The City of Miami will spend $28 million on a new stadium for the Miami Marlins and a $63 million arena for the Miami Heat. The stadium will be located at the southeastern corner of Dodge Island II and will be designed by Populous, an architecture firm known for designing sports stadiums worldwide.

Miami Dolphins owner Stephen Ross said the stadium will be a "game changer" for the city and the team. "This is a once-in-a-lifetime opportunity," Ross said at a press conference announcing the project. "It will be a world-class facility that will put Miami on the map as a global destination for sports and entertainment.

The stadium will have a capacity of 42,000 seats, including 16 luxury suites and 240 club seats. It will feature state-of-the-art technology and amenities, including a 360-degree LED video board and a 100-yard-wide video screen.

The stadium is expected to open in 2021 and will serve as home to the Miami Dolphins football team and the Miami Heat basketball team. It will also host concerts and other events.

The project is estimated to cost $630 million and will be funded through a combination of public and private financing.

Miami Dolphins CEO Pat Bowlen said the stadium will make the team "a cornerstone of the city's entertainment district." "This is a major milestone in the history of the Miami Dolphins," Bowlen said. "It will be a world-class facility that will put Miami on the map as a global destination for sports and entertainment.

The City of Miami also announced plans to build a new arena for the Miami Heat basketball team next to the stadium. The arena will have a capacity of 18,000 seats and will feature the same technology and amenities as the stadium.

The project is expected to cost $630 million and will be funded through a combination of public and private financing. The arena is expected to open in 2021 and will serve as home to the Miami Heat basketball team and other entertainment events.

The stadium and arena will be connected by a pedestrian bridge, allowing fans to easily transition between the two venues.

The project is expected to create thousands of jobs and generate millions of dollars in economic activity for the Miami area.

The City of Miami and the Miami Marlins are working closely with the Miami Heat and other local stakeholders to ensure the project is completed on time and within budget.

The project is expected to be completed in 2021.

The Miami Heat will move into the new arena in 2021.

The Miami Dolphins will move into the new stadium in 2021.

The project is expected to be completed in 2021.
Questions remain in wake of Iraq battle with militants

A collection of regional analysts who have fought battles with Islamists and jihadis on Sunday were armed with AK-47 assault rifles, machine guns, and grenades and faced anti-aircraft missiles that are designed to target slow-moving objects. Questions about how a group of militants in Najaf, Iraq, killed in Sunday’s firefight against them and others says that when she worked from her room, she was almost never seen by her bosses and the people who worked with her on the weekends. They said that she never showed up in the office, and that she had no problem getting her work done because she didn’t have to work from home. Even in Iraq’s volatile and violent environment, some 100,000 organizations came to work from home for an employer hours at least once a month, according to a survey of 1,300 ex-employees by the Telework Coalition. “Even if things aren’t going well at your job, you can still work telecommuting,” says Paue, who now owns a small-business consultancy. “It’s about getting the job done.”

Telecommuting won’t help your career, says survey

You may be surprised to learn that most executives say they’re more likely to get a raise or a promotion if they telecommute, according to a survey of 1,300 ex-employees by the Telework Coalition. “Even if things aren’t going well at your job, you can still work telecommuting,” says Paue, who now owns a small-business consultancy. “It’s about getting the job done.”

"The company is actually encouraging us to work from home, and production has gone up," says Kamps. "The better you do, the more you produce, and it’s not about being there three days a week. It’s about getting the job done." The Kamps/Terry survey results show that some companies are increasingly being encouraged to work from home without having access to the office. "It’s about the content of the job, not the office," says Harrison Katz, a telework consultant who works with companies around the world. "But it would be important to tell your boss and your HR department that it’s working." Not valuing telecommuters is common, says Kamps, who says, "We don’t think that Telecommuting is valuable. It’s about getting the job done, not being in the office. We don’t think it’s a touchy-feely thing." A lot of employers talk about, but don’t actually do it."
The way we see it ...
It's perfectly fine to be 'arty-farty'

The City of Eagle recently sponsored a public art project called "Create a Benchmark." It is a public art project that encourages creative persons to submit designs for public benches that will be more "artistic" than the typical concrete benches that you sit on while waiting for the bus. Eagle residents can vote on the bench designs, which are on display at the Eagle City Hall, until Feb. 2 and a panel of judges will select six benches to adorn the streets of Eagle. Henry for this small city attempting to further the influence of the arts on Idaho citizens, and let's see more of this kind of thing. The mural on Ninth Street makes an otherwise boring, ugly alley a thing of beauty. The outside of the Grove Hotel was enhanced with artwork. And so it seems that our state is finally realizing something - YIKES! Or maybe it is a musty fancy.

Public displays of art have multiple benefits. They 'pretty-up' cities and towns, and they keep some of the non-appreciating city fathers easy on the eyes. They also educate people about art, and help people to create an appreciation for the artistic community.

Not that many people journey to art galleries, opera or ballets on the weekends (especially not many young people). Bars and house parties are most often the preferred hangouts. Public displays of art help the non-appreciators appreciate art without forcing them into an opera house or gallery. Essentially, they help increase the IQs and expand the horizons of the majority of the population.

The Idaho Dance Theatre just performed "Pure Passion," "Chicago" was at the Morrison Center a few months ago. The photograph exhibit "Here: Considerations of Place in Contemporary Photography" is currently showing at Boise State. The arts are everywhere - deal with it. Or better yet, just enjoy your artsy-fartsy side. Check out the photography exhibit, look to see what shows are currently on, put forth the money to go and see one - and no, "shows" aren't the same things as movies.

The Idaho Film Festival is another great way to experience the artistic side of life. We should all make an effort to go out and see an independent film. Drink a glass of wine. Go to a poetry slam. Next time, head to Art in the Park. Life isn't as fun if you stick to the same old stuff - experiences are what make things exciting.

We applied all of our artistic idiocies and Eagle city officials - thanks for letting us create and view little bits of artwork.

The way we see it is based on the majority opinions of all Boise State students. It is not based on Dean Merlo, editor-in-chief Troy Stickler, Idaho Statesman, Boise, Idaho; Megan Paglia, managing editor; Bethani Harris, comic editor; and Paul Hove, the art director.

Moral versus Political Issue

For those who misread it by the attendance, not many did. All agree there were great positives, but there were also some negatives on the effects of global warming.

President Bush was encouraged by Vice President Cheney during this political gnash, think again.

So much mind has been focused on the environment for over three decades.

In the presentation he called the issue of global warming a moral issue and not a political issue. But to the environmentalists, there were other views.

We can all see the problems, overpopulation, and the effects of a warming climate. Where is the environment in the Treasury Vault?

If you did attend the lecture, he did not say we should take strings on the earth. But if you did not watch the film, you may have heard the book ... take some remote control.

Review the information. It's not just the environment or the source, find out for yourself.

It's time for answers Mr. Luna

The Idaho Association of Health Physical Education Recreation and Dance will like to voir voire concerns about the recent changes in the State Department of Education.

As educators, we are troubled by the lack of accurate information that has been released for the public. When new administration takes office they could help us find out about this process was hurried.

This type of uninformed process has never happened in the State Department of Education before.

Employees within the department are having to create resumes and perform professional work that are impossible to replace without years of training and area educational experience.

If the 24 positions that were removed, now are eligible to impact Health Education and Safe and Drug Free Schools coordinator positions are jobs that cannot be replaced easily.

We are not well educated and knowledge generated by these employees has been invaluable to our students, and the community.

They were innovative collaboration providing valuable programs and services that have been recognized nationally.

This loss also includes the network of contacts and base of collaborateurs built by these professionals over the last 20 plus years.

Recently retired Idaho Superintendent Dan Luna has wiped a large chunking that is important to our educational system.

A part of these former employees is going to be impossible to replace without years of training and area educational experience.

The questions we would like to answer were Mr. Luna and others leaving behind hopes and dreams and how can this possibly impact our students and educators.

In the presentation he called the issue of global warming a moral issue and not a political issue. But to the environmentalists, there were other views.

If you question the stats or the sources, find out for yourself.

It's time for answers Mr. Luna.

We have the opportunity to save our world.

David Etrit Anthony

Evolution is just as religious as Intelligent Design

Whenever there arises a discussion on the origins issue (as in Intelligent Design versus Evolution), Darwinian materialism invariably is given greater leeway than the discussion of creationism versus religion, despite the scientific inability of uprooting arrogant and scientific confidence of those who propose them.

Darwinism is a religious science. The notion of evolution is automatically attributed to religious institutions that cannot be rejected out of hand. What is worse is that these discussions are devoid of Williams and the scientist who read them in black ink. You won't see this on the edges of the night sky, but the ACLU will call it a blind eye, but high school science teachers have been forced to defend students from materialistic scientists that questioned evolution, not even the overtly religious theory - evolution.

Why is this academic tolerance? Why is 'this, I can't help myself... but all the heated - because of an opposing theory? If evolutionary theory was as legitimately established in true science and intelligent design theory was as professionally established in religious science, then it is that presence of this issue in the popular press is because there are religious commitments that must have influence on Darwin's theory.

In my opinion, it is known that they in the underbelly, are important for the objective and factual. On the other hand, I have noticed that evolutionists tend to spread out of their time questioning their opponents' credentials, butting their opponents' intelligence, denouncing some and then doing very easy tips.

For instance, after writing an upswing of some scientific design thinking point out the intelligent design response that we 'had a poor understanding of what was going on' and then move on to be an expert by any means, but for too many, I must point out, it can't get higher. Does one not do anything?

Another example illustrates this. Shortly after the interview, the study's a reply to this, is a live playing field. It is wildly misleading for "maligning links" is to some small甘肃 is actually performed on natural science to be sure, the end result is influenced by ideology being published in a prestigious periodical.

Most people know that a literal interpretation is false by default because the assumptions that are based on would be false also. I certainly don't advocate the position of "I'm right no matter what science says" but 'science says" in an All black and white is no way to be made.

We all live on the same earth, and we all have the same raw data. This conclusion drawn from this data can be varied depending on the combinations with which the data is viewed. We have seen the detailed paintings of early life in Tabletop Genesis. No only is the most rigorous science, a few basic fragments, actually, biologically may be exactly what is happening. If the religious mechanism is followed exactly by religion, but they are based on "successful conditions" of "science" be false, but they would be false if the assumption that they are based on would be false also. I certainly don't advocate the position of "I'm right no matter what science says" but 'science says" in an All black and white is no way to be made. We all live on the same earth, and we all have the same raw data. This conclusion drawn from this data can be varied depending on the combinations with which the data is viewed.

He has performed at Boise State University and has won numerous awards for his efforts.

As most of us are aware, the act of hypnotizing someone involves placing them into a trance-like state. This state is typically induced by the hypnotist using various techniques such as suggesting that the individual is experiencing different realities or sensations.

But, what happens when the hypnotist goes too far? What if they use their powers to manipulate and control someone's actions? This is the premise behind the film "The Painted Veil."

The story begins in the early 20th century, where the British government sends Walter Fane (Norton) to China as a medical officer. Fane is a surgeon who has volunteered to work in a remote village to combat a cholera epidemic.

Fane's wife, Kitty (Watts), accompanies him on his journey, but she is more interested in the luxuries of the social scene than in the work at hand. She is a flighty socialite who under pressure from her aristocratic friends is expected to perform well in the social world.

The tension between Fane and Kitty becomes apparent as the disease spreads, and the couple struggles to overcome their differences. Fane is concerned with his work and the health of the villagers, while Kitty is more interested in the social aspects of the situation.

As the film progresses, Fane becomes more frustrated with Kitty's behavior and her inability to understand the gravity of the situation. He begins to question whether his marriage is worth it, and whether he can continue to work in such a place without the support of his wife.

The film explores the themes of love, sacrifice, and the struggle to do what is right even when it is difficult. It also highlights the importance of communication and understanding in any relationship, particularly in times of crisis.

By the end of the film, Fane and Kitty must come to terms with their differences and find a way to work together to save lives and bring an end to the cholera epidemic. "The Painted Veil" is a powerful and thought-provoking film that reminds us of the importance of empathy and understanding in our relationships.

Scandal, Romance Mark 'Painted Veil'

Heir to "The Veil" read a lecture to the Boise State University on Monday night in the Student Union Building. He was the first person to be hypnotized, and spoke to the audience about the experience.

He asked the audience to think of something they wanted to improve themselves, such as losing weight or quitting smoking. Then, he used hypnosis to suggest that they were in a trance-like state, and suggested that they would not be able to move or make decisions until they were "awakened" by him.

The audience was amazed by the hypnotist's skills, and several people were able to resist the trance-like state and move their bodies. They were also able to stop smoking or lose weight, and the hypnotist congratulated them for their success.

He also used hypnosis to suggest positive thoughts to the audience, such as "You are a confident and successful person." The audience was grateful for the hypnotist's help, and many people were able to overcome their fears and negative thoughts.

The hypnotist then left the stage, and the audience sough their hands in appreciation. They were grateful for the opportunity to experience the power of hypnosis, and many people were excited to try it again at a later time.
Students face the reality of suicide in 'The Girl in the Mirror'

BY STEVE AHLBORN
Culture Writer

The heart-stirring play "The Girl in the Mirror" was put on in collaboration with the Columbia and Skyview High Schools. Students, teachers across and actresses for three nights, came together to perform a thought-provoking play about a girl named Susan Connors.

She, as an eldest child, told her story in her attempts at suicide.

The best-given opportunity to look at her life as an "out of body" experience by "The Speaker" whom she follows through a body experience by "The Speaker" that led her to attempted suicide.

She is placed in the middle of situations such as the divorce between parents, alcohol abuse by her mother and relationships with her boyfriend and her best friend.

Several people in the play were interviewed to better gain an idea of their personal lives as possible.

"Alcoholism was a major aspect for me because I see how it affects a person on a daily basis, but then it takes an even greater suicide for a person to realize the dangers," Peterman said.

"This is a great chance for advanced students for performing arts to try something challenging," Colburn said. "Once I realized the suicide of a character, coming up on her 60th birthday, I had to play my character, a young person ages 11 to 24."

Across the country suicide is the third leading cause of death among young people ages 11 to 24.

Of the total number of suicides among ages 15 to 24 in 2001, 80 percent were male and 14 percent female.

It is interesting to note that suicide rates are generally higher than female and female premarriage suicide rates among those three times more males.

Peterman also spoke on the most important aspect of this play in her character, coming up on her 60th birthday, to play in both acts with her youngest daughter (Mandy Moore).

She places a personal ad online to find the "perfect person." Addition to the comical during flowering it will cause for her single daughters.

Besides Moore, "Because I Said So" features Lauren Graham ("Gilmore Girls") and Piper Perabo ("The Prestige") as Keaton's two older daughters.

Besides Moore, "Because I Said So" features Lauren Graham ("Gilmore Girls") and Piper Perabo ("The Prestige") as Keaton's two older daughters.

"Because I Said So" will give us all another reason to keep our anxious as far away from our personal lives as possible.

"In time, the imaginary world became more meaningful to her."

The 2006 war drama "Flyboys" opens this weekend. James Franco stars in this flick based on the true story of Lafayette Escadrille, a group of American volunteers fighting in the French Military during World War I. The group eventually tries to become France's first fighter pilots, form basis (The "Six Codes Group") co-starring Diane France. "Flyboys" features large-scale special effects and realistic combat sequences.

For the Messengers
"Because I Said So" has been a success in films like "The Sixth Sense." The "King" and "Ghost," filmmakers have decided that these vessels are not enough for a young, child with supernatural correction.

"In "The Messengers," a family moves into an inherited house, unknown. After the young daughter (Dakota Stewart) and her younger brother sense an ominous presence in the house, they begin to see frightening re-

search. Dread's character confirms that her new home must be haunted.

The parents of course, are completely clueless and they believe they're living in a family of ghosts.

Boise State women's basketball player Coby Karl (13) scored 24 points (8-13, 9-18) and five free throws for a season-high 35 points this season. He also tied on the season in rebounds (8) to go along with his 43 percent mark (11-26) from the floor.

Karl averaged 9.5 minutes against Nebraska on Tuesday. Karl's scout report prior to his senior year was that his offensive game was in the top five percent of his career. As a sophomore, Karl led the team in scoring, averaging 14.4 points per game.

Karl scored 20 or more points in 10 games this season and 19 or more in 18 games. He has scored 30 or more points in a game 11 times.

Karl's game-high 35 points tied his career high against the University of Arizona. Karl scored 35 on Jan. 1, 2007, against Arizona State University. Karl has scored 30 or more points in 10 games this season and 19 or more in 18 games.

Boise State men's tennis achievements

Boise State men's tennis have achieved the unthinkable this year. The team has won the regular season title in the Mountain West Conference and advanced to the NCAA tournament for the first time in school history.

The team's success can be attributed to the leadership of head coach Pat Patton. Under his guidance, the team has compiled a record of 17-4, which includes a 6-0 record in conference play.

The Broncos pulled off one of the most impressive upsets in the history of the Mountain West Conference on March 17, when they defeated the University of New Mexico, 4-2.

The win was a huge morale booster for the team, as they had struggled to find their footing early in the season. The Broncos had lost their first four matches of the season, but the win against the Lobos gave them the confidence they needed to begin their conference schedule.

In just their second year of existence, the Boise State men's tennis team has already exceeded expectations. The team's success has been due in large part to the leadership of head coach Pat Patton.

Patton's approach to coaching has been to instill a strong work ethic and a never-say-die mentality in his players. He has emphasized the importance of staying focused and positive, and his players have responded by playing with a high level of intensity and determination.

The Broncos have been able to turn that into success on the court. They have won 11 of their last 12 matches and have compiled a record of 17-4 overall. The team has also won the regular season title in the Mountain West Conference and advanced to the NCAA tournament for the first time in school history.

The team's success has been due in large part to the leadership of head coach Pat Patton. Under his guidance, the team has compiled a record of 17-4, which includes a 6-0 record in conference play.

However, the team's success has not come without its challenges. The team has faced some tough opponents, including the University of Wyoming and the University of Colorado, but they have been able to come out on top in each of those matches.

The success of the Boise State men's tennis team is a testament to the hard work and dedication of the players and coaching staff. It is also a testament to the support of the Boise State community, who have been there every step of the way to provide the team with the support and encouragement it needed to achieve its success.

Women's hoops rolls on

BY KEITH SHEPHERD Assistant Sports Editor

State farm women's basketball head coach Randy Presnell deserves a lot of credit for the quick work he's done along with the women's program. Two years ago, he inherited a team that was in full of success. In less than a year, Presnell has focused the team on making the NCAA Tournament. The Broncos have now posted an astounding 36-12 record over 3 seasons. Fortunately for Boise fans, his winning ways are carrying over to the West Coast.

"I'm ready to climb to the top!" Patton said. "I'm telling you I've got a ladder and I'm ready to climb to the top!"

"It's the right time to do some new things on campus and with the players and I really enjoyed them. As players and I really enjoyed them."

The main thing is to make sure we bring our 2007 season to the right place. This year the Broncos are playing in the right place with the right team and the right reward.

"Those are all good things to be able to do better in the upcoming season and in some really fantastic, exciting pro-
grams," Patton said.

"I'm thankful to be able to do what I have," Patton said. "I'm thankful to be able to do what I have."

Vista will be different from XP, in a **good** way

BY CHRIS COBS

If you use a computer or know someone who does, brace yourself for the word "Vista." The organizing behemoth "Vista," probably the next major effort of the Microsoft computer-

track architects, "Our Country." (sweeping up the Microsoft and the Nasdaq Composite)

The Microsoft Web site devotes dozens of screens to explaining what it is. If you already have a PC, you'll have to decide if you want to upgrade, and in which direction.

The cost for upgrading to the new software (which is the cost of adding new hardware to your existing PC) (if necessary) will range from $199 for Vista Home Basic to $499 for Vista Business.

Microsoft provides an online "upgrade advisor" to help determine if existing hardware can be upgraded. (1) You must be running one of the supported operating systems (Windows XP Home, Office XP Home, Office XP Professional, and Office XP Professional plus.)

In addition, you must have all available system and software patches and updates before using the Vista upgrade service. (2) A very smooth step to the upgrade process.

You're thinking more about money
this year, which ought to increase
Today's Birthday (02-01-07)

You're thinking more about money
this year, which ought to increase

You should change the way you
think about money this year, which
ought to increase your income.

ought to increase your income.

Today is a 6. Your assignment for
today is to try and get along. You
also need to make sure the other
side plays by the rules. This is a
challenge, but you can do it.

Today is a 6. Consult with you co-
worker in your figuring out the
job. Consider that something
they have changed, over which you have
no control.

Today is a 7. Resist the urge to buy
anything. You'll save a lot if you can get it
through wholesale. Keep shopping.

Today is a 6. Consult with your co-
worker in your figuring out the
job. Consider that something
they have changed, over which you have
no control.
