*The Idea
of Nature*

PUBLIC LECTURE SERIES

Thursday, April 20, 2023 ~ 6 PM MST

- All Spring 2023 lectures will be via Zoom webinar ONLY
- They are free, open to the public, and require registration to receive webinar link
- All webinar times are listed in Mountain Standard Time with Q & A sessions to follow
- To register for webinars, follow this link: <https://forms.gle/L7so5pkTNU8z6wG88>
- To be added to The Idea of Nature Public Lecture Series email list to be notified of future events, please email: ideaofnature@boisestate.edu

"Don't Forget the Smallest Creatures and Get Rebugging"

Vicki Hird

Author and Fellow of the Royal Entomological Society, London

Vicki Hird, author of *Rebugging the Planet: The Remarkable Things that Insects (and Other Invertebrates) Do - And Why We Need to Love Them More*, will be talking about how we can avoid 'insectageddon', and help the invertebrates to survive and thrive in so many ways. Her book talks of their importance - from food to waste disposal and from culture to clothes - and why they are at risk. Climate change, habitat loss, and pollution in many forms are a big part of the problem. Rebugging our attitudes will be a good start, helping those around us understand the role and importance of all the invertebrates. Gardening and supporting local green spaces to be bug friendly will be critical and she will explore how to go further in what you eat, the clothes you buy and how you act politically locally and nationally. These can all make a huge difference too to the invertebrates. You may be inspired and find the bugs beautiful... Come with questions, leave with a new plan to rebug your life. See www.rebuggingtheplanet.org
