The library houses approximately 22,000 volumes in a large reading room, reference room, and two combined stack and study rooms.

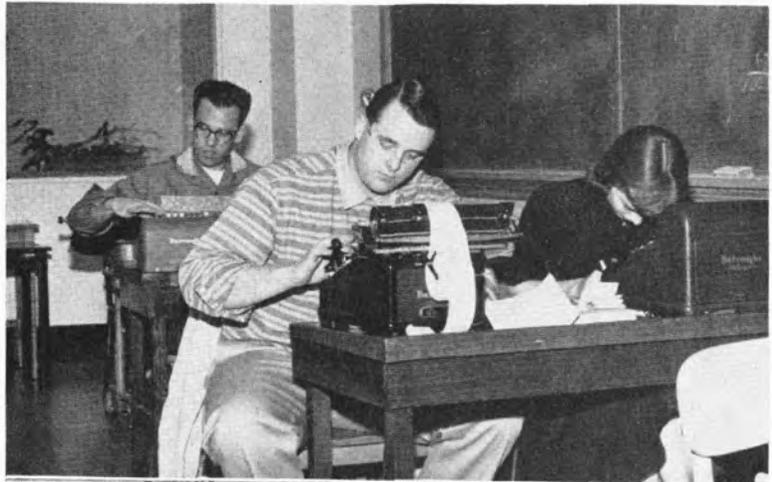

Arrangements such as this are part of the activity in the home economics curriculum, which is designed for those students who are interested in a professional career in home economics. Delia Brown and Varian Kimbro display their arrangements.

Dennis Fleming is active in the machine shop curriculum, which consists of shop work and related instruction in the use of hand and basic machine tools and class instruction in problems and technical information related to the trade.

Frank Overand demonstrates progress in his office machines class which consists of instruction in the operation of adding and calculating machines in which all operations of the machines are studied.

Ed LaRiviere demonstrates the use of the potter's wheel in his ceramics class. Practice is given in the use of the wheel, molding, hand building, decoration, glazing and firing.

Rebuilding a transmission is part of the work that is necessary in the auto mechanics vocation. Here Roberto Villeda and co-workers are at work.

A BJC student in chemistry class can take one of two classes in general chemistry. One is an introduction to the fundamental principles of general chemistry, together with a study of the properties of the most common elements and compounds. The other class involves a thorough study of the fundamentals and principles of chemistry with their application to various elements. During the second semester the students are introduced to qualitative analysis.

Larry Simpson, an accomplished pianist, is shown here taking his organ lesson under the instruction of Mr. C. Griffith Bratt. Prerequisite for organ students is the same as for piano, or the ability to play at the organ hymns or short choral preludes with accuracy.

Deanna Nolff, sophomore student in nursing, entertains a patient in St. Luke's Hospital in Boise. Fundamentals of nursing, maternal and infant health and clinical nursing are learned by students in this field.

In her typing class, Pat Reichert has learned the correct technique for touch typewriting and the correct procedure for typing personal and business correspondence.

The only girl in the drafting and design class, Jewel Hersh, has become acquainted with the necessary basic skills and knowledge for a career in the drafting industry. The student is required to develop and maintain the same standards and techniques used in firms or agencies that employ draftsmen.

Sharon Kratz, Al Day, and Gene Lightfoot are busily painting in their art class, painting and pictorial composition. This course includes work in oil, water color and pastel of such subject matter as still life, figure and portrait.
