Arbiter, April 9

Students of Boise State University

Although this file was scanned from the highest-quality microfilm held by Boise State University, it reveals the limitations of the source microfilm. It is possible to perform a text search of much of this material; however, there are sections where the source microfilm was too faint or unreadable to allow for text scanning. For assistance with this collection of student newspapers, please contact Special Collections and Archives at archives@boisestate.edu.
**Students salute soldiers**

**BY RYAN RASMUSSEN
News Writer**

In the heat of the moment and the heat of the news, we are surrounded by stories of brave men and women who serve in the military. The Arbiter is pleased to feature an article about a memorial to honor those who have served in the military.

Artists Kay Kirkpatrick stands next to the memorial to the brave soldiers, a metal and stone sculpture featuring the silhouette of a soldier saluting. The sculpture will have a row of basalt columns that will be polished and smooth, with a proper height to the student in front of it. The memorial is a metal and stone sculpture featuring the silhouette of a soldier saluting.

The installation will be a memorial and stone sculpture featuring the silhouette of a soldier saluting. The sculpture will have a row of basalt columns that will be polished and smooth, with a proper height to the student in front of it. Each of the students will represent a diverse history in the history of the university. The middle of the columns will be two metal structures. One could create a soldier creating an outline and the piece cut out will be a short distance away. The piece will be made out of high-grade steel.

In the middle of the columns will be two metal structures. One could create a soldier creating an outline and the piece cut out will be a short distance away. The piece will be made out of high-grade steel. The memorial will be a short distance away. The memorial will be placed in the northeast corner of the new SUB.

Falling catching indexes view ed a early sign of hazards global warming in Japan.

The latest report by a U.S. panel on climate change may have failed to specify the dangers, but even the problem of warming has already been witnessed in Japan and other parts of the world.

The fourth evaluation report of the Intergovernmental Panel on Climate Change, adopted by the United Nations, warned that many people could be forced to change their way of life as extreme temperatures and drought could affect many parts of the world.

"If Kyoto may be turning into a subtropical island," said Shinoda Kogu, a 51-year-old farmer in Nagasaki Prefecture. The IPCC report warned that rising temperatures and changes in population patterns could force humans to adapt to the changing climate. The report said that a rise in the cost of rice, estimated to have fallen 60 percent from five years, while the quality of rice, was estimated to have fallen 60 percent from the previous year, to 10.5 million yen less per 60 kilograms than first-grade rice.

Last year, the report says six rising in the city to below half of what it would be an average in a lower year. The lower yields have resulted in a rise of rice prices by 20 to 30 percent, which is about 1,000 yen higher than first-grade rice.

In Japan, agriculture experts predicted that a rise in the cost of rice, estimated to have fallen 60 percent from five years, while the quality of rice, was estimated to have fallen 60 percent from the previous year, to 10.5 million yen less per 60 kilograms than first-grade rice.

Local unemployment rate held at 2.6 percent.

In an effort to get her to come back home, he told her that Mostar has been locked down for five days and that his friend was in the hospital in the hospital in the hospital.

She has moved back home and started working in an accounting firm. Her economy is stable, sustains, and has a good jobs for her.

"Barring any sudden drop in economic activity, prices, or consumer confidence, the interest rates are still at historic lows, which is good for a while," he added. Idaho Commerce and Labor Director Ira Panter said, referring to the latest monthly unemployment rate, which stayed at 2.9 percent of the state's workforce - and nearly 298,000 of the state's 12 million labor force.

"It's a really important lesson and the fact that we had such low unemployment rate is really encouraging," Panter said. He said the last time local unemployment was as low as 2.6 percent was more than a year ago, in February 2006. And that's actually a good thing because the health industry is getting better, faster. It's also a good thing.

A new report released by Idaho Commerce and Labor Department Tuesday showed that 3,800 people joined the unemployment rolls last March, while total unemployment increased to 77,000 people. In the first two months of the year, the number of those unemployed people increased to 8,000, while total unemployment increased to 77,000 people. By the end of last month, the unemployment rate was 2.9 percent, which is well below the state's four percent that most economists consider full employ ment. The same report also showed that the local unemployment rate has been at 2.9 percent of the state's workforce - and nearly 298,000 of the state's 12 million labor force.

Double-homicide
Suspect linked to Arizona shooting

COURTNEY IDANO
SUSPECT TRIBUNE

Police say John Joseph Delling, 21, of Idaho, shot and killed another 25-year-old man in Boise recently. The shooting took place at the America First Event Center on March 26.

"We're concerned that this is not over," Ada County Sheriff Gary Raney said Friday. "We're investigating several possible developments.

Police said they are looking for a man who they believe is associated with the shooting. The suspect is described as a white male, approximately 5 feet 10 inches tall, with short brown hair and blue eyes. He was last seen wearing a black t-shirt and blue jeans.

Raney said officers have no information about the shooter's motive or the victim's relationship to the suspect. The investigation is ongoing.

The shooting occurred on March 26 at the America First Event Center, where a local television station was being held. The station's employees were reportedly targeted during the shooting.

A spokesperson for the station confirmed that an employee was shot and that the suspect is still at large.

The shooting has sparked a city-wide manhunt, with law enforcement agencies from across the state deploying search teams and issuing Amber Alerts.

As the manhunt continues, local residents are being asked to remain vigilant and report any suspicious activity to authorities.

The shooting has raised concerns about the safety of local news organizations, with some employees expressing fears for their safety.

The investigation is being led by the Ada County Sheriff's Office, with assistance from local and federal law enforcement agencies.

Non-newsworthy news
BY CHAD HEIDENSTRAHL

April has always been re- served as a time to celebrate life

As spring flowers bloom, insects and birds emerge after a winter of dormancy. It is a time to appreciate the beauty of nature and to enjoy the warm weather.

In the United States, April is known as National Bird Month. Throughout April, the American Birding Association holds events and activities to celebrate birds and their habitats.

The American Birding Association is just one of many organizations that work to protect birds and their habitats. It is important for us all to do our part to ensure that these beautiful creatures continue to thrive.

Let us all take a moment to enjoy the beauty of the natural world around us. Let us remember that we are all stewards of the earth and that we have a responsibility to protect it for future generations.

The end of the month is here, and it's time to reflect on the past year and to look forward to the future. Let us all work together to create a better world for all living things.
Timbaland's got "Shock Value". His latest album to fans is hot. The collection proves he's got skills with fast beats and catchy lyrics.

Not enough for celeb-observers as you can't help but see a celebrity's own reality show. MTV was the first channel to bring reality TV to the viewers. Now the craze is still going up on almost every network. The craze is popping up on almost every network.

The latest shows have that new trend where the edge is about doing the new shows. The shows are a hit with people, as we really want to keep going in on our own trend that we have to watch. MTV is a very unique trend when it comes to television.

Research exhibition on display in SUB gallery.

Recently, the SUB gallery has been promoting specific research. This is another example of the SUB gallery's initiative to increase interest in research. The SUB gallery has been hosting research exhibitions for several years now, and this event is part of that ongoing effort.

The exhibit features a wide range of research projects, including studies on climate change, biodiversity, and cultural heritage. The students and faculty involved in these projects have been invited to attend the opening reception and share their work with the public.

The exhibit is open to the public from April 16 to April 22, and it is located on the first floor of the SUB building. The gallery is open from 10 a.m. to 6 p.m. daily during this time. Admission to the exhibit is free, and all are welcome to attend.

"Boise State University provides a unique Greek Community that meets the needs of students at a metropolitan, commuter, state-supported institution."

Boise State Greek Organizations

Student Union Building
On Saturday, April 16, the Greek fraternities and sororities are hosting their annual Greek Week. This year's theme is "Wear Your Culture." This is an opportunity for the Greek Community to show their support for each other's cultures and to display their pride.

One event this week is "Wear Your Culture" Day. Participants are encouraged to wear clothing that represents their cultural background. This event is open to the public, and it is a great opportunity to learn about different cultures and to celebrate diversity.

Another event is "Research Through Speech." Boise State University is hosting a research conference on April 16. This conference is open to all students, faculty, and staff, and it is an opportunity to share research findings and to engage in academic discourse.

This conference started in 2001 and has continued every year since. The purpose of the conference is to promote research and to provide a platform for students and faculty to share their work. The conference is open to all members of the Boise State community, and it is held in the SUB auditorium.

The conference is free and open to the public, and it is a great opportunity to learn about the latest research being conducted at Boise State University. The conference is held on April 16, and it is from 10 a.m. to 4 p.m. in the SUB auditorium.

This is an excellent opportunity to learn about the latest research being conducted at Boise State University, and it is a great way to meet and interact with faculty and students from across the campus.

Sweet Jesus: transubstantiation in chocolate

BY MICHAEI.J. MCLAUSEY Opinion Writer

Selleextrême creations like chocolate Jesus are addictive, and suddenly this is no longer a spoof. The backlash has been massive. Named "Jesus in a Mason jar" by critics, the creation is on display and makes public with self-righteousness and rage. He is displayed down.

What is it really? The fact that it was made out of humans is what makes it even more brave and hilarious. The idea of Jesus as a Christian artist doing this piece with reverence in mind to anyone who in the past has responded to Jesus' purposes and beliefs.

The most important thing for me is how the Catholic artist did this piece and how it affects the viewer. It shows that his intentions and beliefs must be questionable, whereas you might not be so sure. It's a much more complex and thoughtful piece than anyone would think. The piece is a work of art and it is a work of art that shows how we have moved forward.

I believe where this chocolate Jesus anger comes from is the naivety of some professional creators that this doesn't mean that Americans are not being duped. People are being duped.

We're all just trying to

stay human

WHY your Stress, anxiety, guilt and cramming will "wan".

PROCRASTINATION
I HAVE OVERCOME

HAS been attending the Fettuccine Forum's discussion of public art. The Fettuccine Forum meets regularly to discuss amenities and positive additions to the Boise community. Karen Bubb, a home-grown speaker of the event, explained that the University of Oregon in 1986 with the help of four arts donors. She wanted to inform the non-profit art organizations in New York and Oregon until 1977, when she was 20 years old.

The presentation continued with pictures of existing things - it tells us about our community," Bubb said time and again you to do something." Public art is a multiplicity of things - it tells us about our community, which is commonly perceived but not fully understood, is one to three-years old their parent's head. The Mayans believed that the head must be perfectly shaped. The shape of the head shaping often reflected a particular family's heritage, different statuses, status and often portrayed a pantheon of the Mayan gods. It was something of a family event and nothing to be out of practice of shaping a young child's head is especially important. However, this outcome was not seen as true in the Mayan art but simply another aspect of life.

Another cosmetic procedure was the shaping and infilling of the child’s head. The Mayans believed that the practice was just as important as the outcome. The appearance or shaping supplied a real over the child's head, protecting them from evil spirits.

Another cosmetic procedure was the shaping and infilling of the child’s head. The Mayans believed that the practice was just as important as the outcome. The appearance or shaping supplied a real over the child's head, protecting them from evil spirits.

The forum of head shaping often reflected a particular family's heritage, different statuses, status and often portrayed a pantheon of the Mayan gods. It was something of a family event and nothing to be out of practice of shaping a young child's head is especially important. However, this outcome was not seen as true in the Mayan art but simply another aspect of life.

Grind (From page 6)

Dear For~lcatIon Forum,

I've been feeling a bit of pressure to do something about my relationship. I've been with my boyfriend for about six months now, and I feel like we're not quite ready to move forward. I've been worried about the future and what it holds for us. I've been thinking about trying to do something about it, but I'm not sure what to do.

Dear Ms. First Timer,

You said you were ready to take the next step in your relationship but you are not sure what steps to take. It's important to talk to someone about your feelings and concerns. It might be helpful to talk to a trusted friend or family member, or to a trained professional who can help you explore your options and make a decision that feels right for you.

Remember, the decision to take the next step in a relationship is a personal one, and it's important to take the time to consider all your options. It's okay to be unsure, and it's okay to take your time. The most important thing is to make a decision that feels right for you and your partner.

Sincerely,

[Your Name]

Total Defense

Boise State 2007 Spring Scrimmage - #2

Scoring

Senior safety Marty Tadman intercepted two passes Friday and returned both for touchdowns.
Tadman's 58-yard interception return set up the first touchdown.

Passing

By Kye Johnson  Assistant Sports Editor

Marty Tadman had two interceptions during Boise State's 48-9 spring game Saturday.
Two of those interceptions were returned for touchdowns.
"I was really happy with how the defense played," Head Coach Greg Patton said. "I made the right call and the right play, then had the spring game.
Besides, it was a good defense, a good day for the defense.
"The defense did it, they did a great job.

**The REC center adventures outdoors**

BY ADAM ADER

The Boise State Student Recreation Center's Outdoor Program is ready for the summer season. The Outdoor Program's main goal is to make sure everyone has a great time on the water, regardless of whether they are experienced or not. The program continues on Wednesday Night Adventures and offers a variety of activities, such as rafting and surfing. 

Isaacs Jones is the outdoor coordinator. He has 16 years of commercial guide experience and plans on using his knowledge to make sure everyone has a great time on the water. He says, "We have a lot of people coming out to the river and they want to know more about the river from us." Isaacs Jones said. "And these trips are not just for fun, these trips are for those that want to have a good time but also want to learn something."

In the first session, Isaacs and the program staff will be teaching the basics of whitewater rafting. They will also be teaching the techniques to safely maneuver the river, as well as the techniques to help out in case of an emergency. The program will start on Wednesday, April 11th and will run every Wednesday night until June 13th.

"If you're looking for a fun way to get out onto the river and have a good time, this is the program for you," Isaacs Jones said. "We want to make sure that everyone has a great time and learns something new at the same time."

The program is open to everyone, regardless of experience. The fee for the program is $25 per person and includes all necessary equipment. To register, call the Outdoor Program at 208-426-3700 or visit the Student Recreation Center online at [www.bosidaestate.edu/Recreation](http://www.bosidaestate.edu/Recreation).
