Drama, choir and debate

Dr. Barnes budgets \$10,000 for ASBSC

Dr. John Barnes, President of Boise State College, has budgeted \$10,000.00 from next year's general fund budget to pay for travel expenses for several departments and activities which the ASB budget has traditionally funded, according to Tom Drechsel, ASBSC President.

Dr. Barnes described this action as being "our step number one in a commitment to assume the financial obligations for some of the activities which are not distinctly ASB in nature."

In joint meetings Mr. Drechsel and Dr. Barnes agreed on the following earmarkings for the funds: \$905.00 in travel monies for the Theatre Arts Department, \$5,360.00 in travel funds for Intercollegiate Debate,

and \$3,735.00 in travel monies for the Boise State College Choir. The funds for the Theatre Arts and Debate are the identical budgets which the ASB had appropriated for these two activities in 1971-72. Concerning the choir, Dr. Barnes stated, "The travel budget for the choir from the ASB was \$4,828.00 and we are hopeful that the ASB will provide additional monies beyond the \$3,735.00 for the choir to bring their budget to at least a level which they had in 1971-72."

Commenting on the use of general fund monies for these areas, Dr. Barnes explained, "In this manner we have saved the ASB \$10,000.00 so they can use 1972-73 monies for other purposes."

Fish have built in answer to problem

Ever since man discovered the joy of speed, whether to escape a hungry predator or just for speed itself, he has dreamed of ways to go faster. In the water, he has honed his sailing hull with wet sandpaper and waxed his surfboard to decrease the friction of water.

A recently published U.S. Navy study reviewed in the New York TIMES shows that some fish have had a built-in answer the whole time. It now appears that swiftly moving fish like barracuda and halibut secrete slime that acts as a highly efficient reducer of turbulence. The slime does not dissolve in water except in the presence of turbulence. Thus the fish swims casually about with its slimy coating intact until it needs a burst of speed. As soon as it churns up water in its dash, turbulence dissolves the top layer of slime, which then soothes the turbulence by changing the property of the water so that it flows smoothly past the fish at an even rate. Additional layers of slime make the process continuous. Fish slimes are also believed to serve other functions, such as offering protection from bacterial infection and lubrication of scales.

Both ocean and fresh water fish carry the high-speed slime, though not all species do so. In the fresh water fish studied, it was found that the small-mouth bass, various forms of trout and other species carry slime in sufficient concentration to reduce friction by close to 60%. In the ocean, Pacific barracudas are the best equipped, with the California halibut a close second.

Democratic candidate for Congress, Ed Williams, and ASBSC President, Tom Drechsel, in a firm handshake at BSC Union

ARBITER

Boise State College MAY 11, 1972

Governor Cecil D. Andrus congratulates best dressed hobo guy and gal, Bobbie Page and Mike Naughton.

Hobo March nets four 'grand'

Boise State's 12th annual Hobo March, last Friday, collected \$4496.91 in downtown Boise. According to Hobo officials the funds collected in this march surpassed all previous scholarship drives initiated by Vo Tech.

The Auto Body class came in first with a collection of \$545.79 and won the first prize of \$50

A total of 161 Vo-Tech students collected various amounts of money with Jason Findley, Office Machine Repair, leading them all with a grand total of \$112.42.

Governor Andrus, Mayor Amyx, and BSC President Dr. Barnes attended the traditional feast in Steunenberg Park after the march.

Governor Andrus, who has mentioned the lack of money

available to him for his own program, eagerly accepted an invitation to help count the proceeds from the scholarship drive.

ASBSC President Tom Drechsel and his newly appointed Administrative Assistant Doug Schanholtz partaking of the mulligan stew publicly thanked Mayor Amyx and the citizens of Boise for the cooperation extended to the BSC Hobos.

Williams calls America 'anxious land' in talk

Ed Williams, Democratic hopeful for the First District Congressional Seat in an address to Boise State College students and faculty said, "America is an anxious land, anxious because of a general feeling and sense of helplessness against the hazards of modern day life. Anxious because the American people feel that government has become unresponsive to their needs and desires."

"It's not hard to understand, we have been embroiled in a war in Southeast Asia on the far side of the world. Our government, preoccupied with the war, has simply not been able to respond to the massive social upheaval of this generation," Williams added.

Williams said, "The environmental urge sweeping the nation is not just a fad but it is

here to stay. Idaho is fairly well off but even here we see abuses. We need to learn and to profit from the mistakes others in the East have made."

"While we don't have a Hudson River or Lake Erie in Idaho as yet, we haven't totally escaped the abuse we see throughout the country. Communities and industries are still dumping raw sewage into our rivers and streams. Passage of bond issues and federal programs are helping and we need to continue to upgrade the programs," according to Williams.

The former House Minority Leader in commenting on amnesty said, "While we are still engaged in conflict in Vietnam and while Americans are being committed to combat, I do not support amnesty to those who have refused to serve."

The home stretch

The college journalist

by Bill Michels

What is a college newspaper?

Ideally, the college newspaper should be an instrument to convey credible news and opinion of interest to the college clientel it caters to.

The college newspaper is in some ways similar to its daily counterpart where the "pros" reside, but there are some marked differences also. Both have a responsibility to their readers to accurately report the facts and to strive for objectivity in their straight news endeavors. The readers of both papers have a right to expect the utmost in journalistic excellence that the papers are capable of giving.

The college publication obviously doesn't have the personnel at its disposal that the daily has, which means neither does it have the financial backing. In plain English this translates to the simple fact that the college newspaper must work with limited funds. This is why some areas of the news are not as well covered as students (and the staff as well) would like them to be.

There is little monetary reward for working on the college newspaper, with lots of good old fashioned sweat and unpaid time going into the finished product. Often times the only reward being the pride of contributing "a job well done."

It is not unusual to find the midnight oil burning at the newsroom during layout nights, for college journalists are a crazy lot often times think more of their work than their sleep.

Besides being continually sleepy, there are other pitfalls that the college newsmen contend with. Controversial stories often bring a flurry of "hell bent for leather" students descending on the office, demanding satisfaction. A back door in one's office is almost a must. Belonging to a college newspaper staff, in essence, means that one is fair game for all.

Women's Liberationists have been a particular threat recently. Last Friday this reporter was sitting peacefully (a little sleepily too) in the CUB snackbar discussing some business with a friend, when a girl sitting next to us inquired if I worked on the ARBITER. This journalist responded with an affirmative answer and all of a sudden realized that a confrontation was in the offing and evasive action was necessary. But, circumstances being as they were, no back door was at hand and the confrontation began.

A string of words (which I care not to repeat) was fired at me at close range, which left my eardrums ringing. It seemed that this petite and mannerly coed was a little bit upset about the new "Coed of the Week" feature which the ARBITER has been running the last two issues. She indicated that she thought it was taking advantage of women. Still trying to comprehend the entirety of the situation, I was immediately labeled a "male chauvinist pig."

To be frank, her attack caught me off guard and left me wondering if this was really the conservative little Boise, Idaho that I used to know. Still somewhat in a daze from all the flack, I told her that she was entitled to her own opinion—at the same time telling myself that this was just a bad dream.

Well, who knows, maybe we college journalists don't really have it so bad. After all, one never hears of the journalist being hit by a truck or mangled by a train—although it might be much less painful in the long run.

See you next year?!

Established May 1968, the ARBITER is a weekly student publication of Boise State College in cooperation with the BSC Printing Department and Graphic Arts, Inc.

Letters to the Editor must be submitted to the ARBITER office by Monday noon of the week in which the publication is desired. All letters submitted must be less than 350 words in length and must be signed. Names will be withheld from publication upon request.

The ARBITER reserves the right to edit for libel and taste or reject letters for publication.

Opinions expressed in the ARBITER are not necessarily those of the ARBITER staff, College Administration of BSC students, but those of the author unless otherwise stated.

BSC student supports Symms

To The Editor

The 1972 election campaign is now upon us. For us it is possibly the most important election of modern times because it is the first election in which we can cast our vote. Unfortunately, some of the choices open to us offer very little difference between the candidates. I do believe that the congressional campaign for Idaho's first district is an area where:

- 1) We, the BSC students can have a direct impact on the election outcome.
- 2) We, the BSC students do have a definite choice open among the candidates

League assists

To The Editor

The Idaho League, an affiliate of the National League of Families of Prisoners of War and missing in Southeast Asia is an organization of families of POW's and MIA's.

The purpose of the LEague is to assist all Americans captured or believed to be captured in Southeast Asia.

The organization through its many projects aims to make the people of the world aware and supportive of inhumane treatment of our prisoners.

One of the League's activities is the distribution of bumper stickers, lapel pins, literature.

One of the most popular items is a name bracelet which sells for \$2.50. The nickel bracelet bears the name of a POW or MIA, his rank and date he became a POW or MIA. People around the world are wearing the bracelets as a constant reminder of the plight of the man whose names appear on the various bracelets.

All items and bracelets may be obtained from:

Eleanor Bodahl, Coordinator,
 Idaho League of Families of Prisoners of War and Missing in Action in Southeast Asia,
 2414 Cherry Lane, Boise,
 Idaho 83705. Telephone:
 344-3252

or from

The Associated Student Affairs office—Henry Henscheid, Student Union Bldg.

Banquet to be held

To The Editor

All graduating seniors are invited to be the guests of the BSC Alumni Association at their second annual "Boody, Seniors — Hello, Alumni" Banquet to be held in the College Union Ballroom May 20, 1972, at 7:00 p.m. The banquet will be preceded by a Social Hour in the American Legion Hall across the street from the C.U.B. from 6:00 to 7:00 p.m. There is no charge to the graduates and they may bring as many guests as they wish at a cost of only \$2.50 per person. Tony Park will be Master of Ceremonies and election of officers for the 1972-73 term will take place. RESERVATIONS ARE REQUIRED. Call 395-1698 before May 15 or drop by the Alumni Office in the Union, second floor.

My vote stands solidly behind Steven D. Symms because of all humans, and says that the government should stop interfering in the private section of our lives. He believes the function of government to be the basic protection of life, liberty and property. As Americans, he feels we should be free to run our lives as we see fit, providing we do not infringe on our neighbors.

We are all future tax payers, and at the present rate of

growth, the general budget will be approximately six times the gross national product by the year 2000. Steven D. Symms is the only candidate whose platform will limit government spending and will protect us from having our lives totally controlled in the future by government agencies. The Boise State College Students need to rally to his cause because he is the candidate who really understands how to keep this country and its citizen free.

By Jerry Wilson

Student impressed with Wegner

To The Editor

The day I met Glen Wegner I figured he was just another politician loaded with a lot of political rhetoric. After talking with Glen I found that he gave straight answers and didn't beat around the bush, and that he too was tired of the same old political rhetoric. Further, Glen stated, "the old way of conducting people's business is just that—old, it just doesn't work any more."

I was impressed after checking Glen's list of qualifications. I found that Glen has had a heck of a lot of public service, and that he has worked hard all his life. Glen was literarily born on his parents farm in northern Idaho. Glen worked his way through college then medical school and then law school by going to night classes. Glen has shown drive and a lot of dammed hard work. This man worked his way from the bottom to the top the hard way—now he is ready to work and fight for Idaho and her ideas—in the U.S. Senate.

Glen has fresh ideas, from what I found out, and the uncanny ability to communicate with people from all walks of life—mainly because he worked his way from the bottom to the top the hard way. To many people Glen has said "if you're dissatisfied with what you're getting, but refuse to work for what you want, don't complain about the outcome".

—If you're tired of the same old B.S. you've been getting (like I am) then give a damn! Give Glen Wegner your support before August 8. It's about time the people's choice was elected and not someone who has made a lot of special deals with the fat cats.

By Owen Krahn

Coed of the Week

Khris Riordan

'NEPA who?' -to preserve and protect environment

If your first reaction is "NEPA who?" you're in the majority. And that's partly why NEPA is in bad trouble. This isn't some sister of Angela - it is the National Environmental Policy Act. And the big money, big power boys of the American Corporate State are out to get it. What follows here is essentially a reprint from the Environmental Action Bulletin, put out by a young, under-paid staff of Nader types who still think that "Power to the People" can be more than a slogan.

In its two-year, four-month existence, NEPA has done more to preserve and protect the environment than all the

previous environmental protection measures combined. It has been used extensively to delay destructive federal projects and to reevaluate federal policy decisions so as to assure that proper consideration is given to environmental considerations. Put bluntly, it has severely shaken all those to whom the status quo has meant profits, progress and pollution.

Now, the very agencies that have been hit the hardest with NEPA-based lawsuits - the Atomic Energy Commission, the Corps of Engineers, the Transportation Department - and, more important, their corporate backers - the utilities, the nuclear industry, the steel, paper and chemical companies and other major water polluters, and the highway lobby - are gearing up to gradually destroy the ACT.

At present the Administration has several bills in Congress which would emasculate NEPA to varying degrees.

NEPA has been instrumental in temporarily halting a wide variety of projects which environmental groups feel would result in a major degradation of the environment. Although few cases have been as spectacularly

won as the Cross-Florida Barge Canal, in which the President terminated the project, NEPA has usually brought about a more careful and rational study of the environmental effects of governmental programs.

NEPA's strength lies in the fact that it requires all government agencies to fully consider all the environmental and social costs of their major activities. It also requires the agencies to explore all feasible alternatives to guarantee that they will choose the best ways to accomplish their objectives. Most important, it assures citizens the opportunity to actively participate in the decision making processes which concern them and the environment.

The federal bureaucracy did not take well to the passage of NEPA. The Atomic Energy Commission decided to ignore the Act for over a year until it has hauled into court. The Department of Interior adopted a policy of secrecy-until-the-last-moment. The State Department claimed it was beyond the reach of the Act. The Soil Conservation Service sought to file occasional impact statements on a hap-hazard basis. The Corps of Engineers

resorted to the preparation of flimsy, superficial analyses.

Ultimately, most of Washington's bureaucrats found themselves in court - and most of them lost their cases.

In fact, one bill containing this clause has already gone through. Both the House and the Senate versions of the Clean Water legislation contain provisions which would modify and severely weaken NEPA as it relates to water polluters.

The major onslaught at present stems from the Atomic Energy Commission which is seeking new legislation making it easier for power plants to be constructed, especially at times and in places where a "crisis" is declared. In its power plant siting bill, the Administration is also including this provision. If passed, it would block virtually all environmental efforts to question the siting, need and desirability of a particular plant.

Despite the seriousness of this threat, it is merely a harbinger of what is to come. Should the AEC open the gates, other agencies are sure to follow suit in their attempts to rid themselves of what is widely regarded in Washington as the most annoying and troublesome

law to be passed in recent years - the National Environmental Policy Act.

Time is short. Some of the amendments which would gut NEPA have already been presented to the House. So act now. You could (1) Write to Idaho's legislators (addresses below) urging them to save NEPA (2) Send them at least a postcard, saying for instance "Don't amend NEPA" (3) Get signatures on a Save NEPA petition to send in (4) Write a letter to the editor of your hometown newspaper (5) Tell your friends (6) Think up something clever all by yourself that might make a difference.

NEPA, unamended, just might help us save the environment. And in the words of the immortal Fox "I don't know anywhere else to live." So save NEPA.

Eight faculty members awarded mini-grants

Eight faculty have been awarded mini-grants up to \$200 from Boise State and the Boise State Alumni Program for Faculty Research. \$1,500 has been committed to the mini-grant program for this year, according to Bob Willcuts, alumni director.

A \$175 grant has been awarded to Dr. Edward Gill and Stephen Hamilton for a project to evaluate and discuss the statistical record of bank profits; relate bank profits to those of other types of American businesses; and to consider the effect of profitability on the ability of the banking system to meet public needs.

Dr. Robert C. Cornwell was granted a \$175 mini-grant to identify the quality of communication at Boise State and well on the departmental level; and to provide a basis for feedback to instructional and administrative units at the college.

Boyd R. Wright received a \$200 grant to build up a working knowledge of polyurethane foam; to find through its use the limitations it has as an art medium; and to discover the practicality of incorporating it into the design; painting and sculpture classes at Boise State.

Dr. Gwynn Barrett received a \$175 mini-grant to research and

publish a paper concerning commercial coal production in Idaho. He will relate the history of Idaho's least known mining enterprise; examine and point up the reasons for the failure of this industry; and discuss the impact of coal operations upon people and towns.

John H. Killmaster has a \$175 mini-grant to explore the Snake River as an aesthetic motif. He will do this in new mediums and materials and present the ensuing art work in a public presentation.

Dr. Eugene G. Fuller has a \$200 grant to study the effects of mercury on protein patterns of chick embryos. Among his objectives is to find out when the concentration of mercury affects the embryo at various stages of development.

Dr. Mont M. Warner received a \$200 grant to conduct field research of geothermal tectonic controls. His project will be to check continental surface areas for evidence of subsurface geothermal trends related to major tectonic features such as oceanic ridges, transform faults and rifts.

Dr. Fenton C. Kelley has a \$200 grant to study the effects of a new fish poison in the bodies and tissues of the northern squawfish. He will also establish levels of mercury in fish in Lake Lowell and its tributaries.

Veterans attending college urged to mail certificate

"Mail in your certificate of attendance card for your final month of training, or you can't be paid."

That is the reminder the Veterans Administration is sending to 752,000 veterans attending colleges and universities under the GI Bill. It's a message VA mails to veterans each year with their next to final check for the enrollment period.

Here, specifically, is why reminders are being sent to veterans attending college:

*VA cannot prepare the final check for the spring 1971-72 school year until it receives the "cert" card.

The idea is to induce the veteran to fill out the "cert" card, sign it, and return it immediately to his VA regional office so he won't be wondering what happened to his education allowance for his final month of training. For most schools, this means the months of May or June.

*If the card is not returned at the end of the current semester, the veteran cannot automatically be enrolled under the GI Bill for the upcoming summer or fall semesters.

It was also pointed out that veteran-students have the responsibility of keeping VA informed on changes in the number of dependents, or education programs.

College registrars also have a responsibility in insuring that veterans receive their allowance checks on time. Registrars should promptly return students' re-enrollment certification so payments will start automatically when study is resumed.

Details are available at the nearest VA office or from local veterans service organizations.

The LOCKER

Tony Smith Arbiter Sports Editor

Sue Stoyer is a senior in Physical Education at Boise State, here she is practicing her tennis backhand. She is definitely an oogling prospect for the summer months.

All through the school year, which is predominately winter, a myriad of sports cover each weekly issue of the sports page in this Arbiter. They range from football in the fall through track and baseball in the spring. Of course, there are all of the other sports in between, such as basketball and wrestling on the varsity side and the intramurals and extramurals.

Throughout the year in the collums, "The Locker", the idea of the little man in sports, or the majority in sports has been the point stressed. So, in keeping with the tradition, this editorial is devoted to another little written about sport, girlwatching.

If a sport has to be talked about in terms of numbers involved, and the long hours of "agonizing" practices—it is girl watching. By far, the numbers involved in the sport out reach football, baseball and basketball combined. After all, at the age of twenty-five or thirty, the average male and female are not over-the-hill, as are athletes in other sports. A small developing "bay window" or a "pound here and there" are not disqualifying notes, just merely added incentives to keep the old shape up so the other side of the sex

does not notice. Now, as for the young who do not worry so much about those things, life in the wondrous summer months is an exciting game of high blood pressure.

For the masses, school is out and the teachers are gone, which leaves many tired and frustrated students with time to turn their minds to "life's simple pleasures," girls.

Therefore, the summer is spent in blissful oogling, which brings the only problem with girl watching, it is hard to keep score on. There are no touchdowns, fieldgoals, homeruns, two point baskets as such; for eventhough girl watching is the oldest sport in the world, there is not a written rulebook on how the game is to be played... or

scored. Consequently one must draw the conclusion that it is an individual or should I say duo sport, where everybody figures his or her own win loss record.

The United States is often thought of in terms of being the leader in many respects as far as world competition goes, be it gross national product or standard of living. Well, the "Red-Blooded American Boy" has to be rated high on the scale also. Out of the approximately 72 million people in the U.S. (the majority of which are in the under 75 years age bracket) there are undoubtedly over 30 million oogling males. Congratulations to all you athletic people who are upholding the continuation of such a fine sport.

FRANKLY SPEAKING by Phil Frank

©FRANKLY SPEAKING / BOX 1525 / E. LANSING, MICH.

BSC Holds 2nd Annual Award Fete

As the second annual Bronco Lettermans Banquet, held at the Rodeway, Inn, the winningest coach of all football, coach Bob Devaney of the University of Nebraska Cornhuskers, explained on the value of athletic competition and the need to win in athletics today. Also at the banquet was Jerry Kramer, of Green Bay Packer Fame.

After the speeches were made by Governor Andrus, the trophies were awarded to the Boise State College athletes, they are as follows: Eric Guthrie, outstanding senior athlete; Steve Wallace, the scholar athlete award.

- Baseball most valuable player — Tom Alpersbach, senior, Rupert.
- Baseball most inspirational player award — Randy Shroll, senior, Nampa.
- Cross country least points award — Jim Coker, freshman, College Grove, Oregon.
- Track man most points award — Mike Bennett, freshman, Baker, Oregon.
- Track most valuable award — Coker.
- Most valuable varsity basketball player — Becker Brown, junior, St. Leo.
- Most inspirational varsity basketball player — Brown.
- Most improved varsity basketball player — Don Newman, junior, Plover.
- Most valuable freshman basketball player — Steve Goodell, freshman, Peoria, New Jersey.
- Most valuable tennis player — Bill Lane, junior, Cypress, Calif.
- Most valuable soccer award — Craig Van Hook, freshman.
- Most inspirational wrestler award — Bruce Roberts, senior, Bona.
- The "Competition" wrestling award — Tom Harrington, sophomore, World.
- Wrestling — Dave Chandler, freshman, Boring, Iowa.
- Most valuable swimmer — Chris Moss, freshman, senior, Astoria player — Eric Guthrie, senior, Vancouver, B.C.
- Most improved football player — Ray Rodriguez, senior, Pittsburg, Calif.
- Most inspirational football award — Pat Ross, senior, Lewiston, Idaho.
- Most valuable football player — Paul Smith, senior, Clatsop, Oregon.
- Most inspirational football least points award — Mike Conroy, Albany, Calif.
- and Kelly, Plover, Calif.
- The "Competition" award — Tom McArthur, senior, Vancouver, Calif.

A student to be ogled this spring and summer is Junior, Kr Riordan, a coed who workes at the College swimming pool as a lifeguard.

Come meet all your friends before leaving for the summer

Track Squad Faces Weber In Dual Meet

Coach Ray Lewis will be taking a well rested track team to Odgen, Utah this weekend to do battle with Weber State in the final dual meet of the season. The Broncos took a week off after their second place finish in the Idaho All College Meet, and Lewis has high hopes that the extra time put some polish on the BSC harriers.

This weekend's meet with Weber will be the last one before the Big Sky Championship which will be held here May 19-20. For BSC, it will be the third time they have tangled with the Wildcats. In their last battle Weber edged BSC 92-84 in the Boise State Open.

The matchup this Saturday should be equally as close. Lewis can expect a strong showing from his distance men, as usual, and the addition of several good weightmen could tip the scoring in favor of the Broncos. Also, Brad Weidenback and triple jumper Gerald Bell are coming off subpar performances and both should be anxious to get back in the winning groove before the Big Sky meet.

Teamwise, Boise has been hurt by injuries. According to Lewis, "We have lost four or five key men, and with our depth problem, that really hurts." BSC has lost consecutive meets to the University of Idaho, and in both

cases the Broncos were overwhelmed by the Vandals' depth. This shouldn't be a problem Saturday since both Weber and Boise State field similar teams.

The physical Education department may drop all P.E. requirements for students outside of PE majors, in an attempt to improve the program. All student should be sure to check the requirement listings for P.E. before registering for fall classes.

Bronco netters to head for Washington

The Bronco tennis team will pack its gear this weekend and head north to Pullman, Wash. for the annual Washington State Invitational Tournament. Featured along with BSC are host WSU, Montana, Southern Oregon and Whitman.

The event could be very interesting for the Broncos because it will include a rematch with WSU, as team Boise beat in April. Also, the tourney will give Coach Ben Conner a look at Big Sky for Montana.

The Boise State netters bring a sparkling 15-3 record into the

tournament. Only Utah State, Idaho, and Oregon have beaten BSC this season. But the Broncos have had some measure of revenge by beating Utah State and Idaho in return matches, leaving Oregon as the only school to be undefeated by BSC.

Last week Boise returned from a road junket with a 1-1 split. Idaho, the perennial Big Sky champ took the Broncos 6-3 but Conner's crew came back to tie Whitman by an identical 6-3.

Individually, Dave Graham and Ray Balbacia went unbeaten and Bill Long, Jim Smyth, and Greg Strawn split 1-1. Terry Benjamin had his troubles and was 0-2. According to Coach Conner, the two losses were Benjamin's second and third of the season while Ray Balbacia has had only two setbacks this year.

Conner said he will stick with his regular lineup for the rest of the season, and the BSC could have three of the top seeds in the Big Sky Tournaments which will be held here May 19-20.

Baseballers End Long Season, Wind Up with 10-30 Record

The Boise State Broncos put the wraps on another baseball season last weekend in an all too familiar fashion—by losing both ends of a doubleheader. The losses, which came against Weber, ran the Broncos' season record to 10-30 and 2-10 in the Big Sky. The final series at Weber wasn't a total loss, however, as the BSC baggers copped a single victory Friday.

The 10-30 record put Boise in the cellar in the final standings of the Big Sky, southern

division. Weber took first and Idaho State was runnerup. Each of the three schools played six games with each other.

In the northern division Gonzaga took first with Idaho second and Montana third. For the Bulldogs it was one of their finest seasons ever, the highlight coming with a defeat over previously 15th ranked Washington State.

These two teams, Weber and Gonzaga, will meet Northern Arizona and the second place

team with the best record (Idaho or ISU) for the Big Sky Championships in Odgen, Utah.

The season for Coach Lyle Smith and his crew was one of ups and downs. In the beginning the BSC hitters had trouble producing runs, but for a brief stretch it seemed as though the team had finally blossomed. During this time the bats boomed and Boise ran up a four game win streak. But then came ISU and Weber, and BSC took only one win out of the final six games.

Boise Fencers Garner Firsts

Boise State Fencers recently returned from competition in Twin Falls with Idaho State University and the College of Southern Idaho.

Jim Christopher took first the mens competition and Charlie Fannon garnered second in mens. Steve Acree placed first in the mens consolation.

Next year the team will feature intermediate and advanced fencing sections and also more competition.

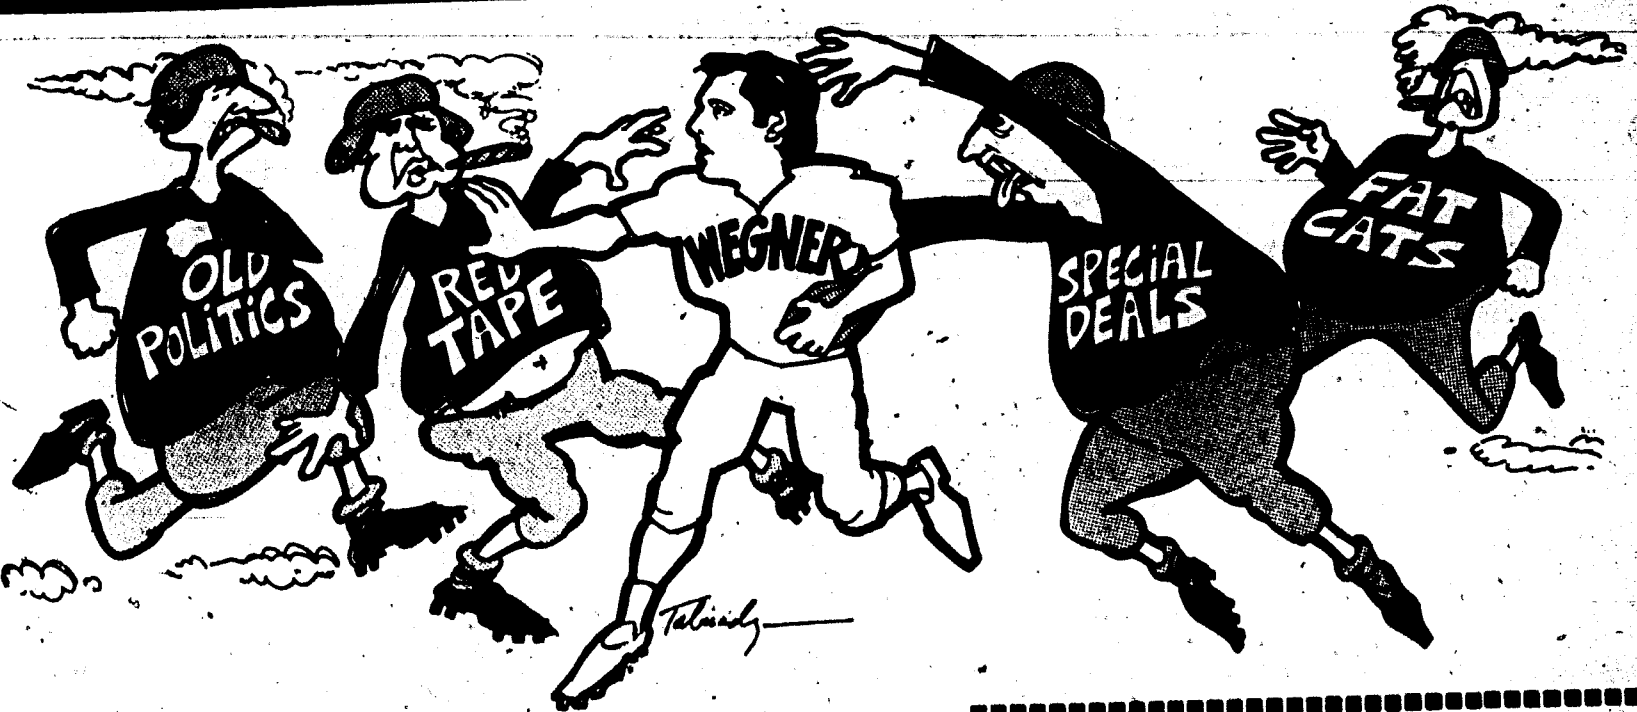

The men members to the team are Gordon Fradenburgh, Fannon, Acree, Dean Black, Christopher, Terry Shannon, Ralph Rhodes, Wayne Courtney, and Marshall Pinkston. The only two women on the team are Carol Arrizabalaga and Rita Gillispie.

Towers to open doors to summer school students

"Due to an increase in summer school applicants, the new Towers residence hall will be open this summer to accommodate students. This hall is air-conditioned, completely carpeted, and has a central lounge on each floor, complete with its own study, typing room and small kitchenette.

The Towers will stay open after May 21 for any students who prefer to remain on campus until the summer sessions begin. Those students who are planning on attending summer school and would like to stay in the Towers at a cost of \$2.00 per day (from May 21 to June 5; \$70.00 per session when summer school begins; this does not include board), should make arrangements with the Housing Office as soon as possible.

In addition, students who wish to stay in the Towers during the summer without attending summer school, may do so if they plan to attend Boise State next fall. Cost for this type of residency is also \$2.00 per day. This does not include board. These students should also come into the Housing Office to make arrangements. No students will be admitted to the Towers unless satisfactory arrangements have been made.

Lead shot ban requested by NWF

Washington, D.C.—The National Wildlife Federation has requested that the Secretary of the Interior ban the use of lead shot in hunting waterfowl and its use on some federal lands by 1973-74 hunting season. An estimated two to three million waterfowl die of lead shot poisoning each year in the U.S.

In an April 17 petition to Secretary Rogers C. B. Morton, Federation Executive Vice President Thomas Kimball asked that a ban on the use of the controversial lead shot be issued immediately, to become fully effective by the 1973-74 waterfowl hunting season. Morton was urged to issue regulations prohibiting "the use of lead shot in hunting waterfowl and its use on federal lands under Interior Department jurisdiction where waterfowl are likely to ingest it." "Unless you act promptly," Kimball said, "lead shot poisoning will continue to take a needless toll of millions of waterfowl each year."

The Federation is urging that the use of lead shot be replaced by non-toxic iron shot. According to the petition, "Soft iron shot is non-toxic. It can be mass-produced reliably and economically and could be substituted for lead shot in waterfowl hunting without any adverse environmental effect."

For more than a century, lead shot poisoning of waterfowl (ducks, geese, and swans) has been documented. It is estimated that 6,000 tons of lead shot are discharged each year over waterfowl habitat, over 30 billion pellets. Lead shot pellets do not deteriorate after they are discharged and are oftentimes picked up and ingested by feeding birds. As the lead erodes from the pellets, malfunction of the birds' gizzards may lead to starvation or highly acute lead poisoning may occur.

Although losses due to lead shot are likely to be apparent only when a massive kill results, it has been estimated that nearly 25 percent of the Mallard ducks in the Mississippi Flyway ingest lead shot and that nearly 5 percent is afflicted with lead poisoning. Lead shot poisoning has also been found by the Mississippi Flyway Council to be reported a significant problem in the Pacific and Central Flyways.

Simulated journalistic community to be offered in curriculum

A simulated journalistic community will be offered as part of two journalism courses next year. Patterned after a University of Iowa simulation, it will possibly involve as many as 200 students competing for points in various journalistic enterprises, with a portion of each student's grade determined by his participation and success in the simulation.

The two classes to be involved are Journalistic Communication; Theory and Practice, and Mass Communication; Concepts and Perspectives. Members of the Journalistic Communication class will serve as producers of

journalistic enterprises, in the role of newspaper editors and radio and tv producers. Students from the Mass Communication class will act as free lance reporters and technical crews. Each week, members of the community will award points to the various enterprises based on the quality of the productions, with approximately 1/3 of the student's grade determined by the number of points he receives in the simulation.

While a number of rules governing the community's operation will be established at the beginning of the simulation, the more complex political and economic structures will

naturally evolve as the community develops.

In addition to participation in the simulation, the Journalistic Communication class will offer a series of short courses taught by members of the professional community dealing with new writing, magazine writing, tv production, and other subjects. The Mass Communication class will emphasize consumer attitudes towards communications and communications theories.

Students may enroll in only one of the classes at a time. And while both are lower-division courses, they will be offered for upper-division credit under Independent Study.
