No matter how you figure it, Here's a POWER-full thought!

Use of electricity in the home is twice what it was ten years ago . . . has increased four times in the last 20 years. What's more, it will again double in the ten years ahead!

Snake River Valley is a land of low-cost kilowatt-hours. Here we LIVE BETTER . . . ELECTRICALLY . . . using more than twice as much electricity as the national average.

WE NEVER STOP BUILDING

Hoover Dam . . . the Empire State Building . . . San Francisco Bay Bridge — these and the other enduring structures men have built with concrete and steel are satisfying the present needs of America's millions. Yet though they are performing prodigious tasks, let no one complacently think our job is done, for America's dynamic drive never slackens and construction is part and parcel of progress.

We never stop building — now or ever. Tomorrow's builders are today's youths, such as the 1957 graduates of Boise Junior College. It is their brains and brawn that will help us build to reap even richer harvests from this, our land of promise and plenty.
