Fewer households with children have opted for small homes on smaller lots and more renters in Boise's downtown. Pictured: alley off Idaho Street and 9th.
Fewer households with children have spiked the demand for small homes on smaller lots and more renters in Boise’s downtown. Pictured: alley off Idaho Street and 9th.
The Investigate Boise Student Research Series

The Boise State University College of Social Sciences and Public Affairs proudly sponsors a nine-credit field school for the study of the Treasure Valley. Each summer, about 40 students interact with professors, practitioners and public officials in a storefront classroom downtown. Students tour, investigate and compose documented research papers concerning political and social problems that vex municipal government. Top papers are peer-reviewed and edited for publication. Topics include housing and homelessness, neighborhood preservation, the political economy of energy and natural resources, and the challenge of urban renewal downtown. For information and sponsorship opportunities, contact Dean Melissa Lavitt at sspadean@boisestate.edu; (208) 426-3776.
