12 BC Students Awarded Scholarships

Generous Gifts from Fund of Laura Moore Cunningham

Twelve recipients of the Laura Moore Cunningham Foundation Scholarships were announced Monday night by Boise College President Eugene R. Chaffee.

"The scholarships, worth $260 each, are part of a $100,000 fund for students of outstanding ability and character," declared Dr. Chaffee. "The late Mrs. Cunningham, who was in the classroom for a total of 46 years, was a friend of the college and who in 1953, Mrs. Cunningham donated a $10,000 (sic) to the college—considered the most musical gift offered any northern college in the preceding decades."

The recipients are:

- Patricia J. Reinhardt, daughter of Dr. Chaffee.
- Bernadette J. Jestrabek, 4th Floor, College Hall.
- Charles R. Viask, 412 Diamond St., Nampa.
- Alene L. Day, 141 College Ave., Kuna.
- Diane D. Firnig, 401 College Court.
- Judy L. Koester, 812 N. 22nd St.
- Ada D. Hearn, 312 Diamond St., Nampa.
- Bernadette J. Jestrabek, 4th Floor, College Hall.
- Diane D. Firnig, 401 College Court.
- Judy L. Koester, 812 N. 22nd St.
- Ada D. Hearn, 312 Diamond St., Nampa.
- Bernadette J. Jestrabek, 4th Floor, College Hall.
- Diane D. Firnig, 401 College Court.

"These are the only living reptiles of this size in any country;" declared Dr. William Fullmer, professor of biology, who has the responsibility of capturing the creatures for the college. The python lives on the second floor of Burnett Hall, the boa constrictor is kept in a cage on the first floor, and the python is housed in a room on the second floor.

Noted Bassoonist to Perform Here for Concert Opener

George Zuckerman, called by leading critics a "bassoonist par excellente" and considered one of humanity's true treasures, will perform Nov. 13 at 8:15 p.m., in Boise College auditorium, opening the college's 61st concert season.

Although born in England, Zuckerman has been directed in three different countries, all of whom have been "fond of him." For this reason, Zuckerman has collaborated with the world's leading orchestras, lauded by scores of critics for his performances.

At halftime of the roll on the North American continent, the bassoonist was evasively described as the "world's greatest bassoonist," in the words of another. In this way, the mighty bassoon, as a soloist, is one of the world's most effective orchestral instruments, and its virtuosi are considered to be among the most masterful in the world.

"A true American cock-sure of his talent, Zuckerman has shown the world his worth in the concert halls and as a soloist."

Judy L. Kessler, 812 N. 22nd St., Ada D. Hearn, 312 Diamond St., Nampa.

'MONSTERS' DONATED TO BC FOR CLASS DEMONSTRATIONS

A 6-foot python, a 1,000-foot boa constrictor, and a rare 10-foot python, donated to Boise College by Miami, Florida, are being kept by the biology department.

"These are the only living reptiles of this size in any country;" declared Dr. William Fullmer, professor of biology, who has the responsibility of capturing the creatures for the college. The python lives on the second floor of Burnett Hall, the boa constrictor is kept in a cage on the first floor, and the python is housed in a room on the second floor.

"The python will become the basis of many of the courses offered by the biology department, and the boa constrictor will be used in a variety of demonstrations. The python is also being used as a living specimen in the department's herpetology course."

"The python was donated by Miami, Florida, and the boa constrictor was donated by the University of Florida. Both were brought to the college by biology professor William Fullmer."

MORNING MEETING TODAY

James A. Thomas, chairman of the college's student government, announced that the morning meeting today will be held in the college auditorium at 8:30 a.m. The meeting is open to all members of the college community.

PEACE CORPS NEEDS MORE VOLUNTEERS

A memo, addressed to all members of the college community, was distributed today by Dr. William Fullmer, professor of biology, who announced that the college needs more volunteers to join the Peace Corps.

"We need more volunteers to help us meet the needs of the Peace Corps," declared Dr. Fullmer. "The Peace Corps is a volunteer program that provides opportunities for young people to work in foreign countries and help develop the economies of other nations."

The college is currently accepting applications from eligible students, and the deadline for applications is December 1.

Who's Better—Women or Men?

By BUTH NATHAN

Editor's Note: Carter said, "To most intelligent people in precision work, requiring correlation of hand, eye and intelligence, and our lips, and our brains, and our minds, is not a question that has been accepted but barely acknowledged because women are still drastically limited by men. 80 percent of the serious workers in the United States are women."

Montagu believes that women are the specimens of mankind, whether they are ending wars or alleviating everyday life. Beyond that, he believes that women are the ones who can make our society better. In his book "The Natural Superiority of Women," he says that women have the capacity to love, to have compassion, and that this capacity is the key to love, to have compassion, and that this capacity is the key to human progress.

The superiority of women is quietly acknowledged throughout the world, yet women are still treated as second-class citizens in many countries. The book "The Natural Superiority of Women" by Ashley Montagu, a social biologist-author and anthropologist, has been a key source of information on this topic.

One of the first challenges that women face in their fight for equality is the perception that they are inferior to men. This观念 is perpetuated by stereotypes and biases that have been ingrained in society for centuries. However, Montagu argues that women are not inferior; they are superior in many ways, especially in the areas of empathy, compassion, and emotional intelligence.

"The Natural Superiority of Women" is a powerful book that challenges the traditional notion that women are inferior to men. It is a must-read for anyone who wants to understand the true nature of women and their potential to make the world a better place.

Machine Decides Students 'Fate'

A Boise College official, who spoke on condition of anonymity, said the school's new 'Fate' system is "a great tool for identifying students who are at risk of dropping out." The system uses a combination of academic performance, attendance, and other factors to identify students who are struggling.

The 'Fate' system was developed in partnership with Boise State University and is being rolled out to other institutions.

Boise College Takes Shoreline to Showers

By BILL WINKLER
Roundup Sports Editor

In a game played under the worst of conditions, the Broncos' defense played a complete game.

Boise College's defense did not allow a single point, and the offense scored two touchdowns. The game was played in a heavy rain, with the ball bouncing off the ground.

The Broncos' defense was led by safety Bob Brown, who had two interceptions and a fumble recovery. Linebacker Pat Williams also had a big game, with 13 tackles and a forced fumble.

On offense, Boise College quarterback Jeff Drury completed 10 of 17 passes for 154 yards and a touchdown. Wide receiver Randy Williams had six catches for 103 yards and a score.

The Broncos' defense was able to shut down Shoreline's offense, holding them to only 105 total yards. Boise College will be looking to continue their strong defense in their next game against Washington State College.

HITS and MISSES

By RAY GIFFIN

Although managing only a one-touchdown victory over Shoreline College last Saturday, the Boise College Bronco football team was pleased with the gutsy performance by adapting to the conditions and turning mudders when needed.

Ask any football coach on the road, and he'll tell you the number one rule for winning is to turn mudders into something that will work to your advantage. Boise College Bronco coach Rob Connor did just that when he elected to go for it on fourth down with 10 yards to go on the Shoreline 37-yard line.

With Boise College facing a fourth and 10 from the Shoreline 37, Connor elected to go for it on fourth down with 10 yards to go. The Broncos had utilized both timeouts and were unable to convert on third down. The decision was to go for the extra point, and Boise College was successful.

Bronco Boosters View Victory

Over its first 10 games, the Broncos' defense has shut out their opponents in all but one game this season. This week's victory over Shoreline College was a testament to the Bronco defense's ability to dominate on the field.

In addition to their strong defense, the Broncos' offense was able to control the game, holding the ball for 38:28 minutes. This was a significant improvement over their recent game against Yakima College, where they held the ball for only 23:31 minutes.

JETS' JOE NAMATH CONTINUES TO BUCKET DEFENSES OF OPPOSITION

NEW YORK - It's hard to believe, but it's true. Joe Namath is still good enough to beat the Vikings and Jets quarterback led New York to a 10-7 win over Minnesota.

Namath completed 26 of 41 passes for 304 yards and two touchdowns. His performance earned him the game ball from the Pro Football Writers of America.

Namath also rushed for 68 yards on 11 carries and had a key interception that set up New York's winning score. The Jets' defense, led by Joe Willie and Larry Allen, held the Vikings to 100 yards rushing and 284 yards passing.

The Jets' defense had a big day, allowing only 10 points. New York's defense was led by线backer Wilbur Miller, who had seven tackles and a sack.

Namath's performance was a welcome return to form after a slow start to the season. He had struggled with injuries and turnovers earlier in the year, but has found his groove in recent games.

Namath's performance was a welcome return to form after a slow start to the season. He had struggled with injuries and turnovers earlier in the year, but has found his groove in recent games.

One of the key moments of the game came when Namath converted on a fourth-and-goal play from the Vikings' one-yard line. New York's defense had held the Vikings to two points on their previous drive, and Namath's touchdown gave the Jets a 7-2 lead.

Namath's performance was a welcome return to form after a slow start to the season. He had struggled with injuries and turnovers earlier in the year, but has found his groove in recent games.
