Students at U of I consider lawsuit over fee increase

by Angela Curtis
The University News

Despite hiring an attorney to represent student interests in a re- cent $25-per-semester fee hike, the Associated Students of the University of Idaho have no current plans to sue the university administration or State Board of Education. “We haven’t even discussed the possibility of a lawsuit,” ASU President Tina Kagi said Thursday. Kagi had drafted a letter to the State Board of Education addressing ASU concerns about a $270 institutional maintenance fee U of I students pay as part of $549 in resident student fees. However, U of I President Elizabeth Zinke asked Kagi not to address the board until the two of them could discuss the matter. Kagi said the students would not take further action until after her meeting with Zinser on Sept. 16. The board meets in Moscow the fol- lowing day.

In late August, the ASU Sen- ate hired Cecil d’Alene attorney Ray Givens. Students began fight- ing a proposed fee increase in March, when the State Board of Education declined a notice of intent to con- sider a $50-per-semester fee hike there. A notice of intent is required 30 days before the board can vote on a fee increase.

The board passed a notice of intent for a $25 fee increase in April. A student activist group filed a lawsuit to prevent the increase before the board’s June vote. Calling them- selves SCAM—Students Concerned About Money—the group staged a demonstration march from the Student Union Building to the Adminis- tration Building, where they presented a 6-foot insufficient funds check to administrators. SCAM’s grievances against then-U of I President Richard Gibb’s administration included administrators’ claims that the increase would address accreditation needs in the College of Engineering. The U of I charter and Idaho Code stipulate that no tuition shall be charged for the “cost of instruction.”

“We’re using the $25 fee to look at the bigger issue of constitu- tionality,” Kagi said.

Givens represented North Idaho College students this summer in a successful lawsuit against that administration. A judge ordered $300,000 in “improperly collected fees” to be repaid with interest.

Givens said that while the legal theories are different for NIC and the U of I, the issues are similar. “The underlying issue is the same, of whether society should make a college education available for every student in Idaho,” Givens said. “The students at North Idaho College and the University of Idaho feel that the state as a whole benefits by making a college education an inexpensive as it can.”

Former SCAM President and current ASU Sen. Ray Givens said the senate hopes to establish a legal definition between tuition and fees. “The ‘cost of instruction’ is a fuzzy area,” Givens said. “We’re not trying to beat someone over the head, we’re trying to set a legal precedent.”

That precedent might include declaring part of the $270 institutional maintenance fee unconstitutional, Kagi said.

“In order for the constitution to be determined, we may have to go to court,” Kagi said. “It’s pretty clear our founding fathers wanted an educated public. Now, the cost is so restrictive it’s keeping people’ out of school.”

“Don’t love to have Elizabeth Zinke aside this, we have no prob- lem with the administration,” Krepl said. “But if she says ‘live with it,’ we’ll be on the phone to the attorney.”

Bike theft rampant at BSU

by Rob Getzin
The University News

Students attempting to cope with difficult campus parking regulations by riding their bicycles to school face another more expensive prob- lem: bicycle theft. In the 19 months preceding Aug. 1, more than 170 bicycles were stolen from the BSU campus, according to the Ada County Sheriff’s Department. During April and May 1980, 25 bikes were stolen, with a total value of approximately $10,000. In an average month, one bike is stolen every three days and thefts are evenly spread throughout the week.

Boise Crime Stoppers reports that two people may be involved in many of the thefts. They believe that one person drives a car and drops off an accomplice who cuts the lock and leaves the bike, then departs the cutting device into the car. The two then depart in oppo- site directions.

More than 92 percent of the thefts remain unsolved. Of the unsolved cases only 12 have information about the offender.

Some possible solutions could be explored, as well as preventative measures. Floyd Kaufman, a crime preven- tion officer with the Ada County Sheriff’s Department, suggests that both cyclists and BSU make some changes. The university could construct a secure area and charge areas to have their bicycles guarded and bicyclists could simply purchase better locks.

Kryptonite locks are available in 10 sizes and can be purchased for about $30. The company claims the locks “will not break, smashing, freezing, sawing, and 42-inch bolt cutters.” If a bicycle is stolen while protected by a Kryptonite lock, the company will reimburse the consumer up to $1,000.

Founders event honors Bishop Barnwell

by Corley Horsten
The University News

On Tuesday, Sept. 6, 1952, an audience including 75 students and eight full-time faculty gathered together in a crowded auditorium on the tiny campus of the newly founded Boise Junior College. Their aim: To make their dreams come true.

Boise Junior College, founded in 1952, was the result of countless hours of hard work on the part of mostly one man: Bishop Middleton S. Barnwell. Bishop Barnwell, working with the Episcopal Church of Idaho, was not only our university’s first president, but also served as its first president and was the university’s first president and was the Pledge hazing not a problem for BSU fraternities

by Dave Thomason
The University News

Pledging fraternities may come to an end if most fraternities follow the example set by the Tau Kappa Epsilon International Fraternity, the largest college social fraternity in North America.

The Tau Kappa Epsilon International Fraternity has adopted the new initiation program to remove that opportunity. "I've never heard of that," said convention speaker, Sigmund Stevens, whose son died from hazing incidents during pledging during the fraternity's 45th national convention in August.

The legislation was passed in an attempt to end hazing, an often degrading and sometimes dangerous form of initiation into a fraternity.

"The only thing that has died from hazing in recent years," said Stevens, whose son died as a result of hazing, added, "When-ever you have a two-tiered system where there are members and not, there's the opportunity for haz-ing to persist." The Tau Kappa Epsilon undergraduates have taken the lead in removing that opportunity.

Now recruits into the TKEs will now be accepted immediately with all the rights and privileges of full membership. They will have to participate in an ongoing Membership Development Program that stresses educational achievement.

Hazing has never been a problem at BSU according to Moe Sigler, Assistant Director of Student Activities. "I've never heard of that going on," Sigler said.

Sigler said she is anti-hazing and feels that the small size of the fraternity system at BSU may be one of the reasons that hazing has never been a problem.

"We have too much trouble getting people involved to not treat them with respect," she said.

At BSU, the TKEs have adopted the new initiation program and view it as a welcome change.

"We have never had a problem with hazing," said TKE Vice President John Gunner.

Tech dean looks to the year 2000 for new college

by Mitch Day
The University News

Dr. John Entorf, first dean of the new College of Technology, plans to approach his job with a clear eye on what the future holds.

"And Entorf's plans extend further than this fall; he has his eye on the 2000 year and beyond," he said.

"It is my personal goal to make the College of Technology the premier college of its kind in the world," Entorf said.

To prepare for the future, he would like to see the School of Applied Technology, a division within the new college, expanded and strengthened. The other half of the college of Technology, the School of Vocational Technical Education is well developed, but he said he would still like to see improvement in the school's program, modification and development, an increase in enrollment in formal programs and stepped-up outreach efforts.

One trend Entorf said he expects to continue into the future is the change in the kind of students going into vocational-technical fields.

Entorf sees many of today's students coming to college lacking in the math and science skills required for success in advanced technical fields. Despite this, he said students are better prepared for college than their predecessors.

Entorf has seen a change in the demographics of vo-tech students. He said he believes women and minorities will get into this typically white male-dominated field because careers in vo-tech are becoming less stereotyped.

"The traditional student—the white male, who has been the mainstay of the enrollment in higher education—will, by the year 2000, comprise only one-third of the total number of graduates," he said.

"Times are changing—and that is good. We are going to have to rely increasingly on that other two-thirds," he added.

Entorf earned his doctorate in industrial education at Texas A&M University. He has spent the last 22 years at the University of Wisconsin-Stout. He then served as associate dean for administration research.

cold-drill scores . . . again

by Loren Petty

The University News

The 1988 issue of BSU's literary magazine, cold-drill has been named one of the nation's top five magazines, according to Charles Guildford, 1988 faculty advisor.

"The most important awards were the Pacemaker from Associated College Press, which places us in the top five magazines in the country, and the Silver Medalion from Columbia University which was a national award," Guildford said.

Columbia Scholastic Press Association awarded cold-drill a first place, a Medalist award, a Silver Medalion award, one Gold Circle award for overall design, and one Gold Circle award for graphic design.

The Council for the Advancement and Support of Education awarded cold-drill a Silver Medal for overall design.

cold-drill combines literary talents of students, faculty, and members of the community. The magazine is designed and edited entirely by BSU students. For the 1988 issue, Michael J. Knapp was student editor, Paul Holt co-editor, art director Jode Stella, and art coordinator Laurie Blakeston. Submissions to cold-drill are open to the public. Interested persons may pick up writers guidelines at the English department or contact Professor Tom Trusky.
Wake up to mass transit

Boise has no appreciation for the value of mass transit. Like most westerners, we seem to include the right to drive everywhere under our list of inalienables. Cities like Denver, Seattle, and Los Angeles have learned painful lessons about just how destructive this kind of mobile living can be. Those cities suffer through some of the worst smog and traffic congestion in the country.

The Boise bus system is not in a big hurry to save Boise from a similar fate. Mind you, we are not on the verge of an emissions disaster, but the city is expanding and traffic hassles increase geometrically.

The bus needs a shot in the arm and BSU can provide it. Fact: most students perceive that BSU has a parking "problem." Fact: the intersections on either side of the university are among the most treacherous in the city. More than one pedestrian has been hit by a car on University Drive.

Boise State should work with the city to develop a student bus plan. It could be done easily and has already proven quite successful at other campuses, such as the University of Oregon in Eugene. It works a little something like this:

A student fee of three to five dollars is established and called, say, the Student Transit Fund. The money collected goes straight to the bus system and ridership would go up. Boise Urban Stages could post route information prominently in several campus buildings.

It's a win-win opportunity for the university and the city to deal with parking, traffic and transit problems in one plan.

Until then, it only costs fifty cents to ride the bus away. Public Utilities Commissioner Perry Swisher has put Boise, Idaho, on the map. In one fell swoop (or is that one swell Healey/Little Feat concert held last week at the Hawk's decibel level, drew public attention to the problem, got great coverage from Boise, Idaho, on the map. In one fell swoop (or is that one swell

Time for the privileged elite to start caring

by Peggy Gules

The University News

Attention all members of the privileged elite:
As college students we are, by definition, members of the privileged elite. I know it's hard to remember, but when we're having peanut butter and jelly sandwiches and used the last of the ketchup for spaghetti sauce last night, but we are elite nonetheless. We have options. We have chosen to sacrifice certain comforts freedom for our education. Yes, friends, somehow we all could be the proud owners of a white limo that could comfortably accommodate a family of twelve.

"Don't know what it is exactly, but I get hostile when I realize that I'm spending more to water his hair than I make in a year." I get weird whenever I see someone driving a car that costs a moderate, yet worried price. I'm worried when I see how unbalanced our society has become. As the gap widens between the haves and the have-nots, hostility increases and the ground preparation for revolution. Donald Trump makes Mario Antio-con look like a philanthropist.

Our societal problem is not limited to a few good deeds skinking around in fat cars, however. Our real problem is a system of competition rather than cooperation. The gap will continue to widen.

Until then, it only costs fifty cents to ride the bus anyway.

Letters

Old Glory: symbol of many things

Editor:

The 1936 Olympic Games were held in Berlin. As the athletes passed his personal reviewing stand, Adolf Hitler demanded that each and every country's flag be dipped before the Nazi banner. Every country, save one, followed Hitler's demand. The flag of the United States of America was not dipped.

The flag was not dipped because this great nation would not pay the respect to Hitler that he demanded. Our Flag symbolized to Hitler, and the world, the spirit of democracy. We, as a country, are the sort of stuff that makes all Americans proud.

Out of the woodsheds and into the streets, comrades! Change through public intimidation is ours for the taking.
The Bush drug war: Vietnam or Dragnet?

For some time now, we have experienced a growing concern over the use of controlled substances in this country. The subject—whether or not controlled substances are dangerous and should be banned—is frequently debated in both political circles and in the media. However, it is important to note that the debate over controlled substances is not new. This issue has been debated for many years, and it seems to be increasing in popularity.

The statistics are alarming: The use of illegal drugs has steadily increased over the past several decades. According to the National Institute on Drug Abuse, in 1970, only 2% of the population had used an illegal drug in the past month. By 1985, this number had increased to 10%. In 1995, it was estimated that 17% of the population had used an illegal drug at least once in their lifetime.

The Bush administration has declared war on drugs, and this has resulted in a significant increase in the number of people being arrested and imprisoned for drug-related offenses. In 1970, there were only 50,000 people in prison for drug-related offenses. By 1995, this number had increased to over 1 million. The cost of this war on drugs is astronomical, and it is estimated that it costs $80 billion per year.

The Bush administration has also implemented a variety of policies to deal with the drug problem. These include increasing the number of police officers, expanding the use of mandatory minimum sentences, and increasing the amount of money spent on drug treatment programs. In addition, the administration has made it a priority to increase the availability of drug treatment services.

The Bush administration has also made it clear that it is willing to use military force to reduce drug production in other countries. In 1989, the administration announced its intention to use military force to disrupt the production and distribution of drugs in Colombia.

Scholarships for postgrad studies in Japan offered

Want to see Japan and experience its culture firsthand? The Ministry of Education in Japan is offering 18-month and two-year scholarships to Idaho students interested in pursuing postgraduate studies in the humanities, social sciences and natural sciences at a Japanese university.

University graduates under age 35 as of April 1, 1990, are eligible to apply. Applicants must be U.S. citizens and have a good knowledge of the Japanese language.

Students, who will be selected by the Ministry of Education, will receive airplane, tuition and a monthly allowance of about $1,100.

Applications must be submitted by Sept. 18. An interview and written examination in Japanese will be conducted from 1:30-5 p.m. Sept. 21 at the offices of the Japanese consulate-general in Portland.

Dykstra and Boyle receive grant

Computers may someday help students solve physics problems if a project by a BSU physics professor and a Carnegie-Mellon University researcher proves successful.

The two scientists, Dewey Dykstra from BSU and Frank Boyle from Carnegie-Mellon, were recently awarded a $416,000 grant from the National Science Foundation’s Research in Teaching and Learning Program. The grant will fund stage one of a three-stage project aimed at developing an artificial intelligence computer program used in teaching physics.

Stage one will last three years, according to Dykstra, who will spend this fall semester working at Carnegie-Mellon.

The program will be geared for introductory physics students and will run on a standard Macintosh, says Dykstra. BSU math professor Daniel Lamet also will work on the project next year.

Dykstra said the grant money will be divided, with a little more than half coming to BSU.

Qualified tutors needed

The Student Support Program at BSU is seeking tutors to assist program participants who are experiencing academic difficulties.

To qualify as a tutor, a person must have a 3.0 grade-point average or better. Tutors with knowledge and experience in freshman level courses such as English and math are in demand, although assistance for courses throughout BSU’s curriculum is needed.

Tutors assist individuals or small groups for approximately three hours per week. More hours may be scheduled depending upon the program’s need and the tutor’s availability.

The Student Support Program is a federally funded program offering free academic and personal counseling support to students who are low income, learning disabled, physically handicapped or first-generation college students.

For additional information contact Jesu Morache at 385-3457 or 385-2383.

Convocation set for Sept. 13

BSU students are invited to attend the second annual Student Convocation to be held in the Morrison Center at 9:40 a.m. Sept. 13.

BSU President John Keiser will recap Year One of the Student progress and outline the university’s plans for the coming academic year.

ASBSU President Pat Reilly also will outline goals for student government. The pep band will provide entertainment and the BSU Bookstore will hold a drawing for several gift certificates.

The convocation is designed to inform BSU students about the university and its plans. At the first meeting last winter more than 1,200 students attended.

1990 cold-drill seeks Idaho writing

The newly appointed editors of BSU’s literary magazine, “cold-drill,” are seeking manuscripts of Idaho-oriented writing.

The literary magazine welcomes contributions from all writers who have written on subjects relating to the state. Authors’ guidelines can be obtained by writing to the BSU English department, or calling 385-1246. Submissions will be reviewed through Dec. 1.

Time for Who’s Who nominations

BSU will again be submitting nominees for inclusion in the annual publication of Who’s Who Among Students in American Universities and Colleges. In order to submit our students for consideration, nominations are requested from all interested individuals, student organizations, departments, and schools.

All nominations should be submitted by Sept. 29.

Boise becoming a "bevy of eateries"

by Will Speckman
The University News

For all you hungry hounds, Boise is becoming a bevy of eateries. While we're sure to remain the fast food capital of the northwest, the 'real thing' does exist. Next time the urge hits, take along the book and pretend to look busy, just in case...

If you're looking for that old fashioned type of drug-store lunch counter, visit Moon's Guns & Tackle at 815 W. Hancock, in Boise. Sure, you might get trapped among the sportsman's snuff, but there's no better place for the real taste of a giant home made milk shake. O.K., so maybe it's not as high-brow as the Haagen-Dazs variety, but you do get the metal "museum shake maker" cups, spillover included. Moon's also serves the great standard burger/sandwich type menu from the grill, daily between 11 and 3. Early risers can also enjoy breakfasts and the rods and reels from 7 to 11.

For something a little more up-scale, make it a point to enjoy lunch at Everett & Co. at 215 N. 3rd, next door to Dragonfly Imports. Owner Everett Halfhide offers an incredible selection of tasty 'nouvelle cuisine' style lunches, taking advantage of fresh and seasonal foods. Diners can devour their delectable either indoors, (check out the Majolica collection), or outside beneath canopy umbrellas. Everett & Co. also specializes in catering and take-home foods. Don't be afraid, at around five dollars, lunch isn't too pricey, (compare fast food prices!), and it is well worth it. Everett & Co. is open for lunch and carry-out Monday through Friday from 11 to 6:30; and Saturdays from 10 to 4.

Another little known treat is Boise's newest restaurant, The Southern Gentleman. Specializing in authentic New Orleans Cajun cuisine, the restaurant occupies the basement location which was formerly home to both The Nook and Nina Mae's. If the word gets out about the delicious spicy Cajun shrimp, The Southern Gentleman might enjoy a little more longevity than their previous tenants. At present, the restaurant is open for dinner only. Monday through Saturday, from 5-10 p.m. Dinners range from $6.50 to $16.95.

Outdoor concerts: gone with the wind or just up in the air after Little Feat?

The public outcry over the volume level of last week's Jeff Healey/Little Feat concert has raised an issue about the future of major outdoor concerts in the Boise area, not even six months into the first season this privilege became available.

When the Hawks' baseball stadium opened this year, and concurrently became available to touring musical acts, it seemed the ideal place for large revenue bands to attract a lot of people for a night of music under an open sky. And, for a brief time, it worked: several of the Hawks' homegames this season had the added attraction of a live rock band opener. Based on the success of audience attendance, bigger name groups started being signed.

Just the Little Feat concert last week not only had 2,300 people in the stands and the infield, it also brought over 500 Capital High area residents to their feet and sent them running for the phone to complain about the noise.

Although it was widely assumed that the hands had simply cranked the volume knobs too high, according to Tom Webster, an associate for Madd Maxx Productions, the company in charge of all of Hawks' stadium musical promotions, the music was not excessively loud but with the clear skies that night, the atmospheric conditions were perfect to carry the soundwaves a long distance.

Listening from my home about three miles from the stadium, I could hear guitar solos and make out the song intros with little effort. The sound was clear enough that it was merely a difference up close; it is sound distortion that is responsible for so much of the hearing damage associated with loud music.

For the time however, a 100 db limit has been placed on the ballpark gigs, and Madd Maxx Productions is consulting with open air areas in California to see others are dealing with similar restrictions. As for the future of outdoor concerts the way they were meant to be heard, it may all depend on that big weatherman in the sky. And I think Willard Scott prefers to polka indoors.
Retold in the Hills, Trusky's film to air on Channel 27

In 1919, Nell Shipman made history with Told in the Hills, the first major film made in Idaho. This summer, BSU English professor Tom Trusky and a film crew retraced some of Shipman's steps for a show on the making of the film, Retold in the Hills, a compilation of interviews with people who viewed the production of the early movie, will air locally on Channel 27.

Part I will be shown at 8:30 a.m. and 8:30 p.m. on Sept. 13; Part II will air at 8:30 a.m. and 8:30 p.m. Sept. 20.

Watch the Emmys Sept. 17

Watch the 41st Annual Emmy Awards at 7 p.m. on Sunday, Sept. 17, on KTVN Channel 12. An Emmy preview special begins at 6 p.m.

Wanted: male voices

Join a music department chorus class 0401 101, 105, 110 for a break from the grueling toll of academia and get BSU credit for participation. The music department reports that male voices are "especially welcome." Check the fall class directory for rehearsal times or call Dr. Schroeder, 385-3299, for more specifics.

Rock with Warehouse and the Dirt Fishermen Sept. 15

A concert to benefit the BSU chapter of Amnesty International, an organization working to promote human and political rights around the world, will feature the music of the Boise bands Warehouse and the Dirt Fishermen. Tickets for the Sept. 15 concert are $3 for BSU students, faculty and staff and $4 general admission. The dance is all ages. The show begins at 9 p.m. in the Student Union Ballroom.

Deanna Peterson, a member of the BSU Amnesty International chapter, said the group "needs the postage. We send out a lot of mail. Amnesty International chapters around the globe solicit signatures for petitions and write letters on behalf of political prisoners. The organization, including BSU's chapter, targets these mail campaigns at government officials in countries which Amnesty International believes are in violation of United Nations' human and political rights resolutions.

Concert go-ers may obtain more information and literature about Amnesty International at the concert. "The focus of the concert is not about raising money," according to Peterson, "but about raising awareness." Peterson added admission to the concert can be paid with postage stamps instead of cash.

To Interest You In Our Student Checking Account, We're Dangling The Perfect Carrot.

As a college student, you're going to want your own checking account. That much is certain.

Something else you might find useful is your own Apple Macintosh Plus computer system.

Wow! Talk about coincidence.

Simply stop by First Security Bank, enter our drawing, and you could be the lucky cuss dancing through school with your own Mac.

Now on to the checking account.

We've already established the fact that you'll probably need one. But the last thing a student needs are the service charges that generally come with it. So we've nixed them. Charges for the first 10 checks each month? Gone. Fees for using HandiBank machines? History.

What's more, if you're not exactly flush right now, no problem. You don't need to make a deposit to sign up.

Plus, every student who signs up for a First Security Bank Checking Account and deposits at least $25 will leave with a college tee-shirt so damn stylish, money can't buy it. Which is why we just give you one, while quantities last.

So if you're a student who could use a great checking account, come in to First Security Bank today.

And pounce on a carrot that looks a whole lot like an Apple.

First Security Bank
Currently Giving 110%
Member FDIC.

No deposit necessary to enter Apple Macintosh drawing.
Apple Macintosh is a registered trademark of Apple Computer, Inc.
Avoid BSU's big parking hassles, ride...

**THE BUS**
Boise Urban Stages

The Boise Urban Stages, Boise's public transportation system, #720 Parkcenter route stops on University Dr. Monday through Friday. Between 7 - 9 a.m. and 4 - 6 p.m., the bus passes by campus twice during every hour. Mid-day, the route travels by BSU once during the hour.

BSU students are eligible to purchase the $10 monthly student pass or the single adult fare is 50 cents. Monthly passes can be bought at BSU's Student Union Union Station and other locations around town.

For route, schedule or Saturday route information, call 336-1010.

**Welcome to Boise State Mugger Bait!**

*By Steve Lyon*
*The University News*

Welcome, class of 1993 or thereabouts.

Dear Freshmen, freshmen, sweet little farm yokels, middle-aged gawking oily slabs of mugger bait—with your out-of-date and dumb crewcuts or your pawnified and puffed, sprayed, shellacked big hair— I am so glad to see you all.

Now that I have tried in my own juvenile way to instill you, let me introduce myself. I am an upperclassperson of mediocre grades and dubious intentions, so it is only logical that I take time out from my busy schedule and sit down to pen some sort of inspirational message for you. Consider me, if you will, your mentor for a few moments (you can trust me and the Lord, friends) and allow me to expound briefly on a subject somewhat relevant to your new career as a college student.

Grades are very important in college. I'm sure you had fun in high school, got Cs, threw out a few times, etc., but those days are over. This is an institution of higher education; grades, and grades alone, are now the sole measure for your existence—your only objective in life. Forget sports; you may have played a little bit in Jerome, where they pretty much had to take every wimpy crybaby who came along. Here in the Big Sky, you're a little too scrummy to play ball with hefty, 300-pounders. I'll tell you that right now.

Believe me, nothing can give you more pleasure—no girlfriends, boyfriends, fast cars, endless legs—than five big As on your report card, the big 4.0,

AAAaahhh. The hell with extracurricular activities—a complete and total waste of your good studying time. I want to see you waiting outside that library at 6:45 a.m. Monday morning, pleading to get in early and hit the books.

Listen, when you show up at that first "real" job interview, you want to kick ass with a bratty G.P.A. Everything else is just resume' padding. Picture this scenario four years down the road: You arrive for a 5 a.m. interview at Yo-Yodne Nuclear Avionics. You are ushered in a walnut panelled executive office. It's you and Mr. Big. You make your pitch.

"Sir, I was president of the Kappa Sigma fraternity; I was an ASBSU Senator; I was a BSU Ambassador; I was captain of the debating team; and I am a real people person."

"What? You're a dork. You got Cs and Ds on your transcript waiting outside that library at 6:45 a.m. Monday morning, pleading to get in early and hit the books."

"You can turn things around, get into a real type-A attitude about grades, and friends, when you do blow by everybody else on your way to a Rhodes scholarship, please think of those less fortunate souls, like me, who fell in love with the books, and the women, and Chuck Bukowski's books, and, well, did not live up to their academic potential. Look into your heart—and give us a job."

---
Fall semester BSU library hours

Monday - Thursday 7:30 a.m. to 11 p.m.
   2nd floor closes at 10 p.m.
Friday                              7:30 a.m. to 7 p.m.
Saturday                            10 a.m. to 6 p.m.
Sunday                              noon to 10 p.m.
   2nd floor closes at 8 p.m.

Cheap movie tickets

See a movie for $3! Available for purchase at the Student Union Station or discount movie passes for Excellence, Cinemex-Odeon and United Artists/Commutemn theaters. Passes are not usually accepted during the first few weeks of a hit film's release, so check the local newspaper to find out which films will accept discount passes. Call 385-1448 for more information.

Cheap recreation

The BSU Recreation Center, located in the Student Union, offers special rates for bowling and billiards. BSU students, with activity card, can bowl for 80 cents a game, plus 35 cents shoe rental, or play pool for $2 an hour. The Recreation Center also houses a assortment of video and pinball games, football tables and ping pong tables.

Cheap outdoor fun

The Outdoor Rental Center, also located in the Student Union, is the place to go to rent sports and recreational equipment. Water sports equipment, camping and backpacking equipment, volleyball and softball sets and cross country skis are available for rental. For example, a BSU student can rent a sailboard for $10 a day or a sleeping bag for 75 cents a day. A current Boise State student activity card is needed to rent equipment at the student rate. For more information, call 385-1466.

Run, jump, swim

As a BSU student, you are entitled to use the swimming pool, weight rooms, jogging track, and racquetball courts simply by showing your student activity card and a photo I.D. To get a schedule of recreational facilities hours, call 385-1131 or stop by the offices in the Human Performance Center.

Free Flicks

The Student Programs Board, the entertainment arm of ASBSU, provides social and cultural activities for BSU students. Some activities, such as the films, are free. Other events, such as concerts, are offered at a moderate ticket price. SPB programming committees include films, concerts, comedy, fine arts, special events, lectures and family activities.

Legal Stuff

Divorce, landlord/tenant problems, small claims court and other legal questions can be answered by the attorney retained by ASBSU. The attorney is available for consultation to any full time BSU student at no or a minimal cost. Call ASBSU at 385-1440.

k.d. lang and the Reclines remain tall in the saddle

by Will Spoorman
The University News

The " Alberta Rose" is 'pullin' back the reins. After the enormous commercial and critical success of last year's Shadowland, k.d. lang and the Reclines have headed back to the Canadian hills without selling themselves short, while Absolute Torch and Twang, lang's latest St. Rose Records release, verifies that there's nothing better than good horse sense when it comes to following one's instincts.

Country torch bearer Patrye Cline had forever been k.d.'s number one influence, so when lang pulled Cline's lifelong producer, Owen Bradley, out of obscurity and illness to produce her last LP, the hits were sure to follow. With lang, left Cline's trademark songs off the intuitive smarts to not offer a hit but rather to simply remain without surprise. lang, however, became Lloyd. lang's new number one influence is Shadowland's Crawford Matthews, Ben Mink, and Greg Leisz, who've shared k.d.'s cornel with electric, acoustic, and steel guitars, respectively, while Michel Pouliot keeps the rhythm on drums and John Dymond fingers the bass, cutting from ballad to hillbilly to honky tonk to country rock and back again, as aptly as lang herself.

Absolute Torch and Twang is k.d. lang and the Reclines' strongest work to date merely because it never strays too long in the hard-edge field that Angel with a Lariat maintained, nor in the ballad-soaked country that became Shadowland. By having lang's instinctive smarts to not offer a readily-made collection of Patsy Cline songs, this newest LP has, like the remaining words of "Pullin' Back The Reins" suggest, forced k.d. lang to do her absolute best to simply remain "all in the saddle" when all that talent runs away with "a will of its own."

See the magic of Wizard of Oz on the wide screen

by Cliff Hall
The University News

This is the 50th anniversary of the greatest fantasy film ever made. See for yourself the power of The Wizard of Oz, especially on the wide screen. It has been released in a brand new print with the Kansas sequence in its original sepia tones—a much warmer picture than the black and white—and the sound is truly incredible. Judy Garland and the rest are wonderful and the Wicked Witch of the West can still frighten. Don't miss this rare opportunity. (At the Flicks, rated G.)

Do the Right Thing, Spike Lee's passion-filled tirade on racism is a must-see for anyone living in America today. Topical and yet entertaining, the film moves in unforeseen directions forcing the viewer to react to the visceral screenplay on unexpected levels. Don't expect it to change the world, but allow yourself to take it in for what it is: a plea for us to "do the right thing." (At the Flicks, rated G.)

"S6 monthly payments at 18% interest OAC"
RINGS OF SMOKE

by Cliff Hall

Dee and I have been close for a long time—at least since before the divorce when we shared a bedroom in the tiny farmhouse where we lived. I remember it as well: she, a seven-year-old with a pixie cut, and I, a ten-year-old wishing to rule the world. We lay in our beds listening and wondering at our parents’ anger and frustration. Their voices low but suspicious, their resentment quiet but strong, my parents would create a circular vocal path that drifted like smoke. We would watch the smoke drift into our room until we grew tired and finally slept. But smoke drifted into our room until we grew tired and finally slept. But smoke drifted into our room until we grew tired and finally slept.

As for my parents, they did try to hide it from us, their bitterness toward one another; but we, lying in our miniature bedroom with ears strained to understand, knew. And as each night passed, I couldn’t help but notice the smoke growing thicker, the rings stronger around my bed.

One Sunday afternoon, a day we usually liked to nap after a big dinner, I stood in the living room next to my sister. We were watching our parents through the picture window. Dee and I were sitting. Pebbles, her baby doll, by the hair like she always did and I was alternately fluffing up her hair with a pocketful of scissors.

I thought it odd that the car’s engine wasn’t running. It had been just a little older I may have found some absurdity in the sight, but not there, not then. They sat parked in the driveway arguing, never planning to leave the house. It was spooky, really, as first and I carried identical, much-needed at the time. Looking through the window, I watched the fight, the battle.

Mom and Dad would come in and out, their resentment quiet but strong. We would watch the smoke drift into our room until we grew tired and finally slept. But smoke drifted into our room until we grew tired and finally slept. But smoke drifted into our room until we grew tired and finally slept.

Brain Bran by Jim McColy
On the road with Bronco Volleyball

by Corky Honset
The University News

While Bronco fans anticipate the commencement of 1989 Big Sky volleyball action, the team has enjoyed a fruitful start in non-conference play.

BSU's first six matches have been in the midst of enemy territory: The August 31 opener in Salt Lake City against the University of Utah was successful as the Broncos disposed of the Utes in four games 9-15, 15-4, 15-13 and 15-6.

From there, BSU traveled to southern California to take on Cal State Fullerton. The final score there was again in favor of the lady Broncos 15-11, 15-13, 15-3, followed by a highly-contested defeat at the hands of UC Irvine: 15-8, 14-16, 15-10, 17-15, 1-15.

On Sept. 8, Boise State traveled to Oregon to participate in a four-team round-robin tournament. In the day's first match, BSU defeated Loyola-Maramont 16-14, 15-9, 15-9. Later in the day, they defeated Wyoming in four games 15-9, 8-15, 10-15, 11-15.

The Broncos completed the round-robin Saturday in which turned out to be the championship match against the host team, Oregon University. Both teams were unbeaten in Friday's contests. Oregon then handed BSU its second loss in six matches in four games: 15-9, 8-15, 10-15, 11-15. Senior middle blockers Sandy Stewart and Kelly Baker were named to the all-tournament team following the final match.

BSU will begin conference play Sept. 15 in Boise against the University of Montana and will continue Saturday against Montana State. Their first home match is Sept. 21 against Weber State.

Virden leads Broncos to 23-12 win

by Derrillio Martinez
The University News

The Bronco's Mike Virden, the Lumberjacks' secondary wide open, leading the way to a 23-12 victory over perennial power Stephen F. Austin Saturday night.

Four minutes into the game and trailing nine to nothing, Bronco fans feared the worst. Enter Mike Virden of Des Moines, Iowa, who simply completed 17 of 31 passes for 276 yards and two touchdowns, which included 20 unanswered points in the second half for the Bronco victory over the Lumberjacks.

"I came to play. I felt all along I could do it," said Mike Virden. Virden replaced starting quarterback Corky Hansen.

And well he should. Virden had an outstanding junior college career, leading his team to a 20-1 two-year record and a national championship in 1987. He finished the 1988 season ranking second among the nation's quarterbacks for passing, according to the 1989 Bronco football press guide.

Virden's most outstanding play Saturday night came late in the fourth quarter when the Broncos were backed against the wall on their own one-foot line. With BSU leading 16-12, Virden engineered a 99-yard scoring drive, capping the game with a four-yard touchdown pass to fullback Bart Hall.

Bronco cross country team wins first meet

by Rob Nesbitt
The University News

Boise State's men's cross-country team was in first place of the year over visiting division 1 powerhouse Cal State of Los Angeles.

The meet, which was the first cross-country meet hosted by the Broncos in four years, was a landslide victory for the Broncos who cut-distanced their rivals by 25 points in Boise's Ann Morrison Park.

Leading the Broncos was junior transfer Rob Card, who came to the Broncos from the University of Oregon where he qualified for the NCAA Cross Country Championships in 1988.

In Saturday's heat Card, who placed first, finished the 8,000-meter course in 26 minutes two seconds. Coming in second was BSU's Kevin Butler, a junior, with a time of 26.05 just three seconds behind Card.

The first runner for Cal State LA to cross the finish line came in fourth behind BSU junior Sid Sullivan, Raymore Perez of CSLA finished with a time of 26.10 just one second behind Sullivan's third place time of 26.09.

BSU coach Randy Mayo who was in his first season as the men's cross-country coach was pleased with his team's whopping margin of victory. "The best thing of the entire race was the amount of time between our first and our fifth runner," Mayo said. He said that any time less than 25 seconds is considered a good time, and noted the team's time span of 25 seconds.

"A big surprise for us was Butler's second place finish. This really ought to push the entire team in our next meet," Mayo said.

The teams next match is Sept. 25 in Seattle at the University of Washington Invitational.
Experienced players put Broncos in good form for '89

by Demielle Martinez
The University News

Fifty-two of the lettermen who led the Broncos to an 8-4 finish and Big Sky conference play-off berth last season, return this year to the football roster. Seventeen of the 42 started in the final game against Northwestern State in 1988 and started again in Saturday's line up against Stephen F. Austin State.

Duane Halliday (6'2", 194 lbs.), who started 11 games last year, and completed 140 of 300 attempts for 1,694 yards, returns as quarterback. With one year of starting experience behind him, Halliday said, "A major change for me is that I'm a lot more comfortable and confident." He said he plans on increasing his passing yards and adding a variety of plays to last year's running game.

Anchoring the offensive line is center Pat McCade (6', 250 lbs.), the only returning senior starter. He missed only 11 snaps out of a possible 794 offensive plays last season.

Running back Chris Thomas (5', 100 lbs.) was the leading rusher last year with 181 yards and became the third Bronco to rush for more than 200 yards in a single season. He leads the tailback crew along with fullback Bart Hall (6', 226 lbs.).

Hall was named the most improved running back last spring. He started in four of 12 games last year gaining 78 yards and four touchdowns.

After losing 15 pounds in spring ball, Hall said there is a "world of difference" between the way he feels this season from last.

"Personality, I'm a lot tougher this year mentally and physically," he said. "I know I'm the best player on the team for them not coming up. We can't penalize the whole team for them not coming up. We won't have a double standard on this team. If there is one thing they must learn, it's that they must earn success."

Check out an IBM PS/2. It could save the semester. And win you a Jeep!

How're you going to do it? PS/2 it!

Choose from five different computer packages loaded with easy-to-use software and ready-to-go! What's more, when you buy a Personal System/2® you can get PRODIGY® the shopping, information and entertainment computer service at less than half the retail price. Special savings on your choice of these IBM Personal™ models, too! See 'em in the SUB cafeteria and enter the sweepsakes on September 13 and 14 from 11 to 2.

Greek system at BSU suffers housing problems

by Dave Thomason
The University News

Sororities and fraternities at BSU are in a period of transition and change. While some are expanding and prospering, others are suffering due to a changing culture. The university is a commuter college where the average student is around 30 years old—not exactly the most fertile ground for Greek recruitment.

BSU lacks the traditional Greek system of a Greek Row. The closest thing the university had to a traditional Greek house was the old Tau Kappa Epsilon house on Warm Springs. The building where the TKEs did their best to uphold the Greek tradition of throwing parties and slamming beers is now the home of the New Hope Center, which was constructed to accommodate the changing needs of the university. They are now occupying apartments and are looking for a new home. Members’ efforts are hampered by a rule that requires all Greek houses to be within a mile of BSU, according to TKE Vice President John Gunnar.

In spite of their housing problems, TKE membership, although less than it was in the '70s, is holding steady.

The Kappa Sigma fraternity also used to have a big house on Main Street but were forced into smaller digs in the late '70s. Kappa President Vic Durnil reports that they may be looking to move to a new house on Lincoln because the membership is out-growing the small house.

The Gamma Phi Beta sorority is also suffering from a housing problem. They were forced out of their house and are looking for a new place.

The Greeks who seem to be the most prosperous are the LDS chapters that have headquarters at the LDS Institute on University Drive. The Iota Chi Beta Sorority expanded into two groups, forming the Iota Chi Sorority. The expansion was spurred by an increase in membership, said Iota Phi President Dianne Brown.

“We just had too many members for one group,” Brown said.

The Greeks at the LDS institute do not reside together in groups but use the institute as a meeting place. According to former Sigma Gamma Chi president and current member Eric Schrader, it is “probably better” because the institute has a gym and facilities that other groups can not provide.

The strength of the LDS chapters may be attributed to greater visibility and LDS student familiarity with the institute and the Greek organizations, according to Schrader.

As a whole, sororities at BSU are more successful than the fraternities at recruiting new members. Moe Sigler, assistant director of student activities and former sorority member, said she thinks one of the reasons for this may be that sororities allow women more opportunities than do other organizations.

Because of the experience and the opportunity for women to assume a leadership role, Sigler said, “it was the best decision I ever made.”

Alpha Chi Omega Vice President Kim Brooks agrees that sororities offer chances for leadership, but cite other reasons for joining.

“We have a lot of sisterhood and I’m more involved. My first year in school I lived in the dorms and wasn’t involved in anything, but since I joined I’m involved with a lot of things,” she said.

According to various leaders and members of the Greek organizations, a major obstacle to expansion of the system is the lack of unity within the Greek system. Last year, efforts to unify the organizations were unsuccessful.

Calling all BSU students

If you are a currently enrolled BSU student and have good communication skills, you could be part of the BSU Phonathon '89 telemarketing team. Dependable and enthusiastic achievers can learn marketable job skills by calling BSU alumni and friends to ask for financial support for the university.

Salary: $5 per hour

You would be expected to work a minimum of two shifts per week. Shift times are 6:00-9:30 p.m. Monday, Oct. 2 through Thursday, Nov. 16.

To set up an interview, contact Kim Phillips, BSU Development Office, Education Bldg. Room 707 or call 385-3276 by Wednesday, Sept. 20.
