Coben migrants land on island near Florida

Twenty-seven Coben migrants, who arrived in Fiji from China, are stuck on a small island off the coast of the U.S. before they can begin their new lives.

They arrived at about 6 a.m. on the small island in Fiji. The U.S. government is considering what to do next.

The migrants had been on a boat for two weeks, and the U.S. and Fiji governments are working to find a solution.

Idaho Fish and Game

Appoint Grand as Director

The Idaho Fish and Game Commission appointed Larry McDaniel as the new Director of the agency.

McDaniel, who has been with the agency for two decades, replaces former Director Dave Watson.

"Larry is a valuable asset to the agency and has the experience and knowledge to lead the department," McDaniel said.

"We are excited to have him on board."

WHAT THE?!

A man was caught in the parking lot of a supermarket in Boise, Idaho, with a large bag of stolen goods.

Police said the man had been spotted multiple times at the store, and they believe he may have been involved in a larger crime.

The man was arrested and charged with theft.

"We are taking this very seriously," a police spokesperson said.

The Headlines

The Secretary of Interior James Watt and Sen. Bob Packwood will meet to discuss the future of the National Wildlife Refuge System.

The Refuge System is a network of protected areas that are managed for the benefit of wildlife and the public.

"We need to work together to ensure that this system continues to be effective," Packwood said.

"I am confident that we can find a solution that benefits both the public and the environment."
Boise State University honors exemplary faculty members

By JOSLYN SALOW

The Boise State football team's dramatic victory in the Turf Bowl was a cause for celebration and soap operas for many students, but it's also a significant month for diamond mining enthusiasts.

The month of February stems from the year 1307, when Edward III granted the right to mine diamonds in the United Kingdom. The first diamond mine in the world was opened in Kimberley, South Africa, in 1871, and the production of diamonds has since become a major industry.

During this time, the Star of Africa, one of the most famous diamonds in the world, was discovered. It is a 186.78-carat diamond that was purchased by the British government in 1841 and is now part of the collection at the British Museum.

At first, diamonds were believed to be rare and valuable, and only the wealthy could afford them. However, as time went on, the value of diamonds began to decrease, and they became more common.

In addition to the Star of Africa, other famous diamonds include the Hope Diamond, the Cullinan Diamond, and the British Diamond.

This is what makes each diamond unique and special, and why they are so sought after by collectors.

The Boise State football team's dramatic victory in the Turf Bowl was a cause for celebration and soap operas for many students, but it's also a significant month for diamond mining enthusiasts.
Micron Technology Foundation donates $12.5 million to BSU

BY CANE SIGEL
Assistant Sports Editor

The College of Business and Economics recently received a substantial financial boost after a $12.5 million from the Micron Technology Foundation. The money will be used to build a new building located on the present University Inn site, at the corner of Capitol Boulevard and 20th Street. The foundation and Boise State University announced the conjunction on Friday, January 18, at a press conference held in room 3-B President Bob Kustra spoke to the small crowd gathered in the hallway.

"Today is truly a historic mo- ment for Boise State University, and of course it simply would not have happened if it wasn't for the gener- osity of the Micron Technology Foundation," Kustra said. According to Kustra, the money is to be used to construct a new building that will serve as an additional marketing, and in other areas to support a variety of programs, including a new faculty in the coming years, "It will greatly enhance our abil- ity to attract, retain and support faculty, programs and endowment pro- jects," Kustra said. When all is said and done, Micron's investment will help the college and Boise State University, but also the greater Idaho community.

"This is a true partnership, a great partner in education, helping Micron and others achieve success through the success of its faculty and industry. We believe this investment strengthens our culture of excellence and will help attract the best and brightest scholars to our institution," Kustra said.

Currently, the College of Business and Economics has only 3,600 students and continues to grow. According to Dean Howard Deemooney, the college is a "great partner in education, helping Micron and others achieve success through the success of its faculty and industry. We believe this investment strengthens our culture of excellence and will help attract the best and brightest scholars to our institution,\" Kustra said.

"The Micron Foundation, too, is a true partner in education, helping Micron and others achieve success through the success of its faculty and industry. We believe this investment strengthens our culture of excellence and will help attract the best and brightest scholars to our institution," Kustra said.

If you didn't get your computer from Santa, you may want to give thought to the level of performance you actually need. We all have a tendency in this age of intense product marketing to think the "latest is the greatest." For the (wealthy) extreme gamers and crunchers, this can be a mistake. For the rest of us our needs don't even approach the requirements for $2,000 wonder machines. Most students and the net, e-mail, occasionally download and play games, write papers with a word processing program and save information in a spreadsheet. This is not taxing work for virtually any of the computers in stores today. My personal PC doctor is Kelvin Thornton of Computer Restorations (www.computerrestorations.com). In talking to Kelvin, it's his experience that for the vast majority of desktop usage, the basic $500 machines are more than adequate. Coupled with $20 to $50 in a graphics board, RAM and all other peripheral needs, these machines can handle your papers, surfing, downloading and light gaming with ease. Kelvin stresses that one should likely avoid the off-the-wall or really cheap manufacturers as they tend to use spot market parts that may not be up to spec. My own desktop is a 6-year old HP 800mhz Pentium III running Windows XP. That 'right, I said a PIII. It has four gigabytes of RAM and can surf the net, play games, watch streaming video, run a spreadsheet and do your taxes. This PC is worth about $500 on the used market; not it will be worth the added cost. Windows XP is going to be around at least the next five years. I cannot tell any difference in the speed that it prints papers pictures or the net compared with the P4. In fact, we've had no problems with AMD, and don't yet see the end. The bottom line is that our computers need to be good, not great. You can be productive on a computer for less than $800. Improves your peace and your wallet; the $1,200 you save can go for more important things. Like dating, gas or own necessities.
Goodbye idealism, hello Democrats

Michael J. Mclaskey
Opinion Writer

Unlike most conservative pamphlets, I was excited to read In the Garden of the Idahoan by Jon Sanders. I'm not just the only woman in the state of Idaho to think this way. I own a real estate business and have had my own ideas come to life. I know that a government that is proactive and outcome-oriented, where there is a government that is proactive and outcome-oriented, is where I belong.

But in our current-mid-term election season, I started having second thoughts: "Will I be becoming a Democrat?"

On Wednesday, I was thinking about whether to vote for the Democrat in my district. I was considering the role of party affiliation, the importance of votes, and the potential impact on local and national issues.

On Thursday, I was reflecting on the importance of individual accountability and the need for individuals to take responsibility for their actions.

On Friday, I was pondering the role of party affiliation in shaping our perceptions and the potential for parties to influence public policy.

On Saturday, I was considering the importance of individual agency and the role of individuals in shaping the course of history.

On Sunday, I was reflecting on the importance of individual agency and the role of individuals in shaping the course of history.

For me, the decision was clear. I decided to support the Democrat in my district. I believe that it's important for individuals to take responsibility for their actions and to work towards creating a better future for everyone.

Your head hurts, your mouth feels as if you've eaten steel wool, your eyes want to close, and you can't see across the room. The only good news is that you recognize the person sleeping beside you as your significant other. This is a hangover.

"You drank too much, and now you're paying the price," says Mike Pearson, co-founder of HangoverReview.com.

What to do? The only time-tested method is to take a couple of aspirin or ibuprofen and drink a lot of water. If that didn't work for you, says Dr. Charlene Prather, associate professor of internal medicine at St. Louis University School of Medicine, anything else you do will be wasted. Just get the alcohol out of your system and replenish the nutrients that the alcohol drained away. Get some rest.

"It may be a form of withdrawal," Prather says. "But it may be because things in alcohol are toxic. We can't be sure if the dehydation from drinking too much in the big cup. Men are a different, and it causes a lot of pain," she says. The symptoms of a hangover mimic those of severe dehydration. Also, Prather says, the pain could come from constricted blood vessels or inflammation of something in your head. That's why it feels so bad. It's not, however, one of the 30- to 35-hour cavity that some doctors believe hangs around in the bloodstream for weeks. While they've been around since the early 1900s, it never shows itself up in the bloodstream again.

Mike Pearson, co-founder of HangoverReview.com, and his associates interviewed more than 50 pills and capsules on the market and concluded the newer pills are variations of the old pills. Some work best by taking one before going to bed, others by taking one or two between drinks. HangoverReview.com also has the ingredients in these pills in the product name. Hangover products contain a variety of foods and minerals, such as aspirin, ibuprofen, or the combination effect of more than a placebo. Pearson did not name the most effective over-the-counter hangover remedies. Only one, Alcohol Hangover Relief, claims to work after a night of drinking. The others are preventative a little late for the day after the party.

"Take them before or during your misbehavior: Sobri HangoverStopper: It's taken primarily before drinking. It says it prevents the chemicals that cause hangovers from entering your bloodstream by absorbing them in the digestive system. Chaser and RU21: They use minerals, foodstuffs and homeopathic ingredients (herbs). They claim to help the body process and expel the chemicals. The more experienced scientists, including Mark Pollman, a freelance bartender, author of books about bartending and spirits, and member of the Bartender Hall of Fame, has less high-tech advice.

"I would say, 'Don't drink too much in the first place," Pollman says. "If you do, put something really nice and greasy in your stomach before you start." He suggests sleep as a remedy unless the beverage of choice is wine, in which case he recommends drinking water before going to sleep. "Take a couple of aspirin and go back to bed," he says. "But know that drinking is fun, a wonderful thing, as long as you're in control. When it starts controlling you, then you have a problem."

Women's basketball wins again

The Boise State women defeated the University of Idaho 66-63 inivity Saturday night in renaissance, 10-0 to open NW Conference play. The Broncos were

“(She’s) very good to have on our team,” coach Graham said. “She can do almost anything for us on the court.”

The game was competitive throughout, but in the end the Broncos were too strong for the Vandals, winning 66-63.

Boise State led 15-5 at the end of the first quarter and 33-28 at the half.

The game was a seesaw battle, with the Broncos leading by 10 midway through the second quarter. But the Vandals were able to pull within 6-3.

Boise State (10-0, 1-0 WAC) will host Colorado State (7-3, 1-0 WAC) on Saturday night, while Idaho (10-3, 0-1 WAC) will travel to Utah State (7-6, 0-1 WAC). The game will tip off at 7 p.m. at Bronco Gym.

Boise State gymnastics scores second place finish against Idaho

Boise State gymnastics competed against Idaho on Saturday night at Bronco Gym.

The Broncos improved their conference record to 3-3.

The Broncos scored a total of 190.500 points, while Idaho scored 188.100 points. It was a close match, with the Broncos defeating Idaho by just 2.400 points.

Sophomore Taylor Jacob led the team, finishing third in the floor exercise with a score of 9.800. Jacob also placed second in the team all-around with a score of 39.400.

Sophomore point guard Tasha Harris led Boise State with a team-high 14 points.

Harris led Boise State with a team-high 14 points.

The Broncos have now won two consecutive home games, and they are looking to continue their success in the conference.

Men’s tennis qualifies for big event

BY KYE JOHNSON
Assistant Sports Editor

On Saturday night the Boise State men’s tennis team wrapped up the Mountain Region Dual Championship by beating Utah State, 4-0, to gain its first NCAA bid since 2007. “We're playing with a chip on our shoulder and that’s what we’re going to bring to every game,” said head coach Mike Dilaj. "And that’s a good match." Dilaj, who is in his 10th year at Boise State, said his team's performance in the Mountain Region Dual Championship was a turning point. "I think they’re starting to believe in themselves and that they can win,” he said. "I think we’re starting to see some growth in the team.” The Broncos finished the season with a 14-9 record, including a 6-2 record in conference play. "We played well at home and we played well on the road,” Dilaj said. "We have a strong team and we’re going to continue to improve.” The Broncos will face off against Stanford, Arizona State and Cal State Fullerton in the NCAA Tournament. "We have some tough opponents, but we’re confident in our abilities,” Dilaj said. "We're going to go out and compete and see what we can do.”

BSU indoor track season begins

The Boise State men and women track and field team kicked off its 2007 indoor season at the Hampton Inn Classic in 2007. Both teams entered the meet with high expectations for their respective seasons.

The men, who are more than six times the size of their women counterparts, took on against Boise State. Young University, the University of California, Eastern Oregon and Northwest Nazarene for the first time.

“On the front, we were hoping to challenge for the NCAA championship,” said Bates. “Our goal was to improve on last year's performance. We have a lot of depth and we're hoping to make a statement.”

The women, who hope to challenge for big events in Boise, said they are ready for the season.

“With the depth we have, we have a good chance of making the NCAA championships,” said Bates. “We’re ready to compete and make our mark.”
