

BUILD A DATA MANAGEMENT PLAN USING THE

The DMPTool makes it easy to generate data management and sharing plans that meet funder guidelines.

[DMPTOOL.ORG](https://dmptool.org)

Many funding agencies require that you include a plan for managing and sharing your research data with your proposal. While the NSF calls this document a Data Management Plan (DMP) and the NIH calls it a Data Management and Sharing Plan (DMS), both require details about how you will organize, store, and share your data during and after your research project is completed.

Although the NSF, NIH, and other funders require similar plans, the specific guidance can vary by department, directorate, or program. In addition, the requirements are being updated over time as the federal government places more emphasis on data sharing.

The DMPTool provides a wizard for creating a DMP or DMS, using current, funder-specific guidelines. With the DMPTool, you can create and share plans with collaborators at Boise State and elsewhere. Once completed, you can download your plan in one of many formats, including csv, html, JSON, pdf, or text.

The DMPTool is free and open, but by logging in with your Boise State credentials, you'll be able to see institution-specific guidance and request a review from the Research Data Management Team, located in Albertsons Library at Boise State University.

DMPTool Features

- Contains up-to-date funder requirements
- Generate a template for any of 40+ funders
- Add and save notes with your work
- View guidance side-by-side as you write
- Invite others to read or edit your work
- Set viewership to public, private, or organizational
- Request a review of your plan by a Boise State expert
- Add your final plan to ORCID and generate a DMP ID

DASHBOARD

A screenshot of the DMPTool dashboard. At the top left is the DMPTool logo and the text "Build your Data Management Plan". To the right of the logo are navigation links: "My Dashboard", "Create Plan", "Funder Requirements", "Public DMPs", and "Help". Below the navigation is the user's name "Ellie Dworak" with a dropdown arrow. Underneath, there are links for "Boise State University (boisestate.edu)", "Albertsons Library Data Management Services", and "Boise State Data Management Support". The main section is titled "My Dashboard" and contains a table with the following data:

Project Title	Template	Edited	Role	Visibility	Shared
Albertsons Library Survey 2019	Albertsons Library Data	05-19-2020	Owner	N/A	No
NIH Outline	NIH-GEN DMSP (Forthcoming 2023)	01-19-2023	Owner	N/A	No
