Students of Boise State College

Although this file was scanned from the highest-quality microfilm held by Boise State University, it reveals the limitations of the source microfilm. It is possible to perform a text search of much of this material; however, there are sections where the source microfilm was too faint or unreadable to allow for text scanning. For assistance with this collection of student newspapers, please contact Special Collections and Archives at archives@boisestate.edu.
BSC student named in call for grand jury investigation

By Phil Verby

George Nourse, a Boise State College student and the Republican nominee for sheriff from Canyon County was named in a long delay in the trial of Richard Reed, Director of Financial Aid at Boise State College. Reed is being held on charges of forgery and theft.

Nourse's campaign manager, Mike Reed, confirmed the news and said that Nourse is not a suspect in the case. He added that Reed's arrest does not affect Nourse's chances of winning the election.

'Under the Gaslight'

"Under the Gaslight" will be played at the Solar Theater on October 22. The show is a musical comedy set in the 1870s and features the characters of a gas company and a family of gaslighters.

BYKE, the chief of the gas company, is played by John Elliot. His wife, Arlette, is played by Andrea Parenteau. Becky Anderson and Steve Barrett will perform in the show.

McGovern's daughter to campaign on BSC campus

Sen. McGovern's daughter, Ann McGovern, is coming to Boise to campaign for her father. She will be in the area to promote her father's re-election campaign.

Andrus announces employment program

BOISE—September 18—The Public Employment Program which provides part-time work for nearly fifty Boise State College students during the last school year has not been completely eliminated from the BSC campus, according to Governor Cecil D. Andrus.

Andrus pointed out that original funding for the program was made possible when his office successfully negotiated a modification to the State's grant under the Emergency Act of 1973. This modification, the college received nearly $25,000 and was able to fund part-time work for laboratory assistants, library clerks, and other activities.

Andrus also remarked that the program has been highly successful at BSC and that he has received favorable responses from the students.

POW MIA POSTER INSIDE

TEAR OUT AND SAVE
Rotten in Denmark

Well the hiring of Wayne Kozel is a comment--or I should say response from the students I have talked with at the Boise State, with the exception of the ASBSC President, can have a well-defined role for using Kidder's name for the BSC positions. It is a good idea for the Senate to have the power to name the committee they would like the ASBSC Senate to have. The Senate is an important decision-making body and would be able to make recommendations to the administration. The Senate has the authority to make decisions that affect the students. Hopefully, the Senate will use this power to its advantage.

Tip-of-the-Pen Award

Only those who have worked in a newspaper office or have a close relationship to a newspaper office have a chance to win the Tip-of-the-Pen Award. The award is given to the editor who has made the most significant contribution to the newspaper. The award is named after the editor who first thought of the idea, who was a friend of the editor.

Washingon, D.C.--One of the most in-demand jobs in the government is the position of White House Press Secretary. The job involves working closely with the President and the White House staff to manage the flow of information to the press. The position requires excellent communication skills, a deep understanding of the political landscape, and the ability to handle high-pressure situations.

Established May 1980, the ARBITER is a weekly publication of Boise State College, published by Boise State Arts Inc.

All letters to the Editor must be submitted to the ARBITER office no later than Wednesday in order for them to be published the following Wednesday. Your article must be 300 words or less.

Opinion submitted to the ARBITER on this subject and on some conventions of the College, the Editor reserves the right to edit and/or reject.

Any material required by the ARBITER may be reproduced without permission as long as it is not taken out of context and is not used in such a way as to mislead the reader.
The great put-on

By Hugh Myers

Well, last week I wrote about the hair thing, mostly because I felt like it, but maybe a little because it needed to be talked about. This week it's time to do a thing about clothes. Hold on, don't get upset about me maybe saying what you should wear and what you should not, 'cause that's not what I'm gonna do.

What I will tell you about is this particular hair, a lot of people spend a lot of time fussing about clothing. You know the routine, a list to tell you what to wear and when, but now hopefully things are a little different.

Presumably, the powers that be have come to the conclusion that if you are here, you are automatically old enough to dress yourself; hence, no dress code. How about that, boys and girls? Sort of makes you feel good to know that someone up there trusts us, doesn't it?

So how's it working, is everybody happy? Well, a quick look around is enough to show most anyone - the things are going pretty well. With no rules to go by, everyone sort of makes their own: some of your more conservative husbands/hungry cords are going the fashion routine and dress to kill. On the other hand, some of the more liberal husbands/hungry cords are going the daywear/shiny route and are dressing to advertise. Basically, you have a lot of people dressing according to where they are going, grubbable for grill-work and just of course, jeans or suit about anything ( Здесь, дёшь-красивый! По-моему, это лучше, чем просто примерно. А ты знаешь, дёсь, моя плюшевая пуговица - еще один пример того, что мы должны делать!)

Just be careful of impartiality, let me say that about the guys. They either dress like dads or don't dress at all. If a guy in jeans and a t-shirt can dress, then so can you, darling!

Well, next week we can talk about some other thing. If you have any suggestions, let me know.
One World Crusade comes to BSC

EDITORS NOTE: The following is a press release from the ONE WORLD CRUSADE. It is written to announce some of the gatherings you have been in the last week on the BSC campus and around state sites.

By Ida Lee

The ONE WORLD CRUSADE is an international movement working to bring about the unity of all mankind, through a new understanding of men and the purpose in life.

Since January, young men and women from all over the United States have been traveling in mobile units, visiting the major cities in every state in America, holding lectures, urging the public, including native, state, and city officials, holding public rallies and news conferences.

The purpose of the ONE WORLD CRUSADE is to make known to the American public the UNIFICATION PRINCIPLES, as the ultimate ideology that can create unity of religion, science, politics, economics, and culture.

The UNIFICATION PRINCIPLES teach the pattern for harmonious family in the world, centered on God, as the building block for a harmonious society, and give new direction in this age of turmoil and confusion, by showing the way to a world of harmony and peace.

This ideology originated with Sun Myung Moon, a contemporary South Korean missionary, who teaches that mankind has entered a New Age, and that today for the first time in history, man has the scientific and technological ability to create an ideal world, if only we have the dynamism to bind man together as brothers.

The UNIFICATION PRINCIPLES provide the death and understanding to do this, not only in America, but throughout the world. The ONE WORLD CRUSADE is now in five different countries. Japan, South Korea, Germany, England, Austria, preparing the UNIFICATION PRINCIPLES.

Through this international effort, the long dreamed harmony and unity between all people and nations, is being made a reality.

Bergman’s film is to be shown

Friday, September 29, the Foreign Film Committee will present Ingmar Bergman’s “Smiles of a Summer Night,” a Cannes Film Festival winner, “Smiles” will be shown at 7:30 p.m. in LA 105.

This “bouquet face” is a cry from Bergman’s later, more sensitive work. It is a beautiful, calm comedy, and exercise in partner searching filled with visual elegance and charm, and featuring an all-star cast of Bergman regulars including Harriet Andersson, Gunno Spannberg, and Eva Dahlbeck. A delightful, wonderful picture not to be missed.

A full schedule of foreign film presentations for the 72-73 year is now available at the information booth in the Union College Building.

Williams attacks Symm’s philosophy

In a talk to the Boise Rosary Club, September 25, Democratic candidate for the First Congressional District, Ed Williams said his opponent’s philosophy would be developing to senior citizens. Meeting set for Sept. 28

Dave Stephip, the Idaho Club will have its first meeting Thursday, September 28. At 7:00 p.m., the Club will meet in the Tenon Room in the College Union Building. Special interest at this meeting will be the movie, “Wives So Clear Even the Blind Can See.”

The meetings are open to any student of Boise State College to attend or become members. One of the main items to be brought on to the meeting will be the election of officers. The purpose of the Idaho Club consists of organizing programs beneficial to Idaho students, producing a better understanding of Indian people to others, and returning pride in Indian heritage and culture.

Youth, agriculture, and the environment

Williams said Symms is catering for aging social security for senior citizens, the 64-club, loans to family farms and for the checkout carts. “Getting government into business,” but cutting through is not, “Williams said.

Williams said independent, free enterprise, and selling a bit of government are admirable goals, but they are general statements and mean little without other explanations. Williams said independence and free enterprise should be for all people—not just the rich and powerful.

“If we are talking about opening government, let’s open government loans to big business. Let’s cut efficiencies and bureaucracy but not tear the system apart and begin it to the corporations to pick up the pieces,” Williams concluded.

So you think you can read?

By Dr. E. Samuel Roberts

Saving the Last Word

According to the National Religious Council of Great Britain, statistics show that over one-third of the nation is unchurched.

The meetings are open to any student of Boise State College to attend or become members. One of the main items to be brought up on the meeting will be the election of officers. The purpose of the Idaho Club consists of organizing programs beneficial to Idaho students, producing a better understanding of Indian people to others, and returning pride in Indian heritage and culture.

Williams said independence and free enterprise should be for all people—not just the rich and powerful.

“If we are talking about opening government, let’s open government loans to big business. Let’s cut efficiencies and bureaucracy but not tear the system apart and begin it to the corporations to pick up the pieces,” Williams concluded.

Selander encourages youth

BOISE—An assistant professor of English at Boise State College who is a Democratic candidate for the Idaho House of Representatives issued a statement Friday encouraging young people to take advantage of their new voting privileges.

Glenn Selander, 10614 North 8th St., who is running for a tax structure, reorganization of Idaho state government and work toward 100 per cent state funding of public education as the important issues this year's campaign.

"Voters need an equitable tax system because many of our citizens are forced to pay beyond their means," said Selander.

In reference to full state funding of public education, Selander noted that "we must move toward that goal. I doubt that this can be accomplished during one session."

Selander stated that the government seems out of touch with its constituents because it is so large and difficult with which to communicate that the voters ultimately have no way of relating to it. He said he supported the reorganization plan developed by Governor Carl D. Andrus.

Selander added he would be glad to open with student groups to discuss the issues of the legislative campaign.

"I look toward to the opportunity when I can go down and discuss the issues with young people here in the campus. They have joined the right to vote and it is the candidate's responsibility to be all voters know what his positions are," said Selander.
For I am black, I am the child of the mother. And I shall endure, I have endured. I have taken the burden of hate—weights of oppression. But I am strong. Black and full of the life of the mother.

AFRICA

She has nursed me with the milk of nations ancient, She has raised me on the meat of pain and fire.

And I am strong. I was lost like a child—Lost in a land of hate and backbreaking work. But I have been found. I am back Back in my mother's arms.

Black Poetry

Black—I am paísed For I am Black.

Daughters of Kings

Sons of a nation strong Wife and mother to Africa Husband and lover to life To be another would be false To be all that I am Is pride and strength.

For I am batch I am the child of the mother. And I shall endure. I have endured. I have taken the burden of hate—weights of oppression. But I am strong. Black and full of the life of the mother.

AFRICA

She has nursed me with the milk of nations ancient, She has raised me on the meat of pain and fire. And I am strong. I was lost like a child—Lost in a land of hate and backbreaking work. But I have been found. I am back. Back in my mother's arms.

Cold Blood, Poco and Canned Heat

By Guy Hand

With high expectations of 5000, almost 2000 filled the rock concert hall of Cold Blood, Canned Heat and Poco expressed themselves in their style of creation to their fans gathered. Cold Blood leading off the night, with a performance, set the tone for the remainder of the night, the roar of teeth chattering which only seemed to make the time drag on. Canned Heat played what they knew, but the style left variety of players by the audiences. With the Boogie blues, they definitely carried the heat for Poco. Leading off with famous bands and shakin' heads, Poco recaptured the country beat in rock. The Ni-Ki torsion on their map, let the poetic lyrics flow like wine.

All three groups are polished musicians in their own right, but due to the poor physical conditions the concert bordered on another Deep Purple. The long time between bands coupled with the cold fall evening left the concert more an ordeal than the pleasure it should have been.
Davis—wheat, potatoes, youth, waste

Wheat, potatoes, youth and government programs have come together in a plan for the waste of 47 cents per bushel on which the Idaho farmer has paid taxes. Thus, the farmer lost at both conference and a government waste became ends.

The Idaho Democrat, Washington, Sen. Frank Church, has shown the benefit of my doubts, and I would urge passage of the Nixon Administration's proposals to the pending revenue sharing bill.

"I don't acknowledge that the American people are sublimely unaware of these startling facts. The practice of politics today seems to be an art of obfuscation. The Administration is carefully writing off its mistakes to the Federal medium Austria's imagination. The fiction has been a "business as usual" Administration, and I would like to thank the truth of operation from the people."

But the Idaho Democrat charged that the opposition has been worried too long. Why charge today, he asked, when the facts have already made the minds of Congressmen like them that the most profound, most deftly written Administration in the end of the Second World War, and they will share their heads in disbelief. dressed in the figures and they will have no doubt that President Nixon's fault, it must be the fault of the Congress.

But the fact is, Church said, that "President Nixon has actually asked for more money than Congress has been willing to give. During the three fiscal years Congress completed since Mr. Nixon took office, Congress has appropriated $33.4 billion LESS than the President requested, and that's the difference between a Republican Administration and Democratic Congress."

"Thus, the farmer lost at both conference and a government waste became ends."

President Nixon has actually asked for more money than Congress has been willing to give. During the three fiscal years Congress completed since Mr. Nixon took office, Congress has appropriated $33.4 billion LESS than the President requested, and that's the difference between a Republican Administration and Democratic Congress. It is the Republican Congress, which will be responsible to the American people, who will have the opportunity to start playing straight."

But the fact is, Church said, that "President Nixon has actually asked for more money than Congress has been willing to give. During the three fiscal years Congress completed since Mr. Nixon took office, Congress has appropriated $33.4 billion LESS than the President requested, and that's the difference between a Republican Administration and Democratic Congress."

"Thus, the farmer lost at both conference and a government waste became ends."

Church has shown the benefit of my doubts, and I would urge passage of the Nixon Administration's proposals to the pending revenue sharing bill.
I do not suppose that I am alone when I say that there are times in my life that I would just as soon forget. And in this manner I am not alone when I see that I cannot forget: One of these times was a day in Vietnam. From June 1970 to June 1971 I did my thing as a photographer for Uncle Sam, not by choice, but simply because someone wrote up a set of orders moving me from one place to another... There were good times to be had, and bad. There were bad times to be had, and I get those too. I suppose almost everyone had their ups and downs. Vietnam was like that. Almost everyone, but not quite; some were not so lucky. There were some that I met there but saw die there, some I liked and some I didn't, but they are just the same and I'm not sure that anyone can say why. To me they were the luckiest of the ones that left. Lucky because while death is unbearable, it is at least final and things will heal in time. But what of some of the others, the ones who disappeared there, the ones who even now, vanish and are listed quietly as missing in action, or listed listed as a prisoner of war. Death may be painful for the living for a time, but how is it possible to bear with a phrase as incompleteness and indefiniteness of missing in action, and surely prison of war offers slight more comfort.

In either situation and other wars these men would be the nameless and forgotten. In this time and war they are not nameless, for they are named by their absence. And while they are part of a time that I would forget, I cannot forget them. In fact I will and must not forget them, for if I do, how many others will... and they must not become the forgotten as well as the missing.

REMEMBER THEM AND HELP THEM FOR THEY HAVE NOT FORGOTTEN YOU.

Editor's note: By now you will hopefully be asking "What can I do?" and equally hopefully, the following will be of some help to you:

Idaho POW-MIA Inc., will have their official opening on Sept. 29 between 12:00 and 5:00 P.M. It is a non-profit, non-political organization, their whole concern is the welfare and humanitarian treatment of POW's and MIA's in South East Asia. Their headquarters are located in the lobby of the Boise Hotel and their phone is 345-7415. Eleanor Budell and Organizational Director Penny Price ask that if you are concerned and interested to please get in touch. Volunteers are badly needed to help in the distribution of posters, bumper stickers, buttons, literature, displays, form letters and petitions. All of this material needs to be gotten to the public, not only for their own information but also to convince them of the need for individual and collective action. Help is also needed with the distribution and sales of the nickel and copper bracelets, in order to raise money for past and future attempts to convince the North Vietnamese of the need to comply with concerned American demands.

Idaho POW-MIA Inc. asks that if you have the time, please help, there is a need.

National League of Families of American Prisoners and Missing in Southeast Asia

Dear Voter:

Almost 1700 of your fellow Americans are being used as pawns of the war in Southeast Asia. These sons, husbands, fathers, and brothers are the men who are Prisoners of War or Missing in Action. In this election year of 1972, families of these men plead for your concerned action in focusing attention on the horrendous problems facing the POW/MIA's. We know the most important democratic decision - making process is the ballot box.

Whenever and wherever you meet the candidates, we request that you ask them for their plan of action to help solve the untenable problem of the POW/MIA's. We know your concern and action will show the candidates that Americans do care and WILL NOT LET THEIR MEN BE FORGOTTEN.

We acclaim no one. We endorse no one. We are not on anyone's bandwagon, we want and need you all on ours.

Will you help us by sharing this information with your relatives, friends and civic organizations?

Most gratefully yours,

The families of the Prisoners and Missing

POW MIA POW MIA POW MIA POW MIA POW MIA POW MIA POW MIA POW MIA POW MIA POW MIA POW MIA POW MIA POW MIA POW MIA POW MIA POW MIA POW MIA

THE PRESIDENT

DEMOCRATIC REPUBLIC OF VIETNAM

HANOI, NORTH VIETNAM

I would like to express my deep concern over the treatment of American Prisoners of War in Southeast Asia and their families.

As a nation in the world community, you are obligated, not only by your declarations in 1957 of the International 1947 Geneva Conventions, but also out of humanitarian considerations for other human beings, to afford those whom you hold the minimum standards of existence which are outlined in the above Geneva Conventions, in all cases and in all circumstances.

Specifically, as an American I implore you to release a complete list of names of all men that you hold, release the sick and wounded, permit neutral inspection of all prisoner camps and allow the free flow of mail between the prisoners of war and their families.

I and other Americans share this grave concern over the deplorable plight of the prisoners of war, those missing in action, and their families. We will not tolerate your lack of response on this issue. The world will hold you responsible for your actions.

Sincerely,

Madame Nguyen Thi Binh
49 Avenue Cambaseres
Vernier - Le Boulieu
91 Esaune, France
ENVIRONMENT

In the beginning...

In the beginning, nature forms kept in order the animal and vegetable resources of the earth. Not until man learned to use fire and invented tools was the balance upset.

Nature has not been able to keep control in competition with our increasing technical skills. As a consequence, the world of living things is in great danger of damage or destruction.

This does not mean that everyone should panic, but that everyone should do what he can to reduce the harmful effects using his way of living, and even to go further to adopt his way of living as much as he can to meet the needs of nature.

When the first settlers came to Canada about 370 years ago, their present material little. They were few in number and this is a huge continent. The coming of the railway, the highway and the airlines, and the building of cities, have separated us from consciousness of the basis of life as it was then and old machines: the land, the water, the wild creatures that inhabit them, and the air.

Some people look upon the effort to conserve nature as being nothing less than a desire to preserve beauty. This is a mistaken idea. Unless we conserve our natural resources we tortured.

Man stands at the apex of the pyramid, but his insensitivity to the needs of other forms of living being threatens to undermine the entire structure and bring it tumbling down.

It is common to the age to always "warn" to almost the state of a religion, but it is not practical to select, and new new, as it does not indicate the presence of great intelligence to wait until the prime bores in dust storms before acting to prevent it, or to propagate until disease flies abundantly through kitchen taps before cutting cities and towns to purely water waste, or to longer until thousands of people die of disease imposed upon them by ships before the pollutants that pass the air.

Individuals and their societies speak fluently of this or that, according to their special interests, as being a desirable way of life. But the efforts of our institutions fail to bear this out: conservation is, literally and unmistakably, the only way to preserve ourselves.

Without conservation, the people of the world are emasculating the earth for a glorious fast tonight, disrupting the need for meals tomorrow.

Spaceship Earth

While we are mapping the moon and Mars, dropping scientific instruments on Venus, urging messages to Jupiter, and the Milky Way, we need to do some constructive thinking about our own planet. Geologic evidence leads the scientists to conclude that the earth will continue to be a remarkably habitable place for creatures like ourselves for perhaps hundreds of millions of years to come if we do not destroy it.

The most important spaceship in orbit is the planet, yet it has no atmosphere, no standing wave, and no substance that carries energy capacity, and limited material resources. It carries 300,000 million passengers, and it is expected to accommodate 8,000 extra passengers who come aboard every hour.

After stating the case in this way, I am in my article in "The Manchester Guardian." Anthony Tucker says there are no emergency states on the spaceport for saving and preventing the destruction of the earth, the air, the water, the wild creatures that inhabit them, and the air. So for a few weeks.

Or let the facts about how small is the area on which we and our natural resources of animal and vegetable life exist.

The circumference of our spacecraft at the equator is 25,000 miles, a distance covered by a jet passenger airplane in a little over 45 hours. Its surface land area is about 58 million square miles, out of all of which is habitable or productive.

When a species becomes extinct, its life is extinguished. Within the same time that the life of a species is extinguished, the time of the other unexplained or unpleasing phenomenon is in some other way by waste and contamination. Over-enthusiasm is likely to blur the facts. Facts which are strong enough and well enough authenticated to carry persuasion without exaggeration. It has not been proved that this might happen. There are no records to prove anything at the past.

There is no need to burden our minds with anxiety about things that may never happen, but it is too late to intensify to brush aside warnings of demonstrable dangers.

Actions that are practically consistent with the essential points: conservation is a great thing and pollution and waste of resources are bad things. From that hub speculation radiates in every direction, so that not only erosion and poisoned air are resources bad things. Conservation is attacked, but every other unexplained or unpleasing phenomenon is in some way linked to waste and contamination. Over-enthusiasm is likely to blur the facts. Facts which are strong enough and well enough authenticated to carry persuasion without exaggeration.

Nevertheless, if it were not for mathematicians, scientists, inventors and preservers of various sorts, and enthusiasts for causes, mankind would not have survived or made the progress it has made.

There is no need to burden our minds with anxiety about things that may never happen, but it is too late to intensify to brush aside warnings of demonstrable dangers.

Conservation is attacked, but every other unexplained or unpleasing phenomenon is in some way linked to waste and contamination. Over-enthusiasm is likely to blur the facts. Facts which are strong enough and well enough authenticated to carry persuasion without exaggeration.

Nevertheless, if it were not for mathematicians, scientists, inventors and preservers of various sorts, and enthusiasts for causes, mankind would not have survived or made the progress it has made.

No need for extremes.

Some people say that those who lobby in favor of conservation of natural resources and elimination of pollution are using scare tactics. But if they do, their efforts are wasted - if they had failed to prompt interest in measures to preserve the present today to make an environment to live in tomorrow, there would be no need to use scare tactics.

The worst known case of compulsive swallowing was reported by the Journal of the American Medical Association in December, 1960. The patient, who complained only of abdominal distress, was found to have 168 items in his stomach. He had a 3-pound portion of metal with 30 nails, 3 metal chains and 88 assorted coins.

The worst known case of compulsive swallowing was reported by the Journal of the American Medical Association in December, 1960. The patient, who complained only of abdominal distress, was found to have 168 items in his stomach. He had a 3-pound portion of metal with 30 nails, 3 metal chains and 88 assorted coins.

Here is the voice of knowledge

The message of the scientists is that the future of the human race is in great question. There are some examples of statements made by reputable people who have no connection with science, economics or probably.

Speaking at the University of Denver, Science, Dr. R. D. Crow of the Howard Hughes Medical Institute said in his address, "We havest our wits and our brain." The environmental methods of controlling the population fast, "it has 'intelligence and order, and the life of a species is extinguished. The air, the water, the wild creatures that inhabit them, and the air. So for a few weeks.

Or let the facts about how small is the area on which we and our natural resources of animal and vegetable life exist.

The circumference of our spacecraft at the equator is 25,000 miles, a distance covered by a jet passenger airplane in a little over 45 hours. Its surface land area is about 58 million square miles, out of all of which is habitable or productive.

The forests belong to you

By Jack Trueblood

As my first contribution to the Arbiter I would like to touch on a subject which has been growing at the same rate as the growth of Oregon's forests. That subject is a 60 second commercial aired by one of our radio stations and heard throughout the country. It featured a song about timber harvest. It spoke in a charming way with an economic, potentially political nature. The idea of the clear cut method of timber harvest. What exactly is a clear cut? It is the practice of selective cutting which is, in a manner true or a seed group of trees for wood products. Clear cutting is the technique of cutting down trees, the area itself, the area around it, and the area has been done for use in wood products manufacturing.

What the commercial did was to present the clear cut method in a light of righteousness. It went so far as to suggest the remaining works better in a clear cutting method. Here is no longer any room for the conservation of the natural environment. The idea was to present the clear cut method as a way of life that could be the future of the timber harvest.

Every time I have gone to plant a well-prepared clear cut, the man in charge had a habit of saying, "Come on guys, this is easy ground. You should be able to plant faster than that." I have heard one government official promise, "I will buy a six-pack of beer for the first man to plant a thousand trees." The quantity was often spoken in terms of quality.

I would ask the people who made the commercial, and the government officials who sanctioned it, if that was what they intended. I am not speaking of timber harvest. I am speaking of the timber harvest. What does the clear cut method of timber harvest mean? It is the practice of selective cutting, which is, in a manner true or a seed group of trees for wood products.

Clear cutting is the technique of cutting down trees, the area itself, the area around it, and the area has been done for use in wood products manufacturing.

The forests belong to you.

We invited a few friends for dinner and they helped clean up the Genesee River.

With the aid of a few thousand pounds of microorganisms, we're helping to solve the water pollution problem in Rochester. Maybe the solution can help others.

What we did was to combine two processes in a way that gives us one of the most efficient water-purifying systems private industry has ever developed.

One process is called "activated sludge," developed by man to accelerate nature's microorganism adsorption. What this means is that for the majority of wastes man can produce, there is an organism waiting somewhere that will happily assimilate it. And thrive on it.

The breakthrough came when Kodak scientists found a way to combine the activated sludge process with a trickling filter process and optimized the combination.

We tested our system in a pilot plant for five years.

(At Kodak, we were working on environmental improvement long before it made headlines.) And the pilot project worked so well, we built a ten-million-dollar plant that can purify 36 million gallons of water a day.

Governor Rockefeller called this "the biggest voluntary project undertaken by private industry in support of New York State's pure-water program."

Why did we do it? Partly because we're in business to make a profit—and clean water is vital to our business. But in furthering our own needs, we have helped further society's. And our business depends on society.

We hope our efforts to cope with water pollution will inspire others to do the same. And, we'd be happy to share our water-purifying information with them. We all need clean water. So we all have to work together.

Kodak
More than a business.

Bronco comments

By Larry Burke

Many people think that football victories are made of only physical things, like strength, quickness, and agility. This may be true in part, but there is another aspect to the game that is often unseen and unknown to the spectator, and that is the mental side of football.

Getting a squad 'up' for a contest is as important as preparing a team physically. One only has to go back to last year's Idaho-BSC game to find an example of two teams who were mentally keyed in different ways. Obviously, Boise State wanted victory; they prepared themselves, and reapèd the rewards.

Last year's Bronco team also had another mental characteristic that allowed them to cross the thin line that divides winners and losers. They never gave up, whereas the Camellia Bowl.

Before this season Tony Knop wondered whether the 1972 Broncos would have that mental quality that could make them winners.

Physically, Knop said that the team is better than last year, but he would have to wait until the squad was tested before he would know how they compared in mental attitude.

Now he knows. Last Saturday on unfamiliar Humboldt turf the Broncos showed the mysterious elements that made them a winners last year...they dug deep and came from behind to capture victory. Mental toughness played just as important a role as physical toughness. It is both that produce winning results, and last weekend the Broncos had them.

Tony Knop is giving some interviews to his two coaches Jim Paffget and Bud Hohnhorst. In the background is Coach Doug Winter. Other Bronco in the photo are Art Berry, 17; Jim McMillan, 12; Paul Ferguson, Mike Cerny.

Arbiter contest won by Paul Fisk

We have a winner! Paul Fisk, while working lines at the venerable Delta King weekly football prediction contest, not only led the entire Arbiter column in the weekly contest, but took first place in the Nose Dive column as well.

Rules

Predict the winners in each of three games and write these choices in the blanks.

Fill in your name, address, and telephone number.

Leave the entry blank at the CUB Information Booth, or the Arbiter office.

Entries must be in before 5 p.m., Friday, Sept. 22.

In game number 10 choose the winner and the number of total points you predict will be scored.

Game

USC—Michigan State
Brigham Young—Oregon State
Montana State—Idaho
Montana—U of Pacific
California—Oregon
Las Vegas—Cal Riverside
Colorado—Oklahoma State
Idaho State—Portland State
Maine—Bucknell
Boise State—Webber Total Score

Your Choice

Boise State won in X—country

Boise State started the Jim Hatcher an Idaho graduate
new cross country season in
his first place in the races that
did not figure in the point totals.

The season gave the Broncos a
perfect fifteen points, followed by
Washington, 12, and California, 6.

Bob Walker and Ron
Grundt took second from with a
time of 15:26, and they were
followed by teammates John
Loepp, Jeff Day, and Randy
Thomas.

The event was won by

Backpacking

The Physical Education Department is offering a three-day trip to the Great Sand Dunes National Monument for State College students on Sept. 29. The outing is open to all Outdoor Activities program participants of the department.

Approximately 35 have signed up and the original fee of $18.00 is due to the department by the 12th. The completed trip will be limited to 50 students, with a $25.00 per person participation fee.

The day will begin at 8:30 a.m. with an introduction to the trip, followed by a packed lunch and a meeting with the guide. The group will then set out for the trek to the Great Sand Dunes National Monument. The staff will tell the story of the area and the students will have an opportunity to enjoy the scenery.

The second day will include a day hike to the top of the dunes and a visit to the town of Alamosa. The group will then return to the dormitory area for an evening meal and return to the campus by 10:00 p.m.

The final day will be a day hike to the upper section of the dunes and a return trip to the dormitory area. The group will then return to the campus by 10:00 p.m.

Weber, Montana win in Big Sky action

Weber took a giant step toward its conference title on Saturday afternoon when it defeated Montana 27-13 at Ogden. Weber is now 5-0 and Montana 4-1, but it is the Beavers that have the conference title in their grasp.

The game was a defensive struggle with Montana holding a 13-3 lead at the half. Weber came back strong in the second half to win 27-13.

Boise State Bronco cross country team lacks depth, hopes for third again

Last year the Boise State cross country team finished third in the Big Sky Conference championships, and a repeat of that performance would be most welcome according to the Bronco officials.

One problem that could keep the Broncs from finishing any higher is the lack of depth on the team. So far the official roster shows only five runners on the squad, and the first five finishers are scored in cross country. This means all 12 of the Bronco runners must finish high, and must show a great deal of ability to make up for the lack of numbers.

Coach Ray Lewis, in speaking on the Bronco problem, said, "Individually everyone was good, but we just didn't have the depth we need for a good cross country team.

The Boys in the number one spot or for this fall is John Fitch, a senior who helped the officials improve over last year according to assistant coach Walt Glasson, and is expected to do well for a good reason. Within weeks of moving from Chicago he started playing with the Big Sky Conference last season, and Glasson said Fitch is the best runner the Bronc has had in a number of years, which attracts the best runners.

Wally Banton, a junior from Mountain Grove, made the lineup, but Glasson feels the best runner for the team is Mark Reed, a junior from Champion.

Right now the team is the favorite to win the Big Sky title, but Glasson said, "I don't think that will stop us from trying to improve our team.

BRONCO CROSS COUNTRY SCHEDULE

Sept. 28 Boise, Idaho
Oct. 14 Idaho Falls, Idaho
Oct. 21 Colorado, Colorado
Nov. 11 Boise State Big Sky Championship

Intramural sports now beginning

Several events are an exciting new activity for fall sports.

Intramural sports have been to the forefront ever since the University has been founded. The Bronco has been participating in them for over 100 years. Intramural sports were started to give students a break from the pressures of school and to provide a chance to compete.

Intramural sports now beginning.

Join No. BSC Skydivers

- One of the most exciting activities in the Intramural program is the Skydivers. The Skydivers are a group of people who skydive for fun and competition. They are always looking for new members to join their group.

- The Skydivers meet every Tuesday night at 6:30 PM in the OYAHHEE ROOM CLUB.

- The Intramural program offers many different sports for students to participate in, including basketball, volleyball, and soccer. Students are encouraged to join and have fun with their friends.

- Join the Intramural program and have fun with your friends. The Intramural program is a great way to stay active and meet new people.
Gridders show promise

By Tony McLean

Playing down eight points for 121 yards and nine touchdowns, Al Marshall was honored with the Big Sky of the Week Award after BSC played by Humboldt State 27-15 on last Saturday's football theater on Arco, California.

The game didn't end so easily, however, as Marshall paired with Goodman in Bronco Athletic Association honors of their weekly meeting. Marshall received the offensive award and Goodman, who created the Humboldt Style tackle to set up the winning touchdown, was honored for the defense.

Run Aubrey, who played down 12 of 22 passes for 179 yards, can be credited for leading the Bronco, drive to counter. Defense was the key factor for BSC, John Stimson recorded on the pass in that Goodman spoiled. Greg Frederick pulled down two Lumberjack awards and Dier blanked a Humboldt State P.A.T. He.

Fer Raby scored for 40 yards in 30 men and Herb Horner ran up with 35 yards in 11 games.

This Lumberjack runner was stifled by Joe Larkin (23) and Greg Frederick (14) to halt a Humboldt drive.

Above: When quarterback Ron Ande gambled, he found himself running for his life.

Below: After making this reception deep in Lumberjack territory, Marshall was forced to hit the dirt.
