Rabbit Tests
are positive.**

Our research shows that 70% of all the people who buy the Rabbit say that it was the test drive that made up their minds for them.

It's no wonder. The Rabbit drives like no other car you've ever driven before.

You see, in designing the Rabbit, we didn't just stop at things like front-wheel drive and rack-and-pinion steering. We created a totally unique "independent stabilizer rear axle" that greatly increases the stability of the car on rough roads. And therefore the safety.

And speaking of safety, we gave the Rabbit features that you'll find on few other cars in the world. Like "negative steering roll radius," for example, which helps bring the car to a straight stop in the event of a front-wheel blowout.

But the two big things that everyone who drives the Rabbit really marvels at are: one, the amount of head and leg room (as much as some mid-sized cars); and two, its incredible pickup. (0 to 50 in 8.2 seconds.) Which is pretty amazing for a car that rates an EPA-estimated 39 mpg on the highway—and 25 in the city, with standard transmission. (Actual mileage may vary depending on type of driving, driving habits, car's condition and optional equipment.)

But don't just take our word for it. Stop in and take a Rabbit Test today.

The Amazing Rabbit

The 1976 Les Bois wishes to express its sincere thanks to all those who supported this year's book through their advertising. Certainly, the yearbook and the University can only be as great as those who stand behind them. Therefore, we proudly recognize those who are listed as Friends of the University and we urge your patronage of their establishments.

Sincerely,

Colleen Best
