Lecture on illegal immigration sparks protest

Protestors showed up on areas of campus to protest the lecture from Canary County Commissioner Robert Vasquez. Brought in by Boise College Republicans, the event stirred-up a controversy from fliers the organization used to promote the event, which many deemed too incendiary.

Breaking down the definition: Intelligent Design

BY MARTEE ORTIZ

The media has portrayed intelligent design as something that is not, and is not an argument for the existence of God, but a scientific argument for the design of all life on Earth.

Proponents of the theory of intelligent design believe that certain elements of life are so complex that they could not have arisen by chance alone. They argue that these elements are best explained by an intelligent cause, or designer, who created them.

One of the main arguments against intelligent design is that it conflicts with the scientific evidence for evolution. Proponents of intelligent design argue that evolution is not a scientific theory, but rather a philosophical belief that is based on faith and not on evidence.

Another argument against intelligent design is that it is not a testable hypothesis. Beliefs are not testable, and therefore cannot be proven or disproven by scientific evidence. Intelligent design is not a scientific theory, but rather a religious belief that is based on faith and not on evidence.

In conclusion, intelligent design is not an argument for the existence of God, and it is not a scientific theory. It is a religious belief that is based on faith and not on evidence.
Detainees will return toAustraliato serve his nine-month sentence

AustralianDavid Hicks, the first prisoner in her war crimes charge since World War II, was sentenced to nine months in prison Friday after five years of detention at the American prison camp for suspected terrorists.

A panel of military officers had announced links to seven phones in prison as a charge of providing material support for terrorism, which he pleaded guilty to in a morning hearing.

The agreement drew criticism from civil rights and human rights attorneys monitoring the trial. They were especially critical of the order forbidding Hicks from processing any statements about such a requirement would be unconstitutional if a U.S. court.

In addition, Hicks admitted to a 35-year narcotics charge and to be considered a "reformed" addict. He said Hicks had been segregated on the bases in and after the plea, the court.

Under the plea deal, Hicks agreed to testify at future U.S. trials or international tribunals.

But the nine other Bolivian leaders, who had equilibrium and toxic gases in a automobile engine, were considered a "radical subversive"

The rising, interest in carbon dioxide (CO2), a powerful green house gas, is expected to collect 1.5 million tons of CO2 a year. The gas will be converted to produce the drive and power of American Electric Power.

The House and Senate voted to override Otter's grocery tax veto in the same unit as John Walker Lindh, America's most prominent

**BY NATHAN THOMAS**

Amos Stanton, of Boise, has recently become an Internet celebrity due to his idea for Google Inc. After several weeks of researching his idea, Stanton, 23, recently graduated from the University of Idaho and has a degree in organizational psychology. His idea was unsuccessful at first, but ultimately led to an internship at Google.

Stanton has been working on his idea for the last six months and has been working on the project part-time since he was hired. He said his idea was to create a platform that would allow users to submit ideas to companies such as Google.

Google's response to Stanton's idea has been enthusiastic, according to the Seattle-based startup. Stanton said he received a call from a Google executive shortly after his idea was submitted.

"I was surprised when I heard back from Google," Stanton said. "They called me and said that they were interested in my idea and would like to meet with me.

Google has since provided Stanton with a job offer, and he is currently working as a software engineer at the company. 

"I am really excited to be working at Google," Stanton said. "I have always been interested in the technology industry, and this is a dream come true for me.

Google's interest in Stanton's idea has not only led to job offers, but has also led to other opportunities. He has been contacted by several other tech companies, including Facebook and Twitter.

"I have received a lot of interest from other technology companies," Stanton said. "They have all been impressed by my idea and have offered me opportunities to work with them.

Stanton has been able to use his experience at Google to further develop his idea and to gain valuable insights into the technology industry. 

"I have been able to use my experience at Google to further develop my idea and to gain valuable insights into the technology industry," Stanton said. 

Stanton has also been able to network with other tech professionals, including Google employees and other industry leaders.

"I have been able to network with other tech professionals, including Google employees and other industry leaders," Stanton said. "This has been really helpful for me, as I have been able to learn from their experiences and gain valuable insights into the industry.

Stanton has received a lot of media attention for his idea, and has been featured on several television shows and in several newspapers.

"I have received a lot of media attention for my idea, and have been featured on several television shows and in several newspapers," Stanton said. "This has been really helpful for me, as I have been able to reach a wider audience and to share my story with others.

Stanton's idea has also led to several other opportunities, including a job offer from a startup and a position at a venture capital firm.

"I have received several other opportunities, including a job offer from a startup and a position at a venture capital firm," Stanton said. "This has been really helpful for me, as I have been able to explore different opportunities and to gain valuable experience.

Stanton's story has been featured on several news programs, including CNN and ABC News.

"I have been featured on several news programs, including CNN and ABC News," Stanton said. "This has been really helpful for me, as I have been able to share my story with a wider audience and to gain valuable exposure.

Stanton has also been asked to speak at several conferences and events, including the Builders of a New Economy conference in San Francisco.

The same goes for working out. Many gym owners will say a few words here to your eyes. But you need to know that there's a place to keep your bag when you go out for a run. There are just two examples of the opportunities awaiting college students with low budgets. These are out there and look for opportunities instead. Not Back to the school routine. Note that spring break has come to an end, school is back in session and we're on the home stretch of the semester. The long weeks will be greating, but here are a few things to keep in mind while studying up to your exam.
Lily Allen isn’t a typical “pop star.”

The British singer recently arrived on the United States music scene with the release of her first album “Alright Still...” and brought all her quirks with her. She possesses an oddball sense of style (she favors vintage gowns paired with white sneakers) and her outspoken personality crosses over into her angsty pop music. Most new pop artists (per: perhaps Akon comes to mind?) dish out generic, assembly line-packaged songs about one of three subjects: sex, love and (of course) teary break-ups.

While “Smile,” Allen’s first single, does qualify as a break-up song, it’s anything but teary. The lyrics tell of a girl who deals with a cheating boyfriend by simply getting over him.

“At first when I see you cry/Yeah it makes me smile, yeah, it makes me smile/At worst I feel bad for awhile, but then I just smile/I go in and smile.”

Allen’s friends beating up the ex-boyfriend and trashing his apartment. Meanwhile Allen, true to her slacker younger brother, plays with a variety of sounds in each track like hip-hop, salsa and jazz. These experiments give a nice break from the beats usually heard on the radio. Allen projects her individuality not only in her music, but on Myspace as well where she features video blogs sharing adventures for music. In an interview with pitchforkmedia.com, Allen talked about launching her Myspace profile: “My record company didn’t even know what Myspace was. About three weeks after I set it up, my manager called me and he was like, ‘I think you ought to set this thing up, it’s called Myspace or something and write a blog. Already done.”

Allen said she started her profile by uploading a few of her songs, like she began posting regular updates concerning her albums, performances and a little bit of her personal life and opinions. Soon Myspace users began to catch on to her forward, sassy personality. “In February or March it was obvious that something was going on because there were so many subscribers to the blog and so many people listening to the music.”

The result was eventually fame and thousands of Myspace friends. Allen’s Myspace profile can be seen at http://www.myspace.com/lilymusic. What could be better?
Missing link in sitcom history: GEICO caveman gets ABC show

BY DAVID HINCKLEY

New York Daily News

The GEICO caveman is one of the few recognizable TV characters of the 21st century. That's why someone should pick up a crude wooden club and pound it into stone to greenlight a pilot for a modern-day caveman in contemporary-day Atlanta.

On the scale of great ideas, this one is right up there with the truth. Yes, fire. Yes, just to be clear. I'm not suggesting someone should literally dress like an ABC executive. That's a cartoon image, exaggerated to get your attention.

And so is the GEICO caveman. He's our first human, a regular guy who happens to live in the stone age, a caveman, someone we meet for 30 or 60 minutes, not so good; for 30 seconds, not so good; for 10 minutes, not so good.

No caveman would think anyone should pick up his club and pound it into stone to greenlight a pilot for a modern-day Atlanta caveman. That's a cartoon image, exaggerated to get your attention.

Defense dominates scrimmage

BY TATE CASTLETON
Sports Writer

The Boise State men's soccer team dominated the match with its defense in a 2-0 win over Georgia State in Bronco Stadium Saturday.

"We saw our inspiring play from Luke today," Paton said. "His play continues to impress and it gives our team some confidence in our own zone."

The BSA scored the only goal of the match with 11:39 left in the first half, with Paton scoring from a pass from his teammate.

The Broncos were able to control the ball well and limit the Panthers' opportunities to score.

"We were happy with how we played defensively," Paton said. "We were able to settle in and control the game, which is exactly what we needed to do today."
The Idaho Steelheads defeated the Long Beach Ice Dogs 4-1 on Friday, March 31, to clinch the Western Conference #1 spot in the final home series of the regular season. The team is preparing for post-season play, which begins April 8.

The Boise State women's tennis team was swept in the opening round of the NCAA Tournament last week. In order to return to the Big West, the Broncos must win a total of five games, including a quarterfinal win. The Broncos are riding a high, having won four of their last five matches.

The Boise State tennis team is off to a strong start, with a 3-0 record in conference play.
