B.J.C. Moves To New Buildings!

Junior College Is Integral Part Of Education Today

By ERNEST RETZLAFF

The growth of education in the United States has been a gradual process, created by necessity, through its various steps.

At first the elementary schools proved adequate to a nation engaged primarily in manual labor and in attempt to subdue a continent. In that day formal education was not necessary.

As America grew, frontiers were conquered and a few land areas on the horizon had disappeared the individuals had to turn to trades for a living; the demand for education became greater. It was at this time that high schools started into being. For a time after that the four years of high school were enough except for a few families that could afford to give their children the luxury of a college education.

Now a still more competitive type of work has changed the college education—from a luxury to the border line of necessity, and the community, in recognition of this fact and most needed step in education.

For many years the system remained as it was, but, more recently, education has recognized two more periods—beyond the seventh grade and the first two years in college—that demand specialized treatment.

This has resulted in the institution of high schools of the junior college in the system.

A recent survey has proven that the youth between the ages of 15 and 20 is generally a “lost” individual. Many are lost, going to a large college is too great, and there is little or no possibility of his or her obtaining a job after 20. The junior college is here to stay; it has taken the place of the old high school, and the young people of our communities.

Informal Reception To Be Sept. 17

To celebrate the opening of the new Boise Junior College the public is invited to attend an informal reception Sept. 17 from 7 p.m. until 10 p.m. Mrs. Roland M. Powers, the general chairman, faculty members will meet visitors in the office. The entire building will be open for inspection.

Tutors for the affair will be furnished by the Intercollegiate Knights, men’s service organization, and the Valkyries, a women’s organization.

Mayor James L. Straight

Welcome J.B.C.

By JAMES L. STRAIGHT

Mayor of Boise

Since the beginning of the Junior College movement, why a few years ago, our citizens have taken a particular pride in being able to offer two complete years of college in Boise. In September the physical plant for that broad program will be complete, with the opening of the new campus and central group of Boise Junior College buildings.

For the part the city itself has played in this development, I am especially proud. Not more important than any tangible contribution, however, has been the stimulus, unselfish cooperation of those individuals and organizations who have made this project not just in these recent months of fulfillment, but through the early years of challenge, sacrifices and disappointments. Many individuals in Boise made very substantial contributions of money and time to make possible this final triumph, that our land and children might benefit.

As long as we have private citizens like these, nothing worthwhile to our community will be too difficult to accomplish.

Boise Junior College begins a long and illustrious career with its community and proudly beheads.

To Junior College Students and Friends:

We move this fall into a new planet, modern in every sense and well planned to meet the needs of Boise Junior College students. All departments are well equipped to give students the opportunity to receive up-to-date instruction in their respective fields of interest.

When one looks at this fine plant, ideally located and planned, he is struck with the potentialities that lie in the word COOPERATION. The existence of this college shows what a community working together can accomplish. Faculty, administration, students, and civic organizations have worked together to make the college a reality.

It has been my good fortune to have a gift this institution since its birth. I have seen each stage unfold the doubt which surrounded it disappear. I have, during this eight-year period, seen many young women and young men enter who were as doubtful of their ability to succeed as to the institution they were attending wax in its flight. You students, entering and re-entering Boise Junior College this fall, shall be inspired and encouraged by the strides made by your college. It testifies that the money and energy erected into a worthy partnership, successfully crowns the handshake.

RUDOLPH K. CHAPPEE

College to Have Assembly Hall

Construction of an assembly hall on the college campus will begin early this summer. It will seat 750 persons and be used for movies, plays, etc.

The floor of the hall may be used for the assembly of the student body, and for social functions of the school.

The floor of the hall may be used for the assembly of the student body, and for social functions of the school.
The distinguishing white sweater with a gold sash that the homecoming queen will wear will be on Boise Junior College campus this year. The local Knights were accepted into a national service organization, Inter-collegiate Knights, last spring. This group is commonly known as the I. K. S. Heading the I. K. S. is Ernest Retzlaff, who was elected Duke last year. James Gray holds the office of Scribe; Dick Armstrong, Treasurer, and Ira Holloway, Recorder. These officers will hold office until next spring.

From the freshman class there will be selected nine new members. They will be chosen on point basis. The sophomore class will make up the remainder of the membership of 20.

The functions of the I. K. S. are many. Among their work is ushering and selling tickets at all college athletic games; providing an information and telephone service; assisting with the registration of new students and aiding the school in any other way possible.

BOISE JUNIOR COLLEGE SONG
By DEF ANDERSON
There's a college
That's a college
It's the Bronee's favorite pasture
But there isn't any room
For a quitter of a "sister".

There are stories and they're danc- ing
And a lot of sweet romancing
And songs we enthrall everything
We do it with a swing. (repeated)
Every time you hear that Bronee cheer
Then you'll know stamped' time is here.
We're going to throw our cares away
And yell out hip — hip, hip hurray!

Then you'll hear a thund'ring, desiring noise
It's the college racing for her honors
Come on and give it everything
For miles around they'll hear us sing.

Trot out those Bronees!
They're full of ginger and tough
Trot out those Bronees!
We'll prove that we've got the stuff.
Zing! Booms, you bucko!
Ring out this song of good cheer.
Now's the time to boise those Bronees
For the gang's all here. (Right Bronee Fight)

B. C. C. HAS NURSERY
The Department of Forestry has a nursery of 5000 seedlings of various species located on the new Junior College campus. This number will be increased from year to year and as they develop, will form a part of the permanent landscape.

The college campus is being de-
veloped rapidly by the Junior Col-
lege District, aided by the federal government. A gymnasium, ath-
letic field and vocational shops are being developed on the eastern end of the campus.

CONNNIE HERZINGER
College Has Complete
Home Economics Dept.
A new department of Home Eco-
nomics is being introduced by the Boise Junior College this fall. The courses are being adapted so as to have special appeal to young wom-
en for exploratory experience and practice in several fields of activity related to the broad field of Home Economics. The work will enable the students to realize the various types of job opportunities available through Home Economics training. The more immediate problems of personality, grooming, clothing, and entertaining will be discussed. Other subjects will deal with family relationships, home nursing, child care, meal preparation and serving, and house con-
struction and design. An attractive feature of the new Home Economics de-
partment will be the use of the modern equipment and rooms. The laboratory is equipped with four unit kitchens, laundry and clothing unit.

The B. C. C. men's service organi-
ization is called the Inter-Collegiate
Knights.

THE MOST VALUABLE THING IN THE WORLD IS TIME—Edison
B. J. C. Offers Complete Business Training

College Business Courses Offer Many Advantages

By C. R. McCaugh, JR.

Boise Junior College is particularly well suited for instruction in Business Administration, as state capital, has grown to be the center for a great deal of governmental activity; all state functions are controlled and directed from Boise and all records are kept here. Recently, Boise has become the hub of many federal governmental activities, originating a large volume of office work and record-keeping, which for this area has been centralized here. Boise has also become an important distributing center for a great variety of products, as well as a concentration point for much of the produce of the surrounding territory. As a result, Boise has grown into a thriving center for business activities of all kinds, and with this has come a growing and constantly recurring need for trained office personnel.

The Department of Business Administration of Boise Junior College offers the advanced students of this community opportunity for college-grade instruction in business subjects. The department has completed its first year and is exceedingly fortunate in being able to begin its second year by offering many additional courses with new and improved administration building on the new campus.

In line with the new Boise Junior College plan, the Department of Business Administration now lists two separate curricula: the lower division business curriculum, for students seeking credit toward bachelor's degree, and the semi-professional curriculum, for students interested in terminating their formal education at the end of the second college year with a view to entry into active business.

The lower division curriculum is as follows: the lower division business curriculum, for students seeking credit toward bachelor's degree, and the semi-professional curriculum, for students interested in terminating their formal education at the end of the second college year with a view to entry into active business.

The following Boise courses are included in the lower division university curriculum: Business Organization, Principles of Accounting, Principles of Economics, Marketing, and the Foundations School. The lower division course as offered for the first time this fall has been carefully prepared with the help of a committee of prominent Boise business men and women, and thus to adequately train students to accepted business standards.

The Department of Business Administration attempts to foster correct attitudes as well as work habits, and thus to adequately train students for entry into active business.

The semi-professional curriculum as offered for the first time this fall has been carefully prepared with the help of a committee of prominent Boise business men and women, and the object in mind of offering training courses in the subjects most needed by the community and most directly connected with business. It is not a curriculum for students planning to complete their study for bachelor's degrees at a four-year university; it is a curriculum especially constructed for students who do not intend to continue their formal collegiate instruction beyond the Junior College. It is designed to prepare students for entrance into commercial life in a minimum time by instruction in courses of regular college grade.

The following business courses are available for students under the semi-professional curriculum and may be elected by all students of the Junior College, subject to the reservations mentioned above: Business Organization, Business Mathematics, Principles of Accounting, Marketing, Retail Merchandising, Elements of Statistics, Principles of Salesmanship, Principles of Advertising, Business Writing, Principles of Economics, Beginning Shorthand, Intermediate Dictation, Office Practice, Office Technique and Management, Secretarial Science, Beginning Typing, Advanced Typing, and Office Machines.

Upon completion of any of the semi-professional courses in a satisfactory manner, students' names will be automatically entered in the department record which will be used to give them all possible assistance in securing permanent positions. All such records will be based on and will be judged strictly by business standards.

For the Clothes That Go to College, Come to Falk's Men's Store

W HEN YOU GO BACK to the old grindstone, go equipped with the snazziest harbleshoe in captivity. We mean those strictly-in-the-groove Arrow Shirts, Ties, Handkerchiefs, and Shorts.

$3 and $5

For the Clothes That Go to College, Come to Falk's Men's Store
There are signs along that path of the future by IRYING W. HART
Editor Of The Idaho Stateman
It is a fine thing to have illustrious ancestors. Traditions, too, are fine. The person who owns that blanket, that silver cup, that amounting to nothing much himself, is a bore and commands little respect.

That is a period of today. We look to the past for a certain amount of wisdom which-which might change the future in order that we may build our lives, and institutions to meet conditions as we think they will exist—or, more ideally, we look forward hoping we can shape this future in accordance with our ideas of what will be for humanity.

But it is still true that Today is all-important. If we are sincere in our desire to build for Tomorrow it is this hour, this minute, this second that must be seized upon.

The Boise Junior College is young in years. Its traditions are in the process of formation. While older educational institutions of aristocratic lineage look back over the years and boast of their ancestry, the Boise Junior College is confronted with the very real—and what should be very pleasant—thought that it has no dim and glorious past, but that it does have a golden opportunity to make use of Today in a manner which will assure a bright and glorious Tomorrow.

Far better to look to being an illustrious ancestor than to merely boast illustrious ancestors.

Congratulations are in order, of course—congratulations to the Boise Junior College on its ancient body and faculty, on the remarkable growth it has experienced, on the achievements on the accomplishments already recorded and more congratulations on the splendid new building, which this issue of the Round-Up so appropriately glorifies.

But most of all, congratulations are in order because the Boise Junior College is young and full of life and spirit and courage and because its career lies ahead, with the word “opportunity” embalmed everywhere along the path into the future.

A Step of Progress — Is B.J.C.?

By G. M. FUNK
Editor of The Boise Capital News
The story we heard the other day about a pilot who flew into Boise and attempted to land on the old airport—only to find a “great big building” right in his path—echoes the sentiment of a lot of people who have received the same surprise in recent weeks upon seeing, for the first time, the Boise Junior College building.

The surprise is in the sudden realization that on the old airport a college building has been born—from the dust of a plot of ground that in the past had felt only the touch of airplane wheels. Here at last Boise Junior College takes its rightful place on a campus of its own, in a building built for it, not tucked away on a side street in cramped and dusty quarters.

In this new building, this fall, an enthusiastic band of young students will bring to Boise the opening phases of a colorful college career. Their voices will sing the first strains of a chorus of college tradition which bids fair to become a ringing melody audible throughout the nation.

No stadium yet. No science building, no dormitory, no gymnasium. But the key is here, a spanking new building which for the present will house the entire B.J.C. scholastic plant, but which some day, real soon, will become an administration building surrounded by a sparkling array of collegiate sidewalks.

Into these buildings will come more and more students and as the years pass, Boise Junior College will “graduate” to the “select” of American educational institutions.

We predict with assurance that we are optimistic for B.J.C.’s future— for its start its new career in the Idaho enters her second 50 years of statehood. At its helm is a capable leader—President Eugene E. Chaffee. In the background, ever ready to work for B.J.C., is a group of wise and capable board members.

In the next 50 years, Idaho is destined for new heights of prosperity and progress. Those same years hold an identical promise for the nation’s most up-and-coming school—Boise Junior College.

Best of luck, B.J.C.!
Boise Junior College offers a curriculum designed to result in full junior standing upon successful completion of two years of study. These courses are fully accredited and accepted at full value at other universities. Art Courses of Varied Types Offered This Year

By CONAN MATHEWS

Art departments in institutions of higher learning have come only within recent years to be one of the major departments. This is due partly to a changing philosophy in education and partly to the demands of the industrial and commercial world in which we are living. Today we think of a complete education as involving the training of skills and abilities whereby a living is made and the development of a personality well integrated and socially conscious, whereby a life is made. Two things with which education is concerned are the making of a living and the living of a life.

In keeping with the philosophy of education we have built our art curriculum and objectives. We aim to develop first out of all creative ability, originality of style, and freedom of expression. Secondly but not less important the training of talent, mastery of skill and craftsmanship. In planning courses of study we also realize our position of a junior college. We know that many students plan going on to universities and professional schools of painting, sculpture and commercial art. We must be a finishing school for those who plan no further schooling and a preparatory school for those who plan to continue. In either case it is our contention that true learning is anonymous with experience and all classes or courses are so designed to give the student real art experience.

Divisions of Art

There are two main divisions in the art field: the Fine Arts and the Useful Arts. This division is for convenient reference and should not be thought of or referred to as strictly literal.

The Fine Arts are thought of as Painting, Sculpture and the Graphic Arts. Their contribution is aesthetic.

The Useful Arts include Architecture, Commercial Art, Industrial Designing, Illustration, Interior Decoration, Fashion and Stage Design. For the student preparing for such work it is essential to realize that all art, whether utilitarian or aesthetic, has one thing in common and that is good judgment in organizing, composing and arranging effectively form and color. Consider any branch or specialized form of activity, and fundamentally they have that common art basis.

Different activities may require different skills, but it is essential that the artist be able to draw accurately what he sees. Another way may require ability to letter well. Another may require a more mechanical working knowledge of tools and technique. Still another may require only a knowledge of processes and materials. In other words, not all artists paint pictures, nor is it necessary for all artists to be trained at drawing. On the other hand, the fundamental they all have in common often goes by different names such as pictorial composition, advertising layout, architectural, industrial design, interior decoration, etc. These terms mean the same ability to organize effectively form and color.

The Art Student

When the art student knows what he wants to do or become, we plan carefully to give him those courses of study that will equip him to do that job well. Our aim is to so integrate his program that he gets the necessary fundamentals, and that his experience is broad enough to keep him flexible and at the same time to concentrate his efforts sufficiently and carry them far enough to give him that degree of specialization by which he can make his way independently in the face of competition.

There is another type of student for which we provide. This student does not think of art in terms of a vocation or a profession but is none the less serious. Painting, sculpture, and some crafts have become very popular as avocations or as leisure-time activities. As many of these people are already engaged in the business of earning livings and keeping homes, we have evening and Saturday classes. Anyone interested in working at art is eligible to join these courses and is invited to visit the Art Department. There will be courses in drawing, painting, lettering and some crafts.

Distinguished as the builders of the new Boise wishes for your continued success.

Administration Building which faces the Julia Davis Park across the cated on the 100-acre campus of Boise's college.

. . . Answering the Call for Economical Building Materials for Colleges or Cottages

Boise Payette Lumber Company furnished the lumber and many other important building materials for the new Boise Junior College building. That is most often the case, whether the structure be a college or cottage, when GOOD construction with ECONOMY is given proper consideration. Economical building materials available at Boise Payette include 4-Square Lumber, Certigrade Red Cedar Shingles and Balsam-Wool Insulation.

Clear Vision

Because it is free from distorting ridges, waves and bubbles, uniform in thickness and easier to install, Fuller Glass is selected by leading contractors throughout the West.

. . . of the mental type is both the partner and the result of education. B. J. C. students will be well supplied with that type of clear vision.

CLEAR VISION of the physical type is assured B. J. C. students through the crystal-clear Fuller Glass installed in windows throughout the new school building.

Gone Forever Are Those Good Old Days At B.J.C.

By MARY PERKINS, '39

I'll never want to go back to school. If I ever did, I might forget about going to at least above back into the corners of my memory the many humor-filled and vitally interesting moments that were mine in the old brick building on Second and Idaho.

You new students in the brand new buildings on the brand new campus will find new ways to pass the time, whether it be between classes or during a dull lecture. But here are many things you miss. You may go through the motions, but the inner pleasure won't be the same.

For instance, you will probably have picnics but they will be huge affairs and not like the picnics of old. When the student body numbered only a little over 100 during 1937-38 there was the wiener roast below State Park, the barbecue at Barred Springs and Campus Day when I helped wash the library windows and was amply rewarded with plates and plates of chocolate ice cream. The one romantic thing about the barbecue was that it was always held in the light of a full moon.

As well which you probably won't acquire in psychology lab but which I did was playing pinochle. The school catalogue stressed that lab periods were three hours long and they were with the last two taken up with card playing.

You won't be running across Charlie the janitor, with a hammer in his hand going after the door-keeps. I did one day in the back hall and asked what he was doing. "Nailing the building together so it won't fall apart," he replied. But those days of plaster-cracked halls are gone forever. Also never to return in the cold, cold French room on the third floor at 8 a.m. every winter morning.

In assemblies you probably won't be discussing the football team and its dismal failures as we did back in 1937. What with bad weather and poor gate receipts, the lack of student interest was so bad that nobody wanted to argue whether football should ever be continued.

You new students won't be bickering Mrs. Hershey in her office with political observations, last minute cramming and the latest family gossip as we used to do. But I guess it wasn't her fault or ours that the easy chair and chair were stationed at the far end of her office.

Aroma of sulphuric acid and hydrogen sulphide mingling with the classroom odor and the fumes from chemistry lab. But a new system will probably prevent any unsuspecting freshman from discovering queer compounds in their "unknown" by actually not put there by the assistant in the store room. Rumor always said that the sophomores were involved.

If I'm truthful I will be spending after hours in the zoo lab watching cats being embalmed or seeing the cut and the guts of moonlight old human emmies being dissected by two pre-med students with a small and I one or two perches.

will help perpetuate the pleasant memories of Boise Junior College.

THE ROUNDUP

Vocational Forestry Course Offered Again This Year

By ROBERT E. LATHAM

The Department of Forestry was founded in 1939 at Boise Junior College to give the student an opportunity to fit himself for a place in the management of resources in this and adjoining states.

The course consists of two years of vocational training. Students who take and complete it may fit themselves for alternate ranger, forest guard, look-out, recreational guard, range rider, state game warden, or other similar positions.

The rain and wind will never be as cold again as it was on the day we took petitions from house to house asking the Governor to sign the junior college bill. You new students will never have that heart-cutting thrill of seeing the smile on Mr. Chaffee's face and the tears in his eyes when he returned from Mr. Porter's office showing the junior college had won.

After two years of headaches from final three-hour exams you will graduate—but you probably won't have as fine and as filling a graduating breakfast as the class of 1939 ate—or the piano rendition of "Pump and Circumstance" as you cross the lawn to receive your diploma, ever never sound so sweet again.

You can get your education at Boise Junior College for less money than you can at any other school.

If you stop to think for a moment about the barbecue was that it was always held in the light of a full moon.

To Have and to Hold

...is a good old American tradition. Learning "to have" is one of the purposes of your present school. Learning "to hold" can be accomplished with small and regular savings deposited in this bank.

No matter how small your allowance or income may now be, the regular saving of definite amounts will encourage the habit of thrift and will make it easier to "hold" and the "having" is easier.

English Department
Increase In English Staff To Meet Needs Of Department

By Ada V. Batch

The size of the fall time English teaching staff at the college will this year be double the size of last year's. For last year's staff, consisting of Mrs. Ada V. Batch, Dwight E. Mitchell, and A. J. Blackmon, who taught part time, have been added J. Roy Schwartz of the University of Oregon, and Ada K. Poffing.

This increase in staff will make it possible for the department to meet the needs of a growing freshman enrollment and to offer a wider range of elective courses, in addition to courses included in the Public Speaking, Dramatics, Survey of English Literature, Introduction to Modern Literature, and Creative Writing, areas. The courses in the History of the English Language are now being offered.

Freshman Composition, a course uniformly required of all freshmen, is an English placement test will be given for all incoming freshmen during registration week on September 20. Students showing serious deficiencies in this test may be asked to report to classes for special remedial work to be performed along with the regular course requirements in order to bring the student's written expression up to the college level. The course in composition at Boise Junior College is especially designed to help a beginning student orient himself to college work. Sections are kept small enough to permit class recitations, and individual conferences are arranged between student and instructor for the purpose of analyzing individual problems, and assisting students in developing good writing habits.

Three courses in Literature will be offered during the fall term. The Survey of English Literature covers itself with a study of the development of types and movements in English Literature from Beowulf to Thomas Hardy, and offers wide readings in the literature itself. The course is open to all sophomores and recommended for all sophomores entering senior colleges of business administration, business law, and education, and for prospective teachers of English.

Survey of American Literature, which is being offered for the first time this fall, will cover in the American field material parallel to the English field, from the earliest colonial writings to our own times. The most important author of each period in fiction, in poetry, and prose will be studied. Emphasis will be placed on the literature as a reflection of the American ideals and thought.

Introduction to Modern Literature has proved popular with students wishing to meet a curriculum requirement of a second year of English, when no particular course is specified. The course does not duplicate the material of the Surveys but deals rather with the backgrounds of, and readings in, Twentieth Century Literature. The novel is studied during the fall term, history during the winter term, and the drama during the spring term. The entire emphasis in the readings is upon growth of the student's own understanding of the literature, which is helpful to the student in his study of the many cross currents which make up modern life.

One or all of the three courses planned to open at the beginning of the winter term and to continue through the spring term will be offered providing registration meets the college minimum of 10 students per class. These courses are Great Books, Advanced Writing, and History of the English Language. Great Books does not duplicate the English and American material of other courses, but offers in translation other great books from the time of the Bible and Homer to modern times which belong to our cultural inheritance.

Advanced Writing is an elective course for students interested in creative, original, and imaginative writing, and in improving their own style and fluency in written expression. Because of its nature, the registration in the course will be limited to students showing special interest and aptitude, and will be particularly valuable to those interested because of special qualifications and experience of the instructor in that field.

History of the English Language, an introduction to the elementary principles of philology, will take up the inter-relationship of all European languages, and so

---

Staff, Double In Size This Year

New Boise Junior College chemistry and bacteriology teacher.

An investigation of the sources of the English language, with particular reference to the English and Germanic. The science of the origin of words and their meanings will be studied, together with the changes that occur in their meaning and pronunciation.

The English offices will be open during the week of September 17 to 20 and faculty members will be ready to advise and assist students with their registration problems.

Complete Physical Education Program Offered To All

By Coach Harry Jacoby

The Physical Education Department of Boise Junior College is divided into men's and women's divisions. The program is to interest every young man and woman in the field of physical activity. This is very important because it is a well-known fact that play is synonymous with growth.

In the men's department we have three goals which we try to attain through our department. The first is better health. When the organs of the body are exercised to better their functioning and muscles developed to facilitate better posture, the vital organs of circulation and respiration tend to increase the elimination of waste and distribute nutrients to the body more quickly.

The second goal is social contact and recreation. Enjoyment is one thing that is essential in a physical education program. Play relaxes the individual, makes him at ease with his fellow men and tends to increase his social spirit. This is very essential to good health. Interest is readily created and a slight competitive spirit is good for students of college age.

The winter quarter includes basketball, track, volleyball, swimming, horseback riding, skating, and hiking.

The physical education program will include touch football, archery, and volley ball. The latter two are carry-over sports that can be played by anyone. The touch football develops the students' posture. This is very essential to good health. Interest is readily created and a slight competitive spirit is good for students of college age.

All activities given at B. J. C. do not require specialized training. Students are taught enough to carry over to their personal sports. Qualities such as decision making, speed, strategy, and personal contact are developed.

The third goal, permanent interest, will be most valuable to the student after he leaves school. They are taught of a distinct "carry-over" type. These sports are not highly specialized, consequently they will be of great value after the student graduates from school. Sports that are taught at Boise Junior College are tennis, basketball, volleyball, touch football, ping-pong, golf, softball, and badminton. By his own volition the student can realize much enjoyment from other sports. A few of these are skiing, swimming, horseback riding, skating, and hiking.

The fall quarter includes archery, frisbee, golf, badminton, ping-pong and basketball. Basketball is a very popular sport at B. J. C. It is thoroughly enjoyed by a large percentage of students and creates more interest than most other activities at the Junior College. The other winter sports are of the "carry-over" type.

All activities given at B. J. C. do not require specialized training. Students are taught enough fundamentals of each activity to arouse interest. Our aim is that each person know how to play many games and enjoy them thoroughly.

Good wholesome activity is essential for a healthy constitution. This cannot be taken like doses of medicine.
Fall College Fashions Call For Reed-Slim Silhouette-Figures

Definitely new for fall is the "reed-slim" silhouette, with enough fullness for youthful grace and freedom, according to Miss Evelyn Moeller, C. C. Anderson Company ready-to-wear buyer, who has returned from three weeks in New York and Chicago markets.

The new, easy, casual simplicity and the big, soft, pump-friendly berets—are sure to win masculine approval, Miss Moeller added. Following is a review of 1940 autumn fashion trends, as noted by Miss Moeller in New York and Chicago style centers, with millinery highlights by Miss Bernice Bucks, newly arrived from San Francisco to take charge of the millinery department at the C. C. Anderson store.

Suits Are Slimming
Fall suits reflect the new slim, narrow trend. Long-torso jackets, longer than hip length, button below the waist to keep a flat line over the hips. Skirts are straight, or retain slim lines with pleats and slight flares. Shoulder line is more natural than it has been for some time, with only slight padding. For sports you'll be a twin of your sporty shirt, with a white shirt turned Borrowed From the Men.

The new fashion of the day, in casual simplicity with masculine accents, green, rust, slaty blues, and sharp accent colors, such as gray red with soft beige wool in sports clothes.

Black will be the leader in basic coats, with single-breasted, soft, green and blues popular. The new "swing" keeps the Men.

Newest sport fashions are taken right from his clothing jacket. Jackets will have that casual, easy fit, and coats will be classics in masculine tailoring. Navy "fly-front" coats of flanel carses hair with big brother freedom. ..snaggle teeth—

Here Are the Right CLOTHES for Fall

Back to School in Bird
Cleaned Clothes

Adela E. Palmer has been appointed dean of women for J. C. Penney College. She succeeds Mrs. Roland M. Power, who resigned.

FLOWERS for Her

Cunning co-eds know the smart way to capture the wandering attention of the roaming campus "wolves"... for those first "college capers" they select a basic wardrobe that will give a star performance the rest of the school year. Backbonc of this wardrobe will be a simple all-over plaid wool dress in beige, gold, brown, 7.95. Top it with an adorable brown bonnet snap brim, 2.98. Bring it down to earth with a new sports shoe of brown pigtex, with zipper and platform soles, 5.00.

Couture-admiring glances with sheer Millary 3-thread hose in golden tones, 1.00. Youthful contours will be firmly controlled in a lacy lastex brief pantie girdle, 2.00. And the whipped cream for this delicious concoction will be a brown alligator bag, 3.00, and smart pigskin gloves, 2.00.

Drop in and select them today!
B. J. C. Is Celebrating Eighth Anniversary

Colorful History Fills Past Of Our College

The Boise Junior College, as it exists today, is a direct outgrowth of the interest of the Episcopal church in education and of the Boise public school system in developing an institution of higher learning for the city of Boise.

Churches have always been the leaders of education in America ever since the founding of Harvard College in 1636 by the Congregationalists; William and Mary in 1693; and King's College (Columbia) in 1754 by the Episcopalians. Likewise in Boise, the Episcopal church was the forerunner of higher education. Back in 1892 the Episcopal church founded St. Margaret's Hall, an academy giving grade and high school education. This pioneer work was done at a time when no well-established public educational institution existed in Boise. As the public grade and high school system developed, the need for a private academy became less urgent, but a new need had arisen. Boise with a large high school population had no college to serve the needs of the city's youth. It was at this stage and during the seniors at Boise high school. It was at this stage and during the seniors at Boise high school. It was at this stage and during the seniors at Boise high school.

improved that enough students would drive for students of their sex, and in October, a committee of public school system in 1930. The Boise Junior College is one of the outstanding institutions of higher education in the west; all the students of the Boise Junior College are graduates of American colleges and conservatories of music noted for their high standards of scholarship, and none have failed privately with artists well known in the musical world.

The instructors in practical work are all excellent performers as well as teachers and a teacher who is able to demonstrate has a remarkable advantage over one who cannot show the pupil the various interpretations in music.

The student who desires to enroll for music, either from a cultural or professional standpoint, will find without difficulty classes or private instruction suitable for his requirements. Students desiring musical careers will find the following very interesting courses in music appreciation and Theory of Music: A Cappella Choir, Orchestra, Chamber Music, and Vocal Ensemble. Students containing music as a profession will be given a thorough and intensive training in the fundamentals and the more advanced topics.

For all students of the college.

The Junior College has for several years entered a basketball team in the city and southern Idaho leagues, last year winning the A. A. U. tournament staged by the "T" officials. The college team later went to Denver under the leadership of Coach Harry Jacoby and participated in the National A. A. U. tournament, through the cooperation of local firms and institutions.

Why not go "Back to College." ..... smartly.

The Mode is just as interested in your appearance as your professors are in your studies. And proper clothes are important too. A "B. H. Wragge outfit" for girls and a "Wilson Bros. campus suit" for men will do much to create the right kind of impression on the campus. Getting looking, comfortable, made for the business of getting an education.

be able to copy figures from a table in his handbook, but the man who expects to reach the top in his chosen field cannot be satisfied with a mechanical procedure: he must know not only what he is doing but why he is doing it. The design of a bridge across the Golden Gate required more than a handbook and a slide rule.

The applicant for admission to West Point or Annapolis knows of the emphasis placed upon mathematics by the army and the navy. During the first World War many of our best mathematicians were employed at the proving ground at Aberdeen, Maryland, to solve problems of range finding and the paths of projectiles. For the navigator, mathematics is indispensable and the ground courses for aviators include work in trigonometry.

At a time when war threatens, when more and more of our young men will be urged to take up a military career, mathematics will be as important a part of training.

The physicist, whether a college instructor, or a technician in private industry or in the various scientific bureaus in the government, must know mathematics, as must the astronomer also.

The actuary, working in the field of insurance, annuities, mortality tables and life expectancy, must be thoroughly familiar with algebra, calculus and the mathematical theory of investment.

Mathematics forms the basic statistical work in general and the writer of this article was once offered a position as a statistician on the basis of a very thorough training in mathematics even though it did not include a specific course in statistics.

The foregoing application of mathematics should be sufficient to indicate that this subject should not be overlooked by the student whose primary purpose in attending college is to prepare himself to earn a living.

What about the person who is not going to be an engineer, a statistician, or an actuary? Is there anything for him in mathematics beyond arithmetic and the simpler high school course? The answer is "yes," for in addition to his practical application in the professions it has also a high cultural value. Music is often referred to as a universal language. Mathematicians also marvel at the universal and symmetrical nature of music in western ears, the mathematics of those countries highly esteemed by Occidental mathematicians. Mathematics is a mode of thought common to all ages and all peoples, in greater or less degree, and no student of cultures should ignore their achievements in this branch of knowledge.

Our views of the universe become continually more mathematical. The physical sciences advance with incredible speed. Sociologists and biologists strive more and more to place their sciences upon a quantitative or mathematical foundation. If we are to follow intelligently what is going on we should at least acquaint ourselves with mathematical terminology and in a general way with its methods.

And finally mathematics may be a source of recreation and amusement. Harold Furth, writing in Harper's Magazine for October, 1926, on the building of the San Francisco bridge, says that though he is now a newspaper man, he returns to recreation to the profession for which he was most trained and works problems in calculus and engineering in his leisure time. Benjamin Franklin enjoyed constructing magic squares. In a more elementary level many people enjoy the trick problems of algebra and arithmetic and take great pleasure in pointing out the fallacies involved.

But whether one is interested in such diversions or not, there is for the diligent and reasonably competent student a thrill, a sense of achievement at the successful solution of a stubborn problem which is less noticeable in other studies and which, in the opinion of the writer, contributes to a strengthening of moral fiber.

Education
What is it?

Webster says, "It's the act, process or result of educating; the systematic training of the moral and intellectual faculties."

STUDENTS
Take it from us, life without the proper education is a hard, hard grind! The demand for education on the part of the employee by the employer is, today, greater than ever before; and this demand is increasing day by day. Your social position in life, the remuneration for service you render, etc., depend upon a degree of education you have. Take advantage of your opportunity and make the best of it. Get all possible out of your new Junior College of which we are so proud. The reason FOSTER'S, THE STORE THAT FRIENDS BUILT, renders better home furnishing service is because of our higher education in furniture and the art of furnishing homes. We congratulate you on being one of the first students of the college and wish you success.
