**Boise State receives $23.8 million for research and sponsored projects**

**By Cean Siegel**

Research at Boise State University received a financial boost for the fiscal year 2006, bringing in $23.8 million: the second highest total in Boise State history. Some research projects involved several federal agencies and private foundations.

**Preventing identity theft from the National Crime Prevention Council:**

Prevent your social security number from being a target by following these tips and staying informed.

**Wednesday, High: 69F / Low 62F**

**KUSU President Bob Kustra spoke about the importance of the research done at Boise State in the area of crime prevention.**

In his role as professor in the Department of Justice and Criminal Justice, Kustra said, "This kind of research is crucial to the field of criminology and to society. The results of this research will be used to develop policies and programs that can help reduce the rate of crime."

Kustra also emphasized the importance of social media in crime prevention. "Social media has become an increasingly important tool in the fight against crime," he said. "We need to ensure that these tools are used responsibly and that they are not abused."
Cluster bombs threaten civilians in southern Lebanon

Lebanese explorers found Israeli shells that killed and wounded more than 40 people and destroyed 10 buildings. The cross-fire fighting between Syrian and Hezbollah forces over two weeks ago, according to United Nations concern, was a violation of the terms of the September 2006 agreement to end the conflict.

As many as 30,000 pieces of unexploded ordnance, including cluster bombs, were found in the affected area. The ordnance, which can be dropped from the air or fired from mortars, can cause hundreds of small explosions over a wide area to kill or maim innocents. Because of the nature of the ordnance, the civilians who live in areas where it is dropped will often remain in their homes, making the destruction of the ordnance difficult.

Cluster bombs have long been condemned. The weapons, which can be dropped from the air or fired from mortars, can cause hundreds of small explosions over a wide area to kill or maim innocents. Because of the nature of the ordnance, the civilians who live in areas where it is dropped will often remain in their homes, making the destruction of the ordnance difficult.

City officials have failed to destroy the unexploded ordnance. "All the weapons and ordnance were destroyed," said Mayor Lemmon. "But the ordnance, the unexploded ordnance, the ordnance that's unexploded, is very dangerous. Even if we were able to explain the unexploded ordnance was destroyed, it's not the same, because there are still these unexploded ordnance that could be very dangerous." A report by Human Rights Watch this year said that unexploded ordnance was being destroyed when it was placed in the ordnance. In 1996, Richard Bicknell was killed in the ordnance.

The State Department is investigating how the ordnance was destroyed. "I think the ordnance was destroyed," said Mayor Lemmon. "But why would they be using it?" The ordnance, which can be dropped from the air or fired from mortars, can cause hundreds of small explosions over a wide area to kill or maim innocents.

For law interns, work comes with big perks

By NATHALIE SINGER

Jerry Taylor was all nerves before he started his summer internship at a big Seattle firm. Not that John Schubert, his mentor, worried about it. He worried about the other interns, whether they would impress their superiors, whether they would do enough, whether they would stay their entire 10-week period.

As a 20-year-old student with no business major, Jerry had no idea what to expect. He had never even been to a big-city law firm before. "I was under a lot of pressure," he admits, "when I arrived at the law firm and realized how much the interns had to do."

Jerry was one of three 10-year-old students who had graduated from Seattle law firm for what was a "10-week internship." The firm, Schubert Barer, is a member of the Seattle law firm that is known for its "10-week internship program." The program allows students to experience the law firm's culture and to learn about the firm's work environment.

Jerry already had an idea of what to expect when he arrived at Schubert Barer. He worried about the other interns, whether they would impress their superiors, whether they would do enough, whether they would stay their entire 10-week period.

Jerry is a senior at Seattle University. He is majoring in political science and is planning to go to law school. He is also a member of the Seattle University Student Bar Association. Jerry has three summer associates.

Jerry's summer internship began with sweeping views of Puget Sound, Seattle's famous harbor. Jerry was ushered into his private office with sweeping views of Puget Sound, Seattle's famous harbor. Jerry was worried about the other interns, whether they would impress their superiors, whether they would do enough, whether they would stay their entire 10-week period.

**Globally**

**HOT**

Paparazzi down Cruise, YEA! We’ve seen him jumping in the air and skiing down fire tracks and covering the pages on the front, but finally Tom Cruise gives what he deserves: kudiculous behavior.

**Locally**

**I forget that there is always an alter-native behavior and a preception of scriptures:**

The news of Cruise appears to be somewhat, which leaves me asking: What? All my fans are seeing Cruise for the first time, but where a company drops him, that’s that.

**NOT**

Some strange sides:

Registration is a positive preceding idea.

Heavy flow of this addiction you can’t help but enjoy. Even my own roommates expressed the least amount of the most readily watched reality TV shows that we’ve ever seen. That’s great, the result is in reality TV. But, it’s not fun, white, blacks, whites, whites and whites.

He got the award in Entertainment Weekly. Yes, his decision, try to have the most evil show ever seen. It’s in the center of my life.

My reason for this is that every show in reality social services comes from something, that is not adding for more ethnic representation, but in many ways it is.

I don’t think that the show may continue to bring in the ratings, this doesn’t mean that it’s great. Locally

Boise State vs. Oregon State

BY JAKE GARCIN
Sports Editor

Eight months worth of questions were answered in one single-play second quarter game as the Boise State Broncos took it to the Oregon State Beavers on Saturday, October 21 and Sunday, October 22. The Saturday session will begin at 9 a.m. with registration at 8 a.m. The field will be lined with 5,000 new acres of terrain for its seventh year of coaching. The Beavers were able to score 252 points on the game against the Ferrets, Johnson led the way with 83 rushing yards on just 13 carries for the game. BSU did manage to balance out the attack in the later quarters, doubling 222 yards on just 13 carries. Zabransky completed 11 of 20 passes for 161 yards in just one quarter of work. Zabransky gave a good deal of credit to all of his running backs, after the game, by hitting the offensive pass phase.

"We know what we need to do with the offense," Zabransky said. "You know how important it was to do the offensive pass. The first five times we touched the ball we passed it down the field and got it in the end zone. I think we were better from an offensive standpoint when you get a good offensive pass like that, and the running backs are moving the ball down the field. We opened up our offense." Zabransky was settled with the team, he remained focused to hit his players in a positive manner throughout the game. Senior linebacker Greg Brooks ran a seven game winning streak including one one hole last on a Cardinal seven game season in the third, which sprung high for a 20 yard return of the kickoff. Brooks finished with eight tackles and one interception in the game.

"The game was pretty good for us," Brooks said. "We had two weeks we really focused on playing different things. It was a team game against the same people. It's a great start for the offense. Coach Pete was really excited to advance us this week, really excited. Zabransky is doing a great job of throwing on us and us and the offensive line. I felt very comfortable back there. It's easy to feel comfortable back there when you have a good offensive line like we do, and the running backs are moving the ball down the field. We opened up our offense." Brooks received a large chunk of support from the Broncos defense, which continued to put pressure on the Oregon State offense and cost the Beavers many yards. Brooks was thinking of additional Oregon State plays he could have made.

"We've got a lot of work to do with the defense," Brooks said. "I think we played well; played in first half. The offense's game was a true statement of what we could be, and I think our team is excited. The defense never gave up, but I think we have a lot of work to do."

Tamarack unveils expansion

Tamarack ski resort is unveiling $3 million in expansion this season. Under a special agreement with the Tamarack Ski Resort Service, Tamarack will offer guided terrain to the north and south of the ski area. This expansion will increase Tamarack's terrain from 33 miles to 36 miles.

"It was a very exciting day," said Pete West, Tamarack ski resort general manager. "We're very excited about the new terrain that's been opened, and we're very excited about the new facilities that have been completed." West said the expansion was in response to the increasing number of visitors to the resort and the desire to offer a wider range of terrain.

"We're very happy to be able to offer this new terrain," said West. "We hope it will help us to accommodate the growing demand for ski terrain in the area." West said the expansion would include new trails, new lifts and new facilities to support the increased number of visitors.

US loses free-trade to Beijing

For the second time in as many international competitions, the United States came up short. This time with Boise State's inability to score a final goal to secure the World Championship to the United States. Furthermore, this time there will be no repeat to the 2000 Olympic Games for the United States in the World Championship for USA Basketball.

The World Championship for USA Basketball is the pinnacle event on the basketball calendar. It is the ultimate test of the skills and talent of the nation's top basketball players. The United States has always been a strong contender for the championship, and this year was no exception. However, the United States fell short in the final game, losing to China in a heart-wrenching loss.

"I don't know if there's a way to describe it," said Coach Mike D'Antoni. "I don't know if there's a way to put into words how disappointing this is." D'Antoni said the United States had a chance to win the game, but failed to capitalize on their opportunities.

"We had a lot of chances to win," said D'Antoni. "We had the ball in our hands, and we didn't make the shots when we needed to." D'Antoni said the United States had a difficult time scoring against China's defense.

"Our defense was excellent," said D'Antoni. "We had a lot of defensive stops, but we couldn't get the shots to fall." D'Antoni said the United States had a tough time scoring against China's defense, and they needed to make more shots when they had the opportunity.

"We have to work to be done to ensure that it doesn't happen again," said D'Antoni. "We need to work on our offense, and we need to work on our defense." D'Antoni said the United States had a lot of work to do to ensure they could compete at the international level.

"We have to get better," said D'Antoni. "There's no question that we need to get better, and we need to work on our offense." D'Antoni said the United States had a lot of work to do to ensure they could compete at the international level.

USA basketball hits another roadblock

BY JAKE GARCIN

Drisan James caught three passes for 125 yards and a touchdown against Sacramento State.

BY JAKE GARVIN
Sports Editor

Drisan James has seen enough of the past few years to know how to understand his role on this year's football team. Prior to the Boise State season opener against Sacramento State, however, everyone else had yet to figure out exactly what his role was going to be. After 56 total yard receptions Thursday night, the Boise State receiving corps was once again a question.

One of the biggest questions marks for Boise State quarterback Jared Zabransky was who would step into the deep threat role from wide receiver. One at a time, Corey Greenleaf, Twan Jones Jr. and James recognized after the game that he's just doing his job. As James recognized after the game that he's just doing his job.

"I was fortunate to have guys to help me out." James said. "I'm fortunate to have a good running back in Jared Zabransky who gives me the opportunity to do what I do."

James also noted that the more he has been able to "get in and out of the play, the more I can do." James was also quick to note that he doesn't want to be "out there with that in mind."

"I was fortunate to have guys to help me out." James said. "I'm fortunate to have a good running back in Jared Zabransky who gives me the opportunity to do what I do."

James accepted the credit, but also seems to be staying grounded. He also seems to be staying grounded.

Tweaking the BCS - again

BY RANDALL MELL
South Florida Sun-Sentinel

Tweaking the Bowl Championship Series may seem easy, but it's not. While the system operates fairly well, there are a few aspects that take time to adjust. The issue isn't necessarily the rankings, but the selection of teams and the format. The goal is to have a system that is fair, exciting, and rewarding.

The current system is criticized for being too subjective. The rankings are based on opinions, which can vary greatly. The BCS is criticized for being a popularity contest, and it's true that the rankings can be influenced by media coverage and public perception.

The BCS is also criticized for being too rigid and inflexible. The system is designed to select the top teams in the country, but it's not always easy to界定 the best teams. The system also has a tendency to favor certain conferences and teams, which can be frustrating for fans of smaller programs.

There are a few possible solutions to these problems. One idea is to add more games to the BCS system. This could help to increase the number of games that are considered and the different perspectives. Another idea is to use a different ranking system, such as a computer system or a more objective system.

The BCS is a complex system, and it's not easy to find a solution that works for everyone. However, it's clear that the system needs to be tweaked and improved to make it more fair and exciting. Only time will tell which changes will be made and whether they will be successful.
