Roundup, October 24

Associated Students of Boise Junior College

Although this file was scanned from the highest-quality microfilm held by Boise State University, it reveals the limitations of the source microfilm. It is possible to perform a text search of much of this material; however, there are sections where the source microfilm was too faint or unreadable to allow for text scanning. For assistance with this collection of student newspapers, please contact Special Collections and Archives at archives@boisestate.edu.
Thought for the week:

In order to keep his mental and organic balance, man must impose upon himself an inner rule. The state can thrash legality upon people by force. But not morality. Everyone should realize the necessity of selecting the right and avoiding the wrong, of submitting himself to such necessity by an effort of his own will. — Alexis Carrel

C United Fund gives a Success

Those who give to the United Fund can actually give to the poor. By giving you are helping prevent actual poverty. Among you are helping to control such diseases as heart, polio, and diabetes. Central Paity Fund

The C United Fund twice competed 1971 and ended Oct. 18 with a total of $1,084. Those helping him for different sections were Mrs. Carpenter, Mr. Charlie Brown, Mrs. C. E. Ford, and Carmen Marvolis in the student section. Apparatus extended to each section, a collection that were im-

First place winner in the large float division was the Golden Z float, a mammoth white bronze which roared. The medium float division was the Pi Sigma Sigma float. In the small float division, the Nurses Club took first and the Spanish Club, second.

Gaye Crowned Homecoming Queen, Reigns Over Weekend Festivities

Pi Sigma Sigma's candidate, Miss Gaye Berger, was crowned Homecoming Queen, Friday night, October 22, during the internment of the annual Homecoming dance.

Geology Classes Take First Field Trip

The first geology field trip of the current school year left Saturday, Oct. 21, at 1:00 p.m., from the science building on a 14-mile round trip to Bruneau Canyon. The group, dressed in hiking clothes, included both the day and night section of geology 11. The trip, conducted by Mr. Paul Nisland, geology instructor, took approxi-

The highlight of the field trip was the view of Bruneau Canyon in which several thousand feet of lava flows. Interbedded red soil zones gave an indication of the amount of time involved in geologic history.

Among the other highlights of the trip were the stops to examine lake sediments, lava flows, and the vegetation cover and its effect upon the erosional processes.

SELECTIVE SERVICE -- VITAL ELEMENT

Selective Service is a vital element to our nation's defense. It is also a system of the government that affects, or will have an effect on many people in America. The Selective Service System of the U.S. is in charge of the draft. Selective Service, of course, that title on the door is not the only function of Selective Service. Selective Service must pass through their 18th birthday, or five days thereafter, to register for possible draft to active duty in the armed services.

Any non-enlisted male approaching 18 years should know that he can register with the local draft board in Boise, located in Room 411 of the Diet Office building, or at his home, by filling out the Selective Service Registration form. The registrant must fill out the Selective Service Registration form, and attend the Selective Service Registration hearing within 30 days of his 18th birthday. After the registration, the Selective Service Registration form is then mailed to the registrant, and the registrant must report to his local draft board for possible induction into the armed services.

After you are duly registered with Selective Service, you are required to notify your local board in writing of any change in your status. Selective Service is a vital element to our nation's defense. It is also a system of the government that affects, or will have an effect on many people in America.

PERSONALITY OF THE WEEK

A pleasant and interesting English major is BJU’s “personality of the week.” This week, Mr. Jack Natkin attended the University of Illinois and Missouri City College. He received his B.A. in philosophy and his M.A. in Latin American studies and creative writing. Mr. Natkin is an amateur art collector and, in his own words, “collect strictly unknown artists—paintings I like and can afford. I listen to folk music, chess and bridge as other avid interests.

Just Browsing...

Did you ever notice how many titles seem to be tied together with “and”? There’s Romeo and Juliet, The Pit and the Pendulum, People and Beast, Love and War.

Whether or not those particular books are in the library you’ll have to check for yourself, there are some interesting new books in our library which contain that hallowed “and” in their titles.

For example, The Lotus and the Robe, by Arthur Koestler, is a book written by a personal friend of the author. He traveled in India and Japan and wrote a “dream book” about the two countries. The pages of this book are filled with poetry and are a beautiful piece of art. The two countries are divided into opposite ends of the spectrum, from the most primitive to the most foremost. The other book that everyone is talking about is Zen and the Art of Motorcycle Maintenance.

Another example of “and” in the middle is the love story Po and the Camelot, by Ignazio Silone. This “romantic, moving masterpiece” is set in a peaceful peasant village in Switzerland on the Italian border. The tableau of a fox under a camels tree healing a dog in his paw is painted on a float for the Feast of Camelot. The art is done by students in the Fine Arts Department. The fox and the dog are two of the most unique things in the world.

The last, but not the least, illustration of this little study is America and the End of the Postwar World, by Edmund Stilpman and William Fife (Dik). Even though the author has an “end” in the middle of the book, must mean there are two authors. This indicates that the foreign policy of the United States is a very important topic in this book.
**FRESHMEN HOLD AUCTION**

"And what am I offered for this lovely Farm?" asks auctioneer Paul Henry as he attempts to sell Holly Bridges and the upper division credits in the field of Life Sciences, and Carmen Marlette, chairman of BJC's United Fund Drive, settles to getting bids from the spectators.

**TV Biology Accepted by BJC**

Recently, a nationally televised biology course was extended to Boise and the surrounding area. Dr. Ray Koppleman of the University of Chicago is the instructor, and working with Dr. Koppleman as the local co-ordinator is Dr. Donald I. Obee, Chairman, Division of Life Sciences, Boise Jr. College.

Although the program started earlier this month, applications are still available from Dr. Obee. Lectures will be given Monday through Friday of each week except for regular school holidays. The time is 7:30-8:30 a.m. over KIDO-TV. Channel 2. The course will continue through June 10.

Three semester hours credit will be given during each of the two semesters for a total of six semester hours. Since BJC is the local coordinator institution, these will, of course, be BJC credits. The course, however, is nationally accredited and more than 150 colleges and universities throughout the country are participating in the program. Some of these schools give graduate credits, some upper division credits, and some lower division credits, which, of course, is all BJC can do at the junior college level. The fact that many institutions do give graduate credit, graduate credit enhances the prospects of having more upper division credits. This decision rests within the discretion of the registrant of the institution in question.

---

**NEW**: Boise's new television biology course, "LET'S GO BOWLING!" has been conceived to make it easier for schools in the field of Life Sciences. The program is sponsored by the American Association of University Women, and will be offered to a number of institutions within the country.

**ABC**

The program is essentially a television course on biology for the junior college level. It is designed to help students gain a better understanding of basic concepts in biology, and to provide them with an opportunity to study these concepts in a laboratory setting.

Five Cents To Serve You

It Pays To Look Well
Broncos Battle Trojans For 14-13 Win; Meyers Makes Extra Point To Gain Win

By Bob Burr

A spirited Everett Junior College football team held the Boise except for the lone touchdown that gave the Bronco.'

In the second quarter of the game, the Trojans' quarterback, Pat Meyers, kicked an extra point to break the Bronco lead.

The first half of the game was controlled by the Everett team except for the lone touchdown made by the Broncos. The Trojans struck hard in the second quarter, striking the Broncos for two touchdowns. Trojan fullback Pat Alexander swept aside Bronco defenders for a 7-yard run to the Boise 10-yard line to set up the first touchdown of the game.

With a little more than nine minutes remaining in the half, the Trojans' quarterback took a pitchout and scored from the three-yard mark.

The Broncos came back in 11 plays and marched 70 yards for their score. Meyers' brilliant runs along with yardage by Meyers and Koons put the ball in position for the try across the goal stripe by Koons.

Everett struck back via the air and in short order they had added six points to their total, the extra point kick being blocked. A bad pass from center set up

The selection of Bob Kennedy ended several weeks of patient growing and grooming of the beard. Since Maden announced the Bob Kennedy Thursday evening at the pep rally, Bob King and Bob Biederman also received honors as having the longest and the most original beard. It seems many of the boys have become attached to their beard that they plan to keep them.

Just after his arrival in this city, Woodrow Wilson visited an old who was almost deaf. She asked him from what he was born. The building that was built for them and which was used for a purpose that he was not the President, "of what?" Inquired the old lady.

"Of the U.S.A." Woodrow said.

The old lady closed the discussion by saying, "That's all.

The Bronco's Player of Week is Ken Stroufe, Bronco Tackle.
