Roundup, April 14

Associated Students of Boise Junior College

Although this file was scanned from the highest-quality microfilm held by Boise State University, it reveals the limitations of the source microfilm. It is possible to perform a text search of much of this material; however, there are sections where the source microfilm was too faint or unreadable to allow for text scanning. For assistance with this collection of student newspapers, please contact Special Collections and Archives at archives@boisestate.edu.
Reflects Community Needs

By Eugene H. Chaffee, President

Bowe Junior college is the result of an idea, first fostered in 1914, that the young people of this area need a community college where they can get a higher education. From 1914 to 1920 the idea was largely sponsored by leading educators of this section. In 1926, however, the Boise Independent schools had a study made; two years later the Episcopal church, under the leadership of Bishop Barnwell, started a private junior college, using the buildings then occupied by St. Margaret's Hall, a secondary academy for girls.

Assisted by a number of community leaders, this school ultimately became the public institution we have today. In fact, just 28 years ago this happened.

That college is the result of an idea materialized at only one of two schools at first, but finally grew into a college with both 100 full-time students, 10-night students, and 24 summer students.

What is more important than numbers is what has happened to the young people of the city of Boise. A desire to develop the best in each resident of the area has grown with the college.

Intellectual quality has become the goal of three times as many students and a host of adults who sought education stopped with adulthood have flooded the college halls at night.

The interests of these students are as varied as they are. They range from vocational studies on the one hand to adult classes which are highly specialized on the other.

In between are a multitude of academic and vocational offerings needed to satisfy the desires of the people of the area.

While our chief purpose is to provide academic excellence, we have developed along with this main contribution, and outstanding athletic teams for opportunities for all divisions of those who wish to excel in sports and recreation.

The college possesses one of the finest pipe organs of any college that started many years ago has in the nation. Along with an art, drama, music and comprehensive musical organization, there is a comprehensive orchestra and band. And in this area students with musical degrees cultural and recreational life.

Music

By C. Jefferson Smith

The Department of Music at BJC offers one of the finest music programs in the State of Idaho.

The college has a total enrollment of 500 students, with an attendance of 48 per cent in music and 24 per cent in music courses.

All music courses are taught by full-time faculty members.

Instrumental music is in great demand at BJC, and a recital of student compositions is one of the important events of the year.

Courses are arranged to allow the maximum individual attention for each student.

The BJC Community symphony orchestra gives about five concerts each season. It has developed into the state's leading symphony. In addition to this, the college band does double duty, at football games and offering opportunities for part time employment in the business district for many students.

SYMPHONY

The BJC-Community symphony orchestra gives about five concerts each season. It has developed into the state's leading symphony. In addition to this, the college band does double duty, at football games and offering opportunities for part time employment in the business district for many students.

CHORUS

The chorale choir has attained great prominence in the Boise area and is an important cultural and educational force in the life of the college. With a reasonably expanding repertoire, a regularly established chorus, both at home and on tours, as is compatible with their required courses of study in general subjects.
PHYSICAL SCIENCE LABS ARE BUSY

The demand of physical sciences has three purposes. In the first place, to prepare students thoroughly in a broad range of fields, that they may transfer at the end of the course. Secondly, to supply physical sciences are required in other areas such as forestry, geology, and engineering in order to provide a scientific background. Thirdly, to offer a larger number of those interested in a general education.

At present, there are 600 students enrolled in science classes. Of these, some 60 are taking one of the introductory courses in astronomy, radio physics, or geology. Some 200 students are engaged in elementary courses in chemistry, physics, mathematics, and biology. In all, except these courses, a student can fulfill requirements. A course in chemistry, physics, and mathematics is offered for science majors and engineering students, and in general, to students whose area of interest is not in the field of physical science. As a result, the department of chemistry, physics, and mathematics seeks to create a program that will help to meet the needs of the student. It is designed to provide a flexible curriculum for those students who must take these courses as part of their major requirements. The course is designed to meet the needs of the student in the sciences, as well as for those who seek a broader education. It is designed to provide a flexible curriculum for those students who must take these courses as part of their major requirements. The course is designed to meet the needs of the student in the sciences, as well as for those who seek a broader education.

ENGINEERING AL FRESCO

The BC library, which is located on the second floor of the administration building, is one of the largest general reading rooms in the United States. Books of all kinds are kept in the library, and the collection is continually changing.

BOOK DISPLAY

The BC library includes a large general reading room, reference collection of approximately 25,000 volumes and over 1,000 periodicals. New daily or weekly newspapers are received regularly.

TYPING CLASS IN THE BUSINESS AREA

The equipment of the business and economics division includes duplicating and calculating machines as well as typewriters. The courses offered and the equipment used are complete and modern.
Oriental Garden Theme Planned For Formal

Bose Junior college's gymnasium will turn into a romantic Chinese garden April 22 for the annual Spring Formal. The theme for this year's ball is "In a Chinese Temple Garden." Decorations planned include an elaborate Buddha modeled by Larry Kim, Chinese lanterns painted by Shun Tan, an intriguing and realistic Pagoda, and various Chinese lanterns with light created by Burel M. to lend a true Oriental atmosphere. Bob Nelson heads the committee for decorations.

Bose Junior college will also present several Oriental numbers. The international committee is headed by Masonじゃなさん.

Warron Wide is general chairman of the affair and he vows to "outdo all precedents." The BBJ May orchestra with a "fresh, new approach to music," promises to make music for dancing in all styles. Frank Lever stars on the local numbers and has made his final recording in the past. Warren states ticket sales are well under way and the charge is only $2.50 per person or $5.00 per couple for spectators. "We on the social committee feel that our effort has been satisfactory," he continued on page 2.

Bose Junior college has announced June 5 as the promotion for the spring formal and all members of the social committee have been assigned their tasks.

Bose Junior college plans to have a thorough promotion for the event. "The Oriental dance will be the main event," said Warren Wide, "and we are planning a variety show with Chinese music, dancing and Chinese folklore."

Some of the plans for the evening include a Chinese music program presented by the BBJ band, a Chinese lantern display, and a Chinese dance demonstration.

The evening will begin with a Chinese music program presented by the BBJ band. The program will include traditional Chinese music, such as "The Golden Gate," "The Moon Over the Mountains," and "The Dragon Dance."

The Chinese lantern display will feature hundreds of luminous Chinese lanterns, each depicting a different cultural symbol or scene. These lanterns will be set up around the gymnasium, creating a vibrant and picturesque atmosphere.

The Chinese dance demonstration will feature a variety of traditional Chinese dances, such as the "Fan Dance," "The Dragon Dance," and "The Lion Dance." These dances will be performed by local Chinese dancers, providing a true cultural representation of Chinese traditions.

In addition to the main events, there will be a variety of other activities throughout the evening. Guests can enjoy delicious Chinese cuisine, participate in fun activities like paper lantern workshops, and watch performances by local Chinese artists and performers.

The event will culminate with a grand finale featuring a spectacular Chinese fireworks display, creating a captivating and memorable evening for all attendees.
IN OUR OPINION...

The dictionary defines news as "information about something which has just happened or will soon happen." News may be about the latest events in education, the latest developments in technology, or any other topic of interest to the public. However, it is not known to everyone if something has happened. News is a service to inform the public about events and developments that they might not otherwise be aware of.

The Roundup belongs to the students of Boise Junior College. The staff tries to see to it, and certainly hopes that everyone on campus is aware of the events that happen each week. But the reader should also find them when they are definitely interested, and about people interested.

Students fail to realize that they are the news, and the only ones who can make their paper, and the only ones who can write and say anything about and in their way to the newspaper. A school newspaper is often taken for granted. It is easily realized that the paper is printed and sent full of news.

But what happens when there is no enough news? Then the paper is full of "filler" material which has no real value to the editor. This is just as much a reason as why newspapers are not sent in some campaigns because there is nothing of interest to their readers. The number of readers increases as readers are given what they want.

A reader expects the best of what is read and reads the newspaper. The more readers are found, the more it will be. The more students are interested in the school or school activities, the more they will be interested in the newspaper. The newspaper is a school newspaper, and the more students are interested in school activities, the more they will be interested in the newspaper.

News may be taken to the reader's computer class in a school's administration building and placed on a special computer system for readers. Students should be encouraged to do this on Monday, and the paper should appear on the next week's issue of the Roundup.

Contribute to your paper and you will get the best of it.

THE ROUNDUP SUPPLEMENT...

This week's article and four pages in the BJC have been handled by people who have been involved with the newspaper for years.

The supplementary pages are planned as an educational resource for students of other schools throughout the country. Their ideas and advice should be made on their own campuses. This is why the BJC's editorial staff provides more students from other colleges at the National Federation of State Clubs.

Letters to the Editor

Dear Editor,

Once again the time for clear thought and reflection upon us with the coming election of student council officers. I urge every member of the student body to participate in selecting and supporting candidates for each respective office.

The campaign work is the period when the student body comes together to demonstrate ability in holding the office and handling student affairs. Now should be developed for this campaign. The students are the ones who have the power to vote, and any candidates who has displayed the most desirable abilities. Let's take pride and support a dedicated and appealing campaign and elect one of the candidates at the polls.

John Neely, President

Faculty Business Advisor

Mr. Franklin Curry

Mr. William Gettenbaum

Sharon Paul, Dede Holt, Lamo Martinou, Mary Lou Reupert, Sam Lang, Doug Jory, Jerry Jester, Larry Hulse, Bob Fliehr.

CAMPUS QUERY

By Sharon Paul

Question: "What are you going to do this summer?"

Response: "I'll be working somewhere probably on a farm and I think I'll play basketball part-time."

Letter to the Editor

Dear Editor,

We wish to say thank you, too, for the news on the campus front. Boise Junior College is a very important university.

Sincerely,

H. S. Hamlin and Linda Cole

LIBRARY NEWS

National Library Week may not be making much of a splash across the nation, but the BJC Library is pleased about its appeal to the ideal attitude of the individual student. Without hesitation, we can recommend our library. We are sure that if you take a look at the books we have at our disposal, you will find something for everyone in our collection.

Access to these books is easy and convenient for National Library Week. The library features a monthly program of book reviews to keep students informed of the latest literature.

Boise Junior College Library

In July, the National Register of Historic Places will be expanded to include the Boise Junior College campus.

Evelyn Johnson

Library Assistant

Evelyn Johnson

Library Assistant

In addition to the Boise Junior College Library assistant's response, the library may be a great place to work during the summer if you are looking for employment opportunities. The library can provide a quiet and focused environment for study and research.

If you are interested in working at the library, please contact the library assistant directly for more information on available positions and application procedures.
Athlete of the Week
By Larry Nurnbeck
For the athlete of the week, Patrick House was chosen for his great performance in BJC's first win of the 1959 baseball season over College of Idaho.

"Pat," a tall, lanky pitcher, went all the way against C. of I. at up seven hits. It was noteworthy, in that it was the first time in the season that a pitcher has gone the entire route alone. The Broncos defeated the Cowboys, 11-8, in five and one half innings. Patrick House was chosen for the 1959 baseball season Most Valuable Player. He received two letters for baseball in high school, while he was co-captain of the Meridian baseball team. Patrick House will be going to the University of Idaho in the fall.

It is rare in baseball for a pitcher to go the entire distance alone, The- Broncos have not lost a game this season without a relief pitcher. The group will spend Friday evening and Saturday at Shore Lodge in McCall.

BjC CONCERT BAND
(Based on page 4)

BJC bounced back with three runs in the 10th inning on walks and Frank Bishop's single. In the fourth inning, Deschutes wrapped up the win with a five run explosion.

BjC CONCERT BAND
(Continued from page 1)

On the third setback.

BJC COUPON

-Ray Shaw, co-captain of the Midian Warhawks, will hit a home run in the third set back.

Life Sciences

By Dr. Donald J. Uber

The humanities are the study of the human experience and the various forms of expression through which this experience is recorded and transmitted. The humanities include literature, philosophy, history, and the arts. The study of the humanities is valuable for its own sake, as well as for its contribution to the development of critical thinking skills.

PHYSICAL EDUCATION IS REQUIRED FOR ALL STUDENTS

The physical education program is designed to promote physical activity and to help students develop a healthy lifestyle. The program offers a wide range of activities, including team sports, individual sports, and exercise classes.

Social Sciences

By Dr. Paul E. Baker

The social sciences deal with the problems of human behavior and the organization of society. They include anthropology, sociology, political science, economics, and psychology. The study of the social sciences is important for understanding the world around us.
STUDENT ACTIVITIES

BJC Accreditation

By Dr. J. H. Chambers

Dean of Faculty

Student Affairs

By W. L. Gottenberg

Vice-President

In addition to its responsibility for the buildings and grounds and for public relations in general, the office of the vice president has certain direct relationships with students. Among these are general control of student activities through the Associated Student Body, the approval of student leaflets, the approval of student social functions and special events on campus, the promotion of musical, dramatic and art performances and clubs and the coordination of the four annual student club activities. In these capacities the office of the vice president deals with the Associated Student Body, which is responsible for the student activities of the college through the Associated Student Council (ASC). The ASC is composed of representatives from all of the students and meets bi-weekly.

ADMINISTRATION

The registrar's office maintains a student record and is responsible for recording all academic activities of the student. This office maintains the files of all students and issues transcripts, degree certificates, and graduation announcements. The registrar's office also maintains the classification of all students and issues registration forms for all students.

The college yearbook, LES BOIS, was a high school publication when the 1955 edition received a first place certificate from the National Scholastic Press Association. The following is a list of the staff members of the yearbook:

TRADING AND INDUSTRY SHOP

Vocational Education

By F. J. Steele

The purpose of the vocational division is to provide practical instruction and training in various trades and industries. The vocational division is staffed by instructors who are well qualified to teach the students in the various courses. The courses offered include: automotive repair, carpentry, electrical work, plumbing, masonry, and typing.

The vocational division also provides a program of practical experience for the students. The students are given the opportunity to work on real-life projects to gain experience in their chosen trade. The vocational division also provides a program of practical experience for the students. The students are given the opportunity to work on real-life projects to gain experience in their chosen trade.

THE AREA OF THE CAMPUS

With the exception of the main building and the student center, the campus is a large, open area with many trees and shrubs. The main building is a two-story structure with a clock tower. The student center is a one-story building with a large open area in the center. The campus is surrounded by a fence with a gate at each entrance. The campus is a pleasant place to study and a good place to relax.
