Roundup, February 21

Associated Students of Boise Junior College
A. W. PLAYNWIGHT WILL BE AT ‘Y’ TONIGHT

Every co-ed will have “her day” tonight at the Y.M.C.A. from 6 to 9 p.m. When the Annual Women of Boise Junior College has been presented, the play will begin, supper, swimming and games are on the program, fun and entertainment, said Nancy Fairchild, general chairman.

The dance is so arranged to begin the festivities, her own cap, out, and fowl if she wishes to swim, and a dance for the pot-luck dinner at 6:30.

Mrs. Fairchild has announced the following committees: Planning committee, Lois High and Betty Taylor; publicity, Bernice Hoeser, Joan Segal, and Betty Taylor; bulletin board, Elmer Waken and Genevieve Van Buren; pot-luck dinner, Mary Clark, Eleanor Vogel, and Phyllis Mathews; finance, Helen Calmes; finances and tickets, Jeanette Gilmore, Elinor Eakin, and Genevieve Van Buren; costumes, Mary Myer, Rachel Brandon, and Betty Loo; lighting, Lowry Loraine, Mary High, Emily Erickson, ping pong, June Arttela and Betty Lash; bilharza, Jackie Calhoun and Ellen Ash, and Raymo. The May Clayville, Frances Hall, organized by Mistred Prestcott, Margaret Shattuck, Berta Davis, Bob Dione, Roberta Vailans, Jean Anderson, Chris Hennessey, Dorri Bailey, Shirley Taylor, Maxine Howery, Betty Craig, Beth Fair, and Jeanne Martin.

Miss Dale Whittemore, Ada Potter, Winona Ellis and Virginia Gilmore, also decided to assess each freshman 10 cents to jump into the puddle jumper.

The debaters are expected to report either Saturday night or Sunday night depending on the outcome of their contest. Teams competing from colleges in Oregon, Washington, and Idaho are scheduled to debate.

Betty Mathews was unable to leave, but decided to remain in the tournament because of her role in the dramatic production, "Dulcy.

Math Class Has Lesson in Music

Mrs. J. McFarland gave her trigonometry class a vacation a few days before mid-term exams. When she spent one whole hour showing them the correlation between music and mathematics.

She drew graphs of the sound waves made by striking a tuning fork and maintaining the vibrations, and proved that the curves recorded by these vibrations were similar to those graphically plotted for the sine and cosine of angles.

The doctor explained to the class that she would not hold them responsible for this material, but considered it worth the time and effort if they would go through an studies, she said that mathematics could be applied to a subject generally regarded as uninteresting and prove a useful tool.

**Student Environments Campus of Future**

**By Don Smith**

I had a personal interview with the other night; it was about our school, S.J.C. What brought the interview on was that the High School was planning a very special class for the next year, a class that might have been our sub-class or our last year class, teaching our school as it will in the years to come.

I was among the 15 students assembled that covered the rolling hills of the campus in front of the administration building.

A soft, sweeping breeze caused the leaves of the many trees to rustle. When the breeze subsided, you could hear the glistening light of diamonds.

Campus Carpeted With Green

A walk amidst the soft carpeting of flowers, of leaves, of fresh grass and made me feel like an animal which had been caged for years and was now released.

I heard the gentle rushing of the stream, the whisper of the wind, the murmuring of the trees. It was a scene of beauty.

Several students had their knapsacks and their bags, and they were all happy to be there.

I followed with my eyes the panorama of the campus. Large brick buildings stood out against the blue sky, saffron with brownstone charm. Yells climbed their walls to the blue and white of the sky.

I was in the middle of the green of the lawn. Every square inch was a verdant green and cement and ornamental iron bench.

**THE ROUNDUP**

**Forestry Class Makes Interesting Field Trip**

Members of the forestry class made a field trip to the Idaho Fish and Game Commission's Big Bear Canyon. They were accompanied by Mr. John Kepros and Mr. Dwight E. Mitchell, the Faculty Advisor.

The group started out at 7:00 A.M. and arrived at the forest by 9:00 A.M. They were greeted at the gate by Mr. Gordon, the forester in charge of the forest.

The group was divided into three sections, each section following a different trail. Each section was accompanied by a guide who gave them an explanation of the trees and their uses.

The group visited several areas of the forest, including a section of old growth forest, a area of young growth forest, and a section of clearcutting.

The guides were knowledgeable and enthusiastic, and the students were interested and attentive. They asked many questions and were eager to learn.

The day ended with a picnic lunch at the base of the mountain. The students were tired but happy, having learned much about the forest and its management.

**Mr. Connie Forbes is Angry!**

Mr. Conning Forbes is in a bad mood. He is angry because he thinks that the Boise Junior College is not doing enough to promote its image.

Mr. Forbes is a member of the Boise Junior College Board of Trustees, and he is concerned about the college's ability to attract new students.

He feels that the college is not doing enough to market itself to potential students, and he is unhappy with the marketing strategy that has been employed.

Mr. Forbes believes that the college should be doing more to promote its image, and he is willing to help in any way he can to make that happen.

**Van Dyke Bank is ONE of Van Dykes!**

Van Dyke Bank is one of Van Dykes. He is not the only one, as there are at least 500 other Van Dykes in the United States.

Van Dyke Bank is the son of Van Dyke Bank, who was a successful businessman in the early 1900s.

Van Dyke Bank is now retired, but he is still very active in the community. He is a member of the Van Dyke Bank Foundation, which gives grants to local charities.

Van Dyke Bank is also a member of the Van Dyke Bank Club, which is a social club for Van Dykes.

Van Dyke Bank is a very popular man, and he is always ready to talk about his family.

*Photo courtesy of Van Dyke Bank*
Many B. J. C. students will know in the future what their voices sounded like when they were in college. This will be a result of the voice recordings made here in the school.

Many students, including the speech class, have had their voices recorded and seem to be pleased with the reproductions. Those recordings have been quite popular so far and promise to be even more so in the future. Every student should be proud of his voice and take advantage of this opportunity that is offered them.

Several students have recorded their voices in a letter form and sent the records to their parents or to friends.

Anyone wishing to record his voice may do so by making an appointment with Ralph Prater and paying a small fee to cover the cost of the record. Records are made during the moon hour and after 4 o'clock each day.

EXCHANGE

MOSCOW, Idaho, Feb. 11—University mermaids will begin practice on the national intercollegiate meet to be held here March 8 and 13. This is the first time that Idaho women have competed with university of Washington, Oregon, Utah, Montana State, and U.C.L.A. in intercollegiate swimming.—The Idaho Argonaut.

3. Optician

(Hint)

Each of these professional men specialises in vision correction. And they all agree that strain can be a serious cause of eye defects. Fortunately, they agree on the importance of study habits and the correct size bulbs reduce eyestrain and headaches. That's a hit for both health and grades.

BRONCO BEAT WARDS WITH 91 TO 41 MARGIN

Boise Junior College Broncs trotted over Montgomery Ward's fast breaking machine Tuesday night to win with a 91 to 41 score.

Tuesday's tilt was the beginning of many practice games for the Broncs before entering the A-A-U tournament the latter part of the month and defending the championship they won last season, which entitled them to represent Idaho in the national A. A. U. tournament.

Coach Harry Jacoby sent his chargers into the game in full strength and at no time were the college cagers in trouble. With Parents, Collins, and Storey hitting the basket with accurate shots they soon pulled off a lead which gave them a chance to use reserve power from the bench. Although Jacoby substituted, the score continued to climb.

The Broncs proved to the independent league that they are still in the running, and have improved since the beginning of the season. This game also showed that B.J.C. is going to have a strong team to represent Idaho in the national finals in Denver, Colo. Broncs, let's really get behind our team and see if our last year championship can be repeated.

Good support along with good sportsmanship will go a long way toward helping our team through with flying colors. In the event that we have to play some games in Nampa, try and arrange to be there if possible.

Many of the boys are wondering if there is going to be baseball at Junior College this year. Uncle Dale sincerely hopes there will be and has heard of a lot of material around the school. Some of the material I have noticed in pictures: Bert Gregory, Carl Davis, and Ernie Bedford; infielders: Dick Armstrong, Bob Curtis, O'Neil and Merril Barnes; catchers: Ed Brown, Darrell Parmalee, and Carl Hill. There are several other boys from other towns that Uncle Dale has been unable to talk to.

Let's all be on deck for the A-A-U tournament! Wednesday will see the last of the season and the boys are probably going to have a strong team to represent them in the tournament.

The increased demand for laborers reason for such a drop, it is believed.

The class meets in the old hangar at the east end of the campus from 7 p.m. to 9 p.m. on four nights of the week. Their curriculum includes 30 hours of aero-dynamic, 38 hours of radio and navigation, 40 hours on power plants, and 30 hours of aircraft operation.

They will start flying as soon as the ships, which are the property of Waldo's Flying Service, are re-assembled after being overhauled.

**Boys Show Themselves To Be Fine in Artists**

Bob Simmons and Jim Shaw's names have been added to Dr. Haines' roll of famous student artists. They claim credit for producing the brains behind the picture of the college and the political cartoons, although a bit handful about the whole studio seems to indicate that it was he that actually produced the masterpiece.

Dr. Haines has added the boys to his collection. He said that he "has several more." While commenting on the drawing, Dr. Haines said, "I am very proud of this picture as it makes me look much younger and trimmer. When you get to be my age you too will appreciate such small favors."

**FOR PETE'S SAKE, WHERE IS PETE? ANYONE KNOWS?**

For Pete's sake, where is Pete? For Pete's sake, where is Pete? Who is it while I am looking for Pete? To say the least, he is certainly a mysterious fellow. Nobody knows him, but everyone has heard of him.

The members of the choir say that he is going to the choir next term. The choir class says that he is going to the artists' hall. Somebody said that Pete's friend was out looking for him, and they both were going somewhere, but far be it from this writer to even attempt to straighten out it on it. By the way, who cares who the heck Pete is, anyway? If anyone doesn't care, they do. That there is a pretty clever way to advertise even if the choir did do a bit of cheating.

Pals Since Grade School Parted For First Time

Two alumni of B. J. C., Warren Hartman and Bert Varian, who have been separated for the first time since their initial appearance in grade school, are now at opposite ends of the Pacific ocean.

Mr. Hartman, who has made his home in California's famous Hollywood, while Mr. Varian is completing his farm service training at Seattle, Washington.

Both of the boys attended B. J. C. last year. Mr. Varian enrolled this fall but dropped out after a few weeks of the fall term after receiving his call from the Seattle training base.

---

**ZOOLOGY TEACHER HAS LED INTERESTING LIFE**

Mr. Dale Arvey, the head of the B. J. C. Zoology Department, was born in Los Angeles, California, on December 6, 1915, and it was in the Los Angeles schools that he received his elementary training. When he had graduated from high school it was his intention to become a veterinarian. When he discovered that it would take several years' preparation he started instead in U. C. L. A., and for one and one-half years, at the end of which time he was forced to continue to finish his schooling at Berkley, California.

Here Mr. Arvey digressed into an interesting episode of his life that he found it more interesting than farming. He was sent up to the head of the biology division and was told he would have to go to Berkley for schooling in biology or make a choice between botany and zoology. In Mr. Arvey's own words, "I chose zoology because it seemed more the better and that's how I got my start in that field."

At Berkley, Mr. Arvey finished his last two years. In his senior year, director of the Department of Vertebrate Zoology asked Mr. Arvey if he would like an office in the department, and Mr. Arvey seized the opportunity. In the latter half of the same year he became technical assistant in the Department of Bird Study. He took his graduate work at Berkley and then determined to get his teaching experience where he had been, and immediately went to work for Mr. Varian.

The teaching experience he derived was obtained at Moses, Idaho, in the Bosley Department. He married Miss Jane Brodhead of Hailey, Idaho, in 1899.

Mr. Arvey's parents are Russian born and speak their native language occasionally. They came this country when they were young. Mr. Arvey speaks Russian to a degree and is able to speak French in which he received his first two years' U. C. L. A. He has two sisters, one of whom is a doctor.

Mr. Arvey has worked and published in the Condor Magazine and participated in a newspaper group of birds. He is now working on the Denver Museum of L. O. and has an interest in California Pipers.

To quell the rumor that Mr. Arvey is a doctor, he has firmly stated that he is not a doctor but intends to obtain his Ph.D. or more likely an Sc.D. at Michigan.

He says, "Why are you impounding—do your shoes hurt?"

She: "No, but my feet sure do."

---

**CHEATING CAN BE DETECTED**

SAY B. J. C. INSTRUCTORS

That honesty is the best policy is believed by most B. J. C. students. There are, however, a few who prefer to skim through by depending on their classmate's and built notes so that they can sneak into class. Those students more than likely think that there is nothing wrong with something, but, since everyone in the class knows they are cheating, why do they think the instructor is blind? It is hard to teach such teachers the art of cheating and how to control it. However, most instructors have their checks in a merry group which grows smaller as the students grow older.
