’s set up now, it provides the NIT with some really good basketball teams every year.

"When the NIT committee has done so much, but the NIT has never backed down. In 1973, the NCAA Tournament consisted of 32 teams, and the NIT had 16. By 1980, the NCAA had grown to 18 teams, but the NIT remained at 16 teams.

Neil Kennedy in a typical tirade.

"If you look at all the tournament conventions that have been going on over the years, there are a lot of people who know nothing about basketball on the university level who are making the decisions. There are people on it that do have some basketball background at all,” Knight was querimous and cooperative with the media, willing stories of bringing his Army and Indiana teams to the NIT and demonstrating his knowledge of NIT history by interjecting suggestions that the first champion was Temple in 1939.

The opening act was well received, and Knight was still a few days in town. Who knows? Better to have been in New York a few days ago, before the NCAA selection committee has to be looking forward to it.

Fast pitch softball

winds up for new season

By Tanya Dubson
The Arbiter

Kristen Salo had one desire her freshman year at Boise State. She wanted to play softball. Not knowing what information about Boise State during her internship, she applied. Must be 21 or older to enter. Fastpitch.

"The Boise State women’s fast-pitch team is a team formed in the spring of 2000. The team is composed of 18 players on the roster. The team is led by Assistant Coach and Head Coach, Senior Co-Captain Katie Dane. The Boise State Crushed Walla Walla 13-3 in the first game of the season. All of their home games are played at Fort Boise. The team is 5-2-0 in home games and 3-0-0 in road games. All of their home games are played at Fort Boise. They have played at various fields due to their availability.

The long-running Broadway hit "Les Miserables" is playing at the two basketball courts away from the Marriott Marquis on Thursday. The Marquis played host to the NCAA selection committee, otherwise known in Knight’s world as "The Midnighters.")

Planet Earth lands in Boise

By Lauren Consuelo Tussing

Blackout, Planet Earth's latest offering, The Arbiter ---(Hed)pewill hit the stage at the Big Fish the 1st.

The album release date was initially set for early October until its first release on the 15th. But Thursday the band spent waiting on the shelves proved to be a good thing for the band's album's first single, and after touring May 1999, bassist Mawk included on the album if it was released on time, bassist Mawk said.

"I love it. I'm proud of it. It's brought a lot of attention to the band, so we're glad it was released on time," Mawk said.

To me, it soundsgreat, but at the same time I know it insideout. I go over, "Mawk said from Panama City Beach, Fla., on the last album. "So, we're a littlomore humble, I for sure am. So I'm trying not to have any expectationsof todayonwards," Mawk said.

Chad Benekos left the band soon after (hed)pe recruited former Snot guitarist Sonny Mayo to take his place. How does the new member fit into the band?

"Like a glove," he put it. "He's a professional bassist, he's a professional player. The music's better, the vibration that I've been wanting to hear that for the first time again. That's why I've been playing so much. Last weekend, we were in Panama City Beach, Fla., on the bar scene there."

"And also for some stupid reasons we just like to play a lot," Mawk said. "We're playing too much. So we're trying to cut it down, but it's hard. We're trying to cut it down, but it's hard."

"We're a little more humble," Mawk said.

"I approached my songwriting from a point-of-view that 'Hey, good idea my line sound. It sounds good, it sounds better. So we really appreciate the feedback that we're getting," Mawk said. "We're really happy to be here."

"The single that we've released is doing really good so far. It's getting a lot of airplay country, which we really didn't expect. But the single that we've released is doing really good so far. It's getting a lot of airplay country, which we really didn't expect.

"We've never peaked yet. The single that we've released is doing really good so far. It's getting a lot of airplay country, which we really didn't expect. But the single that we've released is doing really good so far. It's getting a lot of airplay country, which we really didn't expect."
