Roundup, March 29

Associated Students of Boise Junior College
FORMS' SEMI-FORMAL DINNER

April 8

The semi-formal dinner will be held April 8 in the Student Union Building. The event will begin at 6:30 p.m. with a 6:45 p.m. dinner. 

FORMAL DATE SET FOR APRIL 12

April 12 is the date set for the April prom, which will be held in the gym. The theme is "A Nite in the Park." Tickets may be purchased from any social committee member.

GERMAN CLUB TO PRESENT PLAY

The BJC German club will present "The Kitchen Verandah" by Ludwig Thoma on Friday, April 1, at 8:15 p.m. in the college auditorium. Mr. Robert DeNeef will advise the group and direct the production.

All-School Play "Tonight At 8:30"

The BJC production of Noel Coward's play, "Tonight At 8:30," was presented March 20 and 21, with special student invitation addresses delivered on March 21. Staging was by Brian M. Brooks. A special student invitation address was delivered on March 21, with a special student invitation address delivered on March 22.

The play was produced according to a specific format. The evening's performance was limited to 100 persons per night. The play was modified for performance at a later date.

Interfaith Holds "Religion" Talks

Friday, March 18, the Interfaith Council held the first of a series of "Religion" talks. The purpose of these talks is to acquaint the student with the doctrinal beliefs of various religions. Bishop Landon of the LDS Church spoke at the first meeting. His topic was on the convictions of the LDS Church. A second meeting was held on Monday and was held under the auspices of the Catholic Church. The doctrine of the Catholic Church was discussed at the April meeting.

SCHOLARSHIPS AVAILABLE

Miss Judith Painter, dean of women, announced that applications for scholarships are now available. The scholarships are in the amount of $100.00. Applications are due on April 15, and are to be submitted to the office of the registrar. For more information, please contact the registrar.

Bjc Sophomore Taken by Illness

Frederick Wielbroth

The student body and faculty were saddened by the untimely death of Frederick Wielbroth, the eldest of three children of Mr. and Mrs. Edward Wielbroth. Frederick was born in Glencoe, Minn., in 1941, later moving to those whose classmates were at the high school. At 15, he was a member of the school basketball and a football four-year varsity player. He was an outstanding student and was active in several extracurricular activities. Frederick was a member of the band and was a member of the soccer team. He was an outstanding student and was active in several extracurricular activities.
So You Don't Have To Think...

In the time that Charles Dickens wrote his novels, there was no such thing as an eighteen-hour work day. There were no holidays for most people, except, of course, Christmas. People worked 12 or 14 hours a day. There was very little mention made of laws for time and yet, people found time to read.

Today, when work days have been shortened, when there are many holidays during the year, and when people have less time in abundance, very few find the time to read.

There would be a great deal of competition on the covers for the common or parlor impressions. Life is faster-paced today, because of the numerous and varied methods of high-speed transportation which have made it possible to travel everywhere with facility. Radio, movies, television, and all other devices of easy access, and lastly and most recently, the complicated series of great literature, have all served to make these life faster and thinking unnecessary.

As a依据, some writers claim that "Poe's "tale of a man who is sent to a place where he is put in a maze-like structure" is a way that "Poe interferes with the human brain."

It is not known if this is true, but it is generally believed that the purpose of the man who is sent to a place where he is put in a maze-like structure is to provide entertainment with the aim of making one's mind think, and one's mind think, and to provide entertainment with the aim of making one's mind think, and one's mind think.

Assuming that there was some purpose behind it, and that the apparent purpose was to provide entertainment with the aim of making one's mind think, and one's mind think, then the purpose behind it was to provide entertainment with the aim of making one's mind think, and one's mind think.

Letters To The Editor...

Here is one of the letters that the paper received, and it is an interesting one. It is about the problem of the paper, which is to provide entertainment with the aim of making one's mind think, and one's mind think, and then to provide entertainment with the aim of making one's mind think, and one's mind think.

Marilyn Calkin

Marilyn Calkin, student of the week, graduated from Forest Hill school last year. Among her activities in high school was an EDIT student, and a member of the Forest club.

Dr. Elsie Buck, Calculus Instructor, Is Featured Teacher of the Week

Dr. Elsie Buck, instructor in mathematics, began his second week with LIFE when it got its start in the old Saint Margaret's location.

Friday, April 1

Letters to the Editor...

I am trying to collect a few stories that I have been hearing about the paper. I am trying to collect a few stories that I have been hearing about the paper. I am trying to collect a few stories that I have been hearing about the paper. I am trying to collect a few stories that I have been hearing about the paper. I am trying to collect a few stories that I have been hearing about the paper. I am trying to collect a few stories that I have been hearing about the paper. I am trying to collect a few stories that I have been hearing about the paper. I am trying to collect a few stories that I have been hearing about the paper. I am trying to collect a few stories that I have been hearing about the paper.
A PREVIEW OF SPRING REACHES THE CAMPUS

Art Teachers Exhibit Work
Mr. Louis Peck and Mr. LaVer Stiefel, IRC art teachers, have an exhibit of their oil paintings, water colors, silk screens, prints, and etchings in the Matoaca High School. Rupert. The display will remain in Rupert for one month.

The result of the commentator is that the campus lawn is draped with horizontal students some in art faculty, some in a Gulf view with a far-off gaze.

Others are strolling in their books, books propped on the steering wheel, many are in the Student Union, while the tempest rages over a card game, and here and there are the stiltwalkers who may be found in the library.

One of the amateurs received when a student was questioned about his study habits was that studying was "not habit but was trying to lose." Another made the out-of-place statement that she studied every chance she got. Although campus studying does not follow a pattern and seems to be disorganized, the all-important fact remains that studying is done passing grades indicate that students do their work in quiet rooms, money many easy chairs, before the vacation set, before and after rehearsals, and while the tempest rages.

When extra-curricular activities are canceled, or that final speech are scheduled just before exam time it is very difficult to study. Therefore, the most widely accepted practice seems to be that of cramming, that is, cramming is just for the test.

Even though students claim small when asked how and when they study, it often consider it an important thing. It is not how or where the studying is the thing.

Dr. Spulnik Reviews Recent Satellite, Scientific Advances

"People have the idea that once we are driving into space, we are going to change the whole course of our lives," said Dr. Spulnik in an interview following the successful launching of the moon-satellite, "Pioneer IV.

"There will be some change of course," he went on, "not that it will be a small one."

He explained that the information we receive from these experiments serves to enhance fundamental laws we have held to be true, and added that, whereas once the ideas were theoretical, we are now putting them into practice.

"We are, for the first time, putting objects into space," said Dr. Spulnik. "We are now proving that launching theories we had previously held to be true."

When questioned about the problem of effects the completion of these experiments would have upon education, Dr. Spulnik answered that, in lower-division courses, he thought they would be virtually no change. However, he said that in "the matter of a scientific importance on background in fundamentals must be strengthened."

This, he explained, includes readings on radiation, temperature, humidity, etc. People do not seem to realize, he continued, that if information is received from the minute the satellite left the earth, it is of vital importance in propulsion, such as thrust and altitude. It will be interesting to take-off, and utilized in calculated for further experimentation.

Studies Move To Out-of-Doors - Students Combine Work With Nature

The students at IRC in general have a set time schedule for their study. But do they stick to it? And are they stick to it?

The answer to this double-barreled "Campus Query", of the news, revealing more about the students than about the question itself.

It was, of course, an old-time survey for a "Campus Query".

CAMPUS STYLES

By Sharon Paul

This is the "in-between season" that is, the time when the sun is the only thing in the halls of the IRC. In the beginning, the weather is warm, and the days are long. At night, the cool breezes blow through open windows, looking at nothing.

A perfect atmosphere for mid-summer exams.

To top it all off, something new in the air. Walt Disney's clip art and music is everywhere.

The melody shop is full of books, butterflies, and orange blossoms. If you have an "in-between feeling, or just any old symptom of spring fever, spring to the Andrews and find just the thing to take you in harmony with Spring study.

COACH'S COMMENTS

By Ray Johnson

Baseball Coach Ray Johnson outlined the spring weather which was warm to the players. He said that there are about 35 players on line of whom were internes last year.

The veterans are set for the hard going and for the teams in baseball. The HCC conference will be divided into northern and southern teams. The veterans are in basketball, water, basketball, and music teams. The schedule has six home dates and six away from home.

April 1: 1st at home
April 2: 2nd at home
April 3: 3rd at home
April 4: 4th at home
April 5: 5th at home
April 6: 6th at home
April 7: 7th at home
April 8: 8th at home
April 9: 9th at home
April 10: 10th at home
April 11: 11th at home
April 12: 12th at home
April 13: 13th at home
April 14: 14th at home
April 15: 15th at home
April 16: 16th at home
April 17: 17th at home
April 18: 18th at home
April 19: 19th at home
April 20: 20th at home
April 21: 21st at home
April 22: 22nd at home
April 23: 23rd at home
April 24: 24th at home
April 25: 25th at home
April 26: 26th at home
April 27: 27th at home
April 28: 28th at home
April 29: 29th at home
April 30: 30th at home
