Arbiter, September 11

Students of Boise State College
Administrative Assistant welcomes new faculty

On behalf of the student body at BSC I would like to welcome us to the new faculty and administration and we are looking forward to another productive year at BSC. I’m sure all of the new faculty will occasionally be visiting the College Union and we enjoys.”

something that sets BSC apart from other colleges and universities and that is having a cup of coffee or just talking will be students, faculty, and administrators having talks at the college, state or national level. Communication between all levels of college personnel and students have attributed to making BSC the fastest growing in enrollment and quality in Idaho.

At BSC it is recognized by all that a quality education involves educational experiences in and out of the classroom.

Douglas Shanholm, ASBSC Administrative Assistant welcomes the new faculty at BSC.

Nurses receive a welcome

In order for BSC to be able to bring new and qualified nurses administrators need to be able to keep our nurses highly motivated. This year the student body received a warm welcome from its new faculty.

A warm welcome to all students and faculty. We are looking forward to another productive year at BSC.

The student body has two quality publications provided for everyone at Boise State College that offers the awareness of what’s happening at all levels of life at BSC. The Lin Bree for the year 72-73 will provide a quality yearbook for everyone this year. The Arbiter, a weekly student newspaper serves the needs on campus for every student.

In order for BSC to begin on hiring new and qualified nurses administrators need to be able to keep our nurses highly motivated.

BSC will be able to maintain and support BSC’s nursing program.

And for anybody who’s concerned about nursing, BSC has had an excellent year. She went to the women’s conference and she came back with a positive report of the school’s progress.

Information is strong says much. Mrs. Mullen is no exception.

The administration is working on the women’s conference as well as the students conference.

It’s been a good year and the school is looking forward to next year.

The student body received a warm welcome from its new faculty.

Douglas Shanholm, ASBSC Administrative Assistant welcomes the new faculty at BSC.

Students profit in sale of used books

The used book sale will be held through the month of October. The profit from this sale will be divided among the two and will be used to produce services to the community and student as well as paying the annual tuition for students around the college.

Students can pick up their money on Sept. 11 and 12. It is important to do this as this year’s check will not be written to those who do not pick up their money. The used book sale runs from 9:00 a.m. to 4:00 p.m.

Director plans for concerned Interest

Fred Norman, Boise State Professor for three years, has been appointed new director of Student Activities at Boise State College.

As director of Student Activities, Mr. Norman acts in an advisory or oversee to the College Programming Board. This board performs the duty of scheduling any activities through the Union, Thursday students from the 13 main clubs on campus make up the board.

The purpose of having such a board is to stimulate and arouse interest in the student body. They are also needed to get them to get involved and have some student participation in college life through the various activities planned and approved by the board. Since Norman was appointed to the position, he has been meeting with groups to plan events.

The board is going to be meeting about once a month, if any group on campus wants to plan events, they are urged to organize themselves and talk to the board.

The board is to further student involvement and encourage the top of the Union to each individual student on campus,” said Norman.
Editorials

Terrorism

Words cannot express the feeling that comes when one contemplates the Olympic hopefuls. Regardless of the Palestines' quarter final upset, to shoot down unarmed athletes is a crime second to none. These people did the Nazi's one better. Hitler would not decorate Owens in cold blood.

Hypocrisy

Many in Idaho relieved that the Congress finally enacted legislation curtailing the South Dakota Recreation Area. As Congressman Jim McClure was the main stumbling block to this legislation for a long time.

We think McClure is falling under false cosmic attempts to take credit for it.

Letters

Readers letter to Symms' editorial

To the Editor,

We read the editorial as a part of your article about Sense, Symphony and the more I think about it the more madder I get. The editor has gone on an acid trip on the one hand.

The editor says, 'advantages. Yet he takes advantage of his freedom of the press. There is no truth to either.' Whatever is the last three paragraphs of Mr. Yerby's article. If anything, taking a bit out of the other for a very well informed reader is a bad idea.

Of course, the editor knows nothing about the circumstances of Mr. Symms working in the mine. While he was working in the mine he lived in a model keeping out of the public eye. Until the next to the last week of his life only the owners of the mine and his staff knew who he was and why he was working in the mine. Even the man he was working for didn't know who he was.

A political genius? Don't look it. It makes me like Steve Symms want to work in the mine and only to find out about it. Why would a political genius try to get it right.

The editor makes the same empty statement about Steve Symms wanting to work in the mine for the same reason of the three paragraphs of Mr. Yerby's article.

The people have the right to know the truth in this case. That's one of the reasons we have a free press.

Steve Symms

Editor over his head

To the Editor,

I read the editorial at your paper about congressmen candidate Steve Symms and the more I think about it the madder I get. The editor has gone on an acid trip on the one hand.

The editor says, 'advantages. Yet he takes advantage of his freedom of the press. There is no truth to either.' Whatever is the last three paragraphs of Mr. Yerby's article. If anything, taking a bit out of the other for a very well informed reader is a bad idea.

Of course, the editor knows nothing about the circumstances of Mr. Symms working in the mine. While he was working in the mine he lived in a model keeping out of the public eye. Until the next to the last week of his life only the owners of the mine and his staff knew who he was and why he was working in the mine. Even the man he was working for didn't know who he was. A political genius? Don't look it. It makes me like Steve Symms want to work in the mine for the same reason of the three paragraphs of Mr. Yerby's article.

The people have the right to know the truth in this case. That's one of the reasons we have a free press.

Steve Symms

Arbitrator staff commended for paper

SEPT. 19, 1972. 1 would like to make a note regarding the recent paper that was made available to us. The paper is well written and thought provoking. I believe it will be of great benefit to all those who read it. I appreciate the efforts of the staff who made this possible.

Don Maclean

'There is no Vietnam'

To the Editor,

The recent paper on the Vietnam War that was presented in its entirety at the symposium held here at the university has been received with much interest and appreciation.

I believe that the paper should be made available to all those who are interested in the topic. It is a comprehensive and well-researched piece of work that provides valuable insights into the complex events that have unfolded in Vietnam.

We should be grateful to the staff who have made this paper possible. It is a testament to the dedication and hard work that goes into creating such valuable resources for our community.

Richard Williams

Performance offered to audience

"Bedtime for Democracy" is a new musical that offers a powerful commentary on the state of contemporary politics. The show features original music and lyrics that explore themes of corruption, inequality, and the, role of money in politics.

The performance is scheduled for Saturday, September 24th at 7:30 PM at the University Theater. Tickets are $25 per person and can be purchased at the box office. Don't miss your chance to see this thought-provoking production.
"The Western Idaho Fair Affair"

By Ron Wilper

When I heard that the 1972 Western Idaho Fair was about to get underway this past weekend, I was touched by a deep sense of nostalgia. I remembered the fun I had in bygone years and grew tense with anticipation at the thought of more. I also remembered, with somewhat less glee, all the times I'd been ripped off of my last dime. This year, however, I made myself a solemn vow to spend no more than was absolutely necessary to have a good time.

With hammer in hand, dashed to my bedroom and rendered my unsuspecting piggy bank unconscious with a savage blow to the side of the half. As I rifled my pockets full of pennies, I remembered my vow and reassured piggy with a confident smile. I then went to bed with my hammer in hand, certain that I would make a mint.

As the fairgrounds came into view, I was taken aback by the splendor of it all. The lights, the colors from far away, it looked like a wonderful fantasy land. I arrived at the gates and fell into a long line, and dug into my pocket and came out with $1.00, a little more than I had planned. I passed the lady and moved along, certain that my time had come.

Once inside the gates, I headed straight for the midway in hopes of winning a teddy bear. I had been so close last year that I was sure my time had come. I shouted around, trying to be cool so that one of the carnies wouldn't sucker me as so many had done in the past.

As luck would have it, I came upon an area that was the most suitable of places to win a teddy bear. I stood around a small block of wood, and one by one, I shouted my name, "Teddy bear." Even before the

Dinosaurs were only a slight bit bigger...

Doctor Dude and his men, James
Les Bois to feature BSC campus, natural environment

Our natural environment will be the highlighting theme of the 1973-74 Les Bois, according to Lee Dowdle, yearbook editor. The actual theme of the yearbook will tentatively be a natural environment—something to hold onto in the midst of the confusing world.

"The 1973 yearbook will be considerably different than it has been in the past," commented Dowdle. "We will be returning to a hard-bound edition with sections on all parts of the campus, which we believe is a step in the right direction for the future.

To accomplish the task of representing all sections of the BSC, the one-volume yearbook will include the major divisions. A section will be devoted to BSC students, especially two-year and special graduates so that they will be recognized for their achievements. Graduating seniors will also be included as well as those BSC students who wish to have their pictures published in the Les Bois. Organizations will also be featured in the 1973-74 edition. We would like to be invited to cover organizations and events in order to give the highest quality of what they do," observed Dowdle.

Mera, business, and engineering sports will find their place growing in the yearbook with activities and events. Entries in the activities and events section will be those of homecoming. The engineering work will also include the administration and faculty and campus life.

Dowdle remarked that President Leo Bois is a people-oriented book emphasizing names and faces. "It will be artistic, creative, colorful, and will stress that BSC is a great college," stated Dowdle. "We are tired of people running the majority into the ground. We will emphasize the great qualities of BSC and what it has to offer the person who attends," he added. Dowdle claimed that BSC is a college to be proud of and that he wants to work with all people to emphasize the entire BSC picture.

"Education will be emphasized as a concern of the college. We get education not only from the books but from activities, our involvement with people, knowing our instructors, our peers, and our students. We should make our future a reality."

Dr. Taylor, Vice-President for Student Affairs, made a request for students to fill pages on two newly formed student-faculty committees. The Department of Student Affairs has proposed a Student Health Services Advisory Committee and an Orientation Committee.

The purpose of the Student Health Services Advisory Committee is to investigate and formulate policy concerning problems and improvements dealt with at the Student Health Center.

The Orientation Committee is being formulated to take care of the various programs that are used to acquaint the freshmen to college life and to the Boise State particularly. One program which would fall under the auspices of this committee would be the Freshman Camp, which was established through Senate Act 26.

Roy James, Senator from the School of Arts and Sciences, submitted the resignation to the Senate. That same seat will be filled soon by President Tom O'Meara.

New students were introduced to several facets of the A.S.B.S.C. during registration Thursday and Friday.

Lee Dowdle, editor of the Les Bois, Doug Sheehan, Administrative Assistant to the President, Rita Miller, Director of Student Services, and myself and several other people put in two full days distributing that vital information to the students. Most students received at least four things, an Idaho Student Lobby poll, a letter from the Department of Student Services, information on obtaining one's blue ID card, and a flyer on upcoming events.

The A.S.B.S.C. last year purchased a machine to make plastic ID cards. This simplifies the problems encountered last year with the computer cards. One of the sheets handed to the students contained information concerning the method of obtaining the card. It should be noted that the three-card system was introduced to prevent any students from obtaining the ID card for others.

Student Senate meetings are held each Tuesday afternoon of the school year at 3:00 p.m. Everyone is invited to attend.

A special 2-day course in grant writing is to be held in the Boise State College Student Union Building on October 11-12, 1972. Each day's program will begin approximately 9 A.M., with registration preceding.

There is no registration fee and no college credits will be awarded. The course is open to any interested person.

Renewal identification—federal and private foundation

A panel of instructors will answer questions at the conclusion of the course and agency personnel will be available as consultants throughout the program.

For further information call the Boise State College Office of Special Projects—396-1585 or 1586.

Housing director sees improvements

Jon Vestal, the Director of Student Housing for the past three years, has brought about many changes and improvements, designed "to offer the student the best quality at the least cost with a smiling lock." Three years ago, there was no Housing Department, but 2 or 3 different offices each handling a part of the work. Jon Vestal consolidated all of the sections into one office. Since coming to BSC, he has been working towards the completion of the College Courts, apartments for married students, in which $17,000 had been invested into remodeling, carpeting, and building playgrounds and "kiddie" areas. College Courts has a waiting list of 300. The apartments rent for $60 less than present price for the same apartment. Because there is such great demand, 90 new units are under construction. Vestal feels next year if the completion of College Courts is to encompass a single student housing department. He refers to the College Hall setup as the "it's resemblance to dorm life. He would like no single-occupancy dormitories.

Vestal is interested in forming a Student Committee for an Off-Campus Housing Council. He is a member of the Governor's Committee on Housing. Working with members and student residents, he believes in forming a small group to handle the problems. His main goal would be an agreement to speak to Vestal in the Housing Department.

Vestal was trying to persuade a new committee of student representatives at Marston Hall. He has also contacted Marston and Wescott Halls. Along with the Dean of Men and the Dean of Women, Vestal is developing a more effective program for resident advisors. They are trying to meet with the residence halls acting as the committees.

He was also responsible for the closing of the new food service, making possible more favorable service at $1.25 a day per person. Instead of resident hall living becoming unpopular, BSC's halls have been kept to the limit of 250 per hall. This has been due to the low cost of living (SSI) a month for food, room and board and to the amount of varied activities available to students.

When the former boy explained another story about the special speaker at his church who published the last "Ph.D." after the speaker's "Ph.D." the meeting was a "Post-hold day." -Eleanor L. Dean

JON VESTAL, Director of Student Housing, explains his philosophy of change.

"The College Union is a vital part of college life for students, faculty, alumni, and friends beyond campus. As the name college Union indicates, the building is for the use of every segment of the institution as well as certain specialized community organizations with which the college community interacts." -Dyke Nally, Director of the College Union.

College Union's changes offer variety

The College University Building is sometimes referred to as "the living room of the college," according to Dyke Nally, Director of the College Union. The Union was primarily designed to provide social, cultural, and recreational facilities for the students of Boise State College and the area.

The original building was built in 1957 and an addition was added in 1969 giving the Union a building approximately 33,000 square feet.

The building was completed in 1957 and is one of the best facilities of its kind in the entire north west, commented Nally.

There are a number of facilities available for students, located in the College University Building. The information Center on the first floor provides such services as lost and found, ticket sales to Boise State plays, scheduling of concerts in the building, room information of information about the campus in general, and maintenance of the Master Calendar for Activities, The Bookstore, Games Area, The Center where the Smokery and Office, Operations Office and the Snack Bar are all located on the floor.

Six modern bowling lanes are available in the Games Area for open bowling or league play. Ten billiards tables, two Foosball tables, and two tennis tables are also available. Games can be checked out in the area, including checker, chess, and card games. An accurate record is kept for students borrowing equipment for study or recreation.

The Union lounge, "The Lookout," with a view of the city of Boise, the campus, the Boise River, and the Boise mountains, is one of the favorite spots in the Union for students to sit and enjoy a cup of coffee. The Union is a vital part of college life for students, faculty, alumni, and friends beyond campus. As the name College Union indicates, the building is for the use of every segment of the institution as well as certain specialized community organizations with which the college community interacts.

Otters shocked to death

A month-long survey on the barren Alaskan island of Amchitska has shown that as many as 150 otters were killed from the shock waves last November's underground blast at a nuclear test site. Comparison population surveys conducted by a team of biologists and other scientists confirmed that the environmental fallout from November's megaton hydrogen bomb killed far more otters than the AEC estimated had perished before the November 6 test. A week after the detonation of Project Chariot, the G-Report's first megaton nuclear explosion, only 15 otters died from the shock wave, below the government's predicted population of 240 deaths. Alaskan game biologist Karl Schmidt fears that despite the clear evidence of a massive kill, due to the blast, "no significant long-term damage..." occurred to the island's population.

Burial of 7 million cars

West Germany may have an idea for disposing of over seven million cars which head for the junk yard in the U.S. The Bonn Parliament is considering legislation which would include the cost of disposing of a car in a nuclear burial which has been submitted to the abandonment of refuse burial. The Bonn must provide for a suitable reflecting burial when he pulls up his new car.

The first Health Spa opened to the public was decided on by Virginia in 1756 by Thomas Newton, the Governor. His law is never been abolished to this day.

"Some men go to college to learn to read and write, but in scientific terms..."—El lerston L. Dene

Prostitution and Noise Pollution

Although unnecessary from a health standpoint the law is now in effect and is practical enforcement. Citizens for a Better Environment have applied for a noise ordinance that there is one unique proprietress who does enforce the law, and strongly supports it not for reasons of noise pollution. It seems that the proprietress is in such a state of mind that the noise of cars and bars is not a signal of interest.

This is the second in a series of Ch articles attempting to give a broad look at the environmental situation and pollution problems of other highly-urbanized countries. The WASHING POST recently reported "Japan is said to be the world's largest producer of noise." How did Japan acquire this dubious distinction? Try to imagine this country where the public police are replaced every 20 minutes to recuperate. On a city, in which the drug stores always have one another offering "cost of long term unemployment" occurred to the population.

McClure--dedication of Sawtooth Recreation Area

FROM MC CLURE
Campaign Headquarters

STANLEY--The 75,000-acre Sawtooth National Recreation Area was dedicated today in the presence of 3,000 guests who came to this mountain area during a three-day visit to the Sawtooths. The dedication of the area was scheduled as part of the national celebration of the 50th anniversary of the National Park Service.

The celebration included two days of events at the area, followed by a dedication ceremony at the National Park Service headquarters in Washington, D.C.

The dedication of the area was attended by Secretary of the Interior, James C. Butz, who spoke about the importance of preserving and protecting natural resources for future generations. He also discussed the role of the National Park Service in preserving such areas.

The dedication was followed by a reception at the National Park Service headquarters, where guests were able to meet with government officials and learn more about the dedication and its implications for the preservation of natural resources.

In his speech, Butz emphasized the importance of protecting and preserving natural resources for future generations. He noted that the area is a symbol of the beauty and diversity of the United States and that it is essential to preserve such areas for the enjoyment and understanding of future generations.

The dedication of the area was a significant event in the history of the National Park Service and a testament to the importance of protecting natural resources. It serves as a reminder of the need for continued efforts to preserve and protect such areas for future generations.
Otters shocked to death

A month-long survey on the harbor at Anacapa Island in California has shown that as many as 1,000 sea otters were killed from the shock waves from last November's underground test of a nuclear bomb. Comparison population surveys conducted by a team of biologists and other scientists confirmed that the controversial free-negation hydrogen bomb killed far more otters than the AEC estimated.

Burial for 7 million cars

West Germany may have an idea for disposing of the seven million cars which stayed in one place after the detonation of Project Amber. Under the plan, the used cars will be buried on the outskirts of the city of 180,000 located at the south of the country. The city itself is doing almost all the work. With the total last year, the worst effects of the contamination are set to be curtailed.

Prostitution causes pollution

Annoyance from the smell of the sewage plant and the noise of the motor homes is said to be disturbing to the city of 130,000 located a the north of the country. The city's chief of Suruga Bay is concerned that the area is polluting the world from an interference with industrial and environmental development. Given its large population and industrial base, the city is making the pollution a serious concern. The government's response to the issue has been to establish an Environment Agency, which has been working on the pollution and related issues. The agency's work has been praised, and it is being used as a model for other cities.

Artificial insemination success

The first successful artificial insemination of a dam has been reported by Dr. John van der Burg, Director General of the Environment Agency. Dr. van der Burg, a Wisconsin tourist, is being praised for his work in this area. The artificial insemination was performed on a dam, and the results were encouraging. This is the first time that such a procedure has been tried in the United States.

Mice bugged by Forest Service

A new technique for monitoring mice has been developed by the Forest Service. The technique uses radioactive gold to track the movement of mice. The mice are injected with a small amount of gold, and their movement can be tracked using special equipment. The technique has been hailed as a breakthrough for the monitoring of animal populations.

Love story featured in Diamond magazine

"Love Story" is a diamond magazine that features love stories from around the world. The magazine has been praised for its focus on love stories, and it has become a popular read among readers of all ages.

International Trade and Development

Kakako Takeda, Japan's Prime Minister, will be meeting with developed nation representatives to discuss the future of the LDCs. Takeda is expected to emphasize the importance of development aid and technical assistance to the LDCs. The meeting is expected to be productive, and Takeda is expected to return to Japan with a clear plan for future cooperation.

Charles Potter

"I shall illustrate what I have in mind," said the Professor as he stepped forward.

Father: "What was the hardest thing you learned at college?"

Son: "How to open beer bottles with a half dollar."
50,000 to be induced in 72

The Selective Service System recently announced that the draft lottery number calling the last three months of the year will be RSN 96. Men with lottery numbers through RSN 75 are being induced in August and September. The random selection of RSN 95 reservists is scheduled for August and September.

Approximately 15,000 men will be induced during the October-November period, with the majority of the men being called on the 15th of the month. The Selective Service System has set a deadline of December 31 for all applications to be completed.

Plans to replace draft with volunteer army

Washington, D.C. - Defense Secretary Laird announced in his August 28 press conference the end of the Selective Service System and the beginning of a four-year period of transition to a volunteer army. The end of the draft system will mark the beginning of a new era in military conscription, where volunteers and professional soldiers will be the primary sources of military manpower.

The Selective Service System, established in 1940 to ensure a reliable and adequate source of manpower for the armed forces during times of war and national emergency, will be replaced by a volunteer army. The transition to a volunteer army is expected to take approximately four years.

The revised Selective Service System will be replaced by a new system that will rely on volunteers and professional soldiers. The new system will be designed to ensure a more efficient and effective distribution of military manpower.

The new system will be based on a lottery system, where men will be called to serve based on their birth dates. The lottery system will ensure a more fair and random selection process.

The new system will also incorporate a number of measures to ensure that only the most qualified and dedicated volunteers are selected for military service. These measures will include rigorous physical and mental examinations, as well as background checks.

The government is committed to ensuring that the new system is fair and just, and that all qualified volunteers are given equal opportunities to serve their country.

The new system will be implemented in phases, with the first phase taking place in 1973. The Selective Service System will continue to operate in parallel with the new system, ensuring a smooth transition.

KAID something different

"It's a totally different bag" is the way Bob Pyle describes his television station. Pyle is the Production Manager of KAID (Channel 4), Boise State's all-color Public Broadcast Station.

Located in the west end of the BSU Library, the station is officially new—it began broadcasting last New Year's Eve—and Pyle terms it an "educated" and "just in the stages of rawning," as a matter of fact, added Pyle, "not very many students have stopped in to visit. I think few know we're here."

A couple years ago KAID would have been termed an "Educational Station," but today it is referred to as a Public Broadcast Station, Pyle explained that "People were turned off by Educational TV and thought it was being crammed down their throats."

The station is now broadcasting all available hours, and added Pyle, "We would like to broadcast 24 hours a day if we had the money, our biggest problem."

Fundraising comes from the State of Idaho, Boise State College and from public donations. "We are a nonprofit organization which relies on the help of many people," explained Pyle.

KAID has been experimenting with ITV Instructional TV Programming and Pyle sees it as a very real and upcoming prospect in the future. Such ITV programming could be used to broadcast special "hard-to-get" classes around the campus and community, enabling greater participation. Also, ITV could be used to alleviate overcrowding in classrooms. For example, instead of 100 students growing up to be packed into one class, the professor would tape his lecture at the television studio and it would then be put on the air at a prescribed time. The students taking his course would tune in at the appropriate time and take in the lecture. Students would only have to come to class to take their tests or to see the professor concerning questions. Not only could this be worked out for the students, but it could also be of benefit to the elderly and disabled who are unable to leave their homes. Said Pyle, "It's important that Public Broadcast TV be provided in the community."

Pyle said he would like to see more coverage of college affairs in the future. College sports events is one of the areas he would like to see covered, and "things people don't ordinarily get to see." But without mobile units the station is somewhat limited in this area.

What's the outlook for KAID in the future? Pyle says, "We have a very nice little thing here with a lot of potential. It can only grow."
Watching Senator Proxmire’s hand fly over the pages (his hand acted as a pacer), you can’t believe that he’s actually reading. He must be skimming.

But he’s not.

Bill Proxmire can read the average novel in a little under 40 minutes. Even on the toughest material he rarely dips below 1,000 words per minute.

Moreover, he can comprehend and recall what he’s read — right down to the smallest detail.

Bill Proxmire is not a naturally fast reader. He learned this revolutionary technique of rapid reading in the Evelyn Wood course.

The Senator was one of our better students. He started the course at about 600 words a minute and increased his rate four times. Our average student begins at 500 words a minute and graduates at speeds over 1,500 words a minute. Senator Proxmire expresses the amazement of over 300,000 Evelyn Wood Reading Dynamics graduates, including the late President Kennedy’s White House staff, many members of Congress, business executives, educators, students and businessmen.

Most of these people initially read at 250 to 350 words per minute. Reading Dynamics increased their reading efficiency an average of 150 percent. Now they read at 1,500 to 2,500 words per minute — many even higher — and enjoy a big increase in comprehension and recall.

To find out how Reading Dynamics can increase your reading speed — and guarantee it — attend a free one-hour lesson.

**IMPROVE YOUR READING SPEED 50 - 100% ABSOLUTELY FREE.**

All you have to do is attend a free Evelyn Wood Speed Reading Lesson at the times listed below:

**FREE SPEED READING LESSONS**

CUB Game Room good place to spend time

By TONY McLEAN

The Games Area, located on the first floor of the CUB, has been a popular spot for students looking for a place to relax and enjoy some recreation. The Games Area is equipped with a variety of games and facilities, including bowling lanes, pool tables, and video game machines.

The Games Area is open from 9 a.m. to 9 p.m. Monday through Thursday, and 9 a.m. to 8 p.m. on Fridays. It is closed on Saturdays and Sundays.

Bicycles are available for rent at the Games Area for $5.00 per day.

Football is one of the many games offered at the Game Room.

Bicycle rentals are available for $5.00 per day.

Tony McAnally switches numbers

By JIM FAUCHER

Tony McAnally, Boise State's second baseman, has switched numbers to 26 from 25.

McAnally, a junior, made the switch after being called up to the Boise State baseball team last season. He had been wearing number 25 during his freshman and sophomore years.

McAnally said that he made the switch to better identify himself with the team.

Tickets

Boise State's baseball team has announced that all students will receive free tickets to the game against New Mexico on March 20.

The Boise State Cardinal Club will also be offering free tickets to all Idaho residents who purchase a season pass.

These people will be leading the Boise State Bronco section this year. They recently returned from a cheerleading clinic in California and brought back several trophies. Shown here in one of their formations: bottom row, from left to right: Pat Bonadiman, Alan Fitzgerald, Walter Lange, Jerry Felger, and Pat Waddell.

Football is one of the many games offered at the Game Room.

Coaches Wagstaff and Hohnhorst at the Varsity Cenre have introduced the new league which seems almost identical to the old one. Last year Joe Larkin, Bobo Stayer's excellent safety, led the league with seven interceptions and 332 yards returned. The closest to him was a man 5'8" returned after interpolating a pass. To top it, Joe scored two touchdowns after interceptions. Sounds like a sure chance of conference performer doesn't it? Well, Joe hardly got a vote last year. Somehow the Big Sky players are all together when they overlook Larkin in the balloting season. It shouldn't happen again.

Everyone has some gambler's Ohio. Of that we are sure.

With that in mind the Arbiter staff this year is going to organize a football prediction contest. Each week we will choose seven games between randomly picked teams and invite readers to predict the winners of these games. The entry with the most correct predictions will win a prize. We haven't decided what the prize will be yet, but will be ready next week. With each contest we will look to give away a movie ticket, a hamburger or a few prizes. The prizes should be worth the five minutes it takes to fill out the card and stuff it in a bag. Anyway, read next week's sports page for more details.

About three weeks ago we turned on the television just in time to see last year's star quarterback Eric Guthrie punt for the Boise State Broncos. He had a very good year last year, but he was only on the field for one game. This year he will be back for four, and we hope to see him in action. Boise State plays at the University of Idaho this week, and we hope to see them win.

The Intramural Sports Commission is currently organizing the Intramural Sports League for the upcoming season. The league will start in the fall and continue through the spring. Participants will compete in a variety of sports, including basketball, volleyball, soccer, and tennis. The league is open to all Boise State students and faculty, and is a great way to stay active and have fun.

Baseball: Boise State Athletic Director Larry Hyland announced that the Bronco players would field a full team this year. The first game of the season will be on Tuesday, March 13 at 2:30 p.m. at the Varsity Center. Coach Smith said that all those interested in the baseball team are welcome to attend the tryouts.

Tough Defense is the Name of the Game for this bunch of Boise State Bronco's. Back in the former and middle infielders, Gary Craner, John Walter, John White, Mark Green, and Bill Cooper. In the second row are Mike Underwood, Cliff Mann, and Mike Rice. The top row consists of Bob Brown, Mark Green, Mark Rogers, Bill White, and Mark Duncan.

Bronco Defense Experienced

By LARRY BURKE

Editor's Note: This is the fourth of four articles about the 1972 Boise State football team. This week's article is about the defense.

Last week's article was about the offense. The Bronco offense has been very good this year, and the defense has been just as good. The Bronco defense has been very good this year, and the offense has been just as good. The Bronco defense has been very good this year, and the offense has been just as good.
