To Feature 'Moonlight Cocktail' As Theme

Yes, students, once again your Roundup greets you in a new style, and a new size! Changes were made and your response to them was very satisfactory.

But in the past few months the amount of advertising material appearing in the Roundup has steadily increased. Although the Roundup receives an annual allotment from the student body it is realized that unless proper amount of advertising material is printed the paper cannot be published.

With these facts in mind we have decided once again to alter the size and style of the paper and while doing so we desire to acquaint you with our plan to modernize it.

Beginning this week, then, the Roundup will come to you in a new style and a new size. The Roundup staff and Miss Landis, the faculty advisor, have studied many different papers and finally decided upon the style adopted this week.

Gone are the old-fashioned type styles with their curiously uncees rude date, because psychologists have proven that such type is hard to read. Quite, too, are those vertical lines you may have noticed between the printed columns. Newspapers, like everything else in this world, are changing and the use of white space between columns is now used effectively by many modern newspapers. Too, the Roundup has added an extra column, and is now a six-column paper.

Remember, students, the Roundup is exclusively YOUR paper. It is written by you, part of it for your pay for your money, and it is yours. The staff believes that the new Roundup with its new modernized style will be a most interesting, readable, and informative paper.

This week's Roundup edition is extremely short, but in future issues, if you want your Roundup to be kept up to date, you will be able to read the news stories as well as the sports news and features.

Time Goes Back To Old Days

Proudly she assumed the new position and happily looking forward to the first time.

Lynda Hershey, registrar, tells the cool morning ride to sebese her that she is "in fine "fine" and expressive smiles at the noon meeting. The registrar, with a smile, says: 

"I am doing all right, saving tires!"

Sweating dangerously on two nearly vertically wheels and edges, the students, donning the morning mirror and the sus-
ience of forever looking over her shoulder to watch the tides.

"Mirror" says: "I've had a hard day!"

"What an it!" says she.

"What an it!" says she.

"That's right, she never said," says she.

"Never said!" says she.
LETTERS TO THE EDITORS

Sirs:

We have just received a copy of your Green (St. Patrick's day) plaque. We would
otherwise. It was given to you by your Washington Exchange.

Jay

How does your organization suppose that you look like? You must have made a style
good impression, after the makeup, type, and general looks of the pictures. The picture page was equally superb. Your Washington Exchange
reprints tell us that Boise Junior College has    its officers' functions.

I think that this student is exceptional for a school of that size.

Best wishes.

Tom Peters, Editor, The Tana-San.

Book Review

"She" by Rider Haggard

A novel that has far outside the reach of the average reader. Written by H. Rider Haggard.

The story is of the adventures of two young men, a railroad man, and a young woman who saved her from the savages. The story is full of action and adventure and is well worth reading.

The end is unexpected, and the reader is left wondering what will happen next.

"She" is a story of love and adventure, and it is sure to be enjoyed by all readers.

What a beating the feet of Frank's Roller Rink must have taken as 12 J. C. students, arrayed in uniforms of skating, turned out in full force for the skating party last Wednesday night.

No one in the case of any of the people are wondering who the cute male was who bought her from Coolidge. They call her "Bobo".

Bobo was the spirit of the day who skated bravely in the presence of the people. And in case you won't there don't know it, Earl Mathews and Alon Corak must be congratulated on winning the free skating ticket. (We would like to say for the people of the school.)

Why did Baby Ambuleigh, Betty Ratliff, and Pat Scanlan leave Frank's Rink last week?

"What's going on? I want to have more clubs like the Engineers. They're out in full force."""

The Rind Rink is one of the principal great part of the evening skating in the company of one of the Ocean Rinks. You must have seen it and observed the beautiful artistry and beauty of the girl. She has been the center of attention for the last six months, and she is sure to be the center of attention for the rest of her life.

POWER—where it's needed!

The amphibian tractor—a startling product of American industrial ingenuity—delivers power where it's most needed. The electric network—another example of industrial resourcefulness—connects hundreds of miles of electric company and federal government power to points of need.

The careful planned production of electrical power will continue—we pledge $1—until the war is won—until America's factories have the electric power to produce more cars, more planes, more ships, more planes, and more planes.

IDAHO POWER is doing its part to help win the war.
