Arbiter, September 18

Students of Boise State College
Douglas comments on news

Some 300 plus people listened with quiet interest to Dr. Douglas Edwards Friday night in the first of this fall's lecture series. While billed as speaking on media influence in our society, Mr. Edwards expanded his topic to include comments on the past, present and future of the news outlet of the broadcast media.

Lasting a bit over 40 minutes, Mr. Edwards touched on a wide range of topics, ranging from the importance of the World of Man as well as the World of Communications. From pointing out the fact that "millions of Americans depend on broadcast news" to mentioning the雙tide problem of deciding what is news and what isn't, to the Expression of the First Amendment, Mr. Douglas touched on 30 years of media experience and insight. And while saying that professional association about the future is a "tough kind of matter", Mr. Douglas threw out two predictions on the future of communications and the world in general.

He mentioned that "peoples media and TV does have a future and more than likely a good one. He expects to see more freedom in broadcast news, as well as more news itself. Mr. Douglas pointed out that TV would become more service oriented, offering more programming of an educational nature as well as a helpful one. He went on to say that while the use of cable TV, the viewer would be able to choose more selective in his viewing, a trend that already exists with many viewers across the nation.

"Where you now have Game Street, tomorrow you may have ' сдела City,'" said as "world wide Tums and Tums and Tums." and so on.

While talking of the future, Mr. Edwards takes the time to warn that perhaps there is too much pessimism in American thinking today, that time should be taken to look at the good, things, the improvements that have come about through advances in technology. Both things and improvements in the learning process with the help of better educational materials as well as teaching aids. The fact that homes have improved with the addition of time and future he envisioned the possibility of a home computer station where a member of the household could balance the checking account, keep a check on the groceries and even fill out an income tax return.

Other things we might look for will be household appliances held by the 80's, synthetic foods and beverages that will be possible, and will be able to be sold in grocery stores.

Some of the more controversial topics that Mr. Douglas brought up on the future of media will be addressed later in this series of articles. And while saying that professional association about the future is a "tough kind of matter", Mr. Douglas threw these predictions on the future of communications and the world in general.

Personal Services opening

announced by Vice-president

The Office of Vice-President for Student Affairs would like to announce that applications are "available for the position of 'Student Assistant in Minority Affairs.' This position will be under the general supervision of the Director of Student Personnel Services to help with various clerical and administrative duties in the Office of Student Personnel Services.

There are no special requirements for this position. The student should be able to work overtime, be prepared to do clerical work, and have a solid background in minorities and minority programs. The student should be able to work at least 15 hours per week and be enrolled in the student work program.

Applications for the position of "Student Assistant in Minority Affairs" may be submitted to the Office of Student Personnel Services, Building 101. Deadline for applications is October 15, 1972.

Barnes welcomes faculty

The turn of events at this college has been a pleasant one for many students. In the fall of 1972, the institutional strains on television and radio and in the classroom have been reduced. Students and faculty are much more aware of the importance of the institutional structure that affects instructional personnel, travel, and other aspects of university life.

The need for support personnel to reduce the workload on each of us, to include myself, two years ago I did not realize that blaring and ringing over my office and into the ears of many students was largely caused by the lack of attention our office is given.

Mr. Douglas will be resource person at the Student Activities Office.

This position will be resource person for student affairs, providing support to the student activities office and assisting with the development of programs for minority groups and/or minority programs.

Position of "Student Assistant in Minority Affairs" may be secured from:

BOISE STATE COLLEGE
Administrative Building

Communication Enhances Department

One of the newest and fastest growing departments at BSC is the Communications Department, according to Dr. Richard Barnes, head of the department. The department has become a separate academic major field.

The main reason for this growth is the Communications Department's emphasis on the focus of human interaction, as opposed to the more abstract, less tangible disciplines such as sociology, psychology, and the like. Within the Communications Department, the department has increased in size and scope.

Courses dealing with subjects such as media, public speaking, newspaper, group communication, and special topics have been added. In addition, Mr. Barnes has added that the Communications Department's emphasis on the focus of human interaction, as opposed to the more abstract, less tangible disciplines such as sociology, psychology, and the like. Within the Communications Department, the department has increased in size and scope.

Arbiter taken to task

One of the hazards of writing an editorial is that another person somewhere is going to disagree with it - or at least have something to say about it. One of the hazards of writing an editorial for The Arbiter is that another person somewhere is going to disagree with it - or at least have something to say about it. Among other things, the Free Press suggested we should read the statement from Orwell after he left the mine.

After reading the statement thoroughly we would suggest the following (11 symmetric stanzas that in no way constitute a poem in the old-time sense):

"Amendments of regulations that won't work in earnest progress for whatever they may be."

The Free Press also suggested "as a young better than limited government." The Federal officials deny that as late as July, 1972, illegal aliens were picked up when they stepped off the farms.

"Limited government" could include but be no limited to federal regulations AND federal officials to pick up illegal aliens, holding jobs that should be held by Iowans.

The Arbiter seeks no quarrel with our esteemed colleagues from the Free Press. We will speak out publicly and voice our suspicions of those who offer dogmatic solutions to highly complex problems.

Iowa is a small, population-wise and is a small, population-wise and is a small, population-wise and is a small, population-wise and is a small, population-wise, State House of Representatives.

Who will speak in sound, sensible government, must exercise extreme care in selecting the individual who will speak for the people. That before the Idaho Free Press strikes so quickly, perhaps they should do some constructive thinking rather than bite out of government" and will start and where it will end.

In our opinion neither note nor does not reawaken any interest whether he be from the left or the right.

Letters

Higher Education Act amended by special act of Congress

To all college students.

I have today signed S. 2, of the Senate, which amends the Higher Education Act of 1965, and I have also signed S. 260, of the House, which is the same bill. I have signed both bills.

Those educational and financial institutions which made this record possible deserve the gratitude of the American people for their past achievements. I call upon all those university and college students who have to make up for lost time during this long-term season-long last year which is a result of serious ambiguities in the 1972 legislation. A particularly severe example was the program in the Department of Education that 10,000 students, with whom he argument added to the noise and clutter and ridicule and outlive his office as in his mind. In fact, he keeps on repeating his own words of his convictions.

With dazzling strength of light, the author furnishes a unifying impression of objective reality and objective reality itself. It seems that they operate, separate and together come to define a period. The same oligarchical group that is rich and subsidized, but its block of power is multi fold and unimagined, its tone of black without a red is a cause of revolution rather than one of despair.

"David Cohn's other books include THE ANTIKE FESTIVAL, COMFORTABLE JACOBS, THE DECLINE OF THE WEST. He is also the author of play, poetic, and political studies.

Review

"Taking a big bite out of government"

BY GUY HAND

There's a little fool somebody did stick back called, "THE ONLY THING PERMANENT IS CHANGE," it certainly should be the anthem for our age. But never before have clothes, cars, ambitions and institutions gone out of style so fast. And never before have clothes, cars, ambitions and institutions gone out of style so fast.

For you guys who have stuck through B.C. for the last four or the four years, the feeling is you'll end up getting pretty strong. To watch the freshmen class come for the last three or four years, the feeling is you'll end up getting pretty strong. To watch the freshmen class come for the last three or four years, the feeling is you'll end up getting pretty strong.

The high school class of twenty persons have given us the air old people, to take the world by storm with power, strength, skill and hard work. Those new parents are doing things quietly, with a "how-about-let's-see" attitude.

Anyone who listens to top-40 radio will realize that it reflects this change in posture. Music is indeed the mark of the new generation. But for those who get far beyond this music, the "homegrown" song of the last year, for giving its "clean island" name to the movement, there is something in their philosophy.

"Taking a big bite out of government" was mast definitely suggested the following:

Among other things, the Free Press suggested there is a need for the coming generation of students, with whom they can say, as they do, "It's better to do something to end."
The 18th annual Beaux-Arts Festival in Julia Davis Park Saturday and Sunday, September 9th and 10th, combined a group of talented artists and craftsmen. Boise State College was represented by a group under the direction of Mr. Wright from the Art Department who exhibited a sculpture of helium filled balloons.

The presentation involved a sculpture formed from negative space between the balloons rather than the conventional three-dimensional approach of positive space. The sculpture requires 12 men to hold down the balloons, and if successful the display should represent a figure.

The idea for a sculpture such as this was developed by Harry Wood of California. An integral part of the structure is the fact that it necessitates so many people to exhibit it, involvement is a key factor.

The park display was flanked by wind conditions and through the use of the helium tanks. In Mr. Woods plan the balloons are to be let free to float, but the BSC students felt that this measure might affect the ecology so the sculpture was saved for future use.
Would you like to be a Senator?

There is now a position open for a Senator from the Student Government. If you are interested in filling this position, you must attend the Student Involvement Committee meeting which will be held at 5 p.m. Tuesday, September 19, 1972 in the Student Center.

There are many other positions open to the Student Government. If you are interested in participating in any of these positions, you must attend the Student Involvement Committee meeting.

The most crucial meeting will be held on October 10. This meeting will be attended by the Chairmen of the Student Government. The meeting will be held at 5 p.m. in the Student Center.

"Battle of Algiers," an Italian production directed by Pasolini, will be presented without admission charge to students, faculty, and interested members of the public. Friday, September 21 at 7:30 p.m. in the Art Galleries. This 1969 movie, sponsored by the Foreign Film Committee, shows the revolutionary activity of Algeria against the French colonizers which developed into the Algerian War of Independence. Done in a documentary style and employing literally a "cast of thousands," this exciting film, originally banned in France, remains a provocative, exciting and timely movie.

"Winter Soldier Film" presented by the Unitarian Universalist Church, 355 W. 7th St. This film is about the Winter Soldier Investigation at Detroit where the U.S. government refused to consider charges of atrocities that they committed. The film was sponsored by a Negro chef and was shown at the Winter Soldier Investigation in Detroit.

The College Union Information Booth, located on the first floor of the Union, is offering a free booth service for all students. Anyone needing rides or someone willing to give a ride in-state or out of state, are asked to leave their name, destination and the dates they are planning to travel in the booth.

Covered Wagon, 355 W. 7th St. There is always a staff on duty there. There are many other positions open to the Student Government who can assist you. The Student Government wants you!
Barnes expounds on philosophy of education

John Barnes (continued from page 1)

State Board members in higher education have their own agenda, but the problems we have in common are basically the same. I trust that the Board members in other states have similar concerns and problems.

In my work as an academic and as a member of the Board, I have been able to see the problems that face higher education throughout the United States. I believe that the problems we face are universal, and that the solutions that we propose for our institutions are applicable to all institutions of higher education.

The problems we face are related to the increasing cost of higher education, the shortage of qualified faculty, the lack of resources for research, and the need for more flexible and innovative approaches to teaching and learning.

I believe that we must address these problems by focusing on the following areas:

1. Increased funding for higher education
2. Improved faculty salaries and benefits
3. Greater support for research and scholarship
4. More innovative approaches to teaching and learning
5. Improved institutional planning and governance

In conclusion, I believe that we must work together to address the challenges facing higher education. Only by working together can we ensure that our institutions are able to provide a quality education for all students.

The Board of Higher Education is committed to these goals, and we will work tirelessly to ensure that our institutions are able to meet the needs of our students and the communities they serve.
Pesticides for home owners and home growers

If both DDT and garden pesticides are being used, you may be taking a risk with your health. DDT is a persistent chemical that can build up in the environment and affect wildlife. Garden pesticides may also harm children and pets. Some garden pesticides are more toxic than others. The best way to avoid using garden pesticides is to use integrated pest management techniques. This means using a combination of methods, such as cultural practices, biological controls, and chemical controls, to manage pests. Avoid using pesticides that are harmful to beneficial insects and wildlife. If you must use a pesticide, be sure to follow the instructions on the label carefully. Always wash your hands after using a pesticide. If you are unsure about how to use a pesticide properly, contact your local Cooperative Extension Service or a pesticide supplier for assistance.

Clean cars, dirty water, don’t mix

The Baltimore Sun’s Car and Garage section has brought to light the fact that cars can be sources of pollution. In fact, cars are a major contributor to air pollution. The Baltimore Sun’s article highlights the need for more attention to pollution from cars. The article also points out that cars do not mix with clean water.

Government cleaning up tons of garbage

Tons of garbage are being cleaned up at one of Maryland’s major thoroughfares. The change is due to a concerted effort by government agencies and the local community. The change has been so successful that the Mayor has called it a “miracle.” The Mayor attributes the success to the hard work of government agencies and the community. The Mayor has also appointed a task force to continue the cleaning efforts.

Environmental threats scaled

Though it will eventually be a major problem, pesticides pose potential dangers to the environment. In fact, many pesticides are toxic to wildlife and can affect humans as well. The Environmental Protection Agency (EPA) has established pesticide standards to protect humans and the environment. These standards are designed to ensure that pesticides are safe for use in agriculture and that they do not harm non-target organisms.

The EPA has established a pesticide registration process to ensure that pesticides are safe for use. This process includes a review of the toxicological data and the effects of the pesticide on non-target organisms. The EPA also requires that manufacturers provide a list of all ingredients in a pesticide and that the product be labeled accordingly.

The EPA has also established a pesticide registration process for new pesticides. This process includes a review of the toxicological data and the effects of the pesticide on non-target organisms. The EPA also requires that manufacturers provide a list of all ingredients in a pesticide and that the product be labeled accordingly.

Governments and businesses are working together to address the environmental threats posed by pesticides. However, more needs to be done to ensure that pesticides are used safely and effectively.

Environmenal Notes

The Chamber of Commerce of the Greater Baltimore metropolitan area has issued a report on the economic impact of environmental damage. The report states that the environmental damage caused by pesticides costs the area $250 million per year.

Crops grown in fields treated with pesticides can be contaminated with chemicals used in the production of the pesticides. The chemicals can harm wildlife and humans. To reduce the amount of pesticides used, farmers can use alternative pest control methods such as crop rotation and biological control.

The Chamber of Commerce of the Greater Baltimore metropolitan area has issued a report on the economic impact of environmental damage. The report states that the environmental damage caused by pesticides costs the area $250 million per year.

Pesticide use in agriculture is not limited to chemical pesticides. There are also biological pesticides, which are organisms that can control pests. Biological pesticides include predators, parasites, and pathogens. The use of biological pesticides can help reduce the amount of chemical pesticides used.

Williams returns to launch fight

A former and four Governor Animas Aloka returned to Boise September 16th to endorse a candidate for representative for the fourth district. "For Williams has been working in the northern part of the state as the democratic nominee running against republican Steve Symms.

In a press conference in Boise, Williams outlined his position to the Idaho media, "I have found that through out the north and in the south that this campaign is based on philosophical difference, I support responsible, responsive government while my opponent supports complete individual freedom," Williams continued, "Individual freedom would mean removing the rules and all the regulations that敞开 the disadvantage of the working people, the elderly, the senior, and all those who work for a living, a responsibility to cutting government would be solution for the rich and private enterprise for the poor. It would be like the Idaho continues playing football with Texas grade school without a defense." Mr. Williams believes that an elected official has a responsibility to the voters to let them know that an elected official has a responsibility to the voters to let them know what his net worth is before and after the term of office.

The press conference was continued, with a statement by Mr. Williams about Idaho legislation, "Workmen’s compensation laws are necessary, safety regulations are necessary, Industrial safety laws are necessary, and child labor laws are necessary, and Mr. Symms will have to agree with me on these laws."

Spock to speak

An editorial in the Idaho Statesman, September 17th, 1984 noted, "What Spock has done best for his controversial book writing books on how to raise children and his extensive anti-war activities will be in Boise as part of his campaign for President of the United States. He is running on the ticket of the People’s Party, known as the Peace and Freedom Party.

In 1969, Dr. Spock became involved in radical politics as a relatively late stage in his life. Until his retirement from the University of Idaho in 1967, his reputation was primarily a result of the authorship of the COMMON SENSE BOOK OF BABY AND CHILD CARE. Advised and used by tens of millions of American mothers, the theories of child care have since been condemned as "permissiveness" by such luminaries as Vice President Agnew and others, who has been responsible for the great upheaval of youthful discontent and activism.

Dr. Spock had been active in Democratic politics until 1964, supporting Franklin Roosevelt, Adlai Stevenson, John Kennedy, and John Johnson. His severe disillusionment with the politics and results of the latter led him to become increasingly involved in the anti-war movement.

During the late 60’s he was involved in civil disobedience against the war. In 1968 he was indicted along with the late Reverend Martin Luther King, Jr. for conspiring to encourage illegal draft evasion, was involved in a lengthy trial and finally acquitted. He was nominated this year at the People’s Party convention in St. Louis. In addition to his speech those who would like to meet and talk to him personally can do so at 7:00 p.m. Wednesday, September 20th at 800 E. Fourth, south of campus. The $30 speech fee (and an additional fee of $2.00) will be charged for the information gathering at 7:00 p.m. and food will be served.

Symms says "NO"

JOSE, IDAHO-Mr. Steve Symms, republican nominee for Idaho’s First Congressional District, stated today that Freedom from too much Government is one of the ideals of today. During the past twenty-five years, we have witnessed a vast loss of personal freedom. "The reason I am running for Congress is to protect Americans from any further loss of the freedom," Symms said. "Traditionally one of the most important areas of a man’s freedom, was his personal finances, ‘I do not intend to lead the way to the day when all Americans are required to meet their personal financial relations to their neighbors.’ In this country we have never judged a man’s honesty, or worth by whether or not he is rich or poor. Each man was considered to be equal to any other man, and to have equal rights. This is a great principal, and the present attitude that every American must be classified as Black, or White, Rich or Poor, Young or Old, will eventually destroy the very thing that made this country the greatest place to live on earth. Publishing a personal finance statement is actually dangerous, because it gives the public a false sense of security. "We need to realize that some very dishonest men have been willing to publish a personal financial statement. Bill Sol Gest had no hesitation to meet his personal finances right, the time that he was wounded in one of the great fronts of our time. Of course that didn’t appear in the statement.

Biographical notes: STEVEN D. SYMMS, Republican of Caldwell, Idaho, was born April 21, 1938 in Nampa, Idaho, Son of Dewey and Irene Knowledge Symms, he was educated in Canyon County Schools; University of Idaho, Moscow, Idaho, where he obtained a B.S. Agriculture Econ. He served in the United States Marine Corp, 1960-1963, with rank of First Lieutenant. While at the University of Idaho he was a three year letterman in football, President of "t" Club, member of Sigma Nu Fraternity; past President of Idaho Alumni Association; Personnel and Production Manager. He is Vice-President of Symms Fruit Rancher, owner of: Idaho Power, Figura Sales, an and pilot, member of Rotary, Vice-President of Manhattan Idaho Chamber of Commerce, member of Boise, Idaho Chamber of Commerce, member of Fast Idaho Golf Association, Idaho Horticulture Society, Idaho Frisky Fruit and Vegetable Organization, Past President of "t" Club, Past Chairman of "t" Club, Past Chairman of Idaho Basketball Club, Past Chairman of Vail’s Ski Patrol Organization. "I have been a member of the Idaho Democratic Party since 1958."

Socialist workers gain spot on slate

FROM THE IDAHO SOCIALIST WORKERS PARTY

John J.拉动 of Boise, announced today that the Socialist Workers Party will be on the ballot in Idaho in the November election.

Congressmen appointed to campaign supporters for statements released to the press on Sept. 18 which claimed that for party would have to know "those" why and "those" why they could not be removed from the general election ballot. An IDAHO STATE DAILY feature article on September 18th indicated that Mr. Grams felt that the Socialist Workers Party was not taking a serious attitude toward the election in Idaho. Nothing could be further from the truth in this campaign. In fact, everyone believes that the Socialist Workers Party is the only party on the ballot in Idaho. It is rich or poor. Each man was considered to be equal to any other man, and to have equal rights. This is a great principal, and the present attitude that every American must be classified as Black, or White, Rich or Poor, Young or Old, will eventually destroy the very thing that made this country the greatest place to live on earth. Publishing a personal finance statement is actually dangerous, because it gives the public a false sense of security. Hair, beautiful Hair

By MUGH MYERS

Hair...you know, that long beautiful shining flowing stuff...the socialist allowed hair the square, funky, at least look like he knew what was going on, or at least looked like he believed he knew. Cool stuff, hair...without stretching a point too far, you could even say that hair is where it's at.

The mass of fantastic Jacobian protein stuff allows us all to feel the strength from the roots, the good guys from the bad guys (apart for whatever side you happen to be on) it even allows us to determine your employment outlook. I tell you it's the universal signal, why without hair, we wouldn't know who to vote for, or what to argue about or why just anything.

Look around you hair everywhere, and I guess now that it's growing long enough, I can announce the event that you all have held your political breath for, HAIR IS DEAD...no don't rush to the barber for help, it's too late, I’m afraid it's true my friend, hair as a political issue is at last at last years emancipation campaign and that’s pretty dead.

Maybe it's because white people were letting their hair grow, they grew up enough to realize that there were more important things to get worried about like well, the choreography of the republican convention.

Well whatever the reason for its demise, if you grove on hair, let it grow, it's cool and with the exception of the Army and a few rural holdouts it seems to be a pretty safe thing.

It seems sad in a way, being a vision of the great hair campaigns of 1960's and of further frequent skirmishes with the armed forces. I have many memories of battles lost and won...mostly lost...but I won't bore you with such trivialities.

In fact, all someone needs to know is, this article was to inject a little humor into a subject that all too many of us take a little too seriously. Hair is the measure of no man, woman or child, grow it, cut it, stuff your mattress with it, but please don't make an issue of it.

Just let it be...

By LARRY BURKE

Our head is on the chopping block

Making predictions without the aid of a crystal ball or a set of tarot cards can be a dangerous business. It becomes sheer fluke when one goes even beyond this to record the outcome of specific world events. For instance, we've been given to believe that Bell did, so to speak, the winner in the Big Sky race, thereby putting our head on the chopping block and only wading shallow with the readers swing by.

So here are our choices in the Big Sky race and our reasoning (or lack of it) behind them.

We pick our own Broncos to clinch a berth and win the title tonight this season. The loss of Gary Crowte in a crucial 1-0 loss to Idaho last night was a blow to the Boise defense. The Boise defense is the real key to the Broncos success, but the Boise offense will have to improve.

Second and third in the conference we rate as a toss-up between Northern Arizona and Idaho. NAU has seven defensive tackles and a fourth-down specialist. The defense is the key to the Broncos success. Idaho does not have as many tackles, but they do have a great running back in Bell. Idaho's running back talent is what makes them dangerous.

Fourth place we give to Weber State. The Wildcats will be strong on offense, as usual. They use the Wishbone, an offense which features a running ground game. Weber State's offense is centered on the running game.

Our head is on the chopping block

Making predictions without the aid of a crystal ball or a set of tarot cards can be a dangerous business. It becomes sheer fluke when one goes even beyond this to record the outcome of specific world events. For instance, we've been given to believe that Bell did, so to speak, the winner in the Big Sky race, thereby putting our head on the chopping block and only wading shallow with the readers swing by.

So here are our choices in the Big Sky race and our reasoning (or lack of it) behind them.

We pick our own Broncos to clinch a berth and win the title tonight this season. The loss of Gary Crowte in a crucial 1-0 loss to Idaho last night was a blow to the Boise defense. The Boise defense is the real key to the Broncos success, but the Boise offense will have to improve.

Second and third in the conference we rate as a toss-up between Northern Arizona and Idaho. NAU has seven defensive tackles and a fourth-down specialist. The defense is the key to the Broncos success. Idaho does not have as many tackles, but they do have a great running back in Bell. Idaho's running back talent is what makes them dangerous.

Fourth place we give to Weber State. The Wildcats will be strong on offense, as usual. They use the Wishbone, an offense which features a running ground game. Weber State's offense is centered on the running game.

Governor Andrus proclaims 'Bronco Day'

Boise State has the biggest line working Dan Hollifield, Hutt and Marshall have a "We have always thrown 'Winning 'the Big Sky is one of the strengths Anchoring the line 'will do the the potential to be one of the other veterans, Rod Stearns, Offensively this season strong team by the Bronco mentor."

"We have three men this week that 'tudent spouse available It the Vanity Center. These card, permit a ,tudent spouse edmittance to tickets are selling for $7.50, students are asked to bring'.

"We, are" Guthrie's absence will be situation. 'So to the varsity roster are "Our intention' on

Brent McIver. the other spots. We are not as strong as we had hoped

"The line, with one exception, backfield this season, and "has Behind them 'are three the Bronco punter, Cal Poly also

"We have all the quality in him, and each one excels in an area be center John Klotz, who was be at

"The physical shape of the line is something that could be a problem for the Broncos, Knap, in commenting about his charges said, "Down, fullback, and Halfr'otot are in line shape, but we are still slow in the other spots. We are not at far along as we had hoped to be.

For reserves Boise State returns a group that set the stage on fire last year. Don Hutt, an all-conference selection, and Al Moulthrop had the edge. Between them, they dominate the BSC record books.

Bunting has indicated that defensive back Joe Larkin will be the first full-time raid man and receiver Afi Davis will be the Bronco punter.

"I don't know how to make the other team defend the whole field, we want them to be worried about every play we have. In order to do this we can use a frightening array of formations and must have a lot of skillful players." Knap expects his greatest offensive; difficulty against Northern Arizona and Weber, Cal Poly also was rated as a strong team by the Bronco mentor.

"In outlining the Broncos John, this year, Knap said, "Winning the Big Sky is our goal and we consider it a compliment the school that in the minds of a couple of coaches in the league we were both apparent to the title. Let's hope they had a good reason for their selection."

"I have an important day for Boise State last Tuesday because Governor Cecil Andrus officially declared September 22, 1972, as "Boise Day" Idaho's, leader in order to recognize BSC's contribution to the State. The day also kicked off a membership drive for the Boise Athletic Association in his participated. Boise State's "Institution of higher education in the State of Idaho. The Broncos have brought a great deal of national recognition to the state through the past years in all sports."

Andrus encourages "all who can to participate in the day's activities and also attend the gameduring the warm season whenever possible."

Boise State Day was preceded by a luncheon at the Bronco Host in Boise. The gathering was sponsored by the Boise Athletic Association.

According to the executive director of the BAA, Don Kublick, "Our current student membership has over 60,000 members and this drive for Boise States sporters, should bring in additional support.

Other activities, besides Andrus were Studentbody President, Tom Dorschel, BAA President Robert L. Kroger, Head Coach Tony Knap, Dr. John Stew, and Athletic Director Lyle Smith.

Tom Dorschel thought much of the emphasis of Boise State Day should be dedicated to Head Coach, Tony Knap and the varsity cheerleaders because of their dedication to the school and its functions.

"A football was the heat of early conversation at the luncheon. This reporter heard that BSC should either "Whoa, Buck" run away with, pass a Inter..l and "manage" the flyers from the University of Nevada Las Vegas on Saturday.

"Amid all the colorful literature, which included the presentation of a BSC innerman ticket to the Governor, emerged the realization of the importance of Boise Day, that BSC has become a state institution of higher education and a lasting foundation for athletes everywhere.

Governor Andrus became the newest Idaho's leader official. Boise State became the newest Idaho's leader official. Boise State Athletic Association leader Don Kublick.

Athletic Sports Editor

Last fall the name of Eric Guthrie became a household word among even the most casual of Boise State fans. This was in line with the Boise sports boosters will have to learn a whole new set of names this year. Everyone wants to talk about the Broncos quarterback situation. So much so, that Guthrie, now is a name of a group of Field leaders, Bucky, Austin, and Maitland.

Guthrie's absence will be felt by the Broncos this season. Any player who holds twenty receptions during a game, will most likely be a Boise State lead. Guthrie couldn't be at Boise State lead. Guthrie couldn't be at Boise State lead. Guthrie couldn't be at Boise State lead.

"We have three men this year who are winners. Each one has that quality in him, and each one excels in an area. We have three men this year who are winners. Each one has that quality in him, and each one excels in an area.

Brent McIver. Anticipating the line will be center John Klotz, who was singled out by his coach for the first team. Brent McIver. Anticipating the line will be center John Klotz, who was singled out by his coach for the first team.

Back up Klotz is Paul Adams.

In the guard spots are Tom Squar, on the left and Dan Dwan, who is McIver's replacement, on the right side. Dan Dwan was moved from the backfield this season, and "has the potential to be one of the finest one," according to Knap.

Back up these two men are Mike Corrory and the hard working Dan Hollifield.

The physical shape of the line is something that could be a problem for the Broncos. Knap, in commenting about his charges said, "Down, fullback, and Halfroto are in line shape, but we are still slow in the other spots. We are not at far along as we had hoped to be.

For reserves Boise State returns a group that set the stage on fire last year. Don Hutt, an all-conference selection, and Al Moulthrop had the edge. Between them, they dominate the BSC record books.

But now there is a trio of names that sound more like a law firm. Any player who holds twenty receptions during a game, will most likely be a Boise State lead. Guthrie couldn't be at Boise State lead. Guthrie couldn't be at Boise State lead.

Boise State Broncos open with big 36-16 victory over Nevada-Las Vegas

Quarterback Sonny Bollie couldn't get what he expected out of the Rebels from the University of Nevada-Las Vegas to form the winning combination against the Boise State College Broncos Saturday night.

The fourth quarter had been an uneven one when the last-second pass and coast Sky Knaps' Broncos, won their season opener.

Air Bollie led BSC from their own 25-yard line and marched down to the Nevada 11 on ground and air, but the Rebels could cross the goal line only twice. "The main thing is to work hard, and never give up," Bollie said after the game. "We were in a hole a few times, but we did a good job." Defensive line coach Rod Hohorst felt the same way. He especially was happy with the defense, which held the Rebels to 14 points.

Rebel defender during Saturday night's action in Bronco Stadium. Running up to offer his sympathy is quarterback Jim McMillan, No. 12.

Bronco comments

By Larry Burke

Old return on television usually isn't too popular. But last Saturday against the University of Nevada Rebels the Broncos staged a show that could have easily been mistaken as a rerun of last year's offensive-minded team, and it was immensely popular with the 13,400 fans that came to see the 1973 debut performance of Knaps' charges.

In the Broncos scored in almost every way from every part of the team. The first half specially saw the Bronco scoring machine pile up points as three touchdowns, seven or eight running backs and four ends shared the scoring drives and Joe Larkin electrified the crowd of 13,400 as he later kicked a 21-yard field goal. Guthrie led a team that literally exploded against the Rebels. It was a good start which Guthrie himself couldn't have done much better.

But the contest against the Rebels wasn't as easy as it seemed. Coach Tony Knap expressed some confidence in the Broncos, but he also expressed some problems in the defense. But the Broncos had the Rebels when they were inside the twenty-yard line. "The main thing I stress is to work hard and never give up," Bollie said after the game. "We were in a hole a few times, and we held, and that makes me happy." Statistics prove his point, because the Rebels led BSC in total yards 36-8. But the Broncos held the Rebels when they were inside the twenty-yard line. "The main thing I stress is to work hard and never give up," Bollie said after the game. "We were in a hole a few times, and we held, and that makes me happy." Statistics prove his point, because the Rebels led BSC in total yards 36-8. But the Broncos could cross the goal line only twice. Hohorst concluded, "We do have a few things to work on. Our pass rush wasn't good, but we're never going to give up." That was perhaps an understatement. Three times Broncos defenders popped the ball high into the air causing the Rebels to fumble... and there's some good hitting.

This Saturday the Broncos face Humbolt State, a team that is rated by the coaches as a good one which is always in the thick of the battle for the Far West Conference championship. Last year Chico State barely beat Humbolt for the Camellia Bowl berth, and this year they are out to win the title outright, according to the Broncos coaches. Boise State is especially big game for them because they want to keep the defending bowl champion and enhance their chances for the bid this year.
