At one time or another, all of us ask ourselves: "How is my life going?"

To answer this question, we can use a simple equation.

Life = Work + Play + Relationships + Self-care + Spirituality

Each of these components plays a crucial role in our overall well-being. When any one of these areas is missing or unbalanced, it can negatively impact our mental, emotional, and physical health.

In order to lead a fulfilling life, it is important to strike a balance among all these aspects. By doing so, we can ensure that we are living life to the fullest and reaching our full potential.

This equation serves as a reminder to always keep these important areas in mind and to make conscious efforts towards achieving a healthy balance in our lives.

Inventory Team Scouts Campus

A grant from the Idaho State Commission for Higher Education Facilities is making it possible for Boise College to inventory all its buildings and to determine to what extent each room in each building is used each hour of the day.

Dr. Gerald Reed, BC's academic affairs coordinator, is heading the inventory project. Working under him is the college's Facilities Inventory and Space Utilization team, consisting of team leader Orson Boardman and team members Gary Williams, John Squire and Gerald Glave.

The Boise College Facilities Inventory and Space Utilization team has until March 1, 1968, to complete its study. The team began the project in October of this year.

As outlined in the project's procedure manual, "the primary objectives to be accomplished through the inventory project must be to plan intelligently for meeting future facility construction needs, and to provide some of the data necessary for statewide comprehensive planning for higher education." Additional purposes of the project are accomplished, but not necessarily to be limited to, comparing time-space ratios of public service functions among Idaho institutions and with other states institutions; projecting facilities construction needs and comparing facility construction needs with neighboring institutions.

When asked just what information the team has gathered, Dr. Reed said besides finding information on the heating, lighting, roof- and floor-plan, the team had to measure every room or usable space in the 35 to 40 college buildings. This included the measuring of such things as boiler chimneys to attics and basements.

BRONCOS TRAVEL TO BATTLE NUC, IDAHO FRESHMEN

BY JEFF HARTSHORNE
Boise College Sports Writer

The Boise College Broncos run into a crowded state of activity this weekend as they ready for trips to North Idaho Junior College on Dec. 7, then to Moscow, where they will face the University of Idaho freshman Dec. 8. The Broncos return home for a clash with the Golden Eagles of Southern Idaho on Dec. 12.

The NICC roster consists of 17 men, of which only three are returning lettermen. They are center Dan Burns, a 6'5" sophomore, who was an All-American at Coeur d'Alene High School; Bill Broders, a 6'2" forward and a high school All-State selection at Moscow, Mont., and Bill Schrutz, a 6'4" guard, also of Coeur d'Alene.
